"This game is going to be a lot more interesting now," junior Matt Siebrandt said. "There will be a lot of people in the stands, so the atmosphere will be very

"So in that sense, now is as good of a time as any to play Kansas. If we stay within our concepts and play with the confidence we've been playing with, then we can compete with anyone."

### Cats drop 1st home game to Cyclones

BY DAN SMITH Keesas State Collegian

K-State got a taste of its own medicine Saturday night against No. 16/12 Iowa State, and it wasn't much to the Wildcats'

The Cyclones (17-5, 5-5) converted on seven of 16 attempts from behind the three-point arc and outscored No. 9/10 K-State 36-32 in the paint to hand the Wildcats their first loss at Bramlage Coliseum this season, 86-72.

Iowa State's guard combination of junior Lindsey Wilson and senior Tracy Gahan did the most damage, connecting on four-of-eight chances from three-point range to lead the Cyclones with 25 and 21 points, respectively.

"They came out and played hard and hit shots and penetrated on us and broke our defense down all night long," redshirt freshman guard Laurie Koehn said.

"If you give them any room, they're going to knock down shots. They're just great players."

From the outset, Iowa State's backcourt set the pace with big three-pointers at crucial times. Fifteen of the Cyclones' first 19 points came from three-pointers, including Wilson's nine-point start on three-of-four shooting in the game's first six and a half minutes.

"They were really focusing on the post a lot. They kind of had to," Wilson said. "That kind of opens it up a lot on the perimeter, and we were making them."

The Wildcats kept it close early behind strong inside production from sophomore Nicole Ohlde, who finished the game with a team-high 27 points and 10 rebounds, but Wilson scored five straight points with K-State trailing 24-15 to push Iowa State's largest lead of the first half to 14 with 10:29 to play.

K-State fought back and tied the game at 41 with 1:14 to play in the first on a Koehn three-pointer from the right wing. but the Cats went cold after that, surrendering six unanswered points to enter the

"You always want to take the momentum into halftime with you because, hopefully, it will get you off on the right foot at the beginning of the

second half," Gahan said. "We kept our composure. They came back from a great deficit, and that just shows what kind of a great team they are. We held our own, and fortunately, we were able to take a lead into the locker room."

Poor shooting plagued K-State in the second half as well. Iowa State opened the frame with eight more unanswered and held the Cats without a basket for almost four minutes.

"They were really aggressive on defense," K-State freshman forward Kendra Wecker said. "They were playing tight on us. They got up by six right before halftime, and then we just came out kind of flat in the second half to start it off."

See LOSS on PAGE 8

### Ohlde's big first half not enough

BY MICHAEL NOLL Kanuas Strin Collegior

Normally, 27 points from forward Nicole Ohlde is enough for K-State, but against Iowa State on Saturday, the Cats needed more.

Ohlde dominated the paint against the Cyclones in the first half, scoring 20 points and blocking two shots. In the second half, though, the sophomore could register only seven points against an Iowa State defense that hadn't changed much from the first half.

"We really didn't change a whole lot. When we changed, we didn't do a lot to her," Iowa State Coach Bill Fennelly said. "We just wanted to make sure we stayed between her and the basket make her shoot over us."

Instead of collapsing on Ohlde, Iowa State chose to make her win the game by herself.

"It looked like Nicole Ohlde was

See OHLDE on PAGE 8

Zach Long/Collegian

K-State sophomore Nicole Ohide, top, battles for a loose ball with Iowa State's Lindsey Wilson, right, during the second half Saturday at Bramlage Collseum. The Cyclones upset the No. 9 Wildcats 86-72.

## **SLACKING OFF**

### Talented script, laughs lacking in new college comedy

"Slackers." The title itself seems bound to sit inconspicuously on the shelf of your local video

In a market that is continually testing the saturation point of high school/college sick flicks, "Slackers' is far from

memorable If you're looking

for a movie with a good story, "Slackers" isn't for you. If you're looking for a movie with a lot of laughs, "Slackers" isn't for you. If you're looking for a movie that stalls repeatedly between forced gags, I still wouldn't advise wasting your time with

Sawa), Sam (Jason Segel), and Jeff (Micheal Maronna), who scheme their way into free boxed wine, complimentary birthday meals and slightly improved GPAs.

\* 合合合合合 MOVIE REVIEW BY ADAM LEE

helping him win Angela.

Oddly, "Slackers" isn't about slackers at all. It is about a group of eager con artists. Dave (Devon

Their plans of cheating their way through college are jeopardized when Dave leaves his name and phone number for Angela (James

King) while stealing a test. Angela

already is obsessed over by Cool Ethan (Jason Schwartzman) who, among other things, uses a lint remover to collect strands of her hair for a doll. When Ethan discovers that Dave has been cheating, he blackmails the trio into

There are funny parts in the movie, like when Ethan gets manhandled at a homeless shelter, or when leff uses the anonymity of a large lecture

class to hide his late final among the rest of the students' tests. But more often than not, "Slackers" resorts to token drug usage, humorless masturbation scenes, or an orally fixated stepmother in a vain attempt to avoid bottoming

The worst thing about "Slackers" is its blatant waste of natural talent. Micheal Maronna ("The Adventures of Pete and Pete") is very amusing in the film, but his character is painfully underdevel-

lason Schwartzman is cast in one of the worst possible roles to follow up his profound debut in "Rushmore." We only get an idea of what this actor is capable of in Ethan's piano playing portion of the epilogue.

Missing even the characters to truly call itself by the title, the real slackers here were the writers.

### 'Monte Cristo' once again adapted to big screen

"MONTE CRISTO"

Sword fights, hidden treasure and revenge are the bread and butter of Alexandre Dumas' work, and the latest adaptation is no let-down.

Kevin Reynolds takes on the challenge of putting Dumas' classic work to film in this action-packed adaptation of "The Count of Monte Cristo." Though some liberties are taken with the story to keep the action moving, the result is a fun, yet acceptable adaptation of the work.

Edmund Dantes (James Caviezel, "Frequency"), is wrongfully imprisoned at the Chateau d'If by a handful of conspirators who all had something to

gain from his disappearance. While there, naïve young Frenchman to menacing an aging abbe (Richard Harris, "Harry Potter and the Sorcerer's Stone").

and helps him to escape. After

befriends him

escaping, Dantes uses a hidden

revenge on those who placed him in prison and separated him from his fiancée.

Caviezel brings the Count to life beautifully, showing the change that comes over Dantes while in prison, from

"AND ALL THAT COULD..."

\*\*\*\*

VIDEO REVIEW BY JJ DUNCAN

count. The vengeance he becomes obsessed with drives him from scene to

scene

Richard Harris is an excellent addition to the cast, and Guy

MOVIE REVIEW BY JJ DUNCAN Pearce's Fernand treasure the abbe told him about to exact Mondego becomes a bad guy no one could like.

The movie version just seems to flow smoothly from one action scene to the next, but it works for a movie version of the book. It isn't completely faithful, but

this isn't the bastardized Matrix-style

version of Dumas that "The Musketeer" was last spring.

The best part of the movie is seeing the Count's schemes come to life as he promptly brings his justice to those who put him in the Chateau d'If for 13 years. Reynolds also gets kudos for not slipping in a modern soundtrack with modernized dialect in a period piece. This isn't Dumas made MTV.

This is still basically yet another Hollywood version of "The Count of Monte Cristo," just designed to grab a few bucks at the boxoffice. It isn't too impressive, but it's still fun to watch the

### Energy of Nine Inch Nails' live show captured on new video

Play this at maximum volume. Throw away all those Nine Inch Nails bootleg tapes

you got off e-bay for \$75. You don't need them

Beating bootleggers at their own game, Trent Reznor and his summer 2000 line-up of rock n' roll mercenaries have released the

most powerful representation of NIN live performance ever, legal or not. "And All That Could Have Been," the companion DVD/VHS for the live album of the same name, exhibits the strength of a NIN live performance through

multiple video cameras edited on home computers. According to Reznor's liner notes, "This is almost what it felt like being there."

This two-disc DVD will be the gem in the collection

of many NIN fans for some time to come. The raw and visceral energy of NIN's infamous live shows has never been quite so masterfully captured.

From beginning to end, Reznor presents an unflinching, focused look at the one thing that has kept the band going since "Pretty Hate Machine" was

released in 1989: the live show. For fans who want to know what it's like being there, this is as close as

Compared to 1997's two-tape set, "Closure," this is a completely different animal. While the live

footage in "Closure" also focused on how the band lived on tour, the actual live footage was nowhere near

as satisfactory as anything on this release. The live work on "Closure" didn't have the best

sound editing, and it wasn't all that enjoying to watch.

To be blunt, compared to this release, it was just

"And All That Could Have Been" is a well-rounded mix of 18 NIN songs from all four albums, presented in Dolby stereo or surround sound. The result? Watch Robin Finck pummel his guitar into making the right sound on "March of the Pigs," see Reznor's face as he sings the last song, "You could have it all / My empire of dirt / I will let you down / I will make you hurt."

Nothing ever has brought fans this close to the band without being there. "And All That Could Have Been," is NIN's first live album ever and this DVD/VHS is exactly how live footage should be handled.

This isn't super-polished, MTV-ready concert footage like you might expect from the Rolling Stones. This is raw footage edited on a Mac computer that doesn't hide the rough edges.

For Nine Inch Nails fans, this is as good as it gets.

### misdirection

FEE WHIZ. YOU OF RIGHT! THERE WAS THAT HEAD BRITHEY SPEAKS THE PERSON YEARS THE GAME VISAN'S

### Game takes on new meaning

Every Super Bowl seems to give fans its own flare and pizzazz, something we can remember it by.

This year was no exception.

In this column, I don't plan on talking about the winner of Super Bowl XXXVI, because honestly, that was the last

thing on my mind. Sure I had money on the game, which I will collect from my editor later today. But for once, the game took a back seat to what was really important...America.

Sports have always been a good way to show patriotism. Football, basketball and baseball have been America's pastimes for many years, and through sports, we have celebrated our country's way of life.

Sunday's game showed us what we truly care about. Through the performances, interviews and even commercials, America honored itself, proving to the world that we have come full circle.

It seems like just yesterday I was glued to the television watching as

news stations across America replayed hijacked planes crashing into the the World Trade Center.

Football was canceled the following Sunday, and even though the decision came later than it should have, the sporting world showed that sports never are as

important as our

Sean Purcell

homeland. And from complete devastation, America showed its determination to bounce back and prove that terrorism will not stop us from living the life we so dearly cherish. Super Bowl XXXVI showed us how far we have truly come from that horrible day in September.

Sports have always allowed people an outlet from their problems and troubles. That is the beauty of the game. It brings joy to our life.

Before Sept. 11, the Super Bowl was just a game. But this time, it let us remember the times that were the toughest for this country, while still showing us the progress we

continue to make.

And maybe it was meant to be that the players in the red, white and blue stood atop the National Football League. Either way, America's true colors would stick in the minds of Patriots and Rams fans alike.

America remained a focus throughout the contest.

It also seemed appropriate that the entertainment for the night came not from American lips, but from the lips of those from overseas. Paul McCarthy and U2 showed that patriotism is not an American thing. It's a worldwide message, teaching people to come together to fight a greater evil.

So maybe for once, the Super Bowl wasn't about who got a ring. or what team kicked the crap out of the other. It was about America, the symbol for freedom and the banner

Let freedom ring.

### KSU tennis falls to Mississippi

BY DAN SMITH

Kansas Store Colle

K-State couldn't pull off the upset this weekend.

The No. 50 Wildcats fell to No. 33 Mississippi, 5-2, in a dual match with the Rebels Saturday at the Gillom Sports Center.

Mississippi stayed undeleated (5-0) by winning four of six singles matches and two of three doubles series.

Petra Sedlmajerova, at the

No. 3 position, had the best day for the Cats, winning both her singles match against the Rebels' Alesya Ignatieva (6-1, 6-4) and her doubles contest along with senior Kathy Chuda over Ole Miss' Mira Radu and Karem Harboe (8-4).

The junior's singles win pulled the Wildcats to within 3-1 of Ole Miss, but freshman Maria Rosenberg was shut out by Mississippi's Florencia Basile (6-0,

6-0) to seal the Rebel win. Sedlmajerova's play was one of only a few bright spots for the Cats, though, as Coach Steve Bietau watched his top two singles' seeds fall in two sets.

At No.1, senior Alena Jecminkova lost 6-2, 6-3 to Radu and at No. 2, Chuda lost her first singles match of the season, falling to Harboe, 6-4, 6-3.

K-State looks to heal its wounds this week before Wichita State takes on the Cats in the purple's first home dual match of the season at 2 p.m. Sunday in Ahearn Field House.

#### OHLDE

■ Continued from page 6

going to get 60 at one point," Fennelly said.

"She's almost impossible for us to guard one-on-one, but we felt that if we were double teaming too much - she's second on their team in assists.

"You pick your poison, and our poison was hopefully don't let her beat us one-on-one and stop as many three's as we could."

Unfortunately for K-State, Ohlde wasn't poisonous enough to down the Cyclones. After hitting eight of 12 shots in the first half, Ohlde went just three-for-13 in the second half - a statistic that can be partially blamed on the team rather than Ohlde, Coach Deb Patterson said.

'You're just used to her making a shot look easy," Patterson said. "We put her in a position two or three times that wasn't playing to her strength.'

Even when Ohlde did get the ball close to the basket, the pass sometimes took her out of rhythm to make the shot.

"She's catching, but she's not necessarily expecting the catch. Yeah, she's got it, but the rhythm is an issue at times," Patterson said.

Nonetheless, Ohlde's inability to repeat her first-half scoring performance wasn't as hurtful for K-State as the team's post defense in the second half, Patterson said. Iowa State's two-time All-American center Angie Welle caught fire, scoring 14 points and grabbing eight rebounds to finish with 20 and 14, respectively.

While Ohlde could have been tired after playing all but a few seconds of the game, the shift in advantage in the paint wasn't due to fatigue, she said.

"I really don't think we got tired at all." Ohlde said.

"I think it came down to that we didn't play as good of defense as we needed to, and it just wasn't like us not to play defense. lowa State definitely took advantage of

K-State freshman Laurie Koehn, center, has a shot blocked by Iowa State's Angie Welle, left, as the Cyclones' Lindsey Wilson (13) looks on during the second half Saturday at Bramlage Coliseum.

#### LOSS

Continued from page 6

After nibbling the lead to as few as nine only to see it creep back to as many as 14, K-State seemed to get the break it was looking for at the 3:17 mark.

Leading the Cats by seven, Iowa State senior forward Angie Welle was whistled for her fifth foul while

#### STORM

■ Continued from page 1

The Division of Facilities employs about 450 people. Before the stormhit, groundskeepers were completing their normal duties of trimming back dead trees and cleaning up leaves. Rice said groundskeepers were trying to get things ready for summer, when they have a lot of mowing work to do. Construction shop workers were doing concrete work and other various activities requiring large equipment.

Rice said the facilities department had anticipated the storm and had

snow removal equipment ready, along with a solution of ice-melt and sand they use to melt snow on

"The shop people had what they were going to do pretty well mapped out," Rice said.

Dave Gronquist, director of administration and finance of the Division of Facilities, said there is a state general use budget for most of the custodial and grounds funds. Also, building maintenance funds come from this budget. Gronquist said he did not yet know how much last week's winter storm cost.

When students were able to get back onto campus Thursday and Friday, they saw the work that had

## BEER BATTLE

### Keg registration reaches hearing; stores respond

BY SARAH BAHARI

Kansas State Collegian

d Rickel says it's not worth the hassle. In fact, he said Rickels Retail Liquor will no longer sell beer kegs if the Kansas Legislature passes a bill requiring retailers to register all keg

"We'll have to drop them," said Rickel, who sells more than 100 kegs each weekend. "It'd take extra help. At least one person."

Keg

Proponents of the bill and liquor lobbyists say they have reached a compromise, which could give the bill the added push it needs to pass.

"It's a compromise bill," Sen. Jim Barnett, R-Emporia, said. "Some of the language has been changed to make retailers feel more comfort-

Barnett, the bill's key supporter, introduced keg registration last year, where it made it through the Senate.

However, it failed in the House where it was opposed by liquor retailers and wholesalers.

The revised bill includes three significant changes, Barnett said. It specifically states that the law must be uniform in all 105 counties, and that all purchase records are protected. It also limits the retailer's liability if someone legally purchases the keg and then illegally furnishes it to minors.

Registration is intended to discourage adults from providing alcohol to minors by requiring retailers to record the driver's license number of purchasers and attach plastic tags to the kegs they sell. Law enforcement officials then would be able to punish the purchaser if the keg ends up at a location where underage people are

The bill is not, however, intended to stop underage drinking, Barnett said.

Bob Campbell, owner of Candlewood Retail Liquor. said he doesn't think keg registration would change

"If underage people want to get alcohol, it will just be bottles and cans," he said.

But Barnett said it is the large quantities of cheap

liquor that make kegs so dangerous. "Most people aren't as likely to buy 30 6-packs as they

See KEG on PAGE 8

A hearing on keg registration is scheduled for Thursday. The bill, meant to discourage adults from providing alcohol to minors, would require retailers to record purchasers' driver's license numbers and attach plastic tags to the kegs.

### 'Wabash' introducer dies from pneumonia

BY JESSICA PITTS

Kansas State Collegian

K-State has lost a legend. Phil Hewett, who introduced "The Wabash Cannonball" to the university in 1968, died Sunday of pneumonia.

Hewett, former director of bands from 1968 to 1982, will be remembered for bringing the tradition to K-State, Frank Tracz, director of bands, said. "You hear 'The Wabash

Cannonball' and you think of him," Tracz said. "It is a fitting tradition

that will live on in his memory.'

The pep song was introduced after a fire destroyed Nichols Hall Dec. 13, 1968. The marching band lost all its equipment and sheet music in the fire, but Hewett had put two copies of "The Wabash Cannonball" in his briefcase before leaving the building.

"For some strange reason, he took home

See HEWETT on PAGE 8

### Fort Riley soldier shot, dies Saturday

BY NANCY HULL Kansas State Collegian

A Fort Riley soldier died Saturday morning after being shot one time.

Police found Sgt. Maurice Simpson, 25, around 2 a.m. Saturday at 1839 N. Washington Street in Junction City, said Christie Vanover, Fort Riley spokesperson. Police responded to the location after neighbors called and said they heard a gunshot in the street. The shooting resulted from an argument between Simpson and another person.

Simpson was taken to Geary Community Hospital before he was trans-

San SOLDIER on PAGE 8

### Arts and Sciences associate dean appointed as interim

BY PETE ELSASSER Kansas State Collegian

Stephen White, associate dean of the College of Arts and Sciences, was appointed as interim dean of the college Feb. 1.

White officially will begin his term

He said Dean Peter Nicholls will leave Feb. 22 for his new position as provost and vice president for academic affairs at Colorado State University.

White said he was excited at the opportunity to move the college forward and to address problems.

"I feel as if I know the university very well," White said. "I look at this position as an oppor-

tunity to continue working and building. It's more than just housekeeping."

He said he came to K-State in 1975 as a professor in the Department of Geography, serving as department head for 11 years.

He has been associate dean of the College of Arts and Sciences for four and a half years.

White said the college will have to address two openings in the dean's

The position of assistant dean opened following Assistant Dean Gina Sylvester's death Feb. 2.

White said the role of Associate Dean Gerald Reeck might change.

"We're having discussions about how to handle the vacancies," White

"We haven't decided whether there will be interim positions or a nationwide search. There hasn't been enough time to work everything out yet."

Assistant Provost Ruth Dyer said the search for the permanent position of dean is in the early stages.

Dyer said a preliminary search committee will be formed in order to find a permanent replacement for the position.

She said a definite timeline has not been put into place.

However, Dyer said the college will conduct a national search to fill the position.

There will be input from faculty members on campus and from the College of Arts and Sciences on what

criteria the search should be based. "There will probably not be any solid timeline until this summer or

fall," Dyer said. "The first interviews could possibly occur in the fall."

She said it's conceivable the position will not be filled until July

"This will obviously be a thorough search that will not be filled immediately," Dyer said.

### Snow removal based on priority; residents question decision

Kanson State Collegian

With cars trapped and driveways blocked with mounds of snow, some students wondered why their streets were not cleared after the recent snowstorm.

Kyle Taylor, junior in graphic design, said his car was hit by another vehicle on McCain Lane, where he parked his car Wednesday.

Taylor's car was trapped Wednesday because of the storm and was hit by a vehicle that Taylor believes lost control due to the heavy accumulation of snow and ice.

He said he partially blames poor road conditions on the hill for the collision.

"They probably could have cleared the road. You could barely walk on it without sliding," Taylor said of the condition of the street after the snowstorm.

Several other students' cars were hit on this road as well.

"It was bad enough that I don't think anyone should have been driving on that street," Taylor said.

Chuck Williams, assistant director of Public Works for Transportation, said they must give first priority to main roads like Anderson Avenue and Fort Riley Boulevard, as well as areas around schools and steep hills. Next, they can move on to residential areas.

This snow storm posed a problem for doing that, Williams said.

"The storm had a long enough duration that we had to do the major streets multiple times before we could even start the residential streets," Williams said.

Williams said each of the main streets had to be plowed three to four times before the city could move on to the other roads.

Still, Williams said the snow posed minimal

Drew Rose/Collegian

Though most main roads have been cleared, some Manhattan residential streets, such as Edgerton Street, still have snow on them.

problems for area residents.

"I drive a little Toyota Corolla, and I was able to get around just fine," he said.

The city started clearing the streets of Aggieville and downtown Manhattan late Wednesday night and into Thursday morning by shoveling the snow to the center of the road. They removed the mounds of snow from these streets starting at 4:30 a.m. Friday.

The city of Manhattan has around 160 miles of center-lined streets, not mentioning the three and four-lane roads that hike this figure up to around 470 miles.

With only eight vehicles available to plow, Williams said they did a good job clearing the streets as fast as possible.

Williams said the biggest problem in residential areas is working around parked cars, and the biggest complaint is from people

whose driveways have been blocked. Williams said they have no intent on clearing the streets anymore, as he believes the snow will melt soon.

"And with the good weather forecast, I'm looking at that shouldn't be much of a problem," Williams said.

Sgt. Joshua Kyle of the Riley County Police Department said there has not been a significant increase in the number of collisions due

"The first snowfall about a week before was actually a bigger problem," Kyle said.

Kyle said the first snowfall of the year typically generates more wrecks, and by the second, people are more accustomed and better prepared for the snow and ice.

"Buck O'Neil Lecture," part of Black History Month, will be at 7 tonight in the Union

### STATE IN BRIEF

#### SRS proposes bill to impose fees for services to children

TOPEKA - Some parents and advocates for the disabled and mentally ill are concerned about a bill allowing a state agency to impose fees for services to children.

The Department of Social and Rehabilitation Services wants the authority because of the state's financial problems. SRS officials estimate the agency could raise \$1.7 million for the next fiscal year.

But critics say the fees would keep some parents from seeking services for their children, or make those services too expensive for families already facing extraordinary costs in caring for disabled or mentally ill youngsters.

The Senate Ways and Means Committee heard testimony on the bill Monday but postponed vote because members had too many questions.

### NATION IN BRIEF

#### Senate to vote on subpoena of former Enron chairman

WASHINGTON, D.C. - A Senate committee took steps to subpoena Enron's no-show former chairman Monday, and a director of the failed energy company said managers from Kenneth Lay down knew a network of partnerships was being used to hide huge debts.

Lay was to have been the star witness at congressional hearings this week on the Enron collapse, but he abruptly backed out Sunday night. The Senate Commerce Committee scheduled a vote Tuesday on a subpoena to force his appearance.

#### Bush's \$2.13 trillion budget enriches anti-terror fight

WASHINGTON, D.C. - President Bush proposed a \$2.13 trillion budget Monday that pumps billions into the war on terrorism but challenges Congress by reining in resurgent deficits through cuts to job training, highways and scores of other programs.

Foreshadowing tactics sure to echo

until November's elections for control of Congress, Democrats embraced Bush's national security plans. But they also blamed him and the ample tax cut he won last year for bringing back deficits and shortchanging domestic programs.

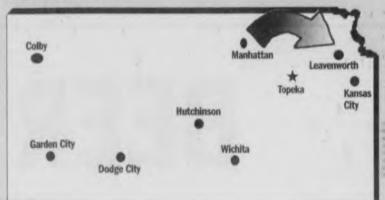

They complained that the budget would divert \$1.5 trillion in Social Security and Medicare surpluses during the next decade to pay for other programs. In flusher times, lawmakers from both parties promised to use that money for debt reduction.

#### American policies topic of **World Economic Forum**

NEW YORK - They came in solidarity with this terror-wounded city. But since they arrived, speaker after speaker at the World Economic Forum has lambasted America as a smug superpower, too beholden to Israel at the expense of the Muslim world, and inattentive to the needs of poor countries or the advice of allies.

With the forum wrapping up its five-day session Monday, some of the criticism has been simple scolding by non-Western leaders. But a large measure has come in public soulsearching by U.S. politicians and business leaders.

#### Life after K-State

### Graduate says he should have taken wider range of classes

BY MICHAEL LAWRENCE

eff Seeger, 1989 graduate, said he was glad he chose K-State to get his degree in milling science management, but in his field, he had no other choice.

Since K-State is the only university in the country that offers a degree in milling science management, he said graduates in this field practically are guaranteed a job.

SEEGER "All milling companies come to

K-State to hire employees," he said. After entering the workforce, he said he was pleased with the quality of education he received at K-State. He said the things he learned at K-State help him immensely in his

For three years he has worked in

sales at Great Western Manufacturing Company in Leavenworth, Kan. He sizes sifters for product applications, produces spare parts and provides technical assistance, he said.

Even though he was extremely satisfied with his milling courses, he said he wished he had utilized other programs for classes while he attended K-State.

In retrospect, he said he wished he had taken at least one course in Spanish. He said he deals with many people from Latin American countries and being able to speak Spanish would be very useful.

Seeger said students in milling science management also should take more courses in social skills. He said that while it is important for employees to be an expert in their field, having strong public relations is vital.

Students who want a milling career should take a diverse course load and try to be as well-rounded as possible, he said, because the benefits of having skills outside the field could last a lifetime.

"The things you learn today you will use 20 years from now," he said.

### ON RECORD

#### **CAMPUS** BULLETINS

Campus Calendar is the Collegian's campus bulletin board service. Items in the calendar can be published up to three times. ### Festival celebrates black culture with musical performances, food

Kansas State Collegian

Rich gospel music filled the air and floated through the room as easily as the ambrosial aroma of the fried chicken and corn. A diverse crowd enjoyed the multicultural event, smiling and clapping to keep the beat as the choirs belted out their songs.

### BLACK HISTORY

The Festival of Nations celebration featured African-American culture Monday afternoon in the Union Courtyard.

The event, sponsored by the Union Program Council's Multicultural Committee and the Black Student Union, featured performances by United Black Voices, and Jessica Hammond and her family. Hammond, a Junction City resident, and four of her siblings sang while their father played the piano.

The festival also included a sampling of food, including fried chicken and cheesecake. Students lined up to try the free lunch.

Erica Smith, event coordinator and junior in apparel marketing and design, said the festival was started last year to celebrate different cultures and to give students the opportunity to understand a little more about a

### K-State-Salina's colony of Phi Delta Theta acquires national chapter status

BY KASEY BROWN

Karraas State Collegian

K-State-Salina's only fraternity recently was recognized as a national chapter of Phi Delta Theta.

After two years of hard work, the members acquired their new status through colonization. Colonization is an achievement they reached after meeting requirements set forth by national standards and by setting future goals for the frater-

The fraternity had a humble beginning. The idea of starting a fraternity at the campus came from conversations with a student who had transferred from Manhattan's main campus to Salina's.

Mike Higley, senior and rush chair of Phi Delta Theta, was a freshman at the time he was approached about starting a frater-

"I thought it was a great idea. It was a way to go above and beyond a regular student and an opportunity to make more of the college experience. So I approached the director of Student Life to see what it would take to get a fraternity started. We had to start out by getting the interested members together and declare ourselves a local fraternity." Higley said.

They were able to gather 10 interested students together. They called themselves The Brotherhood Fraternity and their first meeting was Nov. 28, 1999. "This was a way for students to get a social group together and have fun," said Matt Dietrich, president

From there, they started gathering information from other fraternities in Manhattan and narrowed down which one they were interested in becoming. After weighing the options, they picked Phi Delta Theta.

"The biggest factor in choosing Phi Delta Theta was we had an alumnus of that fraternity on campus who helped us with what we were trying to do and would come talk at our meetings," Higley

After choosing the fraternity, the members started taking steps to get colonized, or nationally recognized as official members of the fraternity. This required meeting certain standards.

"We were constantly treading new water and recruiting new members. We really worked towards getting colonized," Higley

Although the fraternity accomplished colonization Oct. 6, 2001, it wasn't their only goal. From the beginning, the Phi Delts wanted to stand out against the other fraterni-

"We really wanted to combat the negative stereotypes of students in their 20s and to be able to draw in the community as a whole," Higley said.

Some members of the fraternity joined because they wanted to

change others' views of fraternities. "I joined at first because I was a freshman and it was something new. I had always had a bad vision of other fraternities, though, and I

wanted to change people's opinions of them," said Brian Hinnen,

sophomore member of Phi Delts. The Phi Delts have spent much of their time raising money for charitable causes. For instance, they raised more than \$800 for the New York relief fund by pumping gas at Sam's in Salina. They also are planning two other charitable events in the upcoming months.

They will have an annual box village March 28 to raise money for the homeless. The event consists of members sitting in refrigerator boxes in front of the College Center overnight to get food donations. On April 6, they will raise money by taking the seats out of a small aircraft and cramming as many people into it as possible.

As for other future plans, the Phi Delts are working toward chartering by the end of this semester. If the fraternity is chartered, it will reach another level of recognition.

"We want to keep moving forward and keeping organized since colonization. We just elected new officials, and we need to be solid for charter," Higley said.

Dietrich said the biggest challenge for the fraternity will come after the founding fathers

"I don't want the fraternity to fizzle after we leave. The group we have now is great. I just want it to stay that way on not let skepticism in. One day, I hope the fraternity can get a house and have a barbecue for the neighborhood in order to change their ideas about fraternities," Dietrich said.

### Keg registration not the solution to underage drinking problems

**OUR VOICE** and debated by the editorial board and written after a

Jessica Pitts **April Middleton Nancy Foster** Dana Strongin Alyson Raletz majority opinion is **Nancy Hull** formed. OUR VOICE is Matt Killingsworth the Collegian's official Dan Smith opinion. Paul Restivo Katle Lane

JJ Duncan

Zach Long

**Nicole Donnert** 

We are supposed to register our pets and our vehicles, but soon we might have to register a recreational item - kegs. The Kansas Legislature will meet

Thursday to discuss a bill which, if passed, would require retailers to register purchasers of kegs.

Registering kegs will not stop underage drinking. If minors want to drink beer, they will just buy cans or bottles. Also, items like party balls still would be a way Micah Hawkinson for minors to obtain a large amount of

The bill also will not prevent adults from buying alcohol for minors.

Adults may stop buying kegs, but they still can buy other alcoholic drinks without registering.

Registration is intended to discourage adults from providing alcohol to minors by requiring retailers to record the driver' license number of purchasers and attach plastic tags to the kegs they sell. Law enforcement officials would then be able

to punish the purchaser if the keg is furnished to underage drinkers.

Sen. Jim Barnett, R-Emporia, said the focus of the bill is to not make available large quanities of cheap liquor to minors.

However, registering kegs is the wrong way to fight the problem of underage drinking. It is a hassle for retailers and a huge waste of time and resources.

If lawmakers want to make a real difference, they should avoid focusing on one source of alcohol.

### Existing problems can't be solved by legalization

re you kidding me? Don't get me wrong, because I've heard some really bad ideas in my day. However, this one is the worst by far.

I suppose even the dumbest ideas need to be refuted, so

Prostitution is a crime where there are only victims. First of all, there is the prostitute (whether male or female) who is forced to sell his or her body for money. When these people are "working," they are putting their bodies in jeopardy with the enormous risk of being infected with a sexually transmitted disease or becoming pregnant with an unwanted child, not to

business partner. The other victim is the person who uses the prostitute. Beyond the threat of infection with AIDS or other STDs, these people also are wasting money that could be used to support

themselves or their family.

mention the possibility of physical harm that might come from the

Kyle Brownback

### Health, safety important reasons for legalization nyone who has seen "Pretty Woman" already

Matt Killingsworth

has some preconceived notion about prostitu-Some see it as the pinnacle of self-degrada-

tion and sin. Selling one's sex for profit goes against just about every moral and religious code we have in America. Too bad we aren't supposed to make laws based on

Legalization, or more accurately decriminalization, of prostitution would be an evolutionary step in American society that is being restrained by the conservative, patriarchal view that naive, vulnerable little girls have to be protected from dirty old men.

Apparently, policy makers believe if they can keep prostitution in the back alleys of big cities and out of rural America, maybe it will

Thoughts like that about abortion didn't stop the practice. It simply increased the sales

I might not be familiar with the going rate for a prostitute, but I doubt it's cheap, considering the kind of service they provide.

Even when people see so many of the problems that are associated with prostitution, why would some still want to have it legalized?

These people would argue that the legalization of prostitution would force prostitutes to be tested for STDs. Again, I'm not familiar with how prostitution rings work, but I assume these people would have sex for money a couple times a

Even the most advanced STD-detection tests take at least one week to run. If the prostitute's only income is through having sex for money, he or she is not going to be tested after every sexual encounter, and then wait at least another week before working again. A few prostitutes might do this, but most wouldn't.

For the sake of argument, let's say prostitutes in general agree to be tested before every sexual

STD testing is not cheap, and the price increase is either going to be transferred to the customer or the taxpayer. Either the customer is going to waste more money than he or she should on his or her prostitute, or the government will provide this service for prostitutes.

I'm not thrilled about the idea of legalized prostitution, but the idea of government-supported prostitution outrages me.

What I really want to know is, who are these people who support this idea? Is there some secret underground organization of pathetic losers who surprisingly left me out

If prostitution would be legalized, where would its limits be placed? Would prostitutes be allowed to advertise themselves on television and in newspapers? I have a hard time believing I could see the words "for a good time, call..." anywhere outside of a bathroom stall at a truck stop.

Obviously, there would have to be more restrictions and laws made. These restrictions would come at the expense of

There also is a plethora of negative effects that could occur not only in large cities, but also in rural communities. For example, in small college communities like Manhattan, would drunken fraternity guys call an escort service and order a prostitute like they would a Gumby's pizza when they're drunk?

"Yeah, I'd like a big ass with hamburger and a side order of a six-foot brunette."

Prostitution already exists as a moral evil in our society. Legalizing it would not serve to eliminate any of these problems.

Kyle is a senior in biochemistry and pre-medicine. You can email him at krb4706@ksu.edu.

Nations adopted a resolution calling for the international decriminalization of prostitution. Fifty countries have ratified this motion, yet the Unites States sticks to its guns.

Fears about legalizing prostitution include a possible and sudden rampant spreading of brothels all across the nation where husbands will be lured from their homes by the sirens' calls. Families will be destroyed, the country will fall, and we'll all live in rebel colonies beyond Thunderdome.

First off, if someone cheats on their significant other with a prostitute, it's not the prostitute's fault. That's like blaming Burger King for your gut or CNN for your narrow view on political issues.

In this instance, legalization isn't being proposed for increased supply. It's about the safety and health of our country.

Fundamentally, the legalization of prostitution would allow an already-existing industry to be legitimized. It would take prostitutes off of the streets and establish strict, government-monitored guidelines. Regulations would include regular health inspections for workers and clients, mandatory birth control measures for both men and women and a set federal age of consent for all prostitutes at 18 (the same required to vote, buy cigarettes and join the military).

We already have legalized prostitution in Nevada, But it's such a limited market that women working there are being manipulated and abused. It's a third-party management system giving them little recourse for action.

They can't turn to the authorities because they are dismissed as hookers, stereotyped as trash and ignored as a disposable part of society.

When police arrest prostitutes, typically using illegal techniques such as entrapment and invasion of privacy, the cost of processing these dangerous criminals is charged to taxpayers.

Each arrest consumes roughly \$2,000 for the arrest, court and incarceration time, according to the Hastings Law Journal. Cities spend, on average, \$7.5 million to combat prostitution. New York City alone spends \$23 million.

If legalized, the prostitutes would unionize with regulated wages. The days of pimps taking 90 percent would be gone. A preset percentage of wages made would be set aside in a savings account, similar to a 401(k) plan.

There obviously would be the mother-of-all-sin taxes smacked on the service and advertising, generating tax revenue. Soliciting would be limited to adult-only venues or in vague terms in the phone book such as "escort."

Between the money saved from incarceration and the revenue generated from taxes, the monitoring and regulating of this new industry would bear no burden on tax payers

The burden now shouldered by society, shunning prostitutes as a lower class of people, is outdated. We should have a say over what we can do with our bodies.

Matt is a fifth-year senior in advertising and public relations. You can e-mail him at smk8583@ksu.edu.

### Speakers to share real-life experiences of pornography

BY CHELSEA SCHMIDT Kansas State Collegion

An ex-sex addict and an exstripper will tell their stories in a presentation titled "The Power of Porn" at 7 tonight in McCain Auditorium.

Gene McConnell, founder and president of Authentic Relationships International, will give a multi-media presentation of the power of porn and share his real-life experiences with porhography. He will be joined by Kimberly Drake, an ex-stripper.

"They will speak very candidly about their involvement and how it has affected their relationships," said Allyson Davies, staff member with Campus Crusade for Christ, the sponsoring organization for the free event.

Davies said Campus Crusade chose to invite these speakers because pornography is something that affects everyone whether they realize it or not.

"We have a wrong image of sex and even our bodies in some ways," she said. "Our heart is that people that are involved and addicted to pornography would be able to get out of it and have healthy relationships with the opposite sex and honor those people in their relationships."

McConnell, a former sex addict, will focus on the role pornography and sexual obsession played in his life. Using personal examples, he will discuss the real harms of pornography's subtle messages to society.

"Even if it's not something that we struggle with, at some point in our lives we will interact with somebody who struggles with it,"

#### **Porn Facts**

Four out of 10 pastors who use the Internet have visited an online pornography site.

Wideo pomography has an annual revenue totaling \$4 billion.

People pay more money for pomography in America in a year than they do on all performing arts combined.

The pom industry's annual revenue totals 2.5 times that of Broadway theater.

At \$10 billion annually, the pom industry earns more than the NFL, NBA and MLB.

■ There were 700 million porm rentals in the United States last year.
 ■ There were 11,000 adult titles released last year versus 400 Hollywood rentals.
 ■ Pomography is the largest source of Internet commerce.

Sources: "Naked Capitalists". The New York Times, May 20, 2001 and "Survey: Pastors Tempted by Internet." The Detroit News 2000

Davies said

She said this event will show students how to help others who struggle with pornography.

McConnell's struggle with pornography ended 23 years ago after he attempted a rape. According to his promotional flier, the fear in the woman's eyes knocked him back to reality.

He now speaks at college campuses and other events to explain the influence of pornography in the world today.

A follow-up presentation will be available for students to attend at 7 p.m. Wednesday in the K-State Student Union Forum Hall.

Davies said students will have the opportunity to address some of the questions brought up after tonight's presentation.

"Gene and Kimberly will both give their stories and what the next step is for people," Davies said. "They will have an opportunity to hear about some support groups for people who are addicted to porn."

To help fund the event, Student Governing Association allocated

what we would normally give, because it was a higher caliber of speaker," Student Body President Kyle Barker said.

Barker said more than 1,800 students are expected to attend.

"Their organization is expected to bring a great event for K-State," he said. "The main thing is I hope students attend the event."

Becky Wilkerson, sophomore in architecture and member of Campus Crusade, said she encourages students to attend.

"We just want to expose them to the reality of porn and the effects it has on life," she said. "I would encourage students to go whether or not they know someone who is addicted, because it is a part of life and the real world. They need to be exposed to it. They need to be able to hear about it spoken shamelessly and not just skirting around the issue."

Davies said students can expect a bold presentation that directly and poignantly addresses the

"It is going to be bold," she said. "It's a bold presentation, and it's really candid, very real and

### Editor pleads for reporter's release

BY AFZAL NADEEM The Associated Press

KARACHI, Pakistan - After a series of hoax e-mails, the managing editor of The Wall Street Journal issued an open letter Monday to the group he believes responsible for the kidnapping of reporter Daniel Pearl, asking for a private dialogue to "address your concerns."

Pearl's wife, meanwhile, issued an impassioned appeal for his life and said she was willing to die in his

Paul Steiger, the Journal managing editor, addressed the

the Restoration of Pakistani

Sovereignty. That organization signed the first e-mail sent on Jan. 27 claiming to have abducted Pearl who disappeared four days earlier. Attached to that claim were photographs of the

letter to the National Movement for

journalist - one with a gun pointed at his head, another with Pearl holding a newspaper dated Jan. 27. The communication demanded that Washington return Pakistani

prisoners held at the U.S. naval base in Guantanamo Bay, Cuba, for trial in Pakistan. The Bush administration has ruled out any negotiations.

"I know that the National Movement for the Restoration of Pakistani Sovereignty is very serious and wants others to know about its movement. To assure that this happens, it is important for you to respond to this message," Steiger's letter said.

A number of groups have been named by Pakistani authorities as possible suspects in the kidnapping. When asked why Steiger addressed his letter to the National Movement for the Restoration of Pakistani Sovereignty, a Dow Jones' spokesman said the letter spoke for itself. Dow Jones publishes

"I have not heard from you for several days and want to begin a dialogue that will address your concerns and bring about Danny's safe release," Steiger's letter said.

"Since your last e-mail I have received numerous e-mails from people who claim that they are holding Danny. Because of these claims, it has become difficult for me to know that I am communicating with the people holding Danny. These individuals have caused a great deal of confusion.

"Also these numerous messages, which have been made public, detract from your serious concerns. The world is getting a mixed message, and perhaps a negative impression of the National Movement for the Restoration of Pakistani Sovereignty," the Steiger letter said

He suggested the kidnappers use the e-mail account or private telephone number of one of two Pearl friends, both best men at his wedding, to restore communication.

"This line of communication would show me that Danny is with you and would allow us one-to-one contact. We are eager to hear from you soon," Steiger concluded.

Pearl's abductors last released a photo of him Wednesday, with a threat to kill him in 24 hours.

Mariane Pearl, who is six months pregnant with the couple's first child, urged the kidnappers to contact her.

"Don't harm an innocent man because you're just going to create one more misery," she said in

Karachi in a BBC television interview. "Using Daniel as a symbol and all of this is completely wrong, completely wrong.

"If anyone's going to give his life to save him it's me," she said. "Please make contact with me -

I'm ready." Twelve days into Pearl's kidnap ordeal, Pakistan's interior minister said efforts to find the journalist were now "massive in scale, spread to all parts of Pakistan."

"We are hopeful that Daniel Pearl is alive," said the minister, Moinuddin Haider, who is responsible for law and order in Pakistan. "I can't claim of making any breakthrough though we are getting close to the men involved."

Pakistan is under pressure to find Pearl before President Pervez. Musharraf visits Washington next week. Musharraf met late Monday with U.S. deputy Treasury Secretary Kenneth Dam, and U.S. officials said the Pearl case was believed to have been among the topics.

Musharraf is a key ally in the U.S.-led war in Afghanistan, turning over airfields for use by U.S. forces and international peacekeepers. He has won praise from Washington for cracking down on Pakistan-based Islamic militants accused of terrorism against nuclear rival India.

While the Bush administration says Pakistan is doing everything possible to find Pearl, his abduction threatens to cloud Musharraf's visit and has already prompted the State Department to warn American citizens about the risks of traveling in Pakistan.

## Rocked, chalked, Wildcats STOMPED

Zach Long/Collegian

Kansas' Drew Gooden, left, and K-State Junior Pervis Pasco (44) dive after a loose ball during the first half Monday at Bramlage Collseum. The Jayhawks won the game, 98-71.

### Jayhawks retain state bragging rights

-State might lead the Big 12 in field goal percentage defense, but the Wildcats hadn't seen No. 2 Kansas.

It was no wonder that the Jayhawks were atop the league in scoring (90.8 ppg), shooting (51.1 percent) and three-point percentage (40.3 percent), based on their Big Monday performance at Bramlage Coliseum.

In fact, KU bettered all those numbers. Kansas (20-2, 9-0) shot a scorching 57 percent from the floor, including 61 percent from three-point range, to strengthen their hold on the conference standings with a 98-71 victory over K-State (9-11, 3-6).

Five Kansas players scored in double figures, led by Kirk Hinrich's 26, and the Hawks extended their winning streak to 23 games over the Cats.

"Everybody wants it really bad to beat KU," forward Matt Siebrandt said. "Everybody on the team. Everybody in the city and school. It's just frustrating. We wanted it to be a lot more competitive game than it was, but we never stopped fighting."

K-State took its only lead of the game on an early Larry Reid three-pointer, putting the Cats up 3-2, but it was all KU from there.

Back-to-back three-pointers by Kirk Hinrich sparked a 13-0 Hawk run, giving Coach Roy Williams' club a double-digit lead.

ONLINE

Colby Gordon argues the Big 12 won't be ready for the postseason, at www.kstatecollegian.com.

The Cats would score six unanswered points said. "You've got to give their defense credit. to cut the deficit in half with 15:06 left in the first half, but just two and a half minutes later,

Kansas would begin to put the game away. The Hawks erupted with a 23-5 run to build a 24-point lead, and KU took a 51-30

advantage into the locker room. "They were on fire that first half," Siebrandt said. "They've got so many weapons, it's difficult to guard them all. They played great, and they just deserved to win."

It was the same story in the second half. Kansas started the period with an 8-3 run, and took its biggest lead of the game (31) at the 11:21 mark, when K-State coach

lim Wooldridge was ejected. Wooldridge was arguing a non-call on Hawk forward Nick Collison, who knocked

Siebrandt down on his way to the basket. KU's Jeff Boschee hit three-of-four free

throw attempts on the double-technical to push the Hawk lead to 77-46.

"The officiating was fine," Wooldridge said. "There was just one play I was upset about, and I reacted to it, and that's what happened. It wasn't a culmination of things.

"This team beat us tonight, and they beat us soundly. They're a great basketball team." The Cats responded well to Wooldridge's

ejection, though, gathering a 19-6 run to crack the 20-point barrier at 83-65, but KU answered with a 12-3 spurt to end the game.

K-State shot nearly 47 percent from the floor in the loss, and Larry Reid led all scorers with 27 points. Phineas Atchison chipped in 16 off the bench.

"I think at times we played fine, but Kansas really hit us hard early, and we didn't react to the pressure very well," Wooldridge

There quickness and size inside really

bothered us." Yet, there was nothing surprising about KU's play, Atchison said.

"I expected everything that happened," Atchison said. "They're a good team. Good inside players. Great outside shooters. I think they're going to be in the Final Four."

Matt Stamey/Collegian

Matt Siebrandt (34) gets elbowed by Kansas forward Nick Collison during the first half of K-State's 98-71 loss to the Jayhawks on Monday night. The loss brings K-State to 9-11 on the season and 3-6 in the Big 12.

### Perimeter game not enough in K-State loss

BY SEAN PURCELL Kansas State Collegian

Larry Reid and Phineas Atchison's Herculean performances couldn't counter the spread attack Kansas displayed as the Jayhawks rolled over the Wildcats on Monday.

Reid finished with a season-high 27 points, and Atchison added 16, but at many times it was the only offense K-State could put up against the No. 2 team in the country.

"Larry seems to be our bail-out guy," Coach Jim Wooldridge said. "When things aren't going good, we turn to him and he's got to make a big shot for us. But that is what good players do."

Reid couldn't provide the ultimate answer though.

It wasn't until midway through the second half that the Cats had their second player in double digits. Atchison scored 13 of his 16 points after halftime.

In the first half, however, it was all Reid. The senior sizzled in the first half, scoring 14 before going into the intermission. Reid was 6-of-11 from the field, including 2-of-4 from behind the arc.

Going into halftime, Kansas knew Reid would be the Cats' best chance to climb back into the in-state rivalry game.

"Larry had a really good game for them." Jayhawk guard Jeff Boschee said. "We didn't just want him to get his points - we wanted to play a consistent overall game and even though he did get his, we played well enough in all other facets of the game."

The Cats never could get anything going aside from Reid and Atchison, though.

"It was a tough game for us - inside and outside," Atchison said. "We couldn't get it going inside, so we had to rely on the outside to get us going.

But K-State's outside contributions weren't enough to help the Cats pull out the upset. Reid said the lack of production on the inside was the Wildcats' Achilles

heel "We have to get points inside in order to be successful," Reid said. "They got a lot of layups and that was a big part of how

they beat us." The Wildcats second leading scorer, Pervis Pasco, was held to just eight points.

Between starting frontcourt players Pasco and Matt Siebrandt, the two combined for just 12 points.

On the opposite end, the Jayhawks received double-digit points from five players. The Jayhawk inside game was nearly flawless, as Drew Gooden and Nick Collison each put 15 points on the board against the Cat interior.

They did a good job of containing us on offense, then they put up the numbers they needed when they had the ball," Siebrandt said.

"They're a good team though - this is why they are ranked as high as they are. When you stop one guy, another guy steps up to get the team some points."

For Kansas, that is to be expected, Kirk Hinrich said. With each test the Jayhawks have faced, the result has been the same, a team effort of spreading around the ball.

That has been the story of our season," Hinrich said. "We go on the road and teams are making plays, but we keep

coming right back at them. "We've got a lot of weapons on this

### Cat women look to get back on track against Tigers in Columbia

Kansus State Collegian

The last two weeks have been almost like a movie for the K-State women's basketball

team. Not "Cinderella," though, but "Waiting to

K-State (20-3, 8-2) barely has had time to breathe lately, playing its fifth game in just 14 days at 7 tonight at Missouri (19-7, 4-5). While the Tigers might be struggling

somewhat - finally breaking a four-game losing streak with a win over Nebraska on Saturday - Missouri and its guards will present a look somewhat similar to Iowa State, which just defeated the Cats on

Saturday. Guards Kerensa Barr and Natalie Bright can both score like the Cyclones' Lindsay

Tuesday tussie No. 10/11 K-State (20-3, 8-2) at Missouri (13-7, 4-5) nere: Heames Center (13,545) Gio: Wildcat Sports Network: WIBW-AM 580

Wilson, who dropped 25 points on K-State. "Those two players are outstanding Big

12 talent. Bright is very impressive to me. She can shoot that three like Lindsay Wilson, from about 20-21 feet, and she can blow by you," Coach Deb Patterson said. "Barr is very similar, although she looks to penetrate first. If you give her a second, she's going to drop down that three."

Missouri also has a strong post presence in Evan Unrau, who averages 13 points and eight rebounds per game. K-State, on the

other hand, has been out-rebounded the last four games.

Rebounding, though, is an area K-State can easily improve upon, especially if it plays better defense, Patterson said.

The rebounding aspect of the game is something I think is definitely in our hands to control. Our lack of board work, in part, was due to the problems we had individually on defense as well," Patterson said.

"The defense really complicated the lack of rebounding. If the shot goes up, and you haven't defended well, you're not in position to board well."

K-State also will need to improve its offensive execution against Missouri. Against Iowa State, the Cats played the

part of Dr. Jekyl and Mr. Hyde - shooting 48 percent in the first half and just 33 percent in the second. Part of that difference was guard Laurie Koehn, who scored just five points in the second half against intense defensive pressure.

Shutting down Koehn, though, should open up other players, the freshman said.

"If they want to do that to one person, I don't think it can keep us from winning the game because everyone can score and everyone's an offensive threat," Koehn said. "Everyone on this team can score, so it's nothing that we're going to worry about."

Filling that offensive void against lowa State was sophomore forward Nicole Ohlde, who managed 27 points but still expected more from herself.

"Nicole is so hard on herself. She, like some people, expected to make every shot," Patterson said. "I think that's part of what separates her and makes her an exceptional competitor and talent. She struggled even

though she scored 27 points."

Ohlde agreed and critiqued her shot

"I can improve on lots of things," she said. "I need to use both hands when I shoot - use my left hand for a left hook instead of always just trying to do a turnaround jumper. I need to learn to go to all my

moves instead of using just one move." That never-satisfied mentality is what the entire team needs going into tonight's

game, Patterson said. "I'll let her take it hard because I want players in the gym that take losses hard and not only take it hard, but show up the next night and affect change because of the loss,"

Patterson said. "We'll see if this team takes that to heart as we head up to a challenging game at

## Arts & Leisure

**Musical Relief** 

DJs start biweekly electronica night at club

Kansas State Collegian

Time to release.

DJs Aturnie, n.9 and Andrew Boie will start the new electronica series, "Release Tuesdays," tonight at Silverado Saloon. Ernie Saville (Aturnie) said the night will give students a chance to release early

week stress. something he said music has always helped

him with. for 18-20, \$3

Music

"Music has been my release for a very long time," he said. "And it's a lot of people's release. You have a bad day, and you go home and listen

to songs that mean a lot to you emotionally. It's your release. It gives you a chance to blow off the stress, blow off the angst and let your mind free."

The first night of Release will feature guest appearances from DJs Sydeburnz and Rick Banda.

Saville said he hopes to see the biweekly event kickstart a renewed interest in Manhattan for electronica music.

The success of the popular "Elements of Sound" weekly show that ended last spring when Elements of Taste closed was proof that live DJs can draw a crowd, Saville said.

Part of the success of the shows at Elements of Taste was due to the fact that 18 to 20-year-olds could get in, which is key to this series as well, Saville said.

"It gives the younger kids a chance to actually go out and get exposed to some serious dance music," he said.

After spending six months in Phoenix, Ariz., Saville said he has changed his style from straight trance to progressive house and techno.

While in Phoenix, Saville said he was exposed to much more electronica music, and after hearing the more progressive sound, he knew it was a sound he wanted to explore.

"It's harder, more driven, faster, but still very dancer-friendly music," he said. "It gives me more freedom than I had just playing trance."

Adam Mertz (n.9) said it will be nice to have a place to play in Manhattan since most of his shows are in Lawrence or Kansas City. Mertz said he hopes audiences are open to his style.

"People like what they're familiar with, but I play stuff that isn't familiar," he said.

"I'm looking forward to working up to getting people to accept the music. I think it will take a couple sets."

Mertz also composes his own material, and soon will have two tracks pressed to a single on Smitten Records, based in the United Kingdom. The idea of being able to mix

his own music while he's spinning is additional motivation, Mertz Mertz said Smitten Records is a

strong name in electronica music, and the opportunity let's him know people are interested in his music. "I'm always working on my own

A STATE OF THE PARTY OF THE PAR

### Test informs residents on state assessments

Kansas State Collegian

Scribbling with their No. 2 pencils, about 40 community members wrote their answers to an exam comprised of questions that have appeared on past Kansas assessment tests.

Teachers, principals and Manhattan residents took the test at Robinson Education Center on Monday. Kansas Take the Test Day was an opportunity for residents to see what is expected of regional students.

"It gave people the chance to get a taste of what kids are expected to accomplish," said Lori Martin, project coordinator and director of assessments for Manhattan-Ogden USD 383.

The sample exam consisted of questions taken from previous fifthgrade reading, seventh-grade science, 10th-grade math and 11thgrade social studies assessment tests.

"This is just a taste of a student's experience," Martin said.

By administering this test, she said she hopes community members have learned of the tests' rigorous standards, what school administrators are doing to help students prepare for it and what schools plan to do with the test results.

Mayor Bruce Snead was one of the community members who participated in Kansas Take the Test Day. He said taking the test was a good learning experience.

"It's difficult to remember what tests were like," Snead said. "To me, it's always good to have a sense of what's going on in schools."

After community members completed the test, they partici-

pated in a discussion involving Kansas assessment tests. Melisa Hancock, teacher at Bluemont Elementary School, lead this discus-

Hancock said the Kansas assessment tests do not simply ask for students to recall memorized facts. They actually require students to derive answers from the material presented and utilize their problem-solving skills, Hancock said

"There has got to be application in the standard," she said.

Jim Shroyer, board of education member, said he likes the effect the assessment tests have had on teacher instruction.

Teachers are stepping up to the plate and improving teaching," Shroyer said.

and science.

Carolyn Schellhardt, English department chair at Manhattan High School, said she identified a major problem with these tests on the secondary level.

"They are savvy enough to know it's not important," Schellhardt said. "They know it doesn't matter."

She said some students do not take the assessment tests seriously because the tests scores have no personal effect on them. She said most secondary students believe the assessment tests are a waste of

In order to combat this problem, Hancock said, parents now will be mailed their child's results. She said students might want to do better on the test knowing their parents will see how they did.

■ Continued from page 1

the music to look at it that day," Tracz said. "After the fire destroyed the building, that is the only music he had left."

Following the fire, the band borrowed instruments from area schools and Hewett made handwritten copies of the music. The band only had about 20 minutes to practice the material before they performed at the basketball

"It was fate," Tracz said. "The band played it so much it caught on quickly to the crowd."

From there, Hewett added the music into his regular selections, and the tradition caught on.

"Wabash Cannonball" became one of my more effective crowd controllers," Hewett said in a 1983 In-View article.

"When the fans didn't like a call or started booing the opponent, I could change their mood by playing that song.

The same night, Hewett introduced the "Eat Em Up, Eat Em Up, KSU" cheer, which Tracz said Hewitt wrote.

Hewett also was instrumental in organizing Kappa Kappa Psi, K-State's honorary band fraternity, and was a founding father of Kansas Bandmaster, an association of all band directors in Kansas.

"He was Mr. Charismatic," Tracz said. "He was involved in everything when he was here.

Some called him a circus leader because when he was here in the '70s there were a lot of kids in the band - close to 375. He could rouse up anything though, and in those days, you had to create your own excitement at football

games. Besides coordinating the pregame and halftime entertainment at home football and basketball games, Hewett also directed

K-State's jazz program for 13 years. He founded the Central States Jazz Festival and K-State Band Day, an event that draws high school bands to the university annually to perform at a football game.

Hewett resigned from the university June 18, 1982, for health reasons.

He suffered many health problems through his career, often causing him to lead the band from a wheelchair or on crutches.

However, Hewett will best be remembered for his upbeat personality and for bringing the tradition of "The Wabash Cannonball" to the university, Tracz said.

"He was an inspiration," he said. "The band loved him, and he loved to be involved. Every time the 'Wabash' is played, it will be in Phil's memory. As he used to say, we will continue to play it 'fast and loud."

Funeral services will be Thursday in Eastland, Texas. The Phil Hewett Memorial scholarship has been set up in his memory.

different culture.

"K-State students benefit the most because they need exposure to different cultures," Smith said.

Pamela Scott, interim project coordinator for Educational and Personal Development Programs, said everyone can benefit by experiencing different cultural events.

"This type of event helps

students become aware of the diversity that is in society," Scott

The audience was treated to food and to gospel music during the lunchtime celebration.

"I came to watch because its a good break between classes," said

Nikki Adams, senior in sociology. "More importantly, I came to hear good gospel music.

Scott agreed. She said she really enjoyed listening to the perfor-

"The music is moving and uplifting," she said.

### BASKETBALL

■ Continued from page 6

"We've got a lot of weapons on this team. If Drew or Nick is getting doubled, they can kick it out, and if it is open down low we can get it to them and expect them to make plays

K-State at times showed signs of life, mainly due to the efforts of Reid and Atchison, but Kansas had too many weapons on display, never allowing the Cats back into the

"It was a game where you had to be everywhere at all times," Reid said.

"Obviously that is impossible and

#### got memories? Barnett said. Less money was being get yours. they made the big plays necessary to spent at liquor stores, though. 103 kedzie hall \* 532-6555 \* rovalpurple.ksu.edi

### American forces to investigate claims of wrong killings in Afghanistan

BY PAULINE JELINEK

The Associated Press

WASHINGTON, D.C. -American forces have returned to investigate claims they killed the wrong people in a raid in Afghanistan, and they should apologize on the spot if the claims prove true, Secretary of Defense Donald H. Rumsfeld said Monday.

U.S. soldiers have gone to the area in Uruzgan province where

special forces killed 15 or 16 people and arrested 27 in a nighttime raid two weeks ago, Rumsfeld told a Pentagon press conference.

Responding to a question, he said he had no information about reports that the Americans were apologizing for mistakes and had been paying \$1,000 to the family of each man killed in the raid.

"I do know that U.S. soldiers have gone back into the area, I

believe with Afghans, to try to determine the facts," he said.

"I would hope that if, in the course of that, they discover that somebody was in fact killed who should not have been killed ... that American forces would express apologies. I can't say that I know that, but I would hope they

After days of insisting they had struck the right people, Pentagon

officials said last week they would investigate the incident.

The interim Afghan government led by Hamid Karzai said it also was investigating. On the subject of reported

payments to families, Rumsfeld said Monday:

"I know nothing about that," he said. Rumsfeld said he recalled Karzai telling someone in the U.S. military that "in the event that it

Aerobie, Klutz, Erector Sets, Discovery Channel

& Many, Many Other Incredible Toyz for the

turns out that people were in fact killed who were friendly to the interim government, that would be unfortunate and it would be helpful if some way could be found to compensate them."

The Pentagon has insisted U.S. special forces attacked a legitimate military target in the raid on an ammunition dump that intelligence analysts believed al-Qaida or Taliban forces were using.

### Jury indicts Walker on 10 charges

BY LARRY MARGASAK

The Associated Pross

ALEXANDRIA, Va. — A federal grand jury indicted John Walker Lindh on 10 charges Tuesday, alleging he was trained by Osama bin Laden's network and then conspired with the Taliban to kill Americans. His lawyers, nonetheless, pleaded for his release until trial.

The indictment also accused Lindh of conspiring to provide support to terrorist organizations, including al-Qaeda, supplying services to the Taliban and possessing weapons during violent crimes. Lindh could face several life prison terms if convicted.

"John Walker Lindh to train with al-Qaeda, to fight with the Taliban, chose to be led by Osama bin Laden," said Attorney General John Ashcroft. "The reasons for his choices may never be fully known to us, but the fact of these choices is clear.

"Americans who love their country do not dedicate themselves to killing Americans," Ashcroft told a Justice Department news conference called to announce the charges.

The indictment supersedes a criminal complaint that was based on statements Lindh made to the FBI in Afghanistan in December.

The indictment said that in May or June last year, Lindh agreed to attend an al-Qaeda training camp "knowing that America and its citizens were the enemies of bin Laden and al-Qaeda and that a principal purpose of al-Qaeda was to fight and kill Americans."

After the Sept. 11 attacks, the indictment said, Lindh remained with his fighting group "despite having been told that bin Laden had ordered the attacks, that additional terrorist attacks were planned and that additional al-Qaeda personnel were being sent from training camps to the front lines to protect bin Laden and defend against an anticipated military response from the United States."

Ashcroft sought to address charges by Lindh's lawyers that his confessions were improperly obtained and that his civil rights had been violated.

"At each step in this process," he said,
"Walker Lindh's rights, including his rights
not to incriminate himself and to be represented by counsel, have been carefully,
scrupulously honored."

Asked if the government considered asking the grand jury to charge Lindh with treason, U.S. Attorney Paul J. McNulty said, "As far as other charges, we have the opportunity or right to have a superseding indictment if the evidence justifies that."

Earlier Tuesday, lawyers for Lindh asked that he be released pending trial, contending there was no evidence of criminal wrongdoing and no danger that he would flee. A hearing is set for Wednesday on the government's bid to continue holding Lindh without bond.

"There are no allegations and no evidence that he ever so much as fired a shot, even at (U.S.-backed) northern alliance soldiers," Lindh's defense said.

The filing also contended that the government's charges, based on an FBI affidavit, are so weak that they are insufficient to establish probable cause for the crimes charged. In addition to contending Lindh was no risk to flee, the lawyers also said he had no history of violent or dangerous conduct.

### Home Depot submits rezoning application

BY MICHAEL WATSON

Kansus State Collegian

Home Depot is coming to Manhattan if its rezoning application is accepted.

The Manhattan Urban Area Planning Board will discuss the 95,000-square-foot store at its meeting March 4. The store would be built north of the Riley County Law Enforcement Center and east of Seth Child Road.

"They haven't indicated when they will start construction, but after talking to the consultants, construction will probably begin this year," City Planner Steve Zilkie said.

Commissioner Mark Taussig said Home Depot will be beneficial to the community.

"It's always good to have more options when shopping," Taussig said. "This is heading in the right direction to make Manhattan a retail center."

Taussig said west-side commerce should not affect business downtown.

"When people come to shop from out of town, they will shop at more than one place," he said.

Developer Tom DeCicco said the proposed construction site is a good location.

"It appears to be more in the center of Manhattan's growth area," he said. "Things are really expanding on the west side of town." DeCicco said steep slopes on the

construction site have forced the project to be downsized. "We can't build as much as we would like,

"We can't build as much as we would like, but it allows us to move forward," he said. "We hope to bring attention to the area for other stores to build there as well. We haven't marketed the area yet because we have to get the anchor store first." DeCicco said one reason he started looking at the west side was that right across the street is the land where Wal-Mart wanted to build its supercenter in 1999.

One reason the Wal-Mart proposal was rejected was that members of the community did not want the supercenter in their neighborhood. DeCicco said he is not aware the community's response toward Home Depot, but he said the company has done a good job communicating with the city.

Home Depot could not be reached for comment.

Zilkie said the planning board has not made a recommendation yet. He said that following a typical schedule, the planning board will take the Home Depot development to City Commission on March 19.

"The big hurdles for development are working through the proposals," DeCicco said.

## **SWINGIN**'

Bill and Marge Shea practice swing dancing in the Manhattan Town Center on Tuesday night. Many couples gathered in the picnic area to learn swing dancing. Additional classes will be offered Feb. 12, 19 and 26 free of charge.

Karen Mikols/

### Instructor offers dance lessons, teaches etiquette

BY SARAH RICE

Kanzas Stato Collegian

Mike Salerno's job is to make women look good.

With that in mind, Salerno, dance instructor, started the "Ready, Set, Swing," swing dancing lessons in the Manhattan Town Center food court.

The swing dance lessons will be a sixweek series from 6:30 to 7:30 every Tuesday night

Salerno said that with the success of the lessons in spring 2001, he decided to try to

"I am here to teach them how to dance, the fundamentals of swing dancing," Salerno said.

Audrea Martens, Town Center marketing assistant, said the mall creates a low-pressure atmosphere.

"I think a lot of people want to learn to dance in a more open and friendly environment," Martens said.

Angela Greene and Crispy Casiano, Fort Riley residents, went to the mall to shop but ended up dancing instead.

Casiano, originally from Puerto Rico, said he never had heard swing or country music.

never danced country," Casiano said. In addition to teaching his students

In addition to teaching his students dance steps, Salerno taught the unspoken

"I have danced meringue, but I have

etiquette of dance such as the three rules for dancing with a lady.

"You should dance with her in such a way so she will dance with you again," Salerno said. "Don't ever touch her hair and don't ever let her fall."

Greene said that at times, the steps got confusing, but she figured them out.

"The one where you turn was confusing," she said, "until the guy (instructor) came over and showed us. Once we got it, it was easy."

Dana Sitton, Manhattan resident, and Craig Williams, senior in management information systems, came to the lessons to get ready for their upcoming wedding.

"We don't want to look like idiots at our

wedding," Williams said.

Manhattan residents Dick Russell and Dorothy Beckley said they attended the event because it made them feel young.

"I am trying to learn how to use both left feet," Russell said. "It's good recreation, especially for us old folks."

Salerno said people of all ages should learn how to dance.

"It's learning social experience," he said.
"Dancing is one of the best lifetime activities."

Martens encouraged K-State students to attend the lessons Feb. 12.

"It's an opportunity to learn something fun without taking a test," she said. "There is no pressure to remember."

### Baseball legend speaks Tuesday, emphasizes importance of higher education

BY AMY LINK Kansas State Collegian

His voice was one of triumph

His voice was one of triumph, his words rang of hope, his stories brought laughter and his name is Buck O'Neil.

O'Neil, speaker for Black

BLACK HISTORY

O'Neil, speaker for Black History Month, spoke Tuesday night in the K-State Student Union Ballroom.

Ballroom.

John "Buck" O'Neil was the first black man
to coach in Major League Baseball. The
Chicago Cubs hired him in 1962 to coach,
fifteen years after Jackie Robinson made his

Although coaching made O'Neil famous, he said getting an education was his first priority. He said at the end of his eighth grade year, he went home very excited because he learned that his Sarasota, Fla. hometown was building a new high school.

His mother told him he would never go to that high school because it was for whites only.

ool because it was for whites only.

He said his mother told him
not to worry: one day, all
children will be allowed to go
to Sarasota High School.
O'Neil's mother said she

wouldn't see that day, but he would.

O'Neil said he didn't let that stand in his way. Since he could not attend high school, he began taking night courses. This paid off and helped him get into college. He attended college for two years on a baseball scholarship, but the lure of money and playing professional baseball ended his college days.

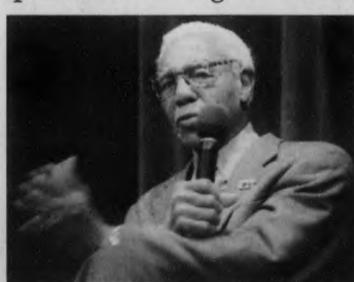

He started playing in Cuba. In 1938 he

joined the Kansas City Monarchs and began his career in the Negro League. He played against Babe Ruth and Josh Gibson, and Satchel Paige was a teammate and friend of O'Neil's. He continued to play until 1955. He played in two Negro League World Series and started 1st base in the Negro American League All-Star Game three times.

When a student asked when his greatest day in baseball was, O'Neil had an immediate response.

O'Neil said, "Easter Sunday 1943, in Memphis, first time up I doubled, next time I singled, third time I hit a home run, last time it hit the fence and bounced between two outfielders. They yelled at me to get an inside

STATE IN BRIEF

#### Legislative panels closer to endorsing new maps

TOPEKA - A House panel redrawing the chamber's 125 districts presented a new plan Tuesday that addresses some of the worries of minority Democrats.

The new map reduces the number of Democratic incumbents who would have to run against each other for reelection this fall. An earlier proposal would have collapsed 10 districts now represented by Democrats into five.

Meanwhile, the Senate's redistricting committee continued its efforts to draw new boundaries for Kansas' four U.S. House districts and was then to work on a new Kansas Senate map.

All of the new maps - of the Kansas House, Kansas Senate, U.S. House Districts and State Board of Education — are being created to reflect gains and losses of population according to the 2000 census.

#### NATION IN BRIEF

#### Former chairman resigns from board of Enron Corp.

HOUSTON - Kenneth Lay is now just another Enron Corp. stockholder. The former chairman and chief

executive of Enron resigned from the board Monday, cutting his last tie beyond stock ownership to the company he helped transform into No. 7 on the Fortune 500 list before it collapsed in bankruptcy.

Lay had resigned as chairman and chief executive Jan. 23, citing his inability to run the company properly amid a maze of investigations and lawsuits stemming from its

But he stayed on the board until Monday, the same day he was to have testified before two congressional committees.

He opted out of the appearances on Sunday, deciding to remain publicly silent about Enron's collapse.

#### Newspaper editor seeks dialogue with kidnappers

KARACHI, Pakistan - Pakistani authorities expressed hope that missing reporter Daniel Pearl would be found alive, and the managing editor of The Wall Street Journal appealed to his kidnappers to make contact almost two weeks after his disappearance.

After days of silence from the kidnappers, Pearl's employer, The Wall Street Journal, released an open letter late Monday calling for a channel of direct communication.

"I have not heard from you for several days and want to begin a dialogue that will address your concerns and bring about Danny's safe release," managing editor Paul Steiger wrote in a letter addressed to the National Movement for the Restoration of Pakistani Sovereignty.

#### Iraq prepares to arrange talks with United Nations

UNITED NATIONS - Iraq is prepared to resume talks with the United Nations, but the world organization did not indicate whether Saddam Hussein's government is willing to discuss the return of U.N. weapons inspectors.

Amr Mousa, the secretary-general of the Arab League who recently visited the Iraqi capital of Baghdad, told U.N. Secretary-General Kofi Annan that Iraq would restart talks without any special conditions, the United Nations said in a statement Monday.

Annan said he was prepared to receive a delegation from Iraq. Iraq has been under U.N. sanctions since it invaded Kuwait in

1990. The sanctions cannot be lifted unless U.N. inspectors verify that

Baghdad has dismantled its weapons

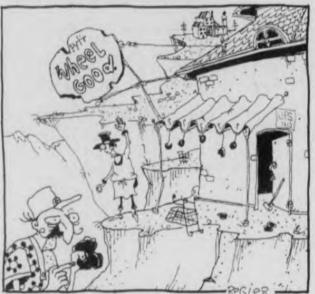

of mass destruction.

#### Afghan warlord factions to withdrawal from main city

MAZAR-E-SHARIE Afghanistan -Warlord factions whose control of northern Afghanistan challenges central government authority have pledged to withdraw from the volatile region's main city and eventually demobilize their soldiers, a spokesman for one of the parties said.

A pullout by warlords from Mazare-Sharif would be an important step in Afghanistan's efforts to restore stability after 23 years of war. In the capital, Kabul, the commander of the international peacekeeping force said security there was already improving.

#### THE GONGFARMER'S Travelogue

Guess who I met in North Deprivdia? This is Pyt'r Ptrptrty. He's the guy who handmakes the left Front wheels For all U.S. shopping carts. "No two alike!" he says. Wish you were here.

#### WHAT DO YOU WANT TO BE WHEN YOU GROW UP? K-State professional describes basics of degree program

Architectural engineering and construction science

1. How many hours are required to graduate? 162. It's a 5-year progr

2. What careers could I pursue with this degree? One could work for a consulting engineering firm as a building, electrical, mechanical or structural engineer

3. What are the advantages/disadvantages of this major?
The advantage is that K-State is one of only 13 schools in the nation that is an accredited architectural engineering and construction science school.

4. Is graduate school typically required?

No, but graduate school is just an extra semester of work. The advantage is that one may get a couple thousand more in their starting salary.

5. What is the average starting salary of a graduate in this major?

Average is \$42,000, but can be as low as \$38,000 or as high as \$50,000.

# Speaker addresses terrorism

BY LINDSEY BURKET Konsas State Collegian

Arab-Americans have experienced the best and worst of times, Dr. Michael W. Suleiman said Tuesday during his presentation titled, "9/11. Civil Rights and Arab/Muslim Americans."

Suleiman, professor of political science, was the guest speaker at the Vernon Larson International Luncheon Series at the Ramada Inn Ballroom.

Suleiman said life in the United States never has been easy for Arab-Americans, but since Sept. 11, things have gotten much worse.

"Terrorism is the new communism in the United States today." Suleiman said. "This changed atmosphere has resulted in ruined lives for many Arab-Americans."

Suleiman shared the stories of several Arab-Americans who had lost their jobs or been arrested or deported from the country as a result of discrimination after Sept. 11.

He also said that while the terrorist attacks have caused an

tion, public harassment and death threats against Arab-Americans in the country, the government administration has done a good job of making sure Americans know that war is against terrorism, not Arab-

Americans or the religion of Islam. Suleiman commended K-State and Manhattan for acting immediately and making sure there was minimal backlash on campus by encouraging positive patriotism, making zero tolerance policy for harassment and hate crimes and advocating religious tolerance.

"They were very cooperative in making sure that any type of harassment or attacks were reported immediately," Suleiman said. There were actions taken to present different points of view to make sure the public understood exactly what was happening."

Controversy between the United States and Middle East has been a long-standing one, and Suleiman said the best way to solve the problem is through understanding and communication.

"We have been far too slow on

problem between the eastern and western worlds," Suleiman said. "There needs to be a dialogue of understanding between west and

The series consists of presentations that allow students and community members to listen to the experiences of K-State faculty members who are involved in significant international issues or recently have been involved in overseas activities.

"We were planning to have Mr. Suleiman share his presentation from the start," said Connie Noble of the Office of International Programs. "The events of Sept. 11 just made his subject very timely."

ake a look around you for just a moment to acknowledge all the various items you own. Now, say it with me, "Yay, capitalism!" Don't be embarrassed. Your roommate was probably too distracted by the TV or their Sony Walkman to have heard you anyway

at hand.

will represent.

Clash of the Columnists

Clash of the Columnists is a week-

long series dedicated to open debate.

Each day, columnists will write columns

taking conflicting stances on an issue.

It is hoped that readers will have

Columnists select which view they

all sides presented to them in order to take an educated stance on the issue

We're taught by evangelists, analysts and the occasional anarchist that capitalism is a ravaging force out to plunder for gluttonous

There might be hints of truth in such bold statements, but let's assess the real questions at hand: does capitalism encourage efficiency and innovation? Is it compatible with democracy? Does it reward hard work? Is the free market effective? Does capitalism improve our standard of living?

The answer to these questions is "yes." Or, "sure." Or how about, "damn skippy?" You choose. That's the glory of our economic

You have the choice between Oreos and Mrs. Fields cookies. American Eagle and consignment stores. Suave and "those other

The plethora of products we have to choose from is a result of capitalism.

"Capitalism" is the art of taking your own capital, or wealth, and putting it to use to create more capital.

Although capitalism is of Western European descent, it has thrived in the United States, allowing us to become a world economic superpower.

A superpower because this land's greatest capital - its people - are the most innovative, creative, determined people

Take, for example, Andrew Carnegie. A Scottish immigrant, Carnegie was self-educated through his various employment opportunities, starting as a bobbin boy in a cotton factory and ending his life as one of the greatest philanthropists in history.

At age 33, Carnegie, whose annual income was \$50,000, stated, "Beyond this never earn ... but spend the surplus each year for benevolent purposes."

Greedy capitalist pig. Carnegie's hard work and charitable spirit led to the funding of over 2,800 libraries nationwide. When haggling with a car salesman about the price of an

Escort, thank Henry Ford for cutting the price by a few thousand. With the invention of the moving assembly line, Ford created the textbook example of efficient labor.

Each worker became skilled at a function of the automobile's assembly, doing it properly and swiftly, thus becoming a specialized worker.

With specialization, Americans are free to focus on what is most efficient and productive, and trade with other countries for items we cannot produce as effectively.

Remember Grandma's stories of the good ol' days when she'd receive oranges and bananas in her Christmas stocking? There's a

reason you get cash in yours now. The United States is not a tropical region. Although diverse, there are some things our soil simply cannot produce. So, through the glory of free trade, we export electronics and import bananas,

coffee and Asian pears. Mmm, Asian pears.

Although entrepreneurs like Carnegle and Ford are the blood of our economy, we cannot ignore that the free market is not simply consumers and producers.

In fact, we are a mixed economy. This means government intervention, although minimal, exists. A corporation caught dumping waste into rivers will hear from

the Environmental Protection Agency. Farmers with a surplus can count on government instituted price floors, which keep prices from being lowered past a certain

In fact, the government is one of the largest consumers of

domestic agricultural products and often purchases the surpluses. The great cornerstone of capitalism that all Americans should appreciate is freedom. Consumers are free to purchase whatever brand of cookie they wish.

Women like Mrs. Fields are free to step out of the kitchen and into the executive office of a multimillion dollar

All Americans, no matter their background, are free to choose their vocation. Free to invent, innovate and create the products and opportunities that make this the most diverse and enjoy-

able land to inhabit Yay, capitalism, indeed.

Susan is a Junior in English. You can e-mail her at sip8478@ksu.edu.

Ben Dolezal/Collegian

# Capitalism violates rules of free market

merican capitalism supposedly is about free markets, efficiency, democracy, liberty, hard work and prosperity. We've been force-fed rhetoric about

the discipline of the free market. Cuts in welfare, health care, environmental protections and more are justified because

Jon Smajda such spending violates the laws of this free market. However, if we apply these "laws" universally, then most of our government spending violates them as well.

> Billions of our tax dollars are spent each year subsidizing the research and development of high tech industry through the Pentagon budget.

Massive public subsidies also cover much of our medical

However, when something profitable comes from this R&D, the patents are handed over to the private sector to profit while the public eats the cost. The result is a system where, for instance, ordinary people

cannot afford the medicine they need despite the fact that

their tax dollars paid for its development. No wonder the private industry appears to be so efficient. Any aspect of industry that isn't profitable on its own,

our hard-earned tax dollars subsidize. Clearly, these practices violate sacred free market law also, yet we do not hear free market ideology calling them into question.

Capitalism is not about the free market. Perhaps, then, capitalism is about efficiency? Not if we mean an efficient use of natural resources or

human labor. Take "planned obsolescence."

This means that even though we could make a light bulb that never burns out, for example, we don't because then there'd no longer be a market for light bulbs.

Instead, we use up unnecessary resources and labor and call this growth.

Then we have to spend billions on advertising to get people to buy our surplus production. Not efficient at all.

Capitalism doesn't necessarily promote innovation either. How many of you know a better way to run your Now, how many of you do nothing about it because

you're nobody who is just doing your job and following Capitalism gives the control to a few people and ignores the potential creative input of a majority of the people in

the workforce. Not a good formula for innovation. Capitalism also is supposed to be about hard work and prosperity. What kind of hard work and prosperity? For who?

If capitalism rewards valuable hard work, then why is it that raising children, for example, is negatively rewarded under Mothers not only don't get compensated for the valuable

work they do in raising children, but also receive lower wages in

the workforce as a result of their inflexibility. Despite the fact that the average American is working one month longer per year than 20 years ago, according to the Boston Globe, the average after-tax, inflation-adjusted income of the poorest 20 percent fell \$100 between 1979 and 1997 while the

average for the richest 1 percent of Americans grew by \$414,000. Why the drop in wages? Good, stable jobs have moved overseas where workers have less rights and lower wages. American workers then take McJobs with lower wages,

security and autonomy while CEOs profit off the exploitation of Capitalism must be about democracy though, right? Not if democracy means that all people have power to make

meaningful choices about their lives. Take Enron, for instance. A handful of executives cashed in shares worth billions while lying to 20,000 employees about the company's well-being.

Then they declared bankruptcy, causing the 20,000 employees to lose their jobs and life savings. It is here that what capitalism is really about becomes

very clear: power. Who has the power? A handful of elites. Who gets screwed? Everybody else. To defend capitalism is to defend this power of

inequality. This should be very hard to swallow in a country founded on the idea that "all men are created equal."

# Former addict discusses threat of pornographic images

BY RYAN DONAHUE

Kansas State Collegian

Clad in K-State colors, and armed with a dazzling multi-media presentation, Gene McConnell educated a nearly full McCain Auditorium on the "Power of Porn" Tuesday night.

"We live in a sex-saturated society, McConnell said. "We use sex to sell everything."

Images of sex are everywhere. Today's images are more risque and graphic than ever before, he said.

McConnell compared the images of 1957 Playboy centerfolds to the covers of today's Cosmopolitan. He compared the somewhat-elegant images of the 1957 Playboy centerfolds to the barely dressed women in the Cosmopolitan.

"I am not here to tell you how to think about porno, but to inform you. I promote personal responsibility, McConnell said.

He showed clips of K-State students expressing their views about pornography.

"Porn is not a sideshow, it is a part of our society," McConnell said. "It is bigger than baseball and football together. There are more strip clubs in the U.S. than there are McDonald's."

Porn has become a main part of American society, he said, and was a main part of his life.

His addiction drove him into a life consumed by pornography.

"The excitement and arousal was like an injection. I was using porno as a way to cope with my rejection and my hurts," McConnell said.

His addiction eventually drove fantasies into his life. McConnell's fantasy of rape became an attempt one evening in a dark parking lot.

"I followed her to her car, forced my way in with the intentions of raping her. I looked into her eyes and saw the fear in them, and it hit me like Follow-up

Gene McConnell and Kimberly Drake will have a question-answer period at 7 tonight in Forum Hall.

a bat. 'Hello, wake up. You're about to destroy another person's life. What are you doing?" McConnell said.

He now speaks about the dangers of pornography addiction so that one can make intelligent decisions.

McConnell served time in jail, and he doesn't blame pornography for his actions. He promotes accepting responsibility for one's actions.

He thinks pornography is a measuring stick for our society's physical worth. The images of the perfect woman and man are ingrained in our culture through media, he said. The idea of the perfect body has driven one in five women to develop eating disorders, he said.

from these disorders are McConnell's wife and daughter, both of whom developed their disorders from his addiction to porn.

The presentation also included the story of Kimberly Drake, a former stripper and cocaine addict.

Drake's feelings of never being good enough for those in her life drove her to mimic the women her husband obsessed about in his pornography.

"I thought that if I became the image of my husband's obsession I would become my husband's one and only. I would finally be the apple of his eye," Drake said.

Instead of gaining the acceptance she sought from her husband, she drove them farther apart.

"I had become what I originally hated," Drake said. "I had become one of the women that caused my feelings of imperfection."

Jeanel Drake/Collegian

Gene McConnell speaks Tuesday night in McCain Auditorium.

During the two-hour presentation, McConnell and Drake explained the impact of sex in society.

"Not everyone who is going to

consume is going to become a rapist," McConnell said. "But everyone is affected, in our belief system, and our way of viewing the world around us."

# Pro Bowl worthless to watch

As the last seconds ticked off the clock during the Super Bowl on Sunday night, a slight twinge of melancholy pricked me. It didn't hurt, but it got me thinking.

This year's game ranked among the best ever, a tight contest capped off by a surprise ending by the upstart Patriots. But as Adam Vinatieri's 48-yard pooch cleared the goalpost, it was sad to say goodbye to another

Dan Smith

I'm so depressed after football season ends. So sitting on the couch

with the unknown stain ingrained into the upholstery, I tried my best to hold back tears.

Then someone tried to ease my pain. "Hey, don't fret, Dan. The Pro Bowl is Sunday," a buddy of mine slurred.

If it weren't for the Cheetos in my lap, the punch in my hand and my extreme laziness, I would have sprung to my feet and slapped him. Twice.

Any self-respecting fan knows that the Pro Bowl isn't legitimate football. Just like the WWF doesn't count as wrestling. Nor does figure skating count as a sport. Come to think of it, no activity that involves men leaping gingerly into the air and spinning constitutes a sport - but that's another

What I don't understand about the NFL's annual attempt at an All-Star game is why they change the rules for a grudge match featuring the league's best talent. Instead, why don't the powers that be use the "if it ain't broke don't fix it" school of

They say it's to keep the players from injuring each other and to ensure an offensive showcase for the fans.

Well to me, that makes about as much sense as Sonic putting one onion ring in my chicken strip dinner when it already comes with fries. Why do these things happen?

Think about it. Telling Baltimore Raven linebacker Ray Lewis or New York Giants defensive end Michael Strahan it's illegal to blitz the quarterback is sort of like your calculus professor telling you to take a test without counting on your fingers, um, without using a calculator.

And I'll never understand why you can't rush the punter in the Pro Bowl. Actually, I can't figure out why there's a punter in the game anyway. Aren't they a dime a dozen, and how is what they do a

# Wildcats rebound from loss, score win over Missouri

BY DAN SMITH

COLUMBIA.-Mo. - K-State was looking for someone to take its frustrations out on Tuesday night after an 86-72 loss to Iowa State Saturday dropped the Cats out of the Big 12 lead.

The Missouri Tigers just happened to be the next team on "We said we wanted to learn from all the things that

happened against Iowa State, but we really wanted to come out aggressively against Missouri," sophomore Nicole Ohlde said. This time, it was K-State that taught the lesson.

The No. 10/11 Wildcats (21-3, 9-2) inched closer to regaining the conference lead, with a 79-61 win over Missouri (13-8, 4-6) at the Hearnes Center in Columbia.

The Tigers couldn't come up with an answer for K-State's inside offense and didn't find a scoring spark of their own, as the Wildcats kept pace with the first-place Oklahoma Sooners by beating the Tigers for the first time in five meetings.

K-State jumped out to a quick 6-1 advantage and led by as many as nine in the first half, paced by Ohlde, who finished with 26 points and freshman Kendra Wecker who recorded a double-double with 20 points and 11 rebounds.

Defensively, the Cats had an answer for everything Missouri threw at them. The Tigers' leading scorer, Kerensa Barr, who averaged 16 points-per-game coming in, converted on just two of seven first-half attempts, and went one-for-five from the field in the second half to finish with eight points.

"We were really struggling on offense to find open looks," Barr said. "They took that away from us tonight."

Still, MU kept it close early.

With the Cats leading 19-13 with close to 10 minutes left in the first half, the Tigers found open looks on three straight trips to tie it, but K-State would outscore Missouri 12-2 during the next five and a half minutes and then hold off several Tiger second-chance shots in the lane to head to the locker room up

Sensing her team might be falling back into Saturday's mindset after Missouri chiseled the lead to five, Coach Deb Patterson delivered a halftime message that would set the tone for the second half.

"I told them nothing close is good enough. Nothing you intended to do is enough," she said. "It's just what you got

The Wildcats responded with an 8-2 run to start the half. And after another 10-2 spurt put K-State up 57-38, the Cats would cruise, benefiting from a 70-percent shooting half that raised their game average to 62.3-percent.

The Tigers trimmed the lead late; but couldn't overcome their earlier shortfalls from the field and K-State left Columbia a half game back of the Sooners for the conference lead.

"We were back tonight," Patterson said.

K-State guard Megan Mahoney (34) goes up for a shot against Missouri's Melanle Fisher, right, during the Cats' 18-point victory Tuesday night in Columbia, Mo.

# K-State ready for action; led by seniors Cats bring in new talent,

Kansas State Collegion

Mike Clark is hoping James Brazeal, Chad Duckers, Brock Smith, Osmar Castillo and Nick Sorensen can become something K-State baseball's five returning seniors

will lead the Cats into their first action of the spring at noon Friday at Frank Myers Field against the Air Force Academy Falcons. With seven letters among them, Clark

said his seniors have both the skill level and leadership capabilities to have a successful final season as Wildcats.

"Leadership has been great," Clark said. "This has really been a good group to work with.

"The seniors got 95 percent of the team back a week early to start practice and they did an excellent job. Our seniors have talent and they have things under control."

Talent, cooperation and leadership are just a few essential traits in a successful hardball campaign, and senior centerfielder Nick Sorensen said the team is focused and determined to add those characteristics to the mix of Wildcat baseball.

"We have an extreme amount of confidence on this team compared to what we have had in the past," Sorensen said. "We are looking forward to showing people in the Big 12 and in the nation what we can

To impress, the Cats will need to improve on the 25-28 overall and 10-17 Big 12 records tallied in 2001.

To impress, K-State must survive a schedule including 21 games against 2001 NCAA Regional qualifiers and a conference slate featuring six teams ranked among the top 30 in the nation.

To impress, Wildcat baseball must qualify around a desire for recognition in one of the

Kelly Glasscock/Collegian

K-State's shortstop Osmar Castilio runs down a ball in last season's victory over Oklahoma.

for competition in the seaon-ending Big 12 tourney for the first time since the league's inception in 1996.

And to do that, the Cats will need support from a bullpen that goes 16 deep and includes Brazeal, Duckers and Smith.

Smith said the 2002 Wildcat pitching staff is talented enough to compete with the best teams in the country, and this year's rotation has its sights set on a top-five finish in the

"The pitching staff is one unit," Smith said. "We are all close, and we are all

"This is a staff with the most depth I have ever pitched with, and we have a lot of good leaders on this team."

Duckers said the Cats are a team built

nation's best conferences.

"The seniors we have coming back will be ready to step in." Duckers said. "We are working hard with the payoff of recognition in mind.

"We want to win the league, and we have the team to do that with."

But gaining recognition in a league boasting the likes of Baylor, Oklahoma State, Nebraska, Texas Tech and Texas won't be

Still. Smith said the pieces are in place for K-State to win quickly.

"Pitching and defense win championships," Smith said. "We have everything we need to win.

"We need everybody ready to play in the Big 12, and once we get to that point, I think we are going to take over."

# anticipate winning year

Karras State Colleg

Head coach Mike Clark is comparing the baseball team to a puzzle.

If that's the case, Clark has 24 new pieces to find places for.

With one of the largest groups of newcomers in years, the K-State baseball team will be mixing a lot of new talent in with the 12

returning letter winners. We are a different ball club than last year," Clark said. "We don't have one or two guys on the team that will stand up and go and carry the guys to the promise land. At the beginning part of the season, we might be platooning people at many different positions. With the new players, I think we have the pieces to the

puzzle and it is getting them to fit." Clark said he has already seen an immediate pitching improvement from last year, and having eight new pitchers will give the Wildcats the depth they need.

"Pitching is 80 percent of baseball," Clark said. "We lost a lot of late games last year. We also had pitchers injured and it put us in a situation where we weren't quite as competitive as we wanted to be. We needed to add depth there so that wouldn't happen again and overall get better at pitching.

Among the new pitchers are twin senior transfers Ross and Ryan Hawley. The brothers transferred from Augustana College in South Dakota where they were both three-year letter winners and starting pitchers. Transfer students Franco Pezely and James Allen will

also have time on the mound. "Things have gone well," Pezely said. "We are going to be deep. There is a lot of us who will be able to start or come in and complete

and go from there."

Allen, a Nebraska native, spent two years as a relief pitcher at Colby Community College before coming to K-State. He was considered the best out of the bullpen.

"He has been a nice surprise to me," Clark said. "He really impressed me in the inner squad game the other day. He is better than what I was told."

But Clark said pitching isn't the only area where the Wildcats will improve. The newcomers will add strength to the lineup.

"We have right and left handed hitters." Clark said. "We have speed and some good defensive players. It is nice to have options."

Junior transfer Tim Foley will give K-State a solid first baseman and Gabe Luttrell will add strength to the outfield. Luttrell transferred from Cowley County Community College where he helped lead the team to a seventh straight Jawhawk Conference title.

"I want to give a positive attitude at all times and give some leadership," Luttrell said. "There are a lot of younger guys here and coming from a junior college with experience I want to help those guys get their feet wet."

Clark said he also sees some of the six true freshmen competing for spots, in particular outfielder Mark Montgomery.

"He has been very consistent," Clark said. "He is one that has jumped up and made his way to get some quality time on this team."

Clark said everyone is ready for the season. "The newcomers have all been prepared," he said. "The seniors have let them know what is expected. We will be real close with those non-conference games to figuring things out and then once conference is here we will be hitting the ground and running."

# Rare replica Chinese statue finds permanent home in Union

BY BETSY STVERAK Kansas State Collegian

he K-State Student Union is host to the findings of extensive exploration in the area of China where the Qin Shi Huang once ruled.

The Brandeberry family donated a rare replica of a Chinese warrior statue that was uncovered in China in 1974 to be displayed in the Union.

The official unveiling of the exhibit will be during the rescheduled Festival of Nations from noon to 1 p.m. Feb. 13.

These terracotta statues are known as the "Eighth Wonder of the World" and they date back to the Qin Shi Huang dynasty. Bernard Pitts, executive director of the Union, said the 250 pound, 6-foot-tall statue is exactly what the Union needs.

'It's gives people the opportunity to observe it," he said. "It's something unique. It puts us in a special category to have this exhibit."

More than just the statue is in the display. "We're going to add more to the statue. There will be historical facts," Pitts said. "We're making it as educational as possible.'

Pitts said the Union has given the Brandeberry family a special name for the donation.

'The Union is recognizing the Brandeberry family as life-time friends," he said. "We are thrilled that we are able to share this treasure with our campus community."

Another close and personal friend of the Brandeberrys is Charles Regan. Regan, associate to the president of the university, said the Brandeberrys were in the process of moving and decided to donate the statue.

Regan said he presented the idea of the statue to the Union because he felt it would benefit the students

"It's quite a rare and very interesting find that will help students understand the history of China," he said. "It's a major artistic find in

If the name Brandeberry sounds familiar, Regan said it's because the family has donated to K-State in the past.

"They donated the money for the indoor baseball practice area," he said.

"The Brandeberry indoor complex was named

in the late 70's." The family man behind the donations,

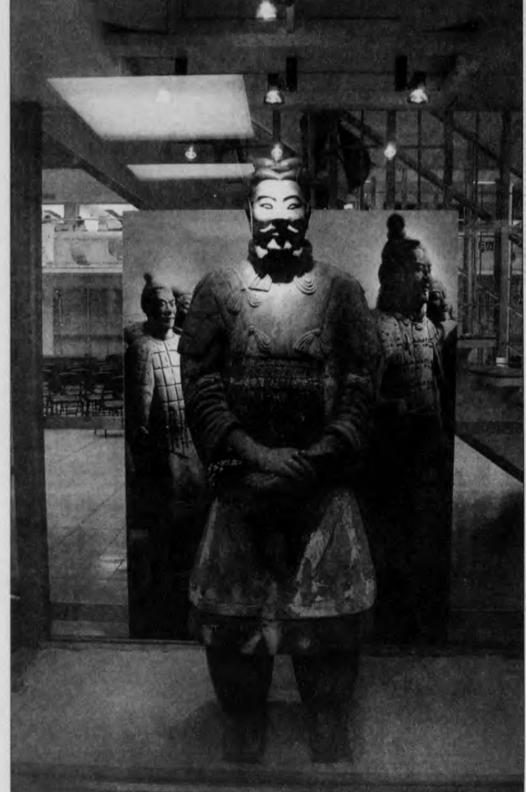

Norman Brandeberry, said he first obtained the statue several years ago. Brandeberry said he spent three weeks in

China where he ended up in Xi'an, where the warriors were uncovered. He soon purchased one for his personal collection. Brandeberry said he thinks this statue is

important because China has a very important culture. "China is going to become one of the most

important nations in the world," he said. "It's a magnificent thing and a wonderful work of art that is an important symbol of China."

As a good friend of K-State, Brandeberry said he knew K-State was where he wanted to donate

Drew Rose/Collegian

The Chinese warrior statue is the main centerpiece of the exhibit found in the K-State Student Union. The unveiling ceremony was canceled last week and has been rescheduled for noon Feb. 13.

"We are big K-State supporters, and very happy to do this," he said. "It's a chance to give something back to K-State.

Brandeberry said that at first the statue was to be given to the Mariana Kistler Beach Museum of Art but it was too large for the space. The statue is number 14 in a limited series of these replicas, and former President Clinton is the owner of

Silverado to feature local metal bands

number 17 in the same series.

In agreement with Regan, Brandeberry said he feels the donation of the statue will help increase students' knowledge of China.

"It ranks, as far as importance, along with the Taj Mahal," he said.

"I hope they can learn the importance of the

Kunsus State Collegian

The local metal community will be having a reunion of sorts at Silverado Saloon Thursday night.

Manhattan's Pins and Needles, Broken Bone Coalition and the Bearded Assholes will play in the biggest metal show since the Manhattan Metalfest in October 2001.

While all of the bands could be categorized as metal, a range of different styles within the genre will be represented, Clint McAllister, guitarist and vocalist for the Assholes,

Pins and Needles focuses on experimental hard rock, drawing from bands such as Tool, Sepultura and Faith No More, John Franco, drummer for Pins and Needles, said.

They recently have finished working on a five song demo CD that will be on sale at the show

Jam times

Pins and Needles, Broken Bone Coalition, Amass, and The Bearded Assholes will play at Silverado Saloon on Thursday. The show starts at 9:30 p.m. and admission is \$5 for 21 and over, and \$8 for 18-20.

Broken Bone Coalition plays a combination of hardcore and death metal in the vein of Hatebreed, Slayer and Pantera, Mitch McGuire, guitarist for BBC, said.

They have been playing with Amass for quite some time and McGuire said he saw this week's show as a way of introducing the McPherson group to Manhattan.

"I think that they're one of the best bands that has come from the area in a long time, and I think more people should to get the chance to see them,"

In forming their particular style, what McAllister described as Ex-Lax metal, music so heavy it causes the listener to defecate, The Bearded Assholes were influenced by groups like Cannibal Corpse, Gorefest and Pungent Stench.

In the time since the Manhattan Metalfest, McAllister said the group has been working on a video for their song "The Pizza Boy Makes Good Toppings.

The video will be released on the band's Web site Feb. 15 and McAllister promised plenty of fake blood.

"Our slogan is, if it's not here in 30 minutes, we eat you." McAllister said.

McAllister said one of the reasons for the metal scene being so strong right now is due to the close relationship between bands.

All of the bands were formed in the last two years and since that time have tried to promote each other rather than competing. McAllister said.

"It's definitely growing," he said. "We're all pretty much coming up

together and that is making it easier for metal bands to get shows than it was before."

Even with an increase in booking. the bands feel that they still have to prove themselves to venues in the area, Franco said.

Many places seem to have preconceived notions about metal bands and are hesitant to hold shows, he said.

"Everybody sort of has this idea that metal bands will come in and wreak havoc," Franco said. "With shows like we're putting together now, we want to let the community know that we're not going to come in and trash the place," Franco said.

They might be trying to show that they're not as evil as people think, but fans don't have to worry about these bands softening their sounds anytime soon, McAllister said.

"This show is going to be a really good time," he said. "It's also going to be really heavy!"

# Comfort dolls help children tell doctors where they hurt

Kansas State Collegion

Plush, featureless comfort dolls are helping young children communicate better with their doctors at Mercy Health Center.

The Manhattan Area Kiwanis Club implemented the Australianbased program when club members began making comfort dolls for children who are too young to explain to doctors what is wrong with them.

A Mercy doctor gives a doll and a set of magic markers to a child, who typically is 5 years old or younger, so the child can illustrate the pain and emotions on the blank doll.

"The dolls are wonderful for the kids as they give children a chance to draw and help express their emotions," said Julie Miller, emergency services coordinator at

"This distracts them and diverts their attention away from being in the hospital."

Kiwanis members decided to make the dolls because they wanted to help children who might have trouble indicating

areas of suffering when they are taken from the comfort of their homes and taken to a different environment, said Frank Morrison, chair of the Kiwanis Priority Once Committee.

"Children are in a strange place and don't know what's going to happen," Morrison said. "The dolls talk for them and show where they hurt."

The club began making the dolls last year and made their first delivery to Mercy in June.

The club delivered 25 dolls each to pediatrics and emergency. They have since made a second delivery and are planning a third around the beginning of April, he

"They help to divert attention and make children less fearful,"

April Hamilton, community relations and planning coordinator for Mercy, said the hospital gives the dolls to any child for which they are appropriate or any child who would receive comfort from having a doll.

"They're made out of fleshtoned muslin and have no features and are not clothed, so kids can

draw on them and can communicate with the medical staff,"

Hamilton said. Morrison said the dolls are not only used for children to communicate their feelings to doctors and nurses, but also for doctors and nurses to explain procedures to children.

"It works for two-way communication," he said.

The Kiwanis members cut the fabric and sew the dolls. Once the dolls are sewn, he said, the Kiwanis Club has a stuffing party. All of the members and some of their wives and members from the K-State Circle K Kiwanis Club meet to stuff the dolls with polyester through an open seam in the legs of the sewn dolls, Morrison said.

Once the dolls are stuffed, the final seam is sewn and the dolls are delivered to the hospital in shipments of 50, he said.

Morrison says the number of dolls the club will make and perhaps the need for additional help and an expansion of the program in the future will depend on the demand for the dolls.

"We want to have an adequate supply for the demand," he said.

#### O'NEIL

■ Continued from page 1

the park homerun but I stayed at third. I wanted to hit for the cycle." O'Neil said he also met his wife that night.

"A school teacher had brought some of her students to meet the players. I went down to meet the students and saw this young lady. I introduced myself and we were married for 51 years.'

Seven years after his career ended, O'Neil was hired to coach the Chicago Cubs. Although O'Neil is proud of this, he said he has one regret. He did have an opportunity to be a general manager. He made it to the final cut, but not having a college degree came back to haunt him.

This experience is why O'Neil continues to stress education to students.

"America is the best. You can be anything you want to be, but competition is keen. You have to be prepared," he said.

O'Neil said his biggest accomplishment was creating the Negro League Baseball Museum in Kansas City, Mo. Some K-State students know his

legacy quite well. Edward King, sophomore in sociology, had heard O'Neil speak three times before.

"To get someone of his magnitude to speak to the community is an honor," King said.

#### PRO BOWL

Continued from page 6

skill in the first place?

The coaching situation also bothers me. If the Pro Bowl is supposed to be the NFI's All-Star game, then why are its coaches always proven losers?

Wouldn't you want someone who knows how to win the big game coaching your team?

Instead, the mustached ones, Bill Cowher and Andy Reid, who lost their respective conference championship games, will patrol the sidelines in beautiful Honolulu this Sunday while New England Coach Bill Belichik and St. Louis Coach Mike Marts kick back with their pork rinds to watch the game on TV.

I guess it suits them though. All Belichik did was win the Pats' first Super Bowl one year after New England went 5-11.

If I ruled the world, and mind you

# Valentine's Day not all roses for singles

BY NANCY HULL Kannas State Collegian

There's another holiday just around the corner. For some, this means a chance to indulge in love and happiness, but for others, it means a day of sadness.

Valentine's Day ranks up there with Christmas and New Year's Eve as far as depressing days, said Tony Jurich, professor of family studies and human services.

"Valentine's Day is a day to celebrate love and relationships and demonstrate outward affection. If there's no one to demonstrate outward affection to, there's a problem," Jurich said.

On holidays like Thanksgiving and Christmas, lonely people can donate their time to helping others, he said. The problem with Valentine's Day, he said, is that it's hard to help someone else.

"There gin't no breadbaskets and soup

kitchens on Valentine's Day," he bluntly

That, he said, leaves people vulnerable. "People are very vulnerable when they're down, especially when everyone

Psychologist Sherry Benton said Valentine's Day can be tough on college students since intimacy is the basic developmental task of the 20s.

else is feeling up," Jurich said.

The intimacy versus isolation struggle makes the holiday a day of evaluation, she said.

"It makes you think about how you're doing. If you're not doing well, it's a day when you feel bad about not having someone," said Benton, who works for university counseling services.

It's hard to avoid the evaluation since Valentine's Day is so focused on having a primary relationship, she said.

"Everywhere you turn, you're reminded

that you're in a bad relationship or alone," Benton said.

Jurich said this Valentine's Day might be

more stressful because of Sept. 11. He said everyone is twitchy and wants to be with the ones they trust and care

"That's not an extremely good thing to everybody," he said.

As a therapist, Jurich has worked with college students who have the Valentine's Day blues. In the late 1970s, a male student's girlfriend broke up with him three days before Valentine's Day because she wanted to spend Valentine's Day with someone else. The student overdosed on

pills and wound up at Lafene. When there's a problem in a dating relationship, furich said breaking up during the holidays is never good. There are down sides to breaking up before, during and after Valentine's Day, he said.

Breaking up before Valentine's Day can make bad feelings worse. Delivering the news on Valentine's Day comes across pretty harsh. And

ending things after Valentine's Day can say "we were phony baloney on Valentine's Day," he said.

The right time to break up is different for different people, but Jurich suggests telling someone your true feelings as quickly as possible.

Those who are single can sometimes put too much stock in someone else, he

For example, he said if a man tells a woman she's lost weight, she might take it as a put down.

"If you put that on top of ah already negative image, pretty soon, you're spiraling down," he said.

"It's not good to be critical on Valentine's Day."

What does Jurich say to those who are bummed out around Valentine's Day?

"The best thing is to spend time with people who make you happy."

# **Bush to make Kansas disaster relief decision**

BY MICHAEL WATSON

Kansus State Collegian

President Bush will announce this week whether Kansas will receive federal funds to help recover from last week's

Sen. Sam Brownback, R-Kan., and Sen. Pat Roberts, R-Kan., sent a letter of support for federal assistance through the Federal Emergency Management Agency (FEMA) on Monday. Now it is up to the president to decide if Kansas is declared a disaster area.

"We're hoping that the announcement would come soon, so people can start planning for the future and recover from the storms," said Erik Hotmire, communications director in Sen. Brownback's

With storm damage of this magnitude, a federal disaster declaration would enable Kansas to access the expertise and resources of trained federal experts and agencies, Gov. Bill Graves said in a press

Joy Moser, public relations officer of the Kansas Division of Emergency

Management in Topeka, said there are still 32,090 residents without electricity one week after freezing rain, sleet, snow and ice plagued northeast Kansas.

This is an improvement considering that Graves asked for assistance for 435,000 residents in 35 counties Monday.

After Monday's assessment of the damage, Graves also sent a letter to President Bush seeking assistance including temporary housing, individual and family grants, disaster unemployment assistance, legal services and small business administration disaster loans.

"We don't want to make a premature decision, but what generally happens is that the president will decide what counties, if any, are areas in need of disaster relief," Hotmire said.

If the area is declared disastrous, Bush will then decide how much money to allocate, he said.

The same process is used to assess damage from earthquakes, tornadoes, hurricanes and floods across the nation.

After seeing the damage firsthand, Brownback said he hopes to hear a declaration from Bush soon.

# Union adds golf simulator to recreational activities

Kaneas State Collegian

The K-State Student Union has added a golf simulator to the list of recreational activities offered in its basement.

The simulator was loaned to the Union by Full Swing Golf, located in San Diego, Calif., until Union administrators decide if they want to purchase it, Terri Eddy, recreation manager for the Union, said.

The simulator features a 9-by 10-foot screen, realistic surfaces and a grid to simplify putting. Players can choose from 53 different courses, select the weather conditions and play nine or 18 holes.

"It's good for people to work the kinks out before they go to a real course," Eddy

The simulator is essentially a large box, with surfaces for both right and left handed golfers. It includes surfaces resembling the fairway, sand traps and the rough. Sensors measure the speed, direction, spin and rise of the ball to predict where it would go if the player were on a real course.

Chad Myers, head golf professional at Colbert Hills Golf Course, said the simulator is good for a video game.

"Just like any Nintendo game, there are things it can't do," he said. "The distancing is sometimes off."

While the simulator has some shortcomings, Sarah Heffel, sophomore in social work and member of the women's golf team, said it shouldn't be expected to be a perfect simulation, but it does have its advantages.

"It is really useful for the golf team," she said. "It gives us a little more feedback than just practicing indoors, hitting into

nets. But the simulator is not just for avid

"My friends and I usually spend all day running back and forth chasing our balls," said Tony Sharp, senior in hotel and restaurant management. "The best thing about this for me is it saves me a long

walk." Myers and other local professionals have agreed to teach winter golf lessons during the winter months using the

"As a teacher, I would look more at your swing than at the ball swipe," Myers

For those not interested in lessons, the simulator is available during regular

In addition, there is a closest-to-the-

Nicole Donnert/

Collegian

hours. Prices for students are \$10 for 9 holes, \$15 for 18 holes and \$10 per hour for the driving range.

The Union is offering a special for the next two weeks where players can get 15 minutes of play for only \$2. Students can bring their own clubs or borrow from the Union free of charge.

o Union Recreation Presents: o

ull Swing Golf

pin contest. For \$1, a student gets four shots in an attempt to get their ball as close to the pin as they can. The winner receives 18 free holes of golf, and the second place winner receives nine free holes

Eddy expects the Union will have until the end of April to decide if they want to pay \$50,000 to keep the simulator.

# Drug use, production present problems in Riley County

Two Junction City men arrested for possession of meth in Manhattan on Tuesday

BY AMBER KOEHN nsay State Collegian

Riley County police officers arrested two men Tuesday evening after a vehicular search

revealed possession of drugs and firearms. Officers stopped a 1993 Chrysler in the 600 block of Tuttle Creek Boulevard around 11:30 p.m., after obtaining a search warrant

from the Junction City Police Department. The officers found two sets of measuring weight scales, two handguns, 18.7 grams of alleged methamphetamine and approxi-

mately \$5,214 in currency inside the vehicle. Michael J. Cook, 23, 948 Grant Ave., Apt. 271, Junction City, and Mike W. Pritchett, 22,

304 Grant Ave., Apt. 154, Junction City, were charged with possession of methamphetamine with intent to distribute.

In addition, Cook was charged with possession of drug paraphernalia, and Pritchett was charged with not having a Kansas drug tax stamp and criminal possession of a firearm.

All crimes are felonies and bond for each man was set at \$25,000.

RCPD Capt. Gary Grubbs said both men could be prosecuted at a federal level.

"They can be prosecuted federally, but as far as I know, it's still a local case," Grubbs

Grubbs said the decision whether to prosecute the men federally was up to the Riley County District Attorney.

Both Cook and Pritchett are still in custody at the Riley County Detention Facility.

### Police department to receive \$.5 million to combat drugs

BY BRYAN SCRIBNER

Kansau State Collegias

The Riley County Police Department has been secured \$500,000 in funding for its drug clean-up operations.

RCPD Director Mike Watson said the department applied for the funding in fall 2001. U.S. Rep. Jim Ryun, R-Kan., worked to obtain the funding, and he announced Tuesday that the money would be appropriated.

Watson said the police department

indicated to Ryun that Riley County needed financial assistance in its fight against drugs.

"We're like every community," he said. "We're not immune to drug problems, we have a drug problem here. We need to admit that."

The funding, Watson said, would probably not be received for several months. The entire \$500,000 most likely will be allocated to the RCPD as a lump

#### STATE IN BRIEF

#### Legislature approves bill to safeguard food supply

TOPEKA - Legislators took steps Tuesday to safeguard the state's food supply, approving a bill that makes it a crime to knowingly expose plants to infectious diseases.

The Senate advanced the bill on voice vote to final action Wednesday. The measure is designed to protect plants, raw agricultural products. processed feed or food products from infectious diseases. Intentional infection would become a felony.

#### **House committee approves** legislative redistricting map

TOPEKA - A House panel endorsed a legislative redistricting map Wednesday bringing the process closer to completion.

The committee redrawing the chamber's 125 districts endorsed a new plan, which leaders said would be voted on by the House next week.

The latest House map - developed by majority Republicans after negotiations with Democrats would add three districts in Johnson County and one in Sedgwick County and reduce the number of seats from rural areas.

The committee's map pits eight incumbents against each other in four districts. Previous versions had up to 10 Democrats facing each

#### **Group says most Kansans** back higher cigarette tax

TOPEKA - A health care group released a poll Tuesday showing most Kansans would support a higher tax on cigarettes.

Gov. Bill Graves has proposed increasing the state tax to 89 cents per pack from the current 24 cents to raise an estimated \$111 million in the fiscal year that starts July 1.

The increase is supported by the Kansas Health Care Access Coalition, made up of 34 health and social service groups.

A December survey of 500 registered Kansas voters found supporters of a higher tax outnumbered opponents 3-to-1, coalition members said at a Statehouse news conference. The poll had a margin of error of plus or minus 4.4 percentage points.

#### NATION IN BRIEF

#### Judge orders John Walker Lindh held pending trial

ALEXANDRIA, Va. - A federal judge, declaring that U.S.-born Taliban member John Walker Lindh has every incentive to flee from federal custody, ordered him held Wednesday pending a trial on

charges of conspiring to kill Americans.

After a hearing of about a hour at the U.S. Courthouse, Sewell rejected arguments that Lindh presented no danger of flight and scoffed at his lawyers assertions that he should be released in the custody of his father, Frank Lindh, and his mother, Marilyn Walker.

#### Labor secretary testifies in Enron collapse hearing

WASHINGTON, D.C. - Responding to the Enron collapse, Labor Secretary Elaine Chao on Wednesday told Congress that President Bush's proposal to revamp pension laws would strengthen retirement account protections for millions of workers.

Bush is asking Congress give workers greater flexibility to diversify their company savings accounts. aiming to prevent another Enron-style meltdown.

Thousands of Enron employees lost their retirement savings as the company stock plummeted and they were barred from selling it from their investment accounts.

Although some changes in pension laws are needed, the system is not irreparably broken and is a great success story, Chao said.

Bush's plan also would require employers to give workers quarterly statements with detailed information on their accounts and their rights to diversify holdings, Chao noted. Employees would be allowed to sell company stock contributed by their employer to their 401(k) after a threeyear period.

A full student section has become a constant sight at women's basketball games. The tradition of holding newspapers up to ignore the opposing team's starting lineup introductions has been revitalized.

### GTA shares love of acting

BY LINDSAY FETTERMAN Kansas Stato Collegian

nights!" Students who were once calmly strolling around the room frantically rush to find a

partner. Once they find partners, they jump on their backs and hold their arms up high in the air. The students who are last are sent back to their seats.

They are playing a game of knights, guards and foot soldiers in Alyson Schacherer's Fundamentals of Acting class. The game consists of students finding a partner and getting into the pose that Schacherer selects.

This game is nothing out of the ordinary for Schacherer's classes. The second-year graduate student in theater tries to make her classes fun with lots of vocal work and scene work.

Schacherer, an Iowa native, became serious about acting her freshman year. After doing a number of studentwritten one acts, Schacherer met people who wanted to do theater for the same reasons she did and was inspired.

Floating around between a premedical, biology degree to public relations to radio and TV, Schacherer finally settled on a major in theater.

"I realized what I really loved and what made me truly happy," Schacherer said of her decision to major in theater. As an undergraduate at both George

Washington University in Washington, D.C., and Southwest State University in Marshall, Minn., Schacherer acted in many plays. "West Side Story" is among her favorites.

Schacherer continues to act at K-State. She was in "Two Gentlemen in Verona," "Arcadia" and "The Crucible."

In April, she will be acting in a student-written and directed play called "The Art of Conquering Aja."

Schacherer graduates in May and does not know where she will go next. She wants to pursue a career in theater and possibly film.

#### ON RECORD

#### **CAMPUS** BULLETINS

Campus Calendar is the Collegian's campus bulletin board service. Items in the calendar can be published up to three times. Items might not appear because of space constraints but are guaranteed to appear on the day of the activity. # Candidates announce campaign intentions

Kaneas State Collegian

The third pair of student body presidential candidates to enter the race announced their intentions to run for office Wednesday In the Union Plaza.

Al Gard, senior in English, will run for president, and Jon Krasnoff, junior in public relations, will run for vice presi-

"Our main campaign goal is to increase intellectual diversity on campus," Gard said.

"Meaning the exchange of ideas, values and world views being increased to better the community at large.

Krasnoff said their overall goal is to make students happier to be

They want to increase school spirit, he said.

During the next few weeks, the candidates said they hope to address education, environmental efficiency and campus

program issues. They said they also intend to increase fiscal responsibility by letting students know how money from upcoming tuition increases will be used.

"A lot more people should know exactly what their money is going towards," Gard said.

Gard said they hope to promote intellectually diversified education to students and faculty members, an education that allows students to study in more subjects outside of their major.

The candidates said they also plan to make the campus more energy efficient by implementing a recycling program to benefit the environment.

"We believe that if we're respecting the environment, we are also respecting ourselves," Krasnoff said.

"The green movement was about 10 years ago and there are recycling programs all across America, but we don't have one," he said.

Sarah Keck, junior in biology, said she attended Wednesday's announcement because she supports Gard and Krasnoff's

campaign intentions.

"I think they are tackling things that actually can be changed rather than things that ideally should be changed, but are way too much to tackle in a one-year term," Keck said.

Brandon Kidwell, junior in political science, also attended the event.

He said he supports their campaign because he believes the candidates are genuine with their campaign goals.

They talk about issues that they care about, he said, not just issues that they think will get them elected. He also believes their campaign goals will be successful.

"I believe that they will work to get the job done," he said. "Barriers might come their way if they actually get elected.

"They might discover that it's actually harder to get these things done than they had initially planned, but I feel that they have the fortitude enough to persevere through that and actually accomplish their goals.

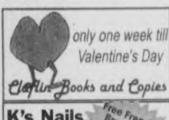

Al Gard, senior In English, left, and Jon Krasnoff, Junior in mass communications, right, announced their intention Wednesday to run for student body president and vice president. The duo sald energy conservation was one of their main points of emphasis.

### Citywide curbside recycling program will be well worth the cost

OUR VOICE

and debated by the editorial board and written after a majority opinion is formed. OUR VOICE is the Collegian's official opinion.

Jessica Pitts **April Middleton Nancy Foster** Dana Strongin Alyson Raletz Nancy Hull Matt Killingsworth Dan Smith **Paul Restivo** Katle Lane JJ Duncan Zach Long **Nicole Donnert** Micah Hawkinson

A task force will prepare a recycling plan to be discussed by Manhattan's City Commission.

The plan would require those living in single-family residences to pay money for a curbside recycling program. Therefore, all residents who have curbside trash service would have to pay every month for recycling service.

This is a sound idea. It will encourage people living in Manhattan to recycle.

Currently, residents have to take their

recyclables to the center themselves. If items are picked up at the curb, people are more likely to separate them and set them out for retrieval.

Charging money also will give residents incentive to recycle. People living in houses already are paying for pickup. Most people are not so lazy that they would refuse to set out a separate bag of plastics and newsprint.

residents a fee for this service. It will

start a program to promote recycling in the city.

Charging money only would be a poor idea if the fee were too large. Manhattan residents should not be charged an excessive fee for recycling service.

But the small charge is worth the cost on residents. Recycling will help reduce buildup in landfills and reduce waste produced by the city.

# **CAMPUS**

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

I have a solution for prostitution - girls need to put out more.

Hey, Coach Woolridge, you're a lot cooler now.

Hallelujah, praise the Lord. The sundaecones are back at the Derb.

Matt Killingsworth, if anyone ever loves you, it should be considered self-destructive behavior.

Single women want flowers, single men want action. Let's make a deal.

I just wanted to know why there was a pro-KU comment in the Fourum.

Hey, is it a bad thing that my girlfriend cancels our dates to play Dr. Mario?

Hey, Kyle Brownback, do the pathetic

losers usually keep you in the loop? The power of porn: it makes those

lonely nights not quite so lonely.

I noticed we have a giant fork statue outside of King Hall, and I was wondering when we were going to get the giant knife and spoon so I can eat.

1 hate Valentine's Day. The best part of it is the day after, half price candy.

Where are all the single women at?

Coach Wooldridge, you truly are the best K-State fan of all.

Madonna should be publicly beaten for her rendition of "American Pie."

Yeah, DJ Aturnie needs to pay his tab at the bar.

Yeah. Matt Killingsworth, you couldn't find a better comparison than a wire coathanger for your column? I have one word for you - tacky.

The K-State Athletic Ticket Department needs to pull their heads out of their butts and actually let people into the gates when they have a valid ticket.

You think you know, but you have no idea. This is the diary of two stoned girls.

Give props to the person who admitted

to watching Dawson's Creek.

Yes, only 77 days until April 20.

Since it's winter now, my roommate and I had to start smoking weed in our dorm instead of outside. But don't worry, we light a lot of candles, so it doesn't smell bad.

Dawson's Creek only bashes fraternities because of their audience - they're all nerds.

If a guy fake bakes and pierces his ear, he's a major tool. If he fake bakes, pierces his ear and wears pantyhose to class, he's a KU student.

Leisuse Hall is a freaking maze.

So all three single girls out there want flowers? I think I can handle that.

There are only two comics in this paper. It would be nice if we could read them.

# Beyond color

# Profiling at airports helps to ensure safety

acial profiling walks a fine line of

But considering the circumstances since Sept. 11, no one can argue against better, more efficient security at airports.

Since that horrific day, airports have adopted a system of randomly selecting and

searching passengers before they board an airplane. Of course, those "randomly" selected tend to be young, dark-skinned

this policy appealing. But here is the million-dollar question, or in this case, the life-saving question: Is this wrong?

Racial profiling has an evil side which threatens social justice. But in this case, it is not for an unjust cause.

The purpose is not persecution or maltreatment of innocent people, but rather to ensure the safety of countless

It is hard to rationalize the violation of an individual's rights. But in times of national emergency, some civil liberties might

be compromised. The sacrifice of the few is made for the benefit of the many. We've done this before. In both world wars, we selected one profile - young males - from the population to serve in a purpose worth fighting for. Thousands of them lost more than

just civil liberties. Yet in doing so, they helped preserve the rights and liberties of millions of others.

Now we are concerned that racial profiling is diluting those rights. That seems to be a legitimate argument.

On the contrary, safety of human life takes precedence over protection of civil liberties.

Who wants to convince the families of the 5,000 victims in the Sept. 11 attacks that it would have been improper to pull people like Mohammed Atta and Ahmed al-Haznawi out of the line boarding the plane?

It is easy to say it in hindsight, but we might have been able to stop them had we known what profile to look for.

There is a catch. Racial profiling would be completely effective if all terrorists were young. dark-skinned males.

But what about people like Richard Reid, or even Timothy McVeigh?

If they were to be included in the profile-search for terrorists, then it would have to be expanded to include all young males. Interestingly, I fit the same demographics of Reid

and McVeigh: I am a young white male. I would have to be searched and questioned before boarding a If this translates into better, more efficient airport

security, I have no qualms - just as long as I make my flight. Although, I would still be slightly irritated.

Countries under constant threat of terrorism, like Israel, have no problem with racial profiling. someone remotely fits a terrorist profile, then he can expect to be detained and interviewed.

According to Industry Airline Information, security for El Al Israel Airlines begins well before takeoff.

Passengers' criminal records are checked and security guards question passengers and physically examine their carry-on luggage. Security experts in Israel said it is not surprising

the hijackers were able to board their respective aircrafts Sept. 11. They argue that had their security methods been employed in the United States, the terrorist attacks

might have been thwarted. Plans for security must be modeled according to

If the threat is significant enough and can be legitimately associated with a certain demographic, then so be it. The cost of not doing so could be human life.

Tanner is a graduate student in journalism. You can e-mail him at tce2225@ksu.edu.

# Racial profiling leads to confusion, problems

ince Sept. 11, airport security has obviously become a major concern for everyone. Airline officials are now constantly looking for ways to tighten security. Fortunately, most of their ideas are very good ones.

Micah Hawkinson

And then, there's racial profiling.

It doesn't take a lot of common sense to see that racial profiling would be useless as a security measure in airports. Implementing it would be a considerable problem.

What races would be profiled? How would one determine that a certain race is more likely to blow up things than any

It would be useless to compile statistics from past attacks. Regardless of the results, powerful terrorist groups would simply use someone who didn't fit the profile.

Good terrorists aren't going to make many mistakes and certainly not one so obvious as planting a bomb on a prime suspect. The absences of certain races on the high risk list would be

You can bet that Anglo-Saxon won't be on the list of profiled races, no matter how many Timothy McVeighs and John Walkers there are in our nation.

That would simply be an unacceptable action, because it would, um, interfere with, uh, commerce. Or something.

Anyway, it would not be good. And it's not just because the white people are in control. Really.

A more important concern is how to determine race. In today's world, racial mixing is rampant. If Polish people were being profiled, would my

friend who is one eighth Polish be included? Would second-generation Polish-Americans be included?

Where would the line be drawn? For a really smart group of terrorists, racial profiling could be the perfect decoy. What would stop them from placing an officially

suspicious person on a flight and slipping a weapon aboard with a less suspicious person while security

Racial profiling would add a meaningless detail to security checks. It would create nothing but confu-

It also raises some significant moral problems. In a nation where the innocent are ostensibly innocent until proven guilty, racial profiling would assume probable guilt on the basis of DNA.

Last month we celebrated Martin Luther King Ir.'s dream of a world where everyone was judged by the quality of his or her character, not by skin

Most Americans agree with this sentiment. We say we want a world where pigmentation isn't a factor in judging anyone.

Will we abandon these ideals when they matter most? Racial profiling goes against everything America stands for. To single out a few racial groups as more likely to be terrorists than others is

It's like finding out what age group commits rape the most and then suspecting everyone in that age group. You can't help what color your skin is (unless you're Michael Jackson). Should people be suspected of terrorism just

because their parents aren't white Protestants? There are plenty of other, better alternatives. ID cards, increased gate security and advanced scanning technology are all valid

profiling when other security choices are available. Profiling is necessary at airports. By all means, we should check for criminal records, associations with known terrorists and anarchist grade-school teachers.

We shouldn't be wasting our time on something like racial

# Campus drive provides needed blood

BY JILL LANZRATH
Kansas State Collegion

K-State students were given the opportunity to support the American Red Cross by donating

blood.

K-State sponsored a blood drive at the Chester E. Peters Recreation Complex on Tuesday and Wednesday to give students, faculty and staff an opportunity to donate.

"We are in desperate need of blood right now," said Nancy Powell, donor resources representative for the American Red Cross

The weather last week caused the organization to cancel drives.

"We have a large number of students and faculty that give frequently on campus," Powell said.

The Manhattan community has its own drive, so this drive was geared toward people involved on K-State's campus, Powell said.

American Red Cross officials like to allow involvement between the Red Cross and programs on campus.

The American Red Cross found a large number of people willing to donate blood as well as first-time donors after the attacks on Sept. 11.

Blood is a perishable product, so blood drives are a continuous process, and blood is still needed. The K-State campus gave a total of 138 units of blood during the two-day drive.

Students also can take advan-

Karen Mikols/Collegian

Abbey Koch, freshman in open-option, reviews for a mass communications test while she gives blood Wednesday at the Chester E. Peters Recreation Complex. Koch donated blood during Homecoming Week and decided to give again.

tage of opportunities to volunteer. Jamie Runnebaum, freshman in life sciences, works as a volunteer with the American

Red Cross.

"I want to work in health, so this is a good way for me to find out if this is really what I want to

do," she said.

"They asked me to just watch
them and make sure they don't
pass out. Everybody's been doing
really well though."

Annie Rose and Stephanie Bartlett, both seniors in elementary education, have donated before

"They called me up to let me know what was going on. We were happy to give," Rose said.

As a first time donor, Michelle Roudybush, freshman in openoption, was encouraged by a friend, as well as a professor to come.

"I was afraid I was going to

pass out at first, but everything went great," Roudybush said.

K-State has sponsored Red Cross blood drives for more than 30 years.

The Red Cross will return to the K-State campus April 8-12 for the annual five-day spring blood drive.

Minimum requirements for donors are to be over the age of 17 and to weigh at least 110 pounds.

### Amendment freezes student loan rates

BY RYAN DONAHUE

Kansas State Collegian

Future K-State students receiving loans will be less affected by unstable interest rates.

The higher education bill of 1965 was amended this past January by Congress to include lower interest rate caps for student loans.

Now, student loan interest rates can go no higher than 8.25 percent. The new amendment caps and freezes the student rate at 6.8 percent. The new amendment comes into effect July 1, 2006.

"This benefits everyone involved in the loan process," Torn Melecki, vice president for policy research and planning at the national student loan program, said.

The current interest rates for student loans is 5.99 percent, lower than it has ever been in the past 30 years, Melecki said.

The new interest rate cap, while lower than the current cap, is not exactly the best thing for students, said Rita Jones, student loan officer with Commerce Bank and Trust.

"This is only beneficial if rates sky-rocket," Jones said.

Jones is concerned with the amendment's freezing of student rates at 6.8 percent. The freezing of rates does not allow students to benefit from the possibility of lower market rates.

The federal government uses a formula based on the selling rate of government treasury bills to figure the student loan interest rate.

With the current provisions, students get the benefit of lower interest rates when they become available and are protected from unstable markets. Under the new provisions, students will have to pay 6.8 percent for their loans no matter where the market interest rate is,

"These new provisions replace a clause in the higher education bill that as of July 1, 2003, would drive the interest rates so low that it would not be economically feasible for banks to make student loans." Melecki said.

Melecki said if the current provisions were not changed, banks would stop making student loans available. Interest rates would be too low for banks to make money off student loans.

"Banks are not going to do something that is costing them money," Melecki said.

Melecki said banks might still offer interest rates lower than 6.8 percent for the purpose of competition.

"Competition will be a good thing if interest rates are lower," Melecki said.

The new amendments were brought up to Congress by student organizations, Jones said.

"They feel more comfortable with a fixed rate, but no one really understood where the student organiza-

tions were coming from," Jones said.

Melecki said the student organizations made a correct decision by

asking for a fixed and frozen rate.

"They looked at the last 10 years and figured that it would come out to about 6.8 percent over the life of the student loan." Melecki said.

While the new amendments are being received with mixed reviews by members of the lending community, both lones and Melecki agree the current provisions need changed.

Jones said the amendment will be changed again before it takes effect in 2006.

"Basically, they extended the current process until a better fix could be made," Jones said.

# DOUBLE DIP

K-State freshman Laurie Koehn (10) drives around Missouri's Evan Unrau, left, during the first half of Tuesday's game in Columbia. The Wildcats travel to Lincoln on Saturday to face Nebraska.

# Women get final OU tune-up Sunday against Cornhuskers

BY DAN SMITH

Kiness State Collegio

The Nebraska Cornhuskers will try to play the role of spoiler this weekend in Lincoln.

With No. 11/10 K-State's showdown against No. 3/4 Oklahoma just less than a week away, Coach Deb Patterson's Wildcats will get their last tune-up

> the Huskers. 9-2) will attempt

Sunday against

to build on

Tuesday night's

solid defensive

effort against the

Huskers (12-11, 2-

K-State (21-3,

Sunday showdown No. 11/10 K-State (21-3, 9-2) at Nebraska (12-11, 2-8) When: Sunday, 1 p.m.

Where: Bob Devaney Sports Center (13,500) Lincoln, Neb.

**WIBW-AM 580** 

8), while trying not to look past Nebraska to next Wednesday's battle with the

Sooners for the Big 12 lead. The Cats held Missouri to 39-percent shooting Tuesday in Columbia and limited the Tigers' leading scorer, Kerensa Barr, to only eight points on the night.

"They put a lot of pressure on us on defense," Barr said after the game. "That's what I was most impressed with. We knew they were a really good offensive team, but they really stepped up the D tonight.

That was K-State's mission from the outset. Patterson said.

After allowing No. 16/12 Iowa State to shoot close to 58 percent from the field Feb. 2, freshman Megan Mahoney said the Wildcat coach made it a point to have her team ready for the Tigers.

"That was a big thing coming into this game because our defense against Iowa State was pretty poor," Mahoney said. "We needed to step it up a big level."

The Cats accomplished this, holding MU to just one shot on many of its possessions while converting on several fast-break opportunities in transition to break out a big lead in the second

K-State will face a team similar to Missouri this weekend in Nebraska. Both teams feature some of the league's most dangerous scoring threats. For the Tigers, it was Barr and forward Evan Unrau,

"That was a big thing coming into this game because our defense against Iowa State was pretty poor. We needed to step it up a big level."

Megan Mahoney, freshman guard

and for the Huskers, it's sophomore K.C. Cowgill

and freshman Katie Robinette. In the teams' Jan. 12 meeting in Manhattan, the Cats managed to hold Nebraska to 32.1-percent shooting, but allowed the Huskers to keep it close behind solid efforts from Robinette (16 points, 12 rebounds) and Cowgill (15 points on five three-

Nebraska's main gun, junior Keasha Cannon, was kept relatively quiet, but the Husker guard enters Sunday's matchup averaging 12.4 points, 7.9 rebounds and 4.9 assists per contest.

K-State will look to counter Nebraska's offense with a triple-threat of its own, including balance both inside and outside, Missouri Coach Cindy

"The main thing is they just pick you apart, and you have to pick your poison when you play them - whether you're going to die by the three, or you're going to die by the two, because they're such great shooters," she said. "They're shooting basically the same percentage from either one.

Freshman Kendra Wecker gave the Husker defense fits in the post the first time around by scoring 21 points and grabbing 12 rebounds. She will lead the Cats into Lincoln this weekend after recording her ninth double-double of the season against the Tigers earlier this week.

Laurie Koehn and Nicole Ohlde are the other two parts of the puzzle, Stein said.

Koehn's percentage from beyond the arc is hovering around 45 percent, and Ohlde comes in averaging 18.6 points and 8.1 rebounds per game, giving the Cats a trio of scorers that could give Nebraska some trouble this weekend.

"When you have that combination of a great shooter, very solid ball-handler and good athleticism, that can be a deadly combination," Stein

K-State's Nick Williams (24) looks for room in the lane against Missouri on Jan 12. The Wildcats play Nebraska on Saturday.

Nicole Donnert/

# Cats set to take on Nebraska in Saturday battle of similars

BY DEREK BOSS

Rango Stote Collegian

If K-State has a mirror image in the Big 12, it's probably Nebraska.

The Wildcats (9-11) and Cornhuskers (10-10) each post 3-6 records in the conference. The two teams sit No. 11 and No. 10, respectively, in the Big 12. Both schools have head coaches - Jim Wooldridge and Barry Collier in their second seasons with the program.

And the similarities don't end there.

K-State started Big 12 play 1-5 before pulling back-toback upsets over Texas and No. 9 Oklahoma State, and then fell by 27 points to No. 2 Kansas in its last outing.

Nebraska also started 1-5 in the conference, then bounced back with two straight wins over lowa State and No. 20 Texas Tech, before losing to Colorado on Tuesday.

Quite ironic. But something will have to give Saturday. Wooldridge said he hopes it's not a mental lapse because as his team can't let its lopsided loss to Kansas

carry over to this weekend's game "We've had three games in six days, and I think we've accomplished a lot this week." Wooldridge said Monday. "We'll take a day off, regroup, and come back and play

down the home stretch of our conference season." Nebraska is led by a trio of guards. Senior Cary Cochran is posting 13.2 points per game in starting all 20 contests, freshman Jake Muhleisen adds 11.2-ppg and

Senior John Robinson adds Saturday showdown 10.6 points. K-State (9-11, 3-6) at Nebraska (10-10, 3-6)

Meanwhile, senior Larry Reid continues to top K-State's offense. notching 17.9 ppg in conference play, good for sixth in

the Big 12. He has

scored double figures in eight straight, including a seasonhigh 27 against KU.

When: Saturday, 12:45 p.m. Where: Bob Devaney Sports Center

Radio: Wildcat Sports Network:

WIBW Channel 13

WIBW-AM 580

(13,500) Lincoln, Neb.

Senior Phineas Atchison also is solidifying his presence off the bench for the Cats, adding 16 points against the Hawks. That marks the seventh time in the last 10 games that the senior has posted double-digit scoring.

But Reid and Atchison were the majority of K-State's offense against KU. Despite the Cats shooting nearly 47 percent against a top-5 team, and 50 percent over the last three games, Reid said the Cats can still improve.

"I think we could've played better," Reid said Monday. "If we could've got a little more from other people to

contribute, our game would've been better." Against the Hawks, the game was over in the first half,

SAN BASKETBALL ON PAGE 10

# Women don't have to show any skin to win

The biggest week in women's athletics will hit the nation in less than a month. No, not the beginning of March Madness,

which pits the best women's basketball teams against one another to determine the national

champion. Sure, K-State could be

seeded high and play deep into the tournament, but the beginning of a basketball dynasty pales in comparison to one thing in the mind of certain media executives - the annual Sports Illustrated Swimsuit Issue.

I will not begin to argue the appropriateness of swimsuit models in a sports magazine. It's a losing proposition. However, the fact that Sports Illustrated's coverage of women's sports consists almost entirely of one issue of scantily clad (or in some cases, merely paint clad) females seems just a little inappropriate considering the rising popularity of women's basketball.

Nonetheless, the babes could soon be challenged by the ballers for coverage. As a result, here is a breakdown of the two

"sports" competing for SI's pages.

#### Women ballers

- Excite teenage girls and parents looking for more realistic role models for their daughters in an appearance-driven culture.
- Could break down and school most guys on the court.
- Look sweaty and tug at their jerseys when
- Wear uniforms, including long shorts. ■ Receive extra recognition for academic achievements. Ability to speak intelligently is
- considered a good thing. Have vast knowledge of the pick and roll, zone defenses, weight lifting and ESPN Sportscenter.
- Are fun to watch, especially in a sold-out arena

#### **Nearly Nude Babes**

- Titillate teenage boys and alleviate loneli-
- ness for single guys. Could make most guys break down and
- cry through teasing. Look sweaty and tug at their swim top
- when being seductive. Often wear strategically placed sand. Could still sell magazines if words were
- were pictured with bags over their heads. Experts on dieting, remaining motionless for long periods of time and clothing

eliminated from the issue and the models

■ Generally viewed in a more solitary

#### Verdict

materials.

- Ballers All it takes for teenage boys to get excited is for a female to walk within a mile radius of them.
- Even Both make guys look like idiots.

- Babes The swimsuit issue isn't a best-
- seller for nothing. ■ Babes — See above.
- Ballers Skin is nice for a couple of minutes, but nobody has ever married a centerfold picture.
- Ballers The babes live a lifestyle that no guy could withstand for more than a couple hours.
- Ballers Unless you're a loser.

The ballers are the big winners. However, since the Swimsuit Issue isn't going anywhere for a long time, Sports Illustrated and other sports magazines should seriously consider giving women sports coverage beyond the lawsuit-avoiding Women's SI.

In the end, it might always take skin to win, but skills might eventually pay the bills.

# Role reversal

Marjorie, played by Erin Fast, reaches in desperation for a bottle of hair spray to spray in her attacker's face in self-defense. Her attacker Raoul, played by George Stavropoulous, planned the attack on Marjorie, entering her home unexpectedly.

# "Extremities" puts attacker in victim's shoes

BY JENNIFER FARR

Kansan State Collegist

"Extremities" is like being taken through one the seven levels of hell.

Entering the lazy beginning scene, it seems unlikely that this day could be different than any

The woman is any woman, not fast, loose or dressed in a different style of clothing. And the man could be considered good-looking. Sally Bailey, director of "Extremities," said this is what makes the

play so scary, because it could be anyone. Written by William Mastrosiome, "Extremities" is a fantasy play based upon what a woman would do to her attacker if she could possibly switch the roles.

Erin Fast, senior in theater, plays Marjorie who is caught off-guard by her attacker, Raoul, played by George Stavropoulous, sophomore in theater.

Fast said the play isn't just about physical violence, but emotional violence as well.

"This play isn't about rape, per se," Fast said. "This is about how a person reacts in a violent situation, and in terms of violence, we shared the play equally. We are both the bad

guys. This is about violence, not rape.

The emotional baggage that is added within this conflict is the relationship that Marjorie has with her two friends Patricia, played by Chantel Green, sophomore in theater, and Terry, played by Alissa Duncan, senior in theater.

Green said Marjorie feels betrayed because her friends do not seem to support her and also because of the contradictory feelings they have of whether or not to support Raoul.

"My character has such conflicting feelings, and it's hard for her to decide what exactly she feels," Green said.

"On one hand, I relate to Marjorie who's my friend, and then Raoul who's obviously the victim, which is hard because I always support the

Stavropoulous said the hardest part of playing Raoul was acting out the rape scene with Fast. The scene required them to have an enormous amount of trust in each other, he said.

All of the attack scenes were choreographed. Stavropoulous said.

In one scene, he tries to smother Fast with a pillow. While he is pulling the pillow away from her to protect her from actually smothering, Fast is actually pulling the pillow toward herself to make the

Jenny Braniff/Colle

Marjorle, played by Erin Fast, and her roommate Terry, played by Alissa Duncan, try to figure out what they are going to do with the man Marjorie locked in the fireplace after he tried to rape her.

"I think it's important for the audience to realize that we are actors and this is what we do, not who we are."

> George Stavropoulous, sophomore in theater

scene look believable.

"I think it's important for the audience to realize that we are actors and this is what we do, not who we are," Stavropoulous said. "This was a difficult kind of role for me because it was the most intense that I've ever done. To be so violent, so dark-it's dangerous to get into that side of you."

Bailey said one of the reasons she picked "Extremities" was to raise people's awareness about violence during the month of nonviolence.

She said that while it is an educational tool for people about rape, it is also a motivational tool for people to look at the realities we choose to ignore.

"I hope that this play raises people's awareness about violence and violence done to women specifically," Bailey said.

"And I hope that it will open a dialogue to encourage people in the campaign against nonviolence.

# misdirection

BY BRENT ENGSTROM - MONKEYBOYCOMIC@HOTMAIL.COM

# Committee develops recycling plans

BY MICHAEL WATSON Kmsax State Collegian

- \_ If people want a curbside recycling program in Manhattan, they are going to have to speak up, Mayor Bruce Snead said at

Wednesday. City surveys and public comments have shown a desire for a curbside recycling program. This effort would reduce household waste.

the Recycling Task Force meeting

After the task force's 10th meeting since the committee began in August 2001, the group will present program options at the City Commission work session on Feb. 26.

"Prospects of a recycling program are diminished if people don't speak up," Snead said. People who want this to happen need to be at the meeting."

At the public interest meeting on recycling Jan. 28 at City Hall, many people spoke in support of implementing a curbside recycling program.

Only one person was against the program, because of the effects it might have towards

trash haulers.

Three financing and implementation options would be proposed to the City Commission:

- Place a city fee on utility bills making the city responsible for collecting fees. The city would either contract for the service or provide the service itself.
- Create a fee on residential property tax bills that would allow the city to receive funds from tax payments. The city would contract or provide the service itself.
- Add a mandatory fee to trashhauling bills. The city would require refuse haulers to assess the recycling fee as a condition for operation in the city. The city would receive funds forwarded from the private refuse haulers and would either contract for or provide the service itself.

Judy Willingham, recycling task force chair, said costs of the program are anticipated to be \$2.50 to \$4 per month for a weekly recycling service by a private contractor.

The task force is recommending voluntary use of the

#### Recycling facts

- Nearly 50,000 tons of waste is discarded through the Riley County Transfer Station each year. About 13,700 tons of the waste comes from residential sources in the Manhattan area. It is estimated that more than 34 percent of residen waste is material that would be recyclable through existing local channels if it can be separated and
- There are now more than 9,700 recycling programs in the nation. More than 20 years ago there were none. Nationally, costs for recycling programs cost \$2.50 to \$5.

To read more about Manhattan's curbside recycling proposal, see the Recycling Task Force link at www.ci.manhattan.ks.us.

Source: Mayor's Recycling Task Force

service, but said payments would need to be mandatory.

A Community Attitude Survey conducted in 1999 showed that 87 percent of the respondents would pay from \$1 to \$5 per month, and 13 percent responded that they would pay \$6 to \$10 for the program.

The program is limited to single-family residences or other housing units with individual curbside trash pickups. Phases for additional housing units could be added later.

Materials to be recycled in the program include newsprint, No. 1 and No. 2 clear plastic beverage containers, aluminum cans, steel cans, and brown, green and clear glass bottles.

"Why not all plastics?" Jonathan Thomforde, junior in landscape architecture, said at the public interest meeting last week.

"We need to recycle all the petroleum products we can. I find I try to hide my No. 3 plastics in the rest of my plastics to recycle."

Bill Eberle, land resource

specialist at K-State and task force member, said not all recyclables can be included in phase one of the curbside recycling project. Because of curbside sorting, there are a limited number of items that can be accepted due to a limited number of bins on collection trucks.

#### SERVICES

Theta Xi President Jarrod Reimer said musical performances and a slide show presentation are being planned for the service. He said anyone in attendance will be encouraged to stand and speak in remembrance of Miller.

Reimer said many of Miller's friends were not able to attend the Jan. 31 funeral because of poor weather conditions. The service will offer students a chance to hear stories and share in remembering Miller's life, he said.

Don Fallon, coordinator of religious activities, said the three services were planned for today, Friday and Monday to avoid conflicts in scheduling. Since five of the deaths occurred before or during winter break, he said scheduling the services was a matter of timing.

We always respond to what the students or living groups desire," he said. "We're responding to their requests and their needs.

"We're glad to do it."

#### RCPD

Continued from page 1

sum, he said.

Watson said Riley County has a problem with users and distributors of drugs. These people often commit crimes or become victims of crimes.

The most popular drug in Manhattan is marijuana, but Watson said methamphetamines take a close second. The money will be used for all types of drug prevention.

"For the police department, it will provide training, equipment and resources to be used against the sale and use of illegal drugs," Watson said. "It will allow us to make this a safer community."

According to a press release, the money was appropriated as part of a Commerce, Justice and State Appropriations Act, which President Bush signed into law in

Watson said the police department is appreciative of Ryun's efforts in helping secure the funding.

"We are very pleased that Representative Ryun saw a need here," he said.

# Anonymous donation helps habitat

BY MICHAEL WATSON

It is very rare for Manhattan's Habitat for Humanity to receive individual donations to build houses for low-income applicants.

That is why an anonymous donation of \$27,000 from a family recognized as the SEVI Foundation. the anonymous foundation, was such a shock. Executive Director Elise Lambert said.

Most donations to Habitat for Humanity come from Builder's Club funds, where the members pledge to donate a certain amount of money when ground is broken for a new home.

"It was totally unexpected," Lambert said. "We usually pursue family foundations or grants, but

Volunteering

Contact Habitat for Humanity at 537-7545 to volunteer to help construct the homes. Or you can send an e-mail to mhfhvolunteer@hotmail.com

they called us. They had an interest in Habitat for Humanity and wanted to do something local."

The donation will pay the rest of the finances needed to complete the \$42,500 home at 1918 Lincoln Drive, the program's 11th house.

"This donation ranks among the top donations we have received," Dave Redmon, Habitat for Humanity development and church relations committee member, said. "The Ogden house was built entirely from a single donor, budgeted money

from an insurance agency. This is not the largest, but certainly one of the larger ones.

Lambert said this donation, made in late December, is important because the project on Lincoln Drive was started without a partner to help pay for the construction costs.

Without a partner, if fund-raising efforts fail to produce money to continue building, the project would have been put on hold. She said the project wasn't to that point yet, but it could have been.

"The donation was a blessing," she said. "It is very important and allows us to not worry about the finances of this house. We can go ahead and focus on our next home."

Lambert said this is the last time construction will begin without having the full amount of funding

"Having the money ahead of time makes it easier for everyone," she said. "Our next partnership will be with the Knights of Columbus. They are in the process of raising money

Redmon said fund raising for projects is an ongoing process. Now that the 11th house is paid for, it is time to start raising money for the 12th house,

He said Habitat for Humanity raises funds through the Builder's Club, direct solicitation, selling candles and collecting group donations from churches and other organizations. He said the program appreciates all donations.

Thank goodness people donate, or we wouldn't be alive," Redmon said.

# Senate blocks Democratic economic stimulus bill

BY CURT ANDERSON

The Associated Press

WASHINGTON, D.C. — A
Democratic economic stimulus bill
was blocked Wednesday in the
Senate by Republicans, who then
also lost a vote on their own version,
guaranteeing that recession relief
efforts will end in gridlock. The
Senate did approve an extension of
jobless benefits.

The vote was 56-39 on legislation introduced by Senate Majority Leader Tom Daschle, D-S.D., which fell four votes short of the 60 needed to prevail under Senate procedural rules. The Daschle bill would have provided \$69 billion in stimulus this year.

The Senate then voted 48-47, again short of the 60-vote threshold, to block a House-passed \$89 billion stimulus bill backed by President Bush. Daschle then pulled the issue from the Senate floor.

By unanimous voice vote, the Senate did approve a measure by Daschle for a simple 13-week extension of jobless benefits for the unemployed, which are now limited to 26 weeks. White House spokesman Ari Fleischer, voicing frustration over failure of the stimulus bill, said that \$8 billion aid extension is "the least they should do." That aid extension now goes to the House.

Daschle said Republicans were to blame for insisting on attaching major tax cuts with little bearing on the immediate recession, such an amendments ensuring the estate tax repeal stays in place and making all of the 10-year, \$1.35 trillion tax cut permanent. Both wouldn't take effect until the next decade.

"Frankly, it has nothing to do with the recession of 2002," Daschle said before the vote.

Republicans condemned Daschle's decision to move on to other business. Minority Leader Trent Lott, R-Miss., said the failure to act is "sending a very dangerous and reckless message to an uncertain economy."

Bush, returning Tuesday from a trip to Pittsburgh, said he, too, was disappointed. The president has been pushing since October for an economic stimulus plan that blended individual and business tax cuts with aid to the jobless to reverse a recession that got worse after the Sept. 11 terror attacks.

"Our economy, while there's some good news, needs more stimulus," Bush said upon arriving at the White House. "Workers need, help, and we need to stimulate the "economy."

Republicans and Democrats were unable to compromise on the level of tax relief in the package, particularly an acceleration of individual income tax cuts, and how best to deliver aid to the unemployed. The GOP-led House passed two different measures last year, but neither could clear the 60-vote threshold necessary to pass a Senate divided between 50 Democrats, 49 Republicans and an Independent.

Daschle, who was labeled an "obstructionist" by Republicans because of the stimulus deadlock, suggested in January that the Senate pass a bare-bones stimulus bill composed of the most popular items. Republicans derided the

Democratic bill as virtually stimulusfree and argued for deeper tax cuts to spur growth.

"If in fact the Senate, under its current leadership, can do nothing good, we are better off with them doing nothing at all," said House Majority Leader Dick Armey, R-Texas.

Democrats, however, said Republicans were trying to showcase their tax-cut priorities for voters in an election year, knowing they would not become law.

"It was tied in with their tax breaks that are not justified," said Rep. Gerald Kleczka, D-Wis.

Some Republicans had begun to question whether money earmarked for the stimulus bill might not be better used to balance the federal government's budget. A group of 70 House conservatives is pushing for that goal if no stimulus bill is passed.

"If we can't pass a solid economic stimulus bill, we should balance the budget this year," said Rep. Pat Toomey, R-Pa.

Other lawmakers expressed frustration that election-year politics

already were dominating the congressional agenda. Voters will think "we're too busy down here trying to figure out who's going to control the U.S. Senate" to address crucial issues, said Sen. George Voinovich, R-Ohio.

The Bush administration supports a package that would provide \$89 billion in stimulus in 2002 and \$73 billion in 2003. It would accelerate income tax cuts now set to take effect in the future and provide a new round of rebate checks of up to \$600 aimed at lower-income Americans.

It would extend unemployment benefits by 13 weeks, help laid-off workers pay for health insurance and give corporations and small businesses more generous tax breaks for new investment.

Daschle's bill, which would provide \$69 billion in stimulus in 2002, includes the unemployment benefits extension, more limited business tax breaks, tax rebate checks and an increase in Medicaid money to help states balance their budgets.

BASKETBALL

Kansas used runs of 13-0 and 23-5 in the first 20 minutes to lead by 21 at the intermission, and K-State could only get as close as 18 in the second.

Wooldridge was ejected eight and a half minutes into the second half of the game, after walking all the way to midcourt arguing a call. No whistle blew as KU forward Nick Collison elbowed Matt Siebrandt to the floor, before laving the ball up and in.

"I felt I had position for the charge, and I think Coach thought that, too," Siebrandt said Monday. "But he was just sticking up for us like he should. He felt the wrong call was made, so he did what he had to do."

The K-State coach said he wasn't upset about anything after the game, however, and the officiating was fine. He said his team's concentration is now shifting to the rest of league play, with Nebraska at the forefront.

"We're going to try to fight and scrap for every win," Wooldridge said. "I think that's what this team has developed into – just a scrappy bunch of guys – and when they face the competition, I think they're performing that way."

Residents create

# Friends, family remember students' lives during service

Jenny Braniff/Collegian

The Rev. Don Fallon leads the closing prayer Thursday during the memorial for Diego Velasquez and Sean Wiens, members of Delta Sigma Phi fraternity, who died during winter break.

BY EDIE HALL

"You're in the arms of the angel. May you find comfort here."

Curtis schwieterman, member of Delta Sigma Phi fraternity, sang Sarah McLaughlin's song "Angel," at the memorial service for two of his fraternity brothers who died during winter break.

The words pierced through the silence and inspired tears that didn't cease for the rest of the service.

Diego Velasquez died in a one-car auto accident Jan. 1 on Interstate 70. Scott Wiens was killed in a car-motorcycle accident Jan. 9 in Wichita.

Scott Tatro, president of the fraternity: welcomed family and friends to the service. He thanked those in attendance for the support they had provided to the fraternity

members and family. He said the memorial would provide some sort of closure.

"We are not here to mourn, but instead, to remember these two great men," Tatro said. "They'll always be with us in our memories.

Fraternity members, friends and family shared their memories of the two men.

Stan Elsea, associate dean of the College of Business Administration, in which both Velasquez and Wiens were students, extended condolences to family and friends of the deceased on behalf of K-State's faculty.

Corey Kirk and Nolan Henderson, both fraternity members, spoke of Wiens. Both said Wiens was never afraid to tell people how much he loved them.

"Sean's last words to me were 'I love you, buddy'," Henderson said.

He explained this was his chance to say

As Henderson looked to the sky, he choked back tears to say "I love you,

Dave Vasquez and Matthew Dunn, fraternity members, spoke about Velasquez. Friend Sarah Cantwell, sophomore in mass communications, also spoke at the service.

Vasquez, who was Valesquez's pledge dad in the fraternity, said Valesquez had a deep love for those around him.

"I'll always love him," Vasquez said. "Just like he loved all of us."

Father Keith Weber spoke next about making a choice. He said if friends had to choose between never knowing Wiens or Valesquez or knowing them for a short time, they would choose to know them.

Sen SERVICES on PAGE 10

# Enron CEO can't recall wrongdoing

BY PETE YOST The Associated Proce

WASHINGTON, D.C. - Former Enron executive Jeff Skilling testified Thursday under tough questioning by lawmakers that he was unable to recall key events surrounding the off-thebooks partnership arrangements that sent the energy trading company into bankruptcy

He said he knew of no wrongdoing. Skilling, the former chief executive officer, said he didn't recall longtime colleague Andrew Fastuw - who collected \$30 million for running the partnerships - telling a board of directors meeting that Skilling would approve all the partnerships.

"You never heard that statement?"

Rep. Billy Tauzin, R-La., said. "I was in and out of the meeting and I don't recall if I was there specifically at the time Andy made the comments,"

Skilling said. He said the board meeting in West Palm Beach, Fla., took place under difficult conditions because the electric power had gone out and "the room was dark."

When he resigned his post in August he said in his first testimony on the Enron disaster, "I did not believe the company was in any financial peril."

And the company's financial statements, "as far as I knew, accurately reflected" Enron's condition, Skilling told the House Commerce oversight and investigations subcommittee.

Skilling said he had no knowledge that the partnerships run by his longtime colleague Andrew Fastow were designed to conceal losses.

"It was my understanding that the purpose of the transactions was to provide a real hedge - locking in profits from technology investments," the former CEO said.

Skilling's testimony came as Fastow and three other current and former Enron executives exercised their Fifth Amendment right not to testify at the House hearing.

In contrast to Skilling's testimony, Enron's new chief operating officer, Jeffrey McMahon, said earlier Thursday that he was transferred to a new job shortly after he complained to Skilling about the obscure partnerships in a 30minute meeting in March 2000. McMahon was treasurer at the time of the meeting.

"His parting words to me were he understood all my concerns and he would remedy the situation," McMahon told the subcommittee. McMahon said Skilling called shortly after the meeting and offered him a job elsewhere in the

McMahon was named Enron's president and chief operating officer last

His testimony followed the refusal by Fastow and ex-executive Michael Kopper to testify. The two are at the center of the partnerships which kept hundreds of millions of dollars in Enron debt off the company's books.

# Coffee concoctions

## Derby buys bar to help with events

BY JAMES HURLA

Derby Dining Center had a festive coffeehouse event Thursday accented by candle-lit tables, live music and a new coffee bar.

The Department of Housing and Dining Services bought the bar when Eclipse Cafe, formerly located at 12th and Moro, went out. of business, said Mark Edwards, unit director of Derby Dining Center.

"The bar sat in storage for a few years," Edwards said. "We finally resurrected it and put it together."

The bar will remain in the cafeteria, but will only be in use for the special events Derby

"The bar is more accessible for the employees," said Colleen Carter, student catering supervisor and junior in business administration pre professional. "Hopefully, we'll be able to do more special events since we can store everything out here and not have to run back and forth. It's much more

Derby usually offers a special event once a week. This week the event was "Giovanni's Cafe," a coffeehouse theme, featuring live music by Edwards and Rob Watson, painter supervisor for Housing and Dining. Edwards and Watson, who also perform occasionally at coffee shops, played ballads and blues music for the students.

"We play because it fits the coffeehouse concept and how they originated in the '60s and '70s," Edwards said. "It gives it an unplugged feeling."

Other themes have included malt shops and foreign cuisines. In March, Derby will offer a karaoke night. Carter said Housing and Dining services employees try to stay consistent with some of the food items offered at the special events.

"We stick with some things we know the

### Bush declares a state of emergency, provides federal funds

BY MICHAEL WATSON

Kansus Sinte Collegisis

President Bush declared a state of emergency Thursday for 35 Kansas counties following the severe winter storms that started Jan. 29.

The presidential declaration would allow federal funds to be released through the Federal Emergency Management Agency

"There is no set amount of money that Kansas will receive, but FEMA has grants and loans available," said Erik Hotmire, communications director in Sen. Brownback's office.

Hotmire said all residents and business owners in disaster areas could receive relief funds if their application is accepted. To apply, individuals should call (800) 621-

"If you're a homeowner and a lot of ice accumulated on a tree in your yard and the tree smashed into your house, you can apply," he said.

Hotmire said Gov. Bill Graves specifically requested public assistance funds for Johnson and Wyandotte counties to pay for public facilities such as roads, buildings and

Also, he said the entire state is eligible for assistance in mitigating future disasters.

"They (FEMA) want to make sure everything is covered," Hotmire said.

Assistance from FEMA includes grants to help pay for temporary housing, emergency home repairs and other serious, disasterrelated expenses. Low-interest loans also will be available to cover residential and business losses not fully compensated by

This is the right thing to do, Brownback

said in a press release. Clearly, Kansans in the affected areas are in need of immediate assistance. The damage and loss of power that resulted from the storms that passed through the state is tremendous, he said.

damage first-hand traveling throughout the state this past weekend. He said he is pleased about the presidential declaration that will aid in clean-up and recovery efforts.

Brownback said he saw some of the

Joy Moser, public relations officer of the Kansas Division of Emergency Management in Topeka, said there still are 17,986 residents without electricity one week after freezing rain, sleet, snow and ice plagued northeast Kansas.

That is a good number," she said. "The number of people without electrical power dropped from 32,000 on Wednesday.

"The amount of damage is still being determined."

#### Disaster relief

■ Call (800) 621-FEMA to apply for assistance.

#### CAMPUS IN BRIEF

#### Student body president arrested for 1999 charge

A routine traffic citation turned into an arrest for K-State Student Body President Kyle Barker on Tuesday.

Barker was pulled over for traveling 33 mph in a 20 mph zone on campus. K-State Police Officer Don

Stubbings ran Barker's license and noticed he had a warrant for his arrest. "I pulled him over for speeding, and the dispatcher checked the local warrant list," Stubbings said. "It was a

routine procedure, but we noticed (Barker's) name was on it." Barker received the warrant after missing a court date in September 1999 for an alleged misuse of identifi-

"I'm embarrassed about the whole situation," Barker said. "It was an oversight on my part because I thought the situation had been taken

Barker said he met with an

care of.

attorney Wednesday and hopes to put this behind him.

"This shouldn't affect my ability to do my job," he said.

#### NATION IN BRIEF

#### E-mail tracing gives police their biggest breakthrough

KARACHI, Pakistan - Police have recovered e-mails linked to the kidnapping of Wall Street Journal reporter Daniel Pearl from the computer hard drive of a suspect in the case, officials said Thursday.

The discovery of the e-mails is a breakthrough in the case, providing a link to the chief suspect, Ahmad Omar Saeed Sheikh, a young Islamic militant and suspected member of a radical group linked to al-Qaeda.

The officials, speaking on condition of anonymity, said investigators traced e-mails sent by the kidnappers to U.S. and Pakistani media a few days after the 38-year-old journalist disappeared to a service provider in an apartment complex in Karachi. The emails included photos of Pearl in captivity.

### 1,300 people give notice of intent to sue New York City

NEW YORK - From rescue workers who say they have lung problems to business owners who say their shops were damaged, 1,300 people have given notice they might sue the city for a total of \$7.18 billion over the aftermath of the World Trade Center attack.

The claims involve injuries or damage caused not by the attack itself but by the alleged negligence of the city during the recovery and cleanup. The vast majority are from firefighters who said the city gave them inadequate respiratory protection at the smoldering trade center site.

Not all of those who served notice will sue. Some, for example, might instead seek money from the federal victims compensation fund. But the notices preserve their right to bring a

The notices show the extent of the health complaints being lodged by hundreds of firefighters, police officers and other recovery workers who fear cancer or other ailments.

#### ATTACK DEVELOPMENTS

- American authorities in Afghanistan released 27 people taken prisoner during a Jan. 23 raid on what U.S. forces mistakenly believed was a hide-out for al-Qaeda terrorists. The military said Wednesday that the 27 people were not members of al-Qaeda or Taliban militia.
- New detainees from Afghanistan were due to arrive Thursday at the U.S. base in Guantanamo Bay, Cuba, where troops built new chain-link cells to double the
- The top U.N. envoy to Afghanistan told the Security Council on Wednesday that the country's new government, ordinary Afghans and even warlords are demanding an expansion of the multinational force now in the capital.

# SHE said / HE said

What is an appropriate gift to get someone for Valentine's Day whom you recently started dating? If a gift is out of the question, what type of activity would you recommend? - Needing Ideas

Dear Needing Ideas: Valentine's day is often stressful for those involved in new relationships. The perfect gift is out there, and hopefully my suggestions will help you find it.

For a girl you recently started dating, I would suggest a card and some kiss-kiss bears from Hallmark. You might think it's dumb, but she'll think its creative and adorable.

Avoid such cliché things as perfume, lingerie and candy. It's too soon to buy anything her grandma shouldn't see her in.

For a guy, try to be creative because they see this as a pointless holiday. Get him tickets to a game he would want to attend or a subscription to his favorite magazine.

Steer clear of cologne, clothes or boxers. At this point you aren't acquainted with his style or scent, and choosing something you

risky. Sarah is a junior in electronic

journalism.

like could be too.

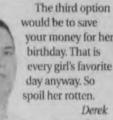

Dear Needing Ideas: First of all, let me start of by saying that Valentine's Day is not an actual holiday.

Banks are open and the post office delivers mail; thus, it is not a real holiday, but I will play along and pretend it is a real holiday.

For clarification, we need to set a time frame for "recently." Is it two months or two days? Let's say you have been together one month.

Don't waste your money on roses and a teddy bear. Take her to El Cazador for dinner. Then buy her a cheap box of Franzia and see where the night takes you.

Another option would be to go all out and fly her to Las Vegas and throw away your savings on a night at Caesar's Palace.

Derek Dietz

would be to save your money for her birthday. That is every girl's favorite day anyway. So spoil her rotten. Derek is a senior in

milling science.

#### ON RECORD

#### **CAMPUS** BULLETINS

Campus Calendar is the Collegian's campus bulletin board service. Items in the calendar can he published up to three times. Items might not appear because of space constraints but are guarantred to appear on the day of the activity. To place an item in the Campus Calendar, stop by Kedzie 116 and fill out a form or v-mail the news editor at bulletins@spub.ksu.edu by 11 a.m. two days before it is to run.

Lutheran Campus Ministry – ELCA will meet at 7 p.m. Sunday for evening worship at Danforth Chapel. KSU Aikido will meet at 7 tonight in

Aheam 301. **■ Career and Employment Services** will have a Dining Etiquette Workshop Feb. 28. Please sign up by Wednesday in Holtz Hall. The meal costs \$5.25, or can be exchanged with a residence hall meal plan.

■ Commerce & Agriculture Career Expo 2002 résumés will be collected from 8 a.m. to 5 p.m. Monday through Wednesday in Holtz Hall, CES will forward résumés to employers

that were scheduled to attend the canceled Career Expo. For information, stop by Hoftz Hall, call 532-6506 or log on to www.ksu.edu/ces.

Department of Marketing
Distinguished Lecturer Series Dr. William M. Pride of Texas A&M will speak about the "Power of Branding" at 10:30 today. The lecture is being presented in the Danforth/All Faiths Chapel. The talk is open to the public, and admission is free.

A university memorial service for Kyle Chapman, Christopher Shipley and Timothy Bennett will be at 4 p.m. today at Forum Hall in the K-State Student Union.

KNEA-Sp will meet Monday at 7:30 p.m. in Bluemont 15. A Volunteer Fair Workshop will me from 11 a.m. to 3 p.m. Monday in the Hoffman Lounge at Justin Hall. BAPP Club will meet at 5 p.m. Feb. 12 in Calvin 212.

Review session for students preparing for the DAT, MCAT and OAT will be from 9 a.m. to noon Saturday in Eisenhower 15. The topic this week is Verbal Reasoning and Writing Sample. This is the last week to register for the practice tests. The Art and Copy Club will meet at 7 p.m. Monday in Kedzie 105. III Phi Alpha Theta History Honorary

# Winter storm brings moisture to Kansas wheat fields

Konsas State Collegian

Last week's winter storm left 35 counties without electrical power, but snow and ice brought much needed moisture to Kansas wheat fields.

Jim Shroyer, agronomy professor, said the four to 12 inches of snow that hit Kansas was very important to wheat crops, but since the state has been in drought, wheat crops have poor root development and bad plant health.

"Everything is stacking up against the wheat crop," he said. "Even with the snow, we still need more moisture."

Shroyer said poor wheat development can be attributed to the mild winter in Kansas this year. He said that because of the warmer fall and winter weather, the wheat is trying to grow, but it can't because there is no moisture.

The lack of moisture has left the soil dry, making wind erosion more likely. Shroyer said the snow brought much needed moisture, and it blankets the soil to keep it from blowing.

Even after the snow melts. moisture in the ground would keep the topsoil from blowing away, he said.

Though Kansas is behind normal rainfall, that does not mean it can not produce a good wheat crop, Shroyer

"We may end up with a great spring," he said. "If we get more moisture in the spring, it can compensate what was lacking in the fall. What happens in May and June will make the crop.'

In this winter stage, the wheat is determining the number of tillers or stems that produce a head with grain in it. Shroyer said if it's hot and dry, the wheat won't tiller.

In wheat, one seed will produce many stems with heads of grain. He said it is the stand or thickness of the crop that is being determined right

"Wheat is a cool weather crop," he

Greg McClure, Riley County extension agriculture agent, said that while the blanket of snow is offering protection to wheat crops, more moisture is needed. He said there is nothing

farmers can do but sit back and hope for moisture, but once the ground thaws, some farmers will go out to their fields to top dress wheat with

Bob Bowden, plant pathologist at K-State, said one of his main worries about this year's wheat crop is not a lack of moisture, but the long and warm autumn without rain that made conditions right to spread barley yellow dwarf virus. The virus is carried by aphids that turns leaves yellow, cutting down the amount of photosynthesis.

"The aphids weren't killed by the cold weather," Bowden said. "The warm weather gave them plenty of time to spread."

He said farmers see the virus a little bit every year, in about 1 percent of the wheat crop, but this year it is a large problem, with some fields approaching 100 percent infection with the virus. Bowden said there is a potential that the virus would take as much as a third of the crop's yield potential.

Rust is a similar crop concern, Bowden said.

There are two types of rust, leaf

For state wheat conditions see www.kstatecollegian.com

rust and stripped rust, and both have been reported in Texas. Spores can blow in the wind to Kansas, which saw its first ever stripped rust

epidemic last year. The disease was blamed for reducing yields statewide by 7 percent last year. McClure said the factors that have

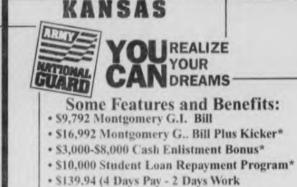

stacked up against wheat fields do not mean there would not be a good crop to harvest this summer.

He said there is no way to stop the barley yellow dwarf virus, but he is

optimistic that it will not take a third of the wheat crop. He said things change, and it is too early to determine what type of yields farmers will be producing when harvest is in full

"At this point in Riley County, there is still the capability of 40 to 50 bushels an acre wheat crop," he said.

Columnists select which view they

he so-called two-party political system is destroying

It seems to me that the only thing that really matters in American politics these days is the small letter next to a person's name

This isn't right. It's also not the way the founding fathers designed our country.

There is no mention of political parties anywhere in the constitution. Not in the Bill of Rights, nor in the Declaration of Independence.

The two-party system is a series of bad traditions that have been passed from Congress to Congress and from president to

president because that's what the legislature before them did.

> Now all we can seem to accomplish in our federal government is deadlock.

Senators and David McCandless representatives make more deals

than Monty Hall just to pass basic bills. These compromises usually end up being

Clash of the Columnists worst effort of both sides. weeklong series dedicated to open The system debate. Each day, columnists will write is prevalent in columns taking conflicting stances on state and some an issue. It is hoped, readers will have

local elections. The most effective elected officials

the combined

are those who aren't enslaved to an exclusive ideology.

The most ineffective officials are those who answer only to one small, single-minded group of people. These people are more concerned about "winning" in the political arena than making effective policy.

This is the most frightening aspect of a political party system. Any time government is turned

> into a game of winners versus losers, everybody loses. Instead of ridiculous cat fights over the souls of the one-half of Americans who bother to care

about politics, we should do something better. We should abolish the political party system. In its place, I envision 535

policy makers who are working in the best interests of all Americans. I envision a president who

represents all Americans, not only the richest one-fifth of them, as less than 18 percent of the American population voted for

Most importantly, I envision an America where all people have the equal opportunity to succeed without interference by meddling, rabidly-biased political parties.

# GOP puts trust with citizens

or years the Republican party has been accused of being greedy, against women's rights, the environment, minorities and the elderly. Of course the Democrats, who are

Jamie Kelley

tions. aren't exactly known for their honesty and integrity.

hurling

accusa

How can Democrats accuse Republicans of greed, then criticize them for putting money back into the pockets of the public

We don't think the government should tell you what you should do with your money.

Democrats, on the other hand, don't believe the public has the intelligence to control their funds. Republicans believe that American people are intelligent and perfectly capable of doing what's right.

As far as the environment is concerned, Republicans are not against conservation. President Bush is working hard to find solutions to the energy crisis without harming the environment. All the charges Democrats make about ruining the Arctic are untrue,

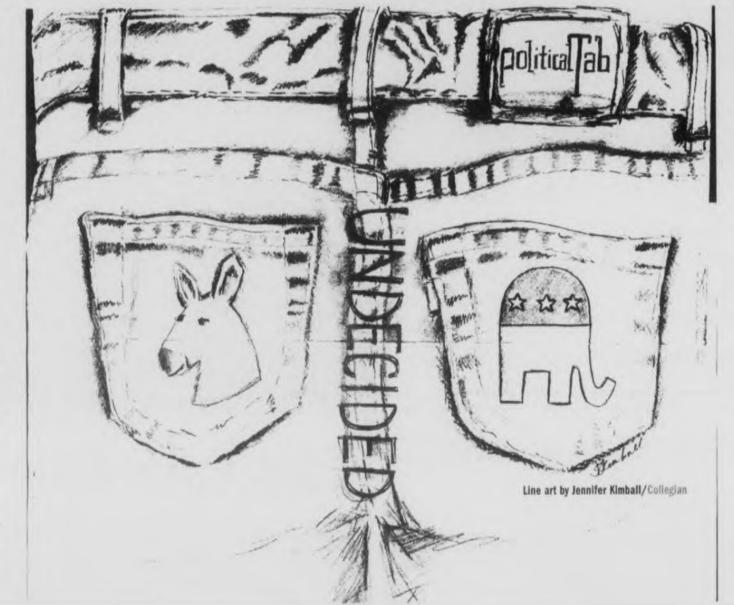

Republicans just aren't fanatical about the environment. We value human life above the life of a tree.

Democrats would rather put thousands of people out of work than cut down a tree. Then they blame Republicans for high unemployment.

As for the elderly, Democrats had at least eight years to do something about Medicare and didn't. Bush has only been in office one year and already passed a bill that will have Medicare cover the prescription costs for the elderly.

So Democrats, you go ahead and hug those trees. We'll run the country.

the Collegian's official

Four K-State students have died and two are missing since December, and there will be three on-campus memorial services in three school days.

The Collegian editorial board would like to offer its condolences to the families and friends of all six students and everyone else who has lost a loved one.

Death can be a **Nicole Donnert** complex and Micah Hawkinson enduring stress for

those still living. K-State has suffered a particularly large number of losses recently.

Those involved with the campus memorials provide an important service.

The services offer opportunities to reflect on the lives of the deceased. Family and friends can come together to share their feelings with each other.

Services might also help people achieve closure. For some, a feeling of closure helps them move on.

Students should feel encouraged to attend. For further assistance, call University Counseling Services at 532-6927 or online at http://www.ksu.edu/counseling

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

How about the state workers who drive over 10 mph in a 20 mph zone?

I would just like to thank you so much for your article about Harry Potter. It just shows us that this town is nothing but backwards, socially inept hillbillies.

Go to Kmart to buy condoms. There's no line and they have a self-checkout line so you don't have to face a smiling clerk.

I was just wondering why everyone hates the parking control so much. We're just out there doing our job.

Why was there a big picture of Kirk Hinrich on the back page of the Collegian?

After a recent survey, it is proven. I am chocolate love.

To Kyle Brownback from everyone: you

# Diet trend cuts out majority of carbs

BYTARA PATTY Kansas Stino Collegian

Breads, pastas, potatoes and crackers are on the hit list of the latest diet trend. Instead, individuals

dairy products and eggs. "Fruits are simple carbohydrates, so sometimes they're good," said Michael Waggoner, freshman in open-option, who follows an anti-

should load their diets with meats.

carbohydrate diet. Waggoner said he cut more than half of the carbohydrates in his normal diet in order to trim body fat and speed up his metabolism. Waggoner also had to grow accustomed to preparing meals in place of his usual daily fare.

Once the body's metabolism speeds up, he said, it can handle more carbohydrates in the system without storing them as fat.

Foods to avoid include breads, pastas and foods high in starches, while dairy products like cheeses and eggs, meat, fish, fatty acids and essential oils should be utilized, said Patrick Ryan, senior in public relations who tried the diet and is an employee at General Nutrition Center Inc. The best way to begin the diet, Ryan said, is to ease in to it.

"You can't just go from drinking pop and eating candy and just cut it all out," he said.

Eventually, he said a person should limit his or her carbohydrate intake to 20 to 30 grams a day. He said he recommends individuals begin the diet at 100 grams a day for a week, then move down to 50, then to 25 and finally to 20.

However, a local nutritionist said significantly lowering carbohydrate intake is not ideal.

Beth Gallaher, private practice dietician, said for a person to be at optimal health, carbohydrates should account for 50 percent of total intake.

"Based on a 2,000 calorie diet, 1,000 should come from carbohydrates," Gallaher said. "That is about 250 grams per day."

Additionally, Ryan said it is important for individuals to eat five to six small meals a day. To do this, students should eat a mid-morning and a mid-afternoon snack. College students who are used to eating whatever is readily available, will have to prepare meals, which can be time consuming, he said.

"Most college students skip

breakfast, have a nice lunch and then a huge dinner," Ryan said. "To drop extra pounds you always have to have something to metabolize."

Other factors that might increase the success of the diet, Ryan said, include drinking large amounts of water because the lack of carbohydrates will cause the body to become dehydrated faster.

Low-carbohydrate diets mandate that dieters eat less complex carbohydrates and starches, and eat more proteins in order to drive the body into a natural fat-burning state known as ketosis. Once the body is in ketosis, Ryan said, the body will start to burn fat as energy instead of the carbohydrates usually in the system.

"When you're sitting at a desk, you don't utilize carbohydrates as energy, and so they are stored as fat,"

Conversely, he said, if an individual with a diet high in protein is sitting at a desk, the body will have to pump more blood to digest the protein and will use stored fat as energy in place of carbohydrates. The human body burns carbohydrates first and then burns stored fat, so by limiting the intake of carbohydrates. the body will start burning stored fat for energy, he said.

Gallaher said the body goes into ketosis anytime a person is on a diet and there is a drop in calorie intake. It is not anything new or unique to the low-carbohydrate diet she said. Also, ketosis can be hard on the kidneys over a long period of time,

Dianna Schalles, health educator and nutritionist at Lafene Health Center, said the diet might be safe in the short-term; however, in the longterm, the lack of carbohydrates in one's diet will be unbalanced and unhealthy. She said science still supports the food guide pyramid and U.S. dieting guidelines.

Research has shown that diets high in saturated fat are detrimental and in the long-term can promote obesity," she said.

She said studies show that Europeans are generally thinner than Americans and tend to eat less fat and more complex carbohydrates, something she tells patients considering the diet.

"The diet doesn't teach people to eat properly," Gallaher said, "It may work initially, but when you go back to trying to eat normal the weight usually comes back."

### Residents make homemade valentines

Knosus State Colingian

Some of her fondest memories were spent making valentines with her mom when she was little, the valentine workshop educator said.

Kathrine Walker Schlageck, education and public services supervisor, said she went through her grandmother's stuff about a year ago and found many of the valentines she had given her when she was little.

"She kept them all," Walker Schlageck said. "Homemade cards are the best valentines to give and to receive because someone spent the time to make something special.

That is where the idea for the workshop came from, she said.

People of all ages gathered Thursday at the Marianna Kistler Beach Museum of Art to make valentines for their loved ones.

All of the materials were there - construction paper, shiny paper, velvet paper, sequins, glitter and other materials to add pizzazz to their gifts.

Laura Irvin, B, said she was making a card for her best friend. She said they used to go to school together, but then the Irvin family moved to Manhattan.

She said they are still best friends, and they are planning a sleepover in Manhattan tonight. Irvin said she was going to give

Arianna Levin, 9, and Madison Davis, 9, make Valentine's Day cards with Levin's grandmother, Anneke van der Hoven on Thursday night at the Marianna Kistler Beach Museum of Art. About 20 people gathered to make cards from construction paper, wallpaper, ribbons, lace and stickers.

the card to her then.

Irvin made the card from shiny, purple paper with a silver heart doily.

"I made it purple for K-State," she said.

While Irvin was there to make a special card for her best friend, her mom Robin nudged her and reminded her to make cards for her brother, sister and dad, too.

lim Porter, assistant professor of military science, brought his family to make cards,

He said his job was to help make his son Matthew, 14

months, make a mess.

Porter said he helped him make a card for his mom, and they were also going to make cards for Matthew's brothers and sisters, all six of them. Three of them are K-State students.

Porter said he put a marker in Matthew's hand and helped him write "Mommy" on the card.

"He wasn't very interested in that," he said. "The markers were more for eating."

Walker Schlageck said everyone was there to be creative. After she showed them a few decorative cutting techniques, she cut them loose to begin folding and cutting.

Some ideas she gave them before they grabbed their materials and started working were fringing techniques, folding techniques to give hearts different layers and cutting feather patterns and diamond patterns on the cards.

"The idea was to give them a place to work with materials that they wouldn't have at home," she said. "Then it was up to their creativity."

# Senators offer condolences to student's family

STUDENT

SENATE

Student Senate

meets at 7 p.m.

every Thursday

evening in the Big

12 Room of the

K-State Student

Union. Students

and faculty are

welcome to attend.

BY SARAH RICE

Student senators observed a moment of silence at the senate meeting Thursday night in honor of David Miller, a K-State student who died Jan. 28,

Senators also passed a resolution to send condolences to the family and friends of Miller on behalf of the entire K-State community.

Spencer Stelljes, governmental relations chair, thanked senators for their unanimous vote to pass the resolution.

"Those people who did know him, this will help end their grief process," he said

Stelljes reminded senators to pay attention to those around them in

order to prevent this from happening to someone else.

"I'm not sure what is going on here at K-State. We've had 19 deaths in a year," he said. "Talk with your friends, be there for your friends, find out what is going on in their lives."

In other discussion, Ben Champion, student. environmental action treasurer, appealed to senators about the need for a more advanced

recycling program at K-State. The recycling program is part of the facilities and custodial services, Champion said.

There is really no consistent program," he said. "We have no

system of recycling throughout our campus. Jason Lantz, senior in biology,

and Katie Macdougall. senior representatives of the

American Red Cross Club, introduced an idea that will be written as legislation soon.

Lantz said a competing blood collection agency. Community Blood Center based in Kansas City, has attempted to conduct blood drives at K-State, therefore

hurting the Red Cross' blood supply.

"If they came here, they would cut the Red Cross' number one blood drive here at K-State." Lance

He said they will be petitioning

senate to name the Red Cross the sole collector of blood at K-State. Fred Newton, director of

University Counseling Services, also presented the benefits of a more technologically advanced biofeedback center.

"Stress is the number one concern students come to us and complain about," Newton said. Senators unanimously passed a

resolution to support active solicitation by the University Counseling Services to acquire funding from outside sources.

The senators also voiced their consent of naming the performance enhancement center in memory of David Danskin, pioneer of biofeedback training who died two weeks

BY DEREK BOSS

Coach Bill Snyder unveiled perhaps his largest recruiting class ever at K-State on Thursday.

The Wildcats have 26 committed student-athletes for next fall, consisting of 11 community college transfers, one transfer from a four-year school and 14 incoming freshman. The class is ranked

No. 15 in the nation by Rivals.com.

"I'd like to think it's a good class, but honestly you don't know," Snyder said. "I think they all have very fine and redeeming qualities on the football field, and the assessment and evaluation is the most significant thing, I believe. But you'll have to wait a period of time until

you find out if you assessed correctly.
"I wasn't at all disappointed in the numbers, and I don't think I will be in the quality either, but that remains to be seen."

What doesn't remain to be seen is K-State's effort to meet positioning needs on its roster, which was well-reflected in the recruiting class. This season's end left gaping holes in several positions, primarily on the offensive line, in the defensive secondary and at wide receiver.

To that end, the Wildcats landed eight

offensive lineman, which collectively rank No. 1 in talent by *Rivals.com*, seven defensive backs and four wideouts—all 6-foot-2 or taller.

Much of Snyder's recruiting process was conducted out-of-state, too, with only eight Kansas natives in the group. Six were drawn from Florida, and five from Texas.

Headlining this year's class are running back Daniel Davis and offensive lineman Peni Holakeituai — both fivestar players as listed by *Rivals.com*.

The 6-foot, 215-pound Davis, of Stafford, Va., rushed for 914 yards last season at Garden City CC, after transferring there following one season at North Carolina.

Despite Darren Sproles, Danny Morris and Carlos Alsup all returning at tailback next season. Snyder said he'd like to think Davis has a chance to contribute

"I can't guarantee it." Snyder said.
"but I know he's proven himself to be a
fine player. He's a good all-purpose
running back. He's physical, and at the
same time, he has excellent quickness
and mobility to go along with it."

Holakeituai, a 6-foot-6, 310-pounder

# Cats still can reach .500 mark

BY DEREK BOSS

Kannas Stata Collegian

So, the men's basketball team lost to KU on Big Monday. Big deal.

I mean, the fact the Jayhawks were only favored by 11 entering the game is a nice compliment for K-State, but let's be serious. No. 2 Kansas was expected to win. Heck, they had done it the past 22 times against the Wildcats.

But what does K-State's loss mean in the grand scheme of things this season? Jack squat.

Coach Jim Wooldridge hasn't placed expectations on the Cats' finish in the Big 12, and that's good. The purple are stuck at No. 10 in the league.

"We've never said anything like that,"
Wooldridge said. "You're tired of hearing
me say it — and I'm tired of saying it —
but we want to be better. If better means
we move up, then so be it."

Still, the chance of moving up — at least a little bit — might not be so unrealistic. Just look at the rest of K-State's conference schedule.

At Nebraska, Texas A&M, at No. 4 Oklahoma, Colorado, at Iowa State, at No. 2 Kansas and Nebraska.

Now, here's the breakdown.

Nebraska (10-10, 3-6) might be the
Cats' best matchup out of that group, and
the purple have the advantage inside. No
more Kimani Ffriend, my friend. So two

wins over the Huskers are possible.

A&M (9-14, 3-6) isn't having a good season at all — they're actually ranked lower than K-State in the league at No. 11 — and its only real surprise was a win over then-ranked Texas in late January. Plus, on the purple's home floor, I'll pick K-State.

Oklahoma (18-3, 7-2) is extremely tough to beat on its own floor, so it'd be quite the stretch to hope anything there. Big advantage for the Sooners.

A win over Colorado (13-7, 4-5) is possible, but the Cats need to play 10 times better than they did in an 85-71 loss Jan. 22, and K-State already has beaten Iowa State (9-15, 1-9), so enough said.

KU (20-2, 9-0) will probably work. Wooldridge's boys over again, especially in Allen Fieldhouse. We'll have to wait and see if Wooly gets tossed again in this one.

So conceivably, the Cats could win five of their last seven to finish 8-8 in the league and 14-13 overall, but knowing K-State, that might be pushin' it.

Still, say that happens and the purple finish .500 in the conference.

The NIT Tourney has expanded to 40 teams this year, and with 64 in the NCAA's, surely we'd be in the top-104 in the nation. Plus, I'd think at least one win in the Big 12 tournament would give the Cats a spot.

Either way, one thing's for sure. K-State will better its 11-18 record from a year ago, with just four wins in the Big 12.

Guess Wooldridge is making considerable progress.

# K-State track searches for right time to peak; heads to Iowa

BY JOEL REICHENBERGER Kansas State Collegian

The K-State track team will be in action for the fifth consecutive weekend today and Saturday, competing at the Iowa State Track and Field Classic in Ames.

K-State will compete against 50 other squads, some from other universities, and others made up of independent athletes.

Field events will start at 3:30 on Friday.

The Men's 200 meter dash will be the last race Friday, beginning at 6:30. Wildcat sophomore Will Jones will try to improve on his 21st-place showing last weekend at the Adidas Invitational in Lincoln. Neb.

Saturday will start with the men's 3,000 meter run, and will finish off with the 4x400 meter relay at 6:40. K-State's relay team looks to continue its strong showing so far this season, after finishing second Feb. 1.

The road trip will be the second time this season K-State has competed outside Ahearn Field House, and marks the end of two straight meets outside Manhattan.

K-State will return home on Saturday and begin to prepare for the KSU Open, held in Ahearn Field House on February 14 and 15.

After the home competition, the Cats have only one week of practice remaining before they return to Lincoln for the Big 12 Indoor Conference Championships.

"It really takes 14 days for anything implemented into training to show up on the track. The art of coaching is to have your athletes at their best when it counts the most."

Cliff Rovelto, coach

With the Big 12 meet only two weeks away, and the national championships a mere four weeks down the road, this is a critical time in the Wildcats' indoor season, Coach Cliff Royelto said.

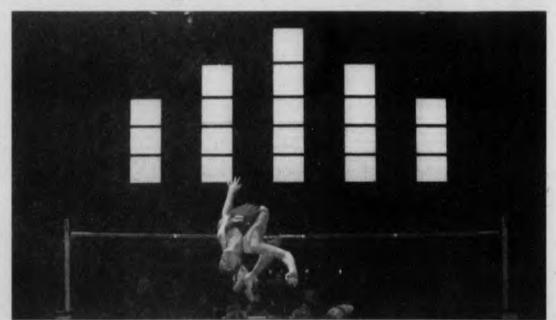

Rovelto said the athletes' training is beginning to become more intense, and the athletes must be at their personal best for the biggest meets of the season.

"It really takes 14 days for anything implemented into training to show up on the track," Rovelto said. "The art of coaching is to have your athletes at their best when it counts the most."

And for the Cats, they will need to peak at the right time to be successful.

They will encounter stiff competition on their way to the Big 12 Championship.

Rovelto said although Nebraska still looms at the top of the Big 12 and will be the team to beat, K-State is very competitive.

Kelly Glasscock/Collegian

K-State's Charlie Robben competes in the high jump in Ahearn Field House on Jan. 20 during the Wildcat Invitational.

Robben cleared a jump of 2.06 m to place sixth.

"Nebraska is at the top of the list," Rovelto said. On the women's side Rovelto placed the Cats among the best in the league, battling with Texas and

Nebraska for the crown.

"In the conference championships a lot will

depend on how other schools do versus Texas or Nebraska in their strengths," he said.

"But still, it will be very much a head to head competition between us. We share a lot of the same strengths." 6 Thickness

**BirdHouse** 

Saturday at the

Manhattan Arts

the BirdHouse

concert series.

and are available at

the arts center,

Claffin Books and

Never give up. That has been one of Lucy Kaplansky's most helpful phrases during her musical career.

She, along with singing partner and friend, Jennifer Kimball, senior in fine arts, will perform a concert at 8 p.m.

> Saturday at the Manhattan Arts Center.

Just out of high school. Kaplansky perform at 8 p.m. began working on her dream Center as part of of being a singer. Tickets are \$12 for students, \$15 for the general public,

However. after moving to New York City and finding prominent songwriters, Kaplansky decided to pursue a

different career. She completed a doctorate in psychology and even started her own private practice, David Kamerer, BirdHouse co-founder, said.

After being persuaded to continue her music career by friends, Kaplansky began to sing again.

Karnerer describes Kaplansky as a great female songwriter who has improved her writings during the course of her three recent albums.

"Lucy is a great harmony singer," he said. "Her writing has come a long way. She used to sing other people's songs and did a great job at doing that, but in the course of her last three albums, you can tell she has become a very strong harmony singer."

Steve Martini, BirdHouse codirector, said the concert will be great and that the audience will love Kaplansky and Kimball.

"I think the concert will be a great show," he said. "Lucy is really personable with the audience as she tells stories. I really like her voice, and I expect the audience will enjoy her singing, too."

Kamerer compared Kaplansky's music to other contemporary female performers.

"Lucy's voice and music are very similar to the works of Jewell and Sarah MacLaughlin," he said. "The three of them are very strong female songwriters."

Kamerer said Kaplansky's work has improved recently.

"I have all of Lucy's albums, but I would have to say that her two most recent albums are my favorite," he said. "Her most recent album, 'Every Single Day' and 'Ten Year Night' both represent her strongest works."

Besides singing, Kimball is also a painter and into graphic design.

Martini said Kimball is an added bonus to the concert and that Manhattan is fortunate to have both performers.

Gretchen Holden, BirdHouse codirector, said she is excited to have both performers together.

"Jennifer and Lucy performing together will be dynamic," Holden

This will be Kaplansky's second time to perform in Manhattan and Kimball's first. To bring the performers to Manhattan, Kamerer said he worked with other venues around the area.

"We coordinated with Lawrence, South Central Kansas and Hastings, Neb., to allow the singers to have four shows in four days," he said.

"This is more attractive to the performers so they perform more and not fly around sq much. Since Lucy and Jennifer don't live in the same city, this reunion is also appealing to them, so they get to see each other and do some catching up.

This is BirdHouse's seventh year organizing singers and performers to Manhattan.

Kamerer said last year when Kaplansky came to Manhattan, her concert sold out, so if people want tickets they need to buy them in

Holden said Manhattan is very lucky to have Kaplansky perform because she is becoming a very well

"Lucy is getting really big," she said. "Eventually. BirdHouse will not be able to support high paying artists, so this may be the last time we are able to have her come out. She just is becoming too popular."

Charlie Robiso

"The lyrics in 'My Hometown' are really good," Church said. "You can really relate to the lyrics, and it gets the crowd "Because anything might happen tonight" Charlie Robison sings in his song two-stepping.

> Tobin said Robison is touring to promote his newest album, "Step Right Up," which was released in April. 2001.

"Step Right Up" includes songs written by Robison and his brother Bruce Robison. Tobin said his brother is the only one he will work with on writing songs. A tour featuring the brothers is in the works right now.

Christy Montgomery, freshman in pre-journalism, said she first heard Robison's music this summer while listening to the radio.

"It's not your typical crossover-pop kind of country you hear today." Montgomery said.

Tobin said Robison's energy grabs the crowd's attention, especially with the college crowd. Robison takes stories and adds the comic reality that comes with real life.

"Charlie has a strong following with college crowds," Tobin said. "There are always great crowds that are into the music. That makes it great fun. Charlie

feeds off an excited, energetic crowd."

Lynlee Landrum, junior in animal science, said Robison's lyrics always have some kind of ironic twist to them, which make them entertaining and comical.

Landrum said she saw him in concert a year and a half ago in Odessa Texas and enjoyed the performance. She said his appeal is the type of country music he plays.

"I like him because he sings more traditional country and not your typical pop country," Landrum said.

Landrum's favorite song, "The Wedding Song," is a duet with Natalie Maines of the Dixie Chicks. The song tells about a couple that gets married despite the fact not knowing if they love each other.

Tobin said "The Wedding Song" is one of Robison's more popular songs.

"Charlie's fans have this thing about wanting to get up and sing with him, especially to the duet "The Wedding Song" which he sings with Natalie Maine, and Charlie often obliges them," she said.

Montgomery said Robison used to only be thought of as the singer who is married to Emily, also of the Dixie Chicks. Now he is making a name for himself. Robison established himself as a musician in his own right with the song "I Want You Bad," Montgomery said.

"His appeal extends far beyond being married to a Dixie Chick," Montgomery said. "He's got a good sense of style that carries into his music."

Landrum said Robison is a wonderful performer, and it is well worth it to see him perform

"If you've been to a concert at Longhorn's, you know the energy and intensity, and Charlie Robison will

definitely bring that out with his usual intense performance on stage," Church

### misdirection

# Award-winning pianist to perform at McCain

Kanasa State Collegian

At an age when he could barely speak, Stefan Milenkovich began his musical career.

In 1980, 3-year-old Milenkovich had already attempted to play the piano, which was his mother's talent.

After realizing the piano was not for him, Milenkovich then picked his father's best talent, the violin.

Years have passed, and the

multi award-winner Milenkovich will play at 8 tonight in McCain Auditorium, Pianist Rohan De Silva will accompany Milenkovich in a recital like performance.

#### Piano man

Stefan Milenkovich will perform at 8 tonight at McCain Auditorium Tickets are \$6 for students, \$12 for general public, are are available at McCain Box Office.

Born in Belgrade, Yugoslavia, Milenkovich said he expected to be an accomplished musician from an early age

"Since both of my parents were and still are musicians, my father being a violinist and my mother being a pianist, it was logical to assume I would like music," Milenkovich said.

Milenkovich said he began to perform in public schools when

were still developing.

"I didn't even play for one minute then," he said.

By the time he was 7, Milenkovich was competing in international competitions. He began touring all over the world, and played for former president Ronald Reagan.

"When I was 16, I gave my 1,000th concert in Monterrey, Mexico," Milenkovich said.

Milenkovich has performed in several recital-type performances, as well as with an orchestra.

"The concert will be a recital, since it will just be Rohan and I playing," he said. "I love playing in both the recitals and with

experiences."

De Silva met Milenkovich in 1994 at a competition in Germany.

Two years later they started playing together. De Silva said he has had a lot of fun with Milenkovich both in the music scene and as friends.

"We have had wonderful times together," he said.

He is a good friend and colleague and also a wonderful

"When working with a person for so long, you really get to know that person. When I work with him, everything is jelled together.

This will be Milenkovich's

second performance in Manhattan.

In addition to doing the concert, Milenkovich and De Silva also gave six lectures and concerts to elementary, middle and high schools throughout Wamego and Manhattan on Wednesday and Thursday.

Thom Jackson, marketing and development officer, said the · audience loved the concert last year, so he speculated they would also love this year's performance.

"The recital will be fantastic. The audience will love this concert just as much as last year's," he said.

"The program is very well

heart, so is he.'

# True or False?

#### four girls & one phone is big trouble

f you answered "true," you are either A experiencing this problem yourself or know someone who is. In either case, there is help. Free yourself or someone you know from the shackles of a land line phone.

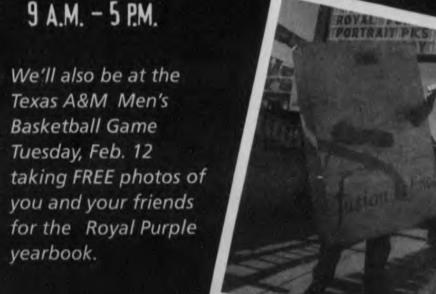

Right now, with an Alltel Freedom Plan, you can get a free Nokia\* or Qualcomm\* cellular phone with no activation fee not to mention free nights and weekends\* from Varney's Book Store.

That's right—nada, zip, zilch for the phone or activation. And with plans starting as low as \$29.95 a month, you may never wait to use the phone again.

With approved credit

#### RECRUITMENT

Continued from page 6

from Waipahu, Hawaii, played at Ricks (Idaho) College, where he was a teammate of Cat QB Marc Dunn. He also is a cousin of former K-State defensive lineman Mario Fatafehi.

In fact, family lineage seemed to have a big effect on this year's K-State class

Former offensive tackle Todd Weiner's brother, Michael - also an offensive lineman - was among the group, as was former tight end Chad Meier's brother, Dylan, who was the only quarterback signed by the purple.

Quarterback Ell Roberson's cousin, wideout Hammond Thomas, also is a new recruit, and defensive back Noah Strozier now will play at the

same school as his uncle, Art, who was a

K-State tight end from 1965-67. The exact opposite was the case for linebacker Brandon Archer, though.

Archer, a member of the fall class, has a brother, Phillip, Jr., who plays at Minnesota. But when Co-Defensive Coordinator Brett Bielema arrived at K-State from Iowa, he found a way to lure Archer to Manhattan.

"When I was recruiting his brother, Brandon would be the one to answer the phone, so I would joke around with him quite a bit back then," Bielema said.

"But when he visited Iowa, I knew the one thing the University of Iowa didn't have was the strong defensive tradition he wanted, and in addition to that, we didn't have architectural engineering."

K-State had both.

"At first, he still said no," Bielema said, "and then I was sitting in my office, and I thought, 'I'm going to give this one more shot.' And I think he was in the mode where, 'You know what, let's go take a look.""

Archer did, and liked what he

He and many of the other signees will not join the team until this summer, however.

Only four recruits - Davis, Holakeituai, offensive linemen Jesse Keaulana-Kamakea and Ryan Lilja - are on campus, and wide-out John Cooper and defensive tackle Andrew Bulman will be in Manhattan at midsemester. All six players will be able to participate in spring practice.

Aside from the 26 signees, four additional commitments who will be mid-term enrollees have been issued scholarship papers, but NCAA rules do not

allow their names to be released.

This means these individuals will not be full-time K-State students until next spring, and will be true freshmen in Fall

Sources say these individuals are 6-foot-9, 310-pound offensive lineman Logan Robinson of Eastern Heights (HS) in Agra, Kansas; 6-foot-2 quarterback Marcus Watts of Hays (HS); 6foot-3, 275-pound defensive tackle Steve Cline of Palm Beach Gardens, Fla.; and cornerback Jerry Hill of Ft. Lauderdale, Fla.

K-State also is not allowed to release the names of its walk-ons until this fall, according to NCAA regulations.

"They're really the backbone of the program," Snyder said of the walk-on player, "and we have this gathering, and we're not able to address those people. My heart is with those guys. I know what they go through."

#### COFFEE

■ Continued from page 1

students like," Carter said. "We almost always keep blueberry muffins and a variety of cookies, along with Italian sodas and French sodas."

Edwards said no matter what the theme, they do their best to keep events as authentic as possible. He said the new bar will provide a good atmosphere for all of the special events.

"I think it adds a little elegance," said Holly Pishney. manager in charge of special events and dietician for Housing and Dining Services. "It also offers a nice change of scenery."

Jamie Runnebaum, freshman in life science, liked the change.

"The coffee bar is a good thing," she said. "It looks nice and offers a good variety of choices."

#### SERVICES

■ Continued from page 1

"Both young men were tremendous blessings," Weber said. "God created them both, and made them both very special."

To end the service, the men of Delta Sigma Phi performed the "Bond Eternal" ceremony, which Tatro said was the fraternity's way of saying a final goodbye.

Each member held a white carnation and formed a triangle around the alter where pictures of Valesquez and Wiens were displayed. Words of comfort, written out by the national Delta Sigma Phi fraternity, were spoken along with prayer.

One by one, each member placed his carnation on the alter. When the ceremony was over, the Rev. Don Fallon led everyone in prayer. The service ended with everyone present singing "Amazing Grace."

# Friends, family remember lives of 3 former students at service

Nicole Donnert/Collegian

Joe Henning, freshmen in computer science, and Kendal Goodheart, sophomore in apparel marketing, share memories of three former students at the memorial in Forum Hall on Friday.

Kansas State Collegian

Outside the doors to the Union Forum Hall, tables lined with photographs, school projects, Boy Scout awards and sailing memorabilia rested on display.

Family members took pictures, friends stood in groups and laughed, and K-State professors looked over the belongings of students they only knew for a semester.

Friday's memorial service honored three students who have not been seen alive since they left for a sailing trip in December, Timothy Bennett was found dead Dec. 6 in Tuttle Creek Reservoir, and Christopher Shipley and Kyle Chapman have not been found.

Professors, friends and fellow Boy Scout members all spoke about their friendships and memories of the three boys during the afternoon service.

\*Chris, Tim and Kyle were one of us

eight who always were together," Lindsay Sutter, freshman in environmental design, said. "We ate together every single meal and hung out together every single night. I would dare to say we were inseparable."

The memorial gave students and faculty a chance to let family know how much Chapman, Shipley and Bennett meant to them.

"I want to thank the families for raising three young men who touched us in ways they can't even imagine. We are all better people for having known Tim, Chris and Kyle," Sutter said.

Representatives from the different colleges in which the boys were enrolled also spoke about the students they only had a small chance at knowing.

Ray Hightower, assistant dean of the College of Engineering and former scout leader, spoke about how Chapman, Shipley and Bennett were Eagle Scouts.

"Some of the students I deal with and faculty ask me, 'How did something happen like this to an Eagle Scout?" Hightower said. "These things can happen to the best and most experienced people. It is out of their control.'

Annah Ecker, sophomore in music education and former girlfriend of Shipley, shared her favorite memories of Shipley and his friends, but ended on a

There is so much left to say in my mind and my heart," Ecker said. "Chris said if he could meet anyone at all, alive or who had passed on, it would be his grandfather, his mother's father, who had passed away before he was 7 months old. My heart is really full thinking of Chris finally getting the chance to meet him."

Sutter ended the memories of friendships with Chapman, Shipley and

# Junction man shot near JCHS

BY JENNIFER FARR Konsus State Collegian

Police are searching for a suspect in the shooting of a Junction City man found near Junction City High School on Friday afternoon.

Officer Leithoff, patrol officer, said police responded to a call in the 900 block of N. Eisenhower Drive around 3:20

Christopher Johnson, 24, after being found shot, was transported to Geary County Hospital. Although he was not a patient as of Saturday morning, hospital officials said they thought he was transferred. Hospital officials would not release information about his condition.

Leithoff said although the victim was found near a school, the incident is neither school nor student-related

Information about the suspect could not be released at this time.

# Cuts needed to balance state budget

BY JOHN HANNA The Associated Preza

TOPEKA - Agreement appears to be growing among legislative leaders that both cuts in some government programs and significant tax increases are necessary to balance the state budget.

The state's financial problems are that

"We don't have any good alternatives," House Appropriations Committee Chairman Kenny Wilk, R-Lansing said "This year is a selection among bad alter-

# K-State bands help judge, teach high school students

Kansas State Collegian

High school students from Kansas and Missouri took over McCain Auditorium Friday and Saturday for the Central States Jazz.

The festival, sponsored by various Manhattan area businesses, kicked off Friday. The K-State Concert Jazz Ensemble gave a performance that evening.

Saturday was filled with each of the 16 bands playing a few pieces for audience members and professional musicians Bobby Watson, Stan Kessler and Todd Strait. The professionals then served as adjudicators to the bands, first judging them, and then giving them various pointers on how to play better.

Watson, professor at the University of Missouri-Kansas City, is an internationally known alto saxophonist. Watson has topped the critics' as well as the readers' music polls consistently. Peter Waltrous of Musician Magazine said Watson's album "Present Tense" was "one of those perfect albums."

Kessler, a trumpeter, is from Kansas City. He was described by Dick Wright of KANU-FM 91.5 as one of the most outstanding players on the Kansas City scene. Kessler has served as a clinician before for festivals including the UMKC Jazz Fest, Central Missouri State Jazz Fest and Northwest Missouri State Jazz Fest.

Strait, who teaches percussion at UMKC, is a musician on the international level. He has more than 50 recordings to date and is currently sponsored by Zildjian and Yamaha.

"This has helped me get used to playing solos," said Peter Leonhard, student at Manhattan High School. "It's been fun to play in front of an audience and get judged."

The K-State Jazz Combos and the Judicial Jazztet also performed Saturday. The Judicial Jazztet was comprised of adjudicators and

Besides the band sessions and concerts, clinics conducted by K-State faculty and alumni were offered to various instrument sections. The clinicians focused more on individual instrument sound instead of the sound of the entire band.

"This event gives students a chance to play for an audience different than what they are used to," said Keith Woolery, director of the Newton High School band. "They get to hear other bands and interact with their peers from other schools.

Wayne Goins, K-State jazz director, was in charge of the event. He said K-State has had this event before, but it was structured in a

"We haven't held the event for three years," Goins said. "We needed to restructure it so the emphasis was more on jazz education."

Goins said that in the past, K-State brought in "big name acts" and the emphasis wasn't on student performance. This year, by giving each band a chance to perform, Goins felt students would learn more.

Besides gaining experience, each band went home with a plaque for attending the festival. They also had a chance to take a group picture after their performances.

Goins looked at high school band students

as prospective K-State students. "We hope they come away from this event with and idea of how incredibly strong and talented our faculty is," Goins said. "We want them to take a good look at us, because we have a whole lot to offer."

# Bill splits Manhattan from Junction City; not expected to pass

BY MICHAEL WATSON

Kansav Stare Collegian

Legislators redrew congressional district lines in Kansas last semester, separating cities such as Fort Riley and Junction City. State officials said those cities should not be split, and the districts are being redrawn to keep them together.

Rep. Jeff Peterson, R-Manhattan, said communities with the same social, cultural, racial, ethnic and economic interests should stay together. He said that is why the map should not change and split Junction City from Fort Riley and

"Similar communities often want the same people in congress to represent them," he said.

Read on page 10 about state legislators who will redraw state district lines at Wednesday's meeting.

Congressional districts should be redrawn to give each of the four districts' 672,105 people. The redistricting should not dilute minority voting strength, but should give the four Kansas districts equal representation in congress.

Manhattan, Fort Riley and Junction City all are in the second congressional district, where many legislators said they should

#### LOCAL IN BRIEF

#### Local man charged with attempting to create meth

A Manhattan man was charged with attempting to manufacture methamphetamine last week.

Patrick Sean Freel, 35, pleaded guilty in U.S. District Court, and now faces a mandatory minimum of 10 years and a maximum of life in federal prison without parole.

Riley County police officers conducted a search warrant at Freel's residence April 9, 2001.

"The police got to the residence to serve an unrelated warrant." Brenda fordan, assistant Riley County attorney, said. "When they got to the home, they gathered information that was consistent with meth.

The police found 5.75 ounces of ground-up pseudophedrine, along

with other ingredients used to manufacture methamphetamine.

Freel awaits his sentencing, scheduled for May 7.

#### STATE IN BRIEF

#### Lawrence to be split into 2 congressional districts

TOPEKA - Senate President Dave Kerr said he doesn't think legislators can redraw congressional districts without splitting Lawrence between two.

The city is in the 3rd District, with Johnson, Miami and Wyandotte counties. Kerr believes a redistricting plan will have to put part of the city in the 2nd District.

Most proposals before the Senate Reapportionment Committee place Lawrence in the 2nd District.

The committee will meet today with the goal of endorsing new maps of state Senate and U.S. House districts,

#### NATION IN BRIEF

# Lawmakers to grill Lay this week, unsure if he will talk

WASHINGTON, D.C. - The man who sat atop Enron's "house of cards" is to be grilled this week by lawmakers who say they have strong evidence of illegal activity surrounding the company's collapse. Whether they manage to crack Kenneth Lay's silence remains to be

Lay, Enron's former chairman and a friend and political backer of President Bush, could testify at a Senate hearing Tuesday, a week after he pulled out of two scheduled Capitol Hill appearances.

#### Iran closes office of warlord who opposes government

TEHRAN, Iran - Iran has closed the office of a former Afghan warlord who opposes Afghanistan's interim government and the strong U.S. role in that country, one of his aides said

The closing of Gulbuddin Hekmatyar's offices in the Iranian capital Tehran and the eastern city of Mashhad appears to be a conciliatory gesture toward the United States, where officials have accused fran of trying to destabilize the new Afghan government.

The aide, who spoke to The Associated Press on condition of anonymity, would not give details about the closure, and Iranian officials did not immediately respond to a request for comment.

#### Touch up

Nicole Donnert/Collegian

Megan Hughes, Junior in public relations and French, touches up a wall with plaster in the William T. Kemper Foundation Art Gallery at the K-State Student Union on Sunday. Hughes was a part of the joint UPC arts and entertainment multicultural committee that helped hang up the Black Panther gallery now being displayed.

#### K-STATE NEWSMAKERS **Professor wins award for Most Outstanding Paper**

Jaebeom Suh

Jaebeom Suh, assistant professor in the Department of Marketing and International Business, said he has fulfilled a once in a life-time opportunity. Suh won the Most Outstanding Paper award from the Literati Club, an organization for authors and editors

Suh said he felt extremely proud when he won this award. "I'm happy that I can contribute to the outstanding reputation of Kansas State," he said

Suh said he wrote the paper because of his interests in the service area. His paper concentrated on building trust and commitment with customers. 'My motivation for this paper was trust issues," Suh said.

He submitted his paper for publication to Emerald Management in May

2001. It was published in October. Suh will receive his award April 11 in Leeds, England

# Former professor's tradition carried on with lecture series

BY MICHAEL NOLL

Kansas State Collegian

Former Professor of Sociology Donald "Adam" Adamchak never hesitated to be honest, even brutally so.

"Whenever I left on a plane, he didn't say, 'I love you, honey,' or anything like that," Adamchak's wife, Susan, said. "He said,

'Don't do anything stupid." Adamchak, who died two years ago of cancer after teaching at K-State for 22 years, also extended his straight-shooting

mentality toward students.

"The best thing about him as a professor was that he was very straightforward," Harry Vogel, graduate student in sociology,

"If there was a problem or if something had to be done, he would let you know. He didn't try to placate you or patronize you."

The Donald J. Adamchak Distinguished Lecture in Sociology at 3:30 p.m. Tuesday in the Union Little Theater will continue his tradition by inviting Karen Stanecki to speak on HIV/AIDS in Africa.

Stanecki gathers data for the U.S. Census Bureau that is used to project what the course of the HIV/AIDS pandemic will be in different countries.

#### **Events**

A free, informal luncheon with speaker Karen A. Stenecki and Susan Adamchak, widow of Donald Adamchak, will be at noon Tuesday in the Union Bluemont Room.

■ Stenecki will speak at 3:30 Tuesday in the Union Little Theater.

In Africa, the results of the disease have been devastating, and now similar scenes are being recorded in India and China, Dr. Lelah Dushkin, lecture organizer, said.

"It destroys families because it affects different sections of the family very unevenly," Dushkin

"In some villages, practically

good many of the able-bodied women of the most productive ages are missing, and it's the others who somehow have to cope and hang a family together and raise the children.'

The topic is not only of international importance but was of interest to Adamchak and his wife Susan, who have published, lectured and had consultancies

However, Adamchak, who had an international reputation in demography, Africa and development studies, also is remembered at K-State more for his effect on students.

"One of the things he brought to his job was the appreciation of mentoring because he had had

some really good experiences himself as a student," Susan said. "He was very loyal and very protective of his students. He demanded a very high quality, but then challenged them to produce that quality."

While Adamchak demanded much from his students, he also gave much in return - even at the possible expense of his health, Susan said.

Just two days before surgery to remove a brain tumor, Adamchak was working on a graduate student's exam.

"He was still trying to read the test before he left because he didn't know what would happen," Susan said.

"He didn't want the student's work to be complicated by

whatever happened to him.'

Such loyalty to students was an important motivator in establishing a distinguished lecture series in Adamchak's name, Susan said.

"This was perceived as a way to perpetuate his memory here at Kansas State," Susan said. "It's very much a reflection of the students' respect and appreciation for him.'

The lecture series also helps fill the void left by Adamchak, Vogel said.

'He really took an active role in your work and kept you going. He was a very dynamic and energetic professor," Vogel said.

"The department hasn't been the same without him. The lecture has kept his spirit going."

The Associated Press

BEERSHEBA, Israel - Two Palestinian gunmen sprang from a car and sprayed automatic gunfire at Israelis outside a military base in this southern desert city Sunday, killing two soldiers and seriously wounding five people before the attackers were shot dead by troops.

In apparent retaliation, Israeli warplanes dropped three bombs on the main Palestinian security installation near the Mediterranean coast

Security officials evacuated the

building before the attack, but more than a dozen people were taken to the hospital, most suffering from shock and from cuts caused by broken glass, hospital officials said. Israel did not immediately comment.

The shooting attack in Beersheba came just hours before Israeli Prime Minister Ariel Sharon returned home from a U.S. visit. During the visit, the Americans said they would press Yasser Arafat to clamp down on militants but turned down Sharon's request to cut contacts with the Palestinian leader.

Also, for the first time in more

than 16 months of fighting, Palestinians fired a rocket into Israel from the Gaza Strip, Israel's military said. The rocket landed in a farm field and no one was injured, but Israel said it regards Palestinian use of the weapon as a serious escala-

Sharon was to meet top security officials at his ranch in the Negev Desert Sunday night to discuss probable retaliation for the shooting and rocket attacks, Israeli television reported. A spokesman for Sharon would not confirm the report.

In the Beersheba attack, the gunmen started shooting with

automatic weapons outside a cafe near the gates of the army's southern command headquarters in the center of the city, police said,

Many soldiers were on the streets during their lunch break Sunday afternoon, and they quickly began firing back at the attackers, who were shot dead within minutes, witnesses and officials said.

The seven people shot by the attackers included soldiers and civilians, and two women soldiers died shortly thereafter, according to Israeli officials.

# Evaluating education

Education should remain state's top budget priority

t all starts with education. Societies will falter if the people are not educated. It fuels the world's ability

Sadly, education and the teaching profession don't get enough respect. It is a mentality that our society must

to solve problems.

Nick Bratkovic

change. In the education process, teachers are the key. A great high school

journalism adviser got me

into newspaper writing. Her simple words, "Why don't you come write on the paper?" made all of the difference in the world. The effect she made on my life is something I doubt she will ever understand.

Honestly, a good teacher makes all the difference in the world.

Their quest is simple: for you to improve and learn the course's material. It is a pretty giving job.

Some have taught for decades. Others come in temporarily and challenge your mind in ways you never dreamed possible. That is the beauty of a good teacher. Sure there are different styles, but you have to know they are each trying to do their best to jam knowledge into your mind.

The question is, are we doing our best

As a society, financially we place little emphasis on education's value to America. We pay our teachers little, and they consistently turn out the leaders of tomorrow. The state cannot afford to cut education just because it is afraid to raise taxes and upset

It's time to forget about approval ratings, and do what is best for education in Kansas. Simply making budget cuts will not solve the economic struggles facing the state of

I understand why teachers do not

always make six-figure salaries. They are not in a profit-driven industry. A school district doesn't make money off selling students. As smart as that valedictorian might be, it doesn't equal dollar signs for the teachers.

I also understand that nothing taught to a child is going to alter the world peace process. In these times of terrorism, missiles and defense spending are vitally important. We must fully fund the military, but not at the expense of education.

We cannot just sell out the education process. Funding at the state level is important because many programs might get cut if education is not a priority for our legislators.

Teachers' salaries might decrease. Programs that make high school English or Algebra 2 tolerable could be gone if the cuts become an annual tradi-

We need to look at the big picture. Take a moment some time in your class, or go to an elementary school. Watch as a teacher works with a student until that magic light bulb clicks on and the student gets it.

Look at the student. Then look at the teacher. They have formed a lifelong bond.

Perhaps the reason education doesn't get funded is because lawmakers know that those who love teaching will stay. They enjoy pumping information into pupils, the way Mike Tyson loves to bite, or Bob Dylan likes to write. So their work is being taken for granted. Bottom line, the salaries and funding need to improve.

It might not be a matter of self-defense or national security now, but some day it

If a new generation of leaders can figure out better ways to lead, and safer ways to live in peace, then maybe educational funding will equal national security. In a sense, aren't the leaders of today a product of the past?

Education in well-funded schools must continue. It is time to improve the education neb8030@ksu.edu

teacher from your past. After all, they deserve something in return for what they have done.

The real star of

the ceremony was the Ground Zero flag, which might have been the only flag flying at the World Trade Center during the attacks.

The flag will hover over the ceremonies, a gentle, fluttering reminder of the pain the U.S. has suffered since the

terrorist attacks. Although the flag represents hardship and international tension, it also reminds the world the Olympics can

overcome these elements of unease. All the participating nations will come together. Political and religious differences are set aside, taking a secondary place. The first priority will be the animal-like joy of sports.

Athletes will whittle all tension into a simple competition of who will finish first. The Olympics are all about this amicable competition.

It is inspiring to see nations set aside their disagreements to come together and celebrate sportsmanship.

TUESDAY

### War brings 2 sides to every story Afghans are completely uninvolved in anything

t really irritates me when our court-appointed president asks questions like "Why do they

Even though I love America and the U.S. Constitution, I feel that to understand the war on terror, you have to accept the United States as one of the leading sponsors of terror around the world. This is evident in reports in June 1986 from the

American Journal of International Law and United Nations reports of our covert involvement in political assassinations, sponsorship of dictators (Saddam Hussein for instance) that commit cold-blooded murder, and prevention of democracy at all costs in regions like Chile, Saudi Arabia or Nicaragua not subservient to U.S. interests.

The United States is the only country to be ruled against by the World Court for "unlawful use of force" against Nicaragua in the '80s (http://www.gwu.edu/-jaysmith/Nicaragua.html).

But wait, I forgot, it's taboo to have any criticism against the United States

The FBI defines terrorism as "the unlawful use of force or violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives."

The horrific tragedy on the morning of Sept. 11, in any way shape or form fits the definition of terrorism. But I suggest you pay closer attention to some of the United States' one-sided, arrogant and irrational foreign policy dictated

toward the Middle East. Look at the Carter or Reagan administration's explicit involvement in the largest covert operation in U.S. history: the Soviet-Afghan

According to history books and articles in the Washington Post (07/18/92), this cost taxpayers between \$3 billion and \$7 billion, and provided arms to large armies of "freedom fighters" like Osama bin Laden. I guess it's okay

to sponsor those who terrorize our enemies, like the former Soviet Union.

> A look in a book or Internet query reveals that more than 100,000 of the most fanatical Muslim extremists to fight a holy war did so unknowingly on our behalf.

Then, in 1989, when the Soviets pulled out, the United States packed up and left Afghanistan to rot. The country remained infested with bitter Muslim extremists from more than two dozen countries that we trafficked in for our own selfish interests.

According to the U.S. and Britain's case against bin Laden, only three of the alleged hijackers can be linked to Afghanistan. The Taliban didn't represent Afghanistan. The majority of

**Paul White** 

related to terror or bin Laden, yet they feel the blunt end of the wrath in this "just war."

Survival is the name of the game for those who wake up every morning to poverty, war, fear, starvation and freezing winter temperatures. What the United

States has done seems just as justified as massive air assaults on Fort Riley and Herrington for providing refuge for Timothy McVeigh and Terry Nichols.

These people live in conditions we cannot possibly imagine. Winter in Afghanistan begins a lot earlier, gets a lot colder and affects a population that lives a

much more uncomfortable lifestyle. These innocent people being murdered with our tax dollars have two options: stay in their war-plagued cities and die from

U.S. strikes, or flea to the border in below-zero temperatures and die from starvation

or lack of medical attention and supplies. A comprehensive analysis

of the Afghan civilian casualties was made available in January by University of New Hampshire professor Marc Herold (http://www.mediaalliance.org/mediafile/20-5/). His data was based on international news wires, major domestic/foreign publications and first-hand accounts.

It's shocking that more than 4,000 civilians have lost their lives as a result of recent air and ground strikes, a similar body count to the U.S. tragedy.

I have a tremendous respect for certain factions of the U.S. military, but who's targeting these "surgical" air strikes? Ray Charles, Miss Cleo and Helen Keller?

Make no mistake, this is no war. War is mutually accepted conflict between two opposing entities. War is not when the country with the largest arsenal of nuclear, conventional, biological and chemical weaponry at its disposal, attacks one of the most poverty-stricken nations on Earth.

When we carry out missions like Enduring Freedom, our military labels these innocent casualties "collateral damage." Think back to Timothy McVeigh's comments about the unfortunate victims present in that Alfred Murrah federal building that April morning in 1995.

They, too, were described as "collateral damage."

# Last Chance owner creates, maintains Aggieville staple

BY NICK BRATKOVIC Kansas State Collegian

Chances are you've heard of Rusty Wilson's bar.

He is the owner of Rusty's Last Chance Restaurant and Saloon in Aggieville, and while most people know the bar, they likely know little about the man behind the business.

Wilson started working in Aggieville in 1982 at Kites, which was in Aggieville for 40 years, and bought Chance in 1989. In that time, the business has grown into an Aggieville staple.

As a teenager, Wilson worked in Derby, Kan., at a little restaurant, and it was there that he said he learned how to work. Wilson was employed by a 65-year-old man who showed him the ropes of business and responsibility.

"He taught me that you have to be involved in your business, and he taught me a work ethic, that you needed to be there," he said. "When I first started here, I was here 15 hours a day, just working it and working and working it."

A lot has changed since Wilson bought the bar in 1989, and added his name. At that time, he owned and operated it with another person. He was fresh off working as a manager at another bar. Today, he is the sole owner, and has engineered bar expansions and renovations to Chance.

Adorning the Chance walls are K-State memorabilia and famous

autographed pictures. There is one piece of K-State history that was given to the bar, and then taken away - the KSU Stadium goal post. It happened Nov. 14, 1998, and it is an event Wilson said he will never forget. K-State had just beaten Nebraska for the first time in 26 years. A mob of people carried the fallen goal post through town and eventually placed it on the bar's roof.

The entire time, Wilson said he felt honored at what was occurring.

"I didn't expect it. I was really flattered that the students of Kansas State thought of Last Chance in that way," he said. "My only regret is that I wish it was still there.'

That night, Wilson said, was one of the biggest in the bar's history.

In recent years, the bar has expanded twice with the addition of Rusty's Next Door. Other highlights include being named one of Playboy's top 100 college bars in

He also has opened another Rusty's Last Chance in Shawnee. Kan., and owns it with former K-State wide receiver and current NFL receiver Kevin Lockett.

Between the two bars, he said he works daily in some capacity, but Wilson said he has changed the way he works. He and his wife have two children, and he wants to spend time with them. He switched his hours from working until closing time to

coming in early and leaving by 7 p.m. He said he doesn't miss the late hours.

"I will tell you this, after 15 or 16 years of being out until three in the morning, it was time for a change," he said.

Now Wilson said he would rather be at home with his family. He leaves the task of running the bar at night to general manager Pete Anderson and his other managers, but handles the Saloon's day to day operations.

"People look at this business and say, 'Wow, you know, he has got it made," he said. "Nobody has any idea what it takes to keep this thing together. We don't just come in here and unlock the doors, It doesn't work that way."

Still, Wilson said he doesn't consider himself at the top of the Aggieville bar industry.

"I never ever, ever consider myself at the top. I am one of many that is down here trying to make a living and trying to survive," he said.

Wilson did say that he is paying the bills, and the bar - judging from crowds - appears to be doing well financially. He also disputes the notion that Aggieville is not what it has been in recent years, and said the entertainment district is filled with good operators.

"Aggieville is just like any other place in America. It has its ups and its downs," he said. "Right now we have had some businesses leave, and there are two reasons for that. A, it is the choice of business that they put in there, and B, it has to be the

Cheryl Sieben, Aggieville Business

Rusty Wilson, owner of Rusty's Last **Chance Restaurant** & Saloon in Aggieville, works early in the morning and leaves by 7 p.m. so he can spend time with his family. He also owns Rusty's Next Door, a smoke-free bar.

Karen Mikols/

Association director, said Wilson has been generous in helping the association, and said people would be surprised to know the man behind

"A lot of people know the name Rusty, but they don't know the guy," she said. "He is a family man, and they would be very surprised to put a face with the name.

Bar employees said it all comes down to Wilson and his ability to create a family-like atmosphere.

"His first priority is for the customers to have fun, and then for the employees to enjoy working here

and being safe," Julie Clark, office manager, said.

It is a formula that has led to long tenure for employees. Anderson said workers average about three years of

He echoed Clark's sentiments, and said Wilson does a great job as an owner. As a manager, he said he works to keep the bar in working order by making continuous laps around the bar.

Wilson said he doesn't know how long he will continue to run Chance, but acknowledged it is a young person's industry, and he might move

on in a few years. "In a college town, your customers are always the same age,"

"They are here for four years, you get them for two years, and then they are gone. Your customers are always between the ages of 21 to 25. Here you have this 38-year-old running around, and I have gotten older, but my customer base has stayed the same age.

"It is a younger man's business, but when a younger man's in charge, he sometimes doesn't have the discipline or maturity to handle it."

# A HUSKER HURTIN'

Photos by Zach Long/Collegian K-State's Megan Mahoney, right, fights for a loose ball with Nebraska's Alexa Johnson, left, during the second half Sunday in Lincoln, Neb. The

# Women's scoring droughts lead to Nebraska victory

BY DAN SMITH

Kansas State Collegian

LINCOLN, Neb. - If you don't score, you don't win.

As simple as that basketball adage is, K-State couldn't get it right Sunday, falling 67-52 to Nebraska at the Bob Devaney

'We did not respond on the offensive end of the floor at all today," Cats' Coach Deb Patterson said. "Dropping down three or four baskets within the framework of 20 minutes is not enough to win a basketball

While it wasn't quite that bad for the K-State offense, two of the purple's longest scoring droughts of the season did K-State (21-4, 9-3) in. Nebraska (13-11, 3-8) held the Cats to just one basket for 13:56 during two critical stretches, handing K-State its second loss in three games.

Nebraska opened the game with a 7-2 run on two Katie Robinette jumpers, and after K-State moved within one at 7-6, the Cats scored just two more points in the next 8:45, while the Huskers put together another 19-2 spurt to push the score to 26-

"At the beginning of the game we let up,

and we weren't as intense as we needed to be," freshman Kendra Wecker said. "That allowed them to get up on us."

K-State did manage to claw back, though. The Cats followed the near nineminute scoring shortage with points on six of its next seven possessions, part of a 9-0 purple run to shave the lead to six heading

into halftime, 37-31. That resurgence was enough for K-State's players to feel confident during the intermission, Wecker said. But that feeling, along with any hopes for a Cat comeback, would soon dissipate.

"We felt confident coming out of the locker room in the second half and wanted to come out and pick up where we left off," Wecker said. "But that didn't happen, and they came out aggressive towards us and we just didn't answer."

Nebraska guard Keasha Cannon, who led all scorers with 27, led a focused group of Huskers on defense in the second stanza, collecting six of her game-high 11 rebounds in the final 20 minutes while helping to force several of the Wildcats' 18 turnovers.

We were just playing defense and

San BASKETBALL on PAGE 7

# Hot-shooting NU keeps K-State men winless away from Bramlage

BY DEREK BOSS

Ransas State Collegian

LINCOLN, Neb. - Nebraska might be the worst shooting team in the Big 12, but it looked far from it

The Cornhuskers (11-10, 4-6) shot a season-high 56 percent from the field, including 12 of 24 from three-point range, and led by as many as 21 in a 99-82 victory over K-State (9-12, 3-7) at the Bob Devaney Sports Center.

Nebraska had been averaging just 38 percent from the floor this season, and only 67 points per game, but the Huskers bested both those figures against the Wildcats - and by a considerable

"We've been a bad road team, and we continue to be a bad road team," said K-State Coach Jim Wooldridge, who's team dropped to 0-7 this season away from Bramlage Coliseum.

"We have ourselves to be accountable, and I've got to be accountable for it, but I just can't get them to the right place playing on the road."

And like previous road games this season, a K-State scoring drought dug a substantial hole for

"Every time we come on the road, I think our team is just so flat that we don't get off to a good start," guard Larry Reid said. "Teams put us away

It wasn't as quick as usual Saturday, but it was the same result for the Cats.

The game was tight most of the first half, with neither team leading by more than four through the first 14 minutes of play, but a 29-27 K-State lead turned into a 10-point deficit by the 4:55 mark as Nebraska reeled off 12 unanswered points.

Five different Huskers scored during that stretch, and Wooldridge was forced to call a K-State

"I don't know. We can't get it in the basket," Wooldridge said. "This has happened so much to us on the road that it kind of makes you wonder a little

K-State cut it to six less than a minute later, but NU rallied with a 6-0 run to take its biggest lead of the half, 46-34, and took a 49-38 advantage into the

Nebraska shot a blistering 65 percent in the first period and outscored the Cats 18-8 in the paint. Then, in the second stanza, the Wildcats' strug-

gles continued. It took over four and a half minutes for the purple to score, and Nebraska capitalized, using a 7-2 spurt to extend its lead to 16. That edge grew to 21 by the 11:54 mark, as two-straight Husker three-

pointers pushed the count to 69-48, but K-State

wouldn't lie down. The purple built a 9-2 run to slice the deficit to 14, and an 8-0 spurt two minutes later cut the deficit to single digits. Back-to-back Phineas

Atchison treys made it 79-71 with 5:45 to play. "I thought we were going to definitely come back and tie the game at that point," Reid said.

"We have defensive breakdowns, rebounding breakdowns, excessive turnovers or missed lay-up opportunities that are staring us in the face."

Coach Jim Wooldridge

But Husker freshman Jake Muhleisen answered with a three-pointer from the left wing to push the lead back to 11, and the Cats never got closer.

"That was a big three he made," Wooldridge said. "That got them back into their comfort level."

Muhleisen had 12 of his game-high 21 points in the final six minutes, leading five NU players in double figures. He shot a perfect 11-of-11 from the line in a game that saw 48 personal fouls called -29 on K-State.

Reid, freshman Nick Williams and reserve Gilson Delesus all fouled out for the Cats, and the Huskers connected on 35-of-42 charities for the contest.

Five Wildcats scored in double-digits, led by Atchison's 21.

"The line of margin of error that we can play at is so small," Wooldridge said. "We have defensive breakdowns, rebounding breakdowns, excessive turnovers or missed lay-up opportunities that are staring us in the face. Those things - we just don't have enough to overcome that."

K-State's Larry Reld (11) loses control of the ball against Nebraska's Brian Conklin, top, during the second half Saturday in Lincoln,

# Men's golf heads South to start spring season

BY LAURA BOYD Kanszy State Collegian

The K-State men's golf team is back in action this week, beginning its spring season with a 12-team tournament against 2001 Big 12 Champion Baylor, No. 9 Tennessee and intrastate rival Kansas, in the Rice

Intercollegiate in Katy, Texas. The players know their focus needs to be

on individual play this weekend. "I don't look at other teams when I compete," senior co-captain Matt Williams said. "Right now, I am focusing more at getting back in the swing of things."

The team is returning to the Rice Intercollegiate for the second time. Making the trip for the Cats will be sophomore Aaron Watkins, who led the team in three out of five tournaments in the fall, senior co-captains Williams and Bryan Milberger and sophomores A.J. Elgert, Bryan Schweizer and Greg Douglas, who will compete as an individual.

"We are playing with the same five guys as we finished with last season," Wildcats Coach Tim Norris said. "Having a veteran team that knows the courses should pay off."

Williams shares his coach's optimism both for the tournament and the season as a

"We all have a game plan of how we are good, solid play out of each of our players."

attacking the course," Williams said. "I expect After the last few weeks of indoor practice

having helped shore up his team's focus and

fundamentals, Norris is confident this team will do great things this season.

"I am so optimistic about how good we can be," Norris said. "The possibilities for the season are open.

Williams said the key to success this season can be summed up by focusing on the importance of teamwork.

"For a team to do well in this conference, there can't be just one or two guys pulling the load," Williams said. "We are playing with the strongest five guys we've got."

At the end of the fall season, K-State was sitting at the No. 8 spot in the Big 12 conference, and though the team might have left for winter break a little frustrated, they are going into the spring season with a new outlook.

"Everyone has made improvements," Norris said, "And that is what it is all about."

Leadership, experience and improvement have kept Norris' players confident that this semester will produce the strongest finish ever.

"We have consistent players and the talent to do it," Williams said. "And we hope to improve with each tournament."

The Wildcats will face the first of their competition for the spring season with 36 holes on Monday and Tuesday on the tournament's par-72 course of Meadowbrook Farms Golf Course outside Houston.

Williams hopes the tournament will be a great start to an even greater season.

"We are in a solid place where we can only get better," Williams said. "We control our

# Nation starting to notice Big 12 hoops teams

The ACC, the SEC, the Big East - all some of the best conferences in the country. Teams such as Duke, Maryland, UCONN, and Cincinnati, all of which are highly respectable teams. But something new is in

the air this Something

we've not heard in awhile-I mean never.

Josh Wells The Big 12 Conference. The nation is finally talking about the Big 12 Conference. Yes, we all know the Big 12 was a powerhouse in football. Now the buzz

the Big 12 is - both in women's and men's After watching conference games unfold this week, I've come to a theory - losing in

is about how tough a basketball conference

the Big 12 on the road is not a big deal. With four teams in the conference ranked in the top 25 on the men's side and another seven women's teams among the top 25, the Big 12 undoubtedly is one of the toughest conferences in the country.

Wining in each one of the conference's venues is indeed a task, and a task that every team in the Big 12 has struggled with at some point or another this season.

Let's first look at the men's examples. Look what happened to Oklahoma State. The Cowboys are on a four-game road losing skid and are still in the top 15. Tough losses to intrastate rival Oklahoma, then an upset from K-State, and before all that, a loss in mit January at Texas Tech.

Another testament of my theory is the play of Texas Tech. Bobby Knight has done a tremendous job turning around a Big 12 cellar-dweller and gets my vote for Big 12 coach of the year. But all of that aside, back to my theory. The Red Raiders have lost three of their last four and remain in the top 25.

Shift gears and look at the women's side. Oklahoma, K-State, Baylor, Iowa State, Colorado, Texas and Texas Tech are all in the national polls, but this week, there were some speed bumps in each of their sched-

Start with No. 12 Baylor. The Bears' last two road games have been losses, one at Colorado and another at Oklahoma - both are ranked teams. No. 13 Colorado fell at Iowa State on Saturday. No. 15 Texas has lost three of its last four, losing to K-State on the road two weeks ago and Texas Tech last week. No. 17 Texas Tech lost on the road in Colorado and also to Baylor last week.

Take a look now at our women's basketball team. Losing at home to Iowa State and falling on the road Sunday against Nebraska, the Cats are still in the running for the top conference spot, not to mention a possible top 5 seed in an NCAA Regional.

The bottom line is traveling in the Big 12 has proved to be rough on every team. Even the conference leaders, KU's men and OU's women traditionally do not play well on the

Kansas still is undefeated in the conference. Despite controlling every opponent this season, KU coach Roy Williams is not resting easy. He and his players know everytime they leave the friendly confines of Allen Fieldhouse, they are vulnerable. Sellout

crowds follow the Jayhawks around the conference. Even K-State's men had their first and only sellout of the year when the Hawks came to town.

Everyone wants to knock off a top team when they come to town.

Oklahoma's women have one lone loss in the conference and, yes you guessed it, it was on the road. OU lost back on Jan. 15 at then No. 9 Iowa State. Oklahoma's last road test will come this week, when the Sooners come to Manhattan to take on the Wildcats. Again, everyone will want to see an upset.

What is my point, you ask?

Look at the rankings. All these teams who have lost in the Big 12 whether it be on the road or at home against a higher ranked team will only fall a few spots in the polls. Finally, some respect for our young conference. If losing in the conference only moves you a few spots, then the voters agree it is a tough conference

which that, in my mind, is respect. There is no doubt Bramlage Coliseum will be a sellout Wednesday night. Those faithful fans bringing the greatest atmosphere in college basketball will no doubt be standing

outside Bramlage hours before tip-off. They'll be waiting to see if my theory of road roughness can in fact become law. OK, I lied.

They'll be waiting to see two highly respected and ranked women's teams battle for the Big 12 regular season championship.

BASKETBALL Continued from page 6

# Nebraska outshoots K-State in 3-point battle

BY DAN SMITH

Kansas State Collegian

LINCOLN, Neb. - If statistics don't lie, three-pointers weren't supposed to make or break either team Saturday.

Both K-State and Nebraska have struggled from behind the arc this season, holding steady in the lower half of the Big 12 with the Huskers holding only a slight edge in efficiency (.367-.319) coming in.

But at the Bob Devaney Sports Center Saturday, three-pointers were less of a novelty than a necessity.

The shootout began early, with both teams hitting three of their first five attempts from behind the arc to keep the game tight in the first 10 minutes.

From there, K-State would miss only one of five attempts in the half, but Nebraska answered the Cat attack, adding three more treys of their own before the buzzer sounded at the break, to take a 49-38 lead to the locker room.

The quick start was more of a concern for Coach Jim Wooldridge

the No. 11/10

Kendra Wecker

than the Huskers, though. In preparing for Nebraska, Wooldridge said his team's focus was primarily on stopping the long-range threats of sophomore forward Brian Conklin and senior guard Cary Cochran.

"It was a really disappointing effort on that end," Wooldridge said of his defense. "That's where we tried to concentrate the last two days to ensure ourselves an opportunity to win. We just couldn't guard them."

Conklin and Cochran burned the Wildcats for combined 19 points in the first half, primarily due to their potency from the three-point line. The Husker combo connected on five of seven opportunities in the first period, and wouldn't stop there.

Off screens, in the open court, or off the dribble, Conklin and Cochran picked the defense a part, adding 11 more points in the second half to lead Nebraska with 15 apiece. The duo hit seven of 10 treys for the game.

"We just couldn't guard the arc very well tonight," Reid said. "They shot a tremendous percentage from there and we just couldn't stop them." Reid and senior Phineas Atchison

would give the Huskers all they could handle on defense, though, draining 10-of-16 from three-point range. But as impressive as that number might sound, it wasn't the type of production K-State was looking for Saturday against an undersized Nebraska team.

"That's always fool's gold with us," Wooldridge said. "We made some three-point shots when the game's over, but that's unusual for us to shoot that high of a percentage."

In fact, K-State's accuracy from between the rings may have been what the Huskers wanted all along.

"It was bait for us to shoot it from the arc because they were packing the paint," Reid said.

While K-State's plan counted on the post contributing most of the scoring load, the Huskers' defensive gameplan was to eliminate that option early and often.

"They wanted us to shoot those shots, because it's a more highpercentage shot that we're gonna miss it than make it," Reid said. "I think we played right into their hands at some points in the game."

Still, K-State was able to get signifi-

Photos by Zach Long/Collegian

K-State's Pervis Pasco, right, fights for a loose ball with Nebraska's Wilson Thomas during the second half Saturday in Lincoln, Neb.

cant contributions from long range, hitting over 58 percent from beyond the arc, but in the end it was a case of one gameplan being better than another, Wooldridge said.

"We just had so much trouble guarding that team," he said. "Everyone of them were taken to task. In the end, those five guys whipped our five guys."

staying focused," Cannon said. "We didn't get rattled when they tried to

make their run, and we just played as

a team." Nebraska's second-half defensive pressure forced K-State into another drought midway through the period, and this time the Cats wouldn't respond. With the purple down four, 50-46, at the 10:26 mark, the Huskers held K-State without a basket for the next 4:20, while posting another 8-0

run to seal the win. We had a chance to get back in the ballgame," Wecker said. "We were within four in the second half - we battled back, but then we just hurt ourselves."

The Wildcats turned the ball over five times in the stretch, and forced just one from Nebraska, as the lead crept back to 16 with 6:15 to play. By then, it was all but over and Patterson was left wondering how her team's potent offense had been completely stalled.

"For Nebraska to have jumped on us defensively as easily and as quickly as they did in the first half, I have to say we came out very passive, and possibly complacent," Patterson said.

"It's a lesson we obviously have a great deal to continue to learn from, because the league is just too tough and the teams you play are too strong.

"Nebraska smelled blood today they just jammed it down our throat."

#### Reshuffled Husker lineup comes up big against Wildcats picking up five steals in the Huskers' BY DEREK BOSS over NU in Manhattan earlier this

Kansas State Collegian

LINCOLN, Neb. - Nebraska coach Paul Sanderford made a decision following the Cornhuskers' 95-60 loss at No. 13 Colorado last Wednesday night.

After playing guard Jina Johansen 18 straight minutes in the second half against the Buffaloes, Sanderford liked what he saw in the freshman reserve.

"I thought she got the ball moving, and she got other people involved," Sanderford said of Johansen, who finished with five assists in the CU contest. "I told the kids in the locker room after the game that Jina had earned a place in the lineup."

Smart decision.

Johansen made her first start of the season Sunday afternoon against K-State, and it paid off for the Big Red. Sanderford put the freshman at the point, allowing Keasha Cannon to move to the No. 2 guard position, and the junior responded.

Cannon notched career-highs in points (27), rebounds (16) and threepoint field goals made (3), while shooting 10-of-15 from the field and upset of the Wildcats.

"Keasha had a tremendous game," K-State coach Deb Patterson said. "There wasn't a possession that she didn't feel as though she could score the ball. I thought she was very active everywhere on the floor, and it can't be without mentioning that she leaves the

She played great on all ends of the floor. She was absolutely, totally into the basketball game completely, and I think that's what led to the production that she had on the offensive end."

game with 11 defensive boards and five

offensive boards.

handling."

Sanderford said replacing Cannon with Johansen at the point opened up the Huskers' offense, as the freshman led the team with a career-high nine assists in 39 minutes of action.

"It makes me look kind of silly that I haven't done that already," Sanderford said. "I thought Keasha played so much more in a comfort zone today because she didn't have to do all the ball

K-State forward Kendra Wecker saw the change in Cannon, too.

As the point guard in the Cats' win

Serious

season, Cannon scored just 10 points on 5-of-16 shooting, and didn't find the rhythm she did Saturday.

'She was all over the place, getting steals and offensive rebounds," Wecker said of Cannon's career day. "If she shot and missed, she'd follow her shot and get the stick back. She was getting loose balls, pushing it up the court and making things happen for them."

Johansen made things happen as well, getting NU into the right offensive sets each possession. But Sanderford said he expected that from a player with such confidence.

"Halfway through the second half during a timeout, we were talking about what to run," Sanderford said. "She said, 'Coach, I can take (Laurie) Koehn off the dribble.' That's a freshman at crunch time, with a five-point lead, telling me, 'I can take her off the dribble.

"So I said, 'OK. Overload, Let's go, Jina.' That kind of confidence is really important, and that's something that we've missed. I thought she really rallied the players together, and it's probably one of the most gratifying wins I've had in a long time."

# Increased need, decreased supply causes nurse shortage

BY TARA PATTY

Kanuas State Collegian

There is no end in sight for a nationwide nurse shortage that could result in higher health care

The nurse shortage is very real and directly related to the graying of America, said Myrna Bartie, EN, MS health occupations coordinator for Manhattan Area Technical College. Not only is the average nurse's age around 45, she said, but Americans are living longer with chronic diseases

"There is an increased need for supply and no increase in supply," Bartle said, "Not as many people are going into nursing.

Nursing is a cyclic profession. she said, and often little shortages occur, but the graying of nurses makes this shortage a little different.

There is no way out of the shortage before 2010, said Richard Allen, president and CEO of Mercy Health Center. Allen said there also

is a shortage in laboratory technicians and not enough training facilities. Mercy, he said, is fortunate because of both the university and Fort Riley and nurses moving in to the community.

"This country is in the midst of a very major nurses shortage," he

We have to ensure we provide competitive salaries, and we are recruiting out of the same base as Denver, Chicago and Kansas City. he said. Ultimately, the shortage and cost of available nurses will lead to higher health care costs, he

Individuals should recognize, he said, that the shortage is going to reach crisis proportions.

The shortage is so great, said Susan Watt, pre-nursing adviser for K-State, that nurses are getting sign-on bonuses between \$1,000 and \$5,000.

Rural areas are especially hurting and nurse educators are rapidly approaching retirement, she

"Nursing is one of the most versatile of health care professions," Watt said.

For example, nurses can get jobs in hospitals and private practices and also work as a school nurse, she

Many students in nursing training programs now are going into a second career or are going in to nursing as a first career after rearing their children, so they are not in the profession as long, she said. The average age of a nursing student is about 33, she said.

"Nurses do the lion's share of face-to-face patient care," she said.

Bartle said recruiting public service announcements and courses in public schools, including career shadowing, all are being implemented to bring the nursing profession to the attention of

Additionally, grants and scholarships are being discussed by the national government to make nurses training financially appealing, she said.

# Movie falls short in believability, special effects

When Arnold Schwarzenegger spends more time in hospital beds and handcuffs than kicking ass, it makes you question how deeply terrorism has affected America.

Although "Collateral Damage" was in production before the attacks on the World Trade Center and the Pentagon, it's hard to believe after watching it. Schwarzenegger, coincidentally enough, plays a firefighter Gordy Brewer. Gordy witnesses a bombing at the Colombian Consulate. that claims the lives of his wife and

Gordy, understandably upset, becomes directly involved with the FBI investigation when he realizes that he talked to the terrorist, El

Lobo, just before the explosion. But when El Lobo miraculously eludes the forces of the world's largest superpower, while

send them videotaped messages, Gordy is forced to take matters into his own hands.

still able to

Normally, Schwarzenegger's road to vengeance would be littered with corpses and one-liners, but "Collateral Damage" decides to take a different route. The role of Gordy Brewer is more of an everyday working man, as compared with the unstoppable killing machine that was

Colonel Matrix ("Commando"). The averageness of Gordy does little to increase the movie's believability or create empathy

for his

is sad in a

different way.

Arnold

character, but it

"COLLATERAL DAMAGE" \* \* \* \* \*

MOVIE REVIEW BY ADAM LEE

Schwarzenegger isn't the type of actor you want to see cry. You want to see him hurt people and shoot big guns. Aside from the ending, the most action in the movie occurs when Gordy builds a MacGyver-style bomb out of an electrical generator. The resulting

explosion is far from cool. "Collateral Damage" appears more as a poor attempt at a political thriller than an action movie. There are few special effects, and the ones that are in the film almost are

Hopefully the industry will learn there are some shots, such as Arnold being swept over a waterfall, that should not be digitally animated.

Without the action of a typical Schwarzenegger film, "Collateral Damage" had little left to stand on. This is not a Tom Clancy book, and Schwarzenegger is not Harrison Ford. There is nothing wrong with being type cast when you are Schwarzenegger

Action fans, "Collateral Damage" only will make you worry about "Terminator 3."

# 'Rollerball' shows no progress from original

MOVIE REVIEW BY JJ DUNCAN

Don't be fooled by the slick previews. The new "Rollerball" isn't any better than the old one.

Director John McTiernan ("Die Hard") has taken a lousy movie from 1975, added hot new stars, a modernized metal soundtrack, flashy camera angles and new ways of making violence look "ROLLERBALL" real. Guess what? It

still sucks. In the original version (directed by

Norman Jewison), Rollerball was the only sport in a totally corporate-run, futuristic society used to sedate the masses and make them realize individuality is futile. The execution left a lot to be desired, but the down-with-the-man message still came through

In this update, Rollerball is a sport gaining popularity on a global scale for its fast-paced violence and high stakes gambling prospects. The games are in Kazakstan where it is legal, but the players and fans are from all over the globe.

The next-door American hero of the game is Jon-A-Than (it's spelled like that so you'll remember to chant it in every other scene), played by Chris Klein of "American Pie." After realizing the whole game is rigged for ratings, Jonathan sets out on a personal

mission against the game's creator, a Russian tycoon played by Jean Reno, ("Just Visiting")

All the best scenes in the movie revolve around the brutal sport the movie is based on. Players either ride motorcycles or skate on rollerblades around a rink with a

shotput-sized metal ball they have to throw against a metal goal. McTiernan tries to cash in on a youth that has been

brought up with MTV Sports and the X Games by giving them a fast-paced, violent, fictional sport complete with shaky-cam technique and loud metal music.

The problem is one the original movie ran into as well. This sport is just too ridiculous to even try to take seriously.

Chris Klein has been doomed to another bad role, this time as a poor-man's Keanu Reeves, and seems every bit as worthy of the screen as the script. Rebecca Romijn-Stamos ("X-Men") seems to be in the movie just so she can walk around the locker room topless every so often.

Basically, this is a movie to avoid. If it's quick, satisfying violence in sports you want, CNBC is broadcasting every Olympic hockey game in its entirety.

# Cracker changes style, keeps distinct sound

\*\*\*

MUSIC REVIEW BY ADAM LEE

When Cracker released the anthology "Garage d'Or" two years ago, it had to make fans question the band's musical future.

With the band's two preceding albums ("Gentleman's Blues," 1998, "Golden Age," 1996) going largely unnoticed, it looked like "Garage

d'Or" might be the definitive Cracker collection. But with

their newest release "Forever," it's clear that Cracker has yet to crumble.

The opening track, "Brides of Neptune" has all of the elements of what makes a Cracker song work. The story-telling lyrics of front man David Lowery are as witty and crisp as they ever have been. "I tried dating a mermaid/ She buys pot from the First Mate/ That mysterious cargo/ is still guarded by monkeys." The sweeping string arrangement and cushy bass line guide the listener dreamily into the album.

The album's first single, "Merry Christmas Emily," already has received a healthy rotation on KSDB-FM 91.9, and probably is the most

energetic and catchy song on "Forever." The structure of the song, particularly the chorus, is quite different than the band's earlier hits "Low," "Get Off This," and "Teen Angst (What the World Needs Now).

Throughout "Forever," Cracker discreetly experiments with new

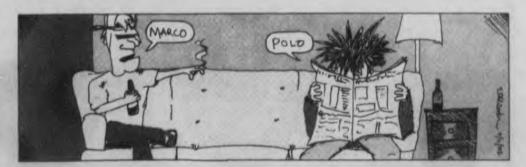

styles. The resulting sounds range from the Beck-esque "Miss Santa Cruz County," with its

funky off beats and sound effects, to the ripping guitar and synthesized flute of "Guarded by Monkeys.

The classic Cracker sound dominates the album and is reminiscent of the band's self-titled debut and sophomore effort, "Kerosene Hat," both of which were wellreceived by consumers and critics.

Lowery has been attempting to perfect his blend of rock, country and blues since his work with Camper Van Beethoven in the 1980s, and his latest work is a very respectable offering. Cracker fans will find plenty of the familiar whimsical western twang and driving energy that makes their music so likeable.

# misdirection

# Organizations promote services

Kansas State Cultegias

Saturday.

Area organizations were given the opportunity to publicize and recruit at a community fair in Manhattan Town Center on

Approximately 15 organizations and businesses set up booths with brochures, posters and handouts to inform mall customers.

Ken Scroggs, executive director of Big Brothers-Big Sisters, set up a booth advertising volunteer opportunities and special events, such as Bowl for Kids' Sake.

"This gives us a chance to tell the community what we are doing and how we are doing it," Scroggs said.

Another service organization. UFM, provided mall customers with information about classes offered by the organization.

"We came here to promote UFM and the classes it offers," Kristen Johnson, UFM education coordinator, said. "We've had a lot of people take catalogs and ask questions."

The Riley County-Manhattan Health Department provided health information for passersby.

"We are providing tobacco education to people in the

"It gives them a little info even though they don't have to ask questions or pick up a brochure."

> Reita Currie, Coordinator of Parish Nursing

community that they might not have access to otherwise," said Kari Quiton-Beard, youth director of tobacco education.

The Manhattan Juneteenth Community Council, which organizes events celebrating the ending of slavery, was represented by treasurer Don Slater.

He came to the community fair with the goal of recruiting volunteers for their event.

"Our goal was to publicize Juneteenth, also to recruit volunteers for the event," Slater said. "We are accepting donations, but not pushing that hard. Every dollar

Mercy Health Center presented posters showing the three phases of the new expansion project.

We want to let people know what's going on with our expan-

sion," Reita Currie, coordinator of parish nursing, said. "We want the community to see our first phase opening soon

"It's really to get out in the community and show them what Mercy Health Center offers."

Currie said the mall location for the community fair provides an opportunity to reach a large number of people.

"It gives them a little info even though they don't have to ask questions or pick up a brochure,"

K-State students also participated with the Bake Club. Rebekah Rokey, senior in hotel and restaurant management, said the club has weekly bake sales on Wednesdays, but the fair gave them more exposure.

there," Rokey said. "The mall is a place where everyone comes to. It is a good place to reach people we wouldn't normally reach being on campus. Currie said she thinks the

"It helps to get our name out

community fair is a great promotion not only for individual organizations, but for everyone in the

"It's a good marketing for the Manhattan community as a whole," she said.

### Legislators to meet, redraw state districts

BY MICHAEL WATSON

Kansas State Collegian

Legislators will draw new state district lines Wednesday at the state capitol. Officials said the trick is drawing the lines so that the 125 districts are drawn equally to fairly represent each community.

The proposal going before state legislators Wednesday leaves the districts pretty much the same, but accounts for some differences in populations from 2000 Census

"The idea is to draw a map that gives all districts fair representation. The problem with drawing the map is drawing it equally," Riley County Commissioner Russ Frey said.

Frey said legislators would consider all Kansas communities to make sure the 125 districts each include 21,000 to 22,000 Kansans who have similar interests.

How they vote and the types of business each community conducts affects the representation each population receives in the state House of Representatives, he said.

Frey said downsizing at Fort Riley would affect the Manhattan area, but there is an even bigger population shift in metropolitan areas like Johnson County.

He said all population shifts would be analyzed and used in the discussions in finding a map that would represent each district.

Rep. Jeff Peterson, R-Manhattan, said when areas like Johnson and Sedgwick counties have growth, there would be larger districts in those areas.

One House map, developed by majority Republicans after negotiations with Democrats, would add three districts in Johnson County and one in Sedgwick County and reduce the number of seats from rural areas

Peterson said the House of Representatives committee drew a map Wednesday that accounted for population changes in Johnson and Sedgwick counties.

Where there are many different ways the districts could be redrawn, he said this one makes the most

Peterson said there would most likely be some amendments proposed to the map, but he said he does not think they would pass.

The senate will draw the map Wednesday based on the map presented Wednesday to the House committee.

"There are things I like about the map, and there are things that I don't like, but it's a fair map," he

"It should be the map that we

#### BUDGET Continued from page 1

expected revenues and spending commitments for the state's 2003 fiscal year, which begins July 1.

And that gap is likely to grow, say legislative leaders and members of the House and Senate budget committees. Still to be factored in is \$25 million the state owes Panhandle Eastern Pipe Line Co. in tax refunds and interest following a Kansas Supreme Court decision late last month.

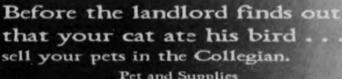

Moreover, the court rejected a rule the Department of Revenue used in determining Panhandle's taxes. Legislators don't know how many times the department applied the same rule in the same way for other companies in similar situations.

"The real problem is, are there any others out there?" said Senate Minority Leader Anthony Hensley, D-Topeka.

The \$426 million projection also ignores a shortfall in revenue collections. From July 1, when the current fiscal year started, through Jan. 31, collections were nearly \$98 million short of expectations.

State officials and economists plan to meet March 8 to revise revenue estimates used in budgeting. Many legislators expect them to slash estimates.

"There seems to be a consensus that we're dealing with declining revenues," said Sen. Jim Barone, D-Frontenac, a member of the Senate Ways and Means Committee.

Bennett by comparing each boy to what he loved most,

"Even though they are not with us anymore, they are always all around us," Sutter said. "Tim is the buildings that reach up to the sky because that is what he wanted so bad to give to all of us. His talents were greater than anyone he could even imagine.

"Chris is the land because he truly appreciated all that the earth had to offer and loved every living creature that surrounded him.

"Kyle is the water because that is what he loved so much and where he loved to be, and like water, he helped to nourish our friendship.

The Rev. Jayne Thompson ended the memorial with a blessing and song and reminded everyone present that Chapman, Shipley and Bennett are not alone.

"On that afternoon we do not know what happened," Thompson said.

"I am certain that Jesus was there with them. Just as God had to welcome Jesus, Chris, Kyle and Tim were not alone. They had each other.

"As true as that may be, the fact remains that Kyle, Tim and Chris are gone, and that is painful. The laughter and the tears will come and go. It is part of how we heal, and we go on."

#### DISTRICT LINES

Continued from page 1

Glasscock, R-Manhattan, said he adamantly opposed any map that would divide these areas and place them in anything but the second congressional district.

While recent developments have left Manhattan. Junction City, Fort Riley and areas in Geary County together, Frey said the discussion continues with adding Lawrence, which is in Douglas County, to the second district.

The proposed map cuts Lawrence in half, with the University of Kansas and points east in the second district with Manhattan and Fort Riley, and Junction City would then be moved to the first congressional district.

This issue has not been settled yet, but Frey said this would be an unlikely proposal and the map should not change.

Peterson said legislators tried to get a plan on Friday, but he did not know the results. He said he wants to get the state map drawn first before working on the congressional map.

Frey said the map should stay the same. He said that is the most adequate for the community.

"The majority of people feel it is best to keep these communities of interest together -Manhattan, Junction City, Geary County and Ft. Riley," Frey said.

# Olympic security reaches high alert

BY TIM DAHLBERG The Associated Press

SALT LAKE CITY - The show behind the scenes was just as impressive as the one inside. Before one athlete entered the Olympic stadium Friday night, the greatest defense in the history of sport was already well under way.

With snipers peering over the top of the rooftop and helicopters hovering overhead, a \$310 million effort to protect the Olympics moved into full gear after nearly three years of planning.

Unlike the performers in the Olympic opening ceremony, though, the thousands of agents. police and military couldn't afford to make even the most minor mistake.

"We don't get a second chance," Secret Service agent Mark Camillo said.

Although no credible threat has surfaced against these games. top administration officials have warned that the Olympics could be a prime target of terrorists.

Security agents took no chance in a complex plan that includes 59 agencies and employs nearly 16,000 security workers on everything from snowshoes to fighter jets.

It began for real Friday with a ban on all air travel in and out of the city's airport during a threehour opening ceremony that was to include President Bush and U.N. Secretary-General Kofi Annan:

The security force was busy around the stadium in the hours before the ceremony, and a maze of fences and checkpoints stretched up to a half mile from its

Police patrolled the fences on all-terrain vehicles, while helicopters kept watch overhead. The adjacent University of Utah campus, usually bustling with activity, was nearly deserted.

But the expected long waits to get through security checkpoints didn't materialize, and the stadium was filled long before the opening ceremony began.

About 150 police standing shoulder-to-shoulder with riot gear in hand had a brief showdown with about 300 protesters waving signs that read 'abolish poverty." near the stadium, but the protest quickly

"All that can humanly be done to make this a safe place will be done," Utah Gov. Mike Leavitt said. "This will be a safe place."

# Family, friends gather to remember Miller's life, smile

Kansas Statu Collegian

The phrase "Thanks for the memories" spread across the bottom of the last slide of a slide show mourners viewed at David Miller's memorial service Monday night. The picture showed Miller giving the camera a peace sign and a goofy grin.

Miller, a senior in secondary education, died Ian. 28 from a selfinflicted gunshot wound in his hometown of Wilson, Kan.

Miller was a member of Theta Xi Fraternity, where he served as rush and intramural chairman, Miller also coached Manhattan High School and American Legion baseball. His plans were to teach and coach high schoollevel students.

Jarrod Reimer, president of Theta Xi, welcomed friends and family. He thanked those in attendance for coming and offered his hope for the

"Let us leave here comforted. consoled and especially uplifted," Reimer said.

Person after person went to the podium to share their memories of Miller. Not one speaker left the microphone without talking about Miller's smile. It was what many remembered about him most.

"I'll always remember his smile," Brandon Clark, one of Miller's classmates, said.

"You could see that grin from a hundred miles away."

Many also spoke of Miller's competitive personality and his love for sports.

Drew Halderson, a fraternity member, announced himself as "the guy you'd see following David around." He said he remembered wrestling with Miller once until he had rug burns on his knees and elbows.

brought us closer together," Halderson

"I'll miss those rug burns and scratches. I'll miss being the guy who followed him around."

Elise Kershner, a close friend of Miller's, said Miller was a huge part of her life, and seemed like a part of her

"He had a heart of gold," Kershner said. "I loved him, and I always will."

As the Rev. Don Fallen gave the closing prayer, tears rolled off noses and cheeks and wet the ground of All Faiths Chapel.

To end the service, the men of Theta Xi sang "Amici," a song special for their fraternity.

When the song had ended, Miller's father, Gary Kraus, took the hands of his mother and sister, Joyce and Alyce Kraus, and exited the chapel. Fraternity members, still wiping tears from their eyes, followed the family.

Janice Wissman, **Associate Dean** of the College of Education, gives the opening remarks at the memorial of David Miller on Monday night at All Faiths Chapel.

Drew Rose/

# Committee to propose privilege fee increases

BY SARAH RICE

Students might see a privilege fee increase next year, which would fund K-State Student Union repair and replacement, Union Program Council and operations budgets.

The privilege fee committee met Monday evening to write legislation, which will be proposed to Student Senate

In the 1993-94 school year, the Union requested \$40 million for renovations. enate allocated \$9.2 million from a bond that will be repaid with student fees collected until 2013.

However, the difference in funds requested and money received left the Union with significant areas still needing to be addressed.

"They didn't give us enough money for the project," Union Executive Director Bernard Pitts said. "It was a \$40 million

The Union now is requesting additional funds for improvements and services that were not funded with the original money.

#### Repair and Replacement

"We are asking for funds to continue improving the building and address things we weren't able to include in renovation." Pitts said.

He named the most crucial needs as food service equipment, modernization of the mechanical rooms and installing double-paned windows.

Last week, the committee discovered \$600,000 in excess funds from the original renovation proposal. That money will be used for the repair and replacement fund to reduce the amount needed in student fees. However, an approximate \$2 increase per student fee will be needed to fulfill the Union's list of improvements.

"I'd say a \$2 increase is very reasonable and addresses serious concerns the Union is experiencing right now," Ben Harder, privilege fee committee chair, said.

The committee allocated \$178,798 each year for the next two years, with a 3 percent increase for inflation.

#### Operations

The Union has reached a \$431,000 deficit in its operations budget.

"Operations is the money it takes to keep the building open everyday," Pitts said. "Being a service building means we keep the building open during nonrevenue hours. We do not generate enough to operate the building."

The two main sources of revenue for the Union have been the bookstore and food services. However, a decrease in sales has left the bookstore searching for ways of generating income.

"We have a stronger off-campus competition," Pitts said. "There is

Myron Calhoun, 61, clears snow away from the bus door at Manhattan High School. Calhoun began driving a bus for Manhattan-Ogden USD 383 after he retired in 1997 from teaching computer science at K-State.

# On the road again

## Retired instructor drives Manhattan school bus

Kansan State Collegian

While the sun continued to rise after he retired. Myron Calhoun did not see a reason to wake from his slumber.

"I finally realized I was sleeping my life away." said Calhoun, a 61-year-old retired computer science instructor. "So I found a reason to get up in the morning."

His daily routine now includes rising before the sun and driving 25 students to school for the city of Manhattan. He is a bus

"He said it gets him up in the morning," Nancy, his wife, said. "Boy, it gets us both up. We always have breakfast together right before he leaves, so I see him before he leaves,

Calhoun taught computer science courses at K-State from 1971 to 1997, taking a year sabbatical to teach in Nigeria, Africa from 1986 to 1987.

The brain tumor and death of a colleague prompted Calhoun to retire in 1997.

"I said to myself 'Myron, I've got things I'd

like to do before I get my brain tumor. 'My wife keeps joking with me," he said. "I have a list of about 300 items I want to do some day. Every once in awhile, I cross one

Calhoun's activities include singing in a barbershop's quartet, being a docent for the Konza Prairie, being an amateur radio operator and gardening.

"I garden with a vengeance," he said. His list did not include bus driving, but a trip to a National Rifle Association camp in

New Mexico stirred up the desire to teach BB gun classes to youths. "They told me that BB gun teachers are a dime a dozen," he said. "What they needed

were bus drivers. "I wanted practice before I went to the camp, so I called the local bus driving depart-

ment and asked if they needed a bus driver." Soon after he began driving buses for the camp, they switched over to passenger vans.

Sam BUS DRIVER on PAGE 12

Myron Calhoun greets students as they get onto his bus after school. Calhoun drives from the East to West campus of Manhattan High School in the afternoons, as well as a morning route.

# Student Governing positions filing deadline today

BY PETE ELSASSER Kansas State Collegian

The filing deadline for Student Governing

Association positions is 4 p.m. today. Students can still pick up and turn in

applications in the Office of Student Activities and Services. The primary election is Feb. 26 and 27, and the runoff election, if needed, will be March 5 and 6.

Five presidential tickets filed for election as of 3 p.m. Monday. Ted Conrad, elections committee chair, said he expects more candidates to file at the last minute.

"It seems like the number of students who have filed is somewhat below average," Conrad said. "Although many times students

procrastinate until the deadline." Candidates must attend one of three mandatory informational meetings about the campaign. The first meeting is 8:30 tonight in the Stateroom.

Conrad said he would recommend students look at candidates who have been active in their colleges.

He said it is important that their platforms indicate they have have been active or at least indicate if they can do a good job or are serious

about performing the job well.

"It's important

to look at platforms to see if the candidates will

**ELECTIONS** Primaries will be Feb. 26 and 27. General elections will be held March 5 and 6.

SGA

be able to pursue their goals," he said. "Because all candidates put down a few token things on their platforms."

Conrad said students should look for goals that can be attained within a year, or at least issues in which progress can be made within a year.

## Former KSU officer appeals termination

BY NANCY HULL

Kennas State Collogian

A former K-State police officer who has sued the university before is appealing his recent termination.

Gary Jones filed a case with the U.S. District Court in February 1999, claiming his supervisor racially discriminated against him. The case was settled in October 2000, and the university paid Jones \$5,000 in attorney fees. K-State terminated Jones this January, citing gross misconduct. Jones says the department's decision is retaliation from the 1999 case.

Jones' attorney, Luke Harkins whose firm represents the Fraternal Order of Police - sent the appeal to the state civil service review board last week. Jones' private attorney, Pete Rombold, has received a right to sue

letter from the U.S. District Court. In mid-December, Jones received a letter from Gary Leitnaker, K-State human resources director, requesting his dismissal on the basis of gross misconduct. Jones started working for the department in January of 1997. The letter states that the proposed action is based on an Aug. 23, 2001 traffic stop. The subject of the stop filed a complaint, and the police department conducted an internal affairs investigation, the letter said.

"The results of the investigation found you had 1) submitted false information in a case report of the traffic stop and 2) violated the in-car camera policy that states 'every traffic stop shall be recorded until the stop is terminated," the letter stated.

According to the transcript of Jones' Jan. 8 K-State peer-review committee hearing, police officials allege that on the Aug. 23 police report, Jones recorded a car was legally parked when it was illegally parked. The department said Jones turned off the moving video recorder before the stop was

completed, according to the transcript. The peer review committee agreed with the university's request for Jones' dismissal

"There's a pretty solid basis for the decision," university attorney Richard Seaton said. Seaton will represent the university in situations regarding lones.

Jones said prior to the peer-review committee hearing, he was never told specifically what he did to violate policy. Jones will not go on the record with specifics of the stop because it could jeopardize future court matters.

He says his termination is based on more than the traffic stop. Jones' problems with the department date

back to early 1998, he said. "When I first came here, I was told that a certain captain, who's the second in command, didn't like black folks and women," Jones told the Collegian. "I heard that he had been referring to blacks in a very derogatory way."

In the 1999 complaint filed with the

#### RCPD makes arrest in aggravated robbery case

The Riley County Police Department arrested a man late Feb. 8 in relation to an aggravated robbery of the Total station at Third Street and Bluemont Avenue, according to local authorities.

Jamie Burnett of Topeka allegedly robbed the Total station on Feb. 7, taking around \$300 in cash, said investigations division Capt. Gary Grubbs. The suspect was armed with what was believed to be a knife, he said. The knife allegedly used is in custody, he said.

"The cash has not been recovered at this time," Grubbs said. "It is still an ongoing investigation."

Cameras in the Total station provided good video of the suspect, Grubbs said, and knowledge of the community led to a credible suspect. Officers arrested the suspect on a probable cause warrant and charged him with the robbery Friday night. Bondwas set at \$50,000, and Burnett remains

### STATE IN BRIEF

#### Sebelius rejects acquisition of Blue Cross-Blue Shield

TOPEKA - Insurance Commissioner Kathleen Sebelius on Monday rejected the proposed acquisition of the state's largest health insurance company by an Indiana firm.

Sebelius said the purchase of Blue Cross-Blue Shield of Kansas by Anthem Insurance Companies Inc., of Indianapolis, would raise consumer premiums too much.

#### NATION IN BRIEF

#### Iranians mark Revolution with condemnations of Bush

TEHRAN, Iran - Angered by the United States' labeling of Iran as part of an "axis of evil," hundreds of

thousands of Iranians chanted "Death to America" on Monday during demonstrations to mark the 23rd anniversary of the Islamic Revolution.

Iranians used the occasion to show their anger with President Bush's condemnation of their country in his State of the Union address. Many Iranians, who said they rarely join such celebrations, spoke of taking to the streets to show solidarity.

#### Former Enron chairman to invoke Fifth Amendment

WASHINGTON, D.C. - Former Enron chairman Kenneth Lay is asserting his right against self-incrimination and will refuse to answer questions when he appears before Congress under subpoena this week.

Lay, who resigned Jan. 23, was a friend and political backer of President Bush and moved easily within the corridors of power in Washington, D.C.

He has not spoken publicly about Enron's collapse since the company entered the biggest bankruptcy in U.S. history in December.

Lawmakers had hoped for his

#### Life after K-State

# Alumni comfortable in career outside his major

BY MICHAEL LAWRENCE Kansas State Collegia:

ay Frey did not expect to work for an aircraft company after be received his feed science management degree from K-State in 1982.

Twenty years later, however, he found himself working at Cessna Aircraft Company in Wichita,

Until 1990, Frey ran a feed mill for Farmland Industries FREY in the outskirts of Bonner Springs, Kan. Then, he and his wife decided to move

family. Frey said he did not simply get another job in feed science management because his wife's father had offered him a job as a mechanical

to Wichita so they could be closer to her

contractor. He said he installed plumbing. heating and air conditioning in

commercial construction. There was no point in looking for a job in feed science management, he said, when he had a decent job already lined up for him. However, he said he only kept this job for three years and moved on to the aircraft company.

Frey said he now works in Cessna's cost-estimating department. He develops the list price of airplanes and determines whether the company is making money.

He was nervous when switching fields to something he had little knowledge of, he said, but it ended up fine. "It didn't turn out to be as difficult

as I initially thought it would be," he said. "It didn't take long to get comfort-Frey said it is unlikely he will return

to his original field because too many new technological advances have taken "I'm behind the curve," he said.

Even though Frey is not employed in his degree's field, he is glad he got an education at K-State.

"Any education is valuable," he said.

the most important issue K-State students face, Matt Wolters and Mandy Achilles said.

And students should play a part

Drew Rose/Collegian

Matt Wolters, senior in agricultural education, and Mandy Achilles, sophomore in public relations and advertising, announced their candidacy Monday.

in where those additional dollars go, they said.

Wolters and Achilles kicked off their campaign - "Making It Real" - for student body president and vice president Monday.

"We wanted to focus our attention on issues and ideas we could have a real impact on," Wolters said. "We can bring really down-to-earth leadership to the position.'

If elected, the pair plans to form a tuition advisory committee, consisting of students, faculty and administrators.

"Our first commitment is we will work to keep tuition as low as possible," Wolters, senior in agricultural education, said.

But more important, Wolters said, is ensuring the quality of education stays consistent with how much students pay. That includes

16" Cheese Pizza

maintaining small class sizes and availability of some classes.

"We should see a direct benefit when we go to class day-in and dayout by paying more for our education," he said.

The candidates also plan to begin a new K-State tradition. Wildcat March.

Fans, cheerleaders and the marching band will gather at Memorial Stadium on Fridays before home football games and then make their way through Aggieville where it

will stop by the bars to boost spirit. "We're talking about a lot of work

here, but we want to have some fun, too," said Achilles, sophomore in public relations and advertising. "Matt and I are convinced this will be an awesome tradition.'

Wolters and Achilles also want to make a new service available to students. Wildcat Connection. This service would enable students to contact K-State alumni who can answer questions about the degree they pursued.

What we determined is we have a tremendous resource in our

alumni," he said. Parking is also a concern, Wolters said. The pair favors parking garages and are opposed to a bus system.

"What we have found is everyone wants a shuttle system," he said. "One in 10 will actually use

In Kansas and small towns, people are inclined to drive. A parking garage would better accommodate K-State, he said.

Achilles said she and Wolters have similar goals.

"I wouldn't be doing this if I didn't think K-State was a great place to be and want to make it better," she said.

# **POWER POSSIBILITY**

# Wind could be answer to energy crisis

he United States feeds an addiction that threatens to cripple its environment, pocketbook and standard of life.

Our drug is not administered through a needle, but from a gas pump; our poison is not cocaine or heroine, but oil and nuclear energy. Like any confirmed junkie, America is deep-seated in

view

That's right. The future of our nation's

energy crisis can be helped by the

same air that mainstream politicians

its desire for repeated use of its illustrious drugs, willing to sacrifice all relationships and internal health for a few waning moments of empty happiness and remembrance of a better day.

Jared Wiesner There is, however, a radical technology turning heads and poised to "blow" the competition away: wind

energy sources, is the relatively high price. But as David Case points out in the Sept. 13 Rolling Stone magazine, the cost of wind power has fallen 80 percent in the past At the same time, fossil fuel prices have varied,

determined by political situations and availability. It also must be remembered that fossil fuels are a finite resource. Basically, as reserves start to deplete, the

price will climb to unreasonable levels. New breakthroughs in wind energy, on the other hand, have created competitive prices with fossil fuels, at 4-6 cents per kilowatt-hour, in high wind-traffic areas.

Sound like any Midwestern state you know? A debate also looms about the reliability of wind

power. What happens when the wind stops blowing? To begin with, if a large-scale operation is implemented, there is always going to be wind blowing

Of greater significance is the fact that wind power could be used as an auxiliary energy source in combination with other renewable energy technologies or backup

Thus, if the wind stopped blowing everywhere, we would not be left in the dark.

Aside from this, it is important to point out that fossil fuel energy is not always reliable, as demonstrated in California this past summer.

These issues, however, take a backseat when one examines the environmental effect of both energy

It is widely known that the use of fossil fuels has a harmful effect on the earth.

From ruining land with strip mining to polluting our air with emissions, fossil fuels have inflicted an astounding amount of damage on our environment.

On the other hand, wind turbines are able to provide energy without these negative effects.

A lone criticism is that wind turbines sometimes result in the death of birds.

But, as Rolling Stone also reports, new wind farms result in the death of approximately one bird perturbine per-year and are endorsed by the National

Compare this with the effects of pollution on birds and it is easy to see which technology is friend-

> Knowing this, what can we do to start the implementation of wind power? We as a society need to adopt the idea that a switch to alternative energy sources is necessary to sustain ourselves in the future. Also, the government must take an increased role in the funding, implementation and

growth of new technologies such as wind power. In this respect, everyone can come together to make a change. Such a shift proves promising upon realization that wind power is only the tip of

the renewable energy iceberg. The future is bright for sun-based technologies such as hybrid-fuel cars, solar powered batteries and passive solar architecture, with improvements in hydroelectric

and geothermal plants arriving daily. The problem facing America today and future generations is not so much that we can't do anything, but that we are hesitant to take the first step toward a sustainable future.

Currently it is impossible to maneuver a total switch to renewable energy technologies, but we must begin the process now.

Jared is a sophomore in political science. You can contact him at jsw7333@ksu.edu.

# Science supports claim, nice guys finish last

skilled mechanic does not mind purchasing a car with a few broken parts, as long as the body is in good condition. Similarly, it seems most

young, heterosexual women take this approach when shopping for boyfriends. As long as a boy is handsome and

**Peter Morris** 

strong, girls can overlook minor personality flaws, such as a lack of commitment. personal

promiscuity or Class A felony convictions.

Why would girls overlook such behaviors? Because they think they can change

Despite their best efforts as a one-onone social worker, some of these relationships end after months of neglect and psychological abuse.

The question remains: what is the attraction between naive girls and interpersonally degenerative scum? Do wifebeater tanktops or Chevy Camaros naturally attract women?

These must be secondary attributes of jerks, not defining characteristics. The problem is deeper than I had originally

According to Craig Bruce at the University of Waterloo, Canada, women are biologically attracted to confidence. Jerks, by definition, think very highly of themselves and look negatively upon other people, and as a result possess a high degree of self-confidence. Jerks are neither thoughtful nor deliberate in their actions, making them impulsive and

What logic sees as reckless, the hearts of women see as adventurous. Women fall for the handsome, confident man promising them a daring lifestyle.

From there, the Principle of Least Interest guides the relationship. The individual who is more emotionally detached will determine the parameters of the relationship. Namely, she gets treated like crap by being neglected, cheated on and put down by him. Surely there's got to be some hope out there for women.

Radio show host Dr. Drew said, the part of the brain that deals with attraction has no learning memory. Meaning, girls will fall for the same type of man again and again. Girls should keep this in mind when searching for guys, and answer certain questions like:

Does he remind me of guys I have dated before? How is he different?

Does he really care about making me happy? How many girls has he gotten

with before? How many tonight? What Would Jesus Do? Should I get a water bra? But what about the nice guys? By definition, they're

sensitive, caring and insecure. The first two traits are admirable, but ultimately women are still attracted to confidence.

So, gentlemen are still screwed. How one gains confidence, I'm not sure, but there are several products on the

market to assist. For example, Weight Gain 4000 or The Pen-is Mightier® can be bought at your local pharmacy for pennies a day.

Keep in mind I am not player-hating here. To the few, the proud, the Jedi-

Pimps at K-State, keep on trucking. The problem lies with men who treat women badly who are looking for a meaningful relationship. By meaningful, I mean more than 24 hours.

To the women of K-State, yes, all men are jerks. However, most of us can repress our inner-jerk for the benefit of romance. Find someone who

makes you feel good about yourself, who doesn't like NASCAR and who stands a chance at being someone important in 10 years. Like a columnist, for instance. Secondly, do not put too

much value into what I write; I wrote authoritatively about National Missile Defense last

One final piece of advice: do not jump on the bandwagon of love this week just because its Valentine's Day. Saint Valentine works as CEO of Hallmark.

Peter Morris is a sophomore in open option. You can e-mail him at pdm5999@ksu.edu.

# Pair announces intentions to run for president, vice president

BY JAMIE BARRETT

Kansas State Collegian

Standing in front of a sign identifying them as Luke "Pops" Miller and Jeremy "Flave" LaFaver, another set of student body presidential and vice presidential candidates announced their intention to run Monday evening at Gilligan's Bar and Grill.

Miller, senior in architectural engineering, and LaFaver, senior in advertising, outlined their campaign, "We Can All Make A Difference" to a crowd of friends and bar customers. Focusing on four main issues, Miller and LaFaver said they intend for the student body to see a noticeable difference if they are elected.

"From what I can remember from

freshman, sophomore, junior year, a lot of people come in and make promises and we wonder, 'Can you really do that though?" LaFaver said. "What we want to do is possible. Our issues we can actually accomplish. They will be able to see a change.'

Miller and LaFaver said their main platform issue will be accountability between the president and vice president and the student body. They said they hope to implement a presidential report as well as a vice presidential report that would let the student body know what they have been working on, what they will be working on and what they already have accomplished in their term.

'We want students to see what we have done that month and what we

are going to do in the coming months," LaFaver said. "That way, students can look at it and read it and see that we have done what we said we were going to do. We want to be accountable to students."

Miller said other important issues they plan on focusing on are revamping the wait-list system. finding ways to allocate money from the Educational Opportunity Fund to every group that needs it and to bring the basketball Alumni Game back to Ahearn Field House. Miller said the proposed tuition raise is another issue where he feels it is important for the student body to have a president and vice president they can rely on.

"Tuition is going to go up," Miller said. "It is going to happen. It is just a matter of how much and when. What we want to make sure is that students know where this money is going. They want to see tangible results."

Working as liaisons between the administration and the student body, Miller and LaFaver said they think they are the best candidates because they are willing to listen to and work with anyone who has a concern about

"We know a wide range of students," LaFaver said. "We come from engineering and mass communications. So that covers a wide range. We feel we know what students want and where they want to go with the university. We can better represent how the student body feels and what they want to do."

Zach Long/Collegia

Luke Miller and Jeremy LaFaver announced on Monday at Gilligan's their intention to run for student body president and vice president.

# CROWDPLEASER

# Mahoney works audience; leads Wildcats in assists

BY MICHAEL NOLL

Kansus State Collegium

Megan Mahoney might lead the K-State women's basketball team in assists, but the freshman guard has a more distinctive ability. She can raise the roof.

During the Cats' celebration following a victory over then-No. 7 Baylor, for instance, Mahoney ran from the yelling mob of her teammates and jumped on top of press row where she pumped her fist at the crowd.

It was a display of emotion that most of Mahoney's teammates wouldn't have consid-

"I don't like to get up and do things like that, but that's just Megan's personality." freshman forward Kendra Wecker said. "It's great. You've got to have somebody on your team that does that stuff. I was just laughing when she was doing that. I was like, 'Man, you're crazy,' but the crowd loved it and that's

Mahoney has given the crowd several chances to show its love. In addition to jumping on the press row, she has motioned for noise with her arms from just about every spot on the court, including the free throw

Such displays are more exciting when considering the team's more reserved past, Coach Deb Patterson said.

"I think that any player that will stand on the free throw line and wave their hands like, 'C'mon crowd, we need to hear more of you, are a little more outside the norm." Patterson said, "certainly for our program, where we're not exactly a fist-pounding, chest-pounding kind of group.

"It's been a great addition to our energy and intensity on the basketball floor, and as long as you can harness that within the framework of intelligent play, which she does an excellent job with, it's a joy to watch, and it's a joy to coach, and I love it."

As commonplace as Mahoney's

\* Numbers in parentheses are team rank

enthusiasm has become at K-State, she said she didn't show it as much in high school. Her actions have been the response to a combination of large crowds and her more reserved teammates, she said.

"The other four on the court lead by example a lot, just with great plays," Mahoney said. "A lot of times, we need vocal leaders and I try to do that and try to get the crowd and our team pumped up."

In addition to pumping up the team, Mahoney has given the Cats a physical presence that has been absent the last several years. She averages 4.5 assists and 9.7 points per game.

"She's got a great feel for the game and is a very good passer. She's got good hands, she's got good feel for the ball, she understands the angles of the defense, and she doesn't hold the ball too long." Patterson

"We haven't had that. We haven't had the penetrator and we haven't had the catchand-pass, catch-and-get-rid-of-it player that

last weekend.

The Big Red shot a blazing 56 percent from the field, including 65 percent in the first half.. The Huskers also got to the foul line, hitting 35-of-42 attempts for the game.

Freshman Jake Muhleisen led NU with 21 points, and sank all 11 of his free throws.

"We couldn't guard the ball. Muhleisen was the best guard on the floor today, to get to the foul line like that," Wooldridge said. "We're a little team, and we just weren't able

BASKETBALL PAGE 8

## Winter Olympics in Salt Lake City provide good excuse to channel surf

The Winter Olympics have never been my cup of tea.

Whether it's because I was born in

sunny California, or the fact that watching some of these events makes me contemplate going into hibernation, I don't know. Either way, I find it a waste of two weeks. On Sunday, however, I

Sean Purcell found myself tuning in to the ski jumping competition,

wondering what could motivate someone to ski down a ramp at something like 5,000 mph - only to fling themselves off a ramp and see how far hey can go.

Who are the ad wizards that came up with that one?

But before I start dissing on these "athletes," let me explain why I was watching.

First of all, the NBA All-Star game was once again a joke. Every year, I tune in thinking something cool will happen, only to come once again to the realization that the NBA is basically a bunch of thugs running up the court, trying to be tough.

Second, the other sporting event that was on was the Buick Invitational where

Tiger-Mania was once again drawing big crowds.

view

Now, I am usually one to sit down and watch Tiggs hammer the ball down the fairway, but lately

Mr. Woods has just been ticking me off. When he was winning, he would play consistent golf - shooting in the '60s every

day. Now he shoots 66 to open the tournament, and then follows it up with a 77 to barely make the cut. Just when you think the god of golf has

given up, he shoots a 65 on the final day to finish in fifth. I don't know if this is some kind of ongoing conspiracy, like my colleague Fehr Factor would hope it would be, but geez,

Tiger, you don't have to play like an absolute a-hole in order to keep a storyline We'll keep watching because you are a

Anyway, this is why I was stuck watching the Winter Olympics.

You've got these competitors strapped in to these tree trunks for skis, trying to soar like flying squirrels through the thin

air, and attempting to land softly on the snow. All this to get like three-ten thousandths of a point. That is pretty much how I understood it.

What I didn't get is how NBC thinks they need these commentators to do the playby-play when you could sit a 3-year old in front of a TV and have him or her say, "Man go far.

Isn't that pretty much all we need? And the broadcasters really get into it,

You hear them say, "Oh, look how he brings the skis to a point at the bottom, with the tops of the skis near his ears. He stays still as he glides through the air, looking for style points. Now there is a real athlete.

Give me a break.

Style points? You get style points for staying still and crossing your skis?

I remember back in the day when style points at the pool consisted of who could make the biggest splash.

Or who could perform the most believable crash when they tried to jump from a tree branch to the top of the family grocery-getter slash station wagon. Oh well, I'd better not criticize. Remember

these people are professionals.

But I do have to give them credit. Personally, I am scared of heights, so you wouldn't get me near the ski jump. It would have to be the involuntary ski jump in my case, because in order to get my scrawny. 170-pound frame on a 90-meter ramp, it would take an act of God.

I would probably soil myself in front of the nationally televised audience. Now that's what I call style points.

I guess that's why officials give the athletes padded suits and thick goggles. They don't want you to see their eyes giving the look of "Oh S\$#%" while a little trail of yellow and spot of brown form on a tight

Either way, this is just one of the many events that encompass the Winter Olympics, a spectacle I, for the most part, choose to not watch. Between the ski jump, curling and figure skating, I think I will continue to play Super Tecmo Bowl and

drink Dr Pepper in the company of friends. Anything to be like the Russian General.

Sean is a junior in electronic journalism. You can e-mail him at spu5598@ksu.edu.

# Mortimer qualifies for NCAA, leads Cats at Iowa

BY JOEL REICHENBERGER

Kansas State Collegian

Amy Mortimer qualified for the NCAA Indoor National's in the 3,000-meter run at the Iowa State Classic on Saturday, becoming the third Wildcat to qualify for the meet this season.

Mortimer finished third in the race, with a time of 9:17.11. The time earned her an automatic bid to the NCAA Indoor National Championship on March 8-9 in Fayetteville, Ark.

Mortimer joins Austra Skujyte and Rebekah Green as automatic qualifiers to the meet. Both Skujyte and Green qualified in the women's shot put earlier this season.

In addition to Mortimer's performance, during the weekend a number of other Wildcats reached provisional-qualifying marks for the championship meet. Such a mark is the minimum an athlete

needs to reach in order to be considered for competition at the national meet. But the actual qualification for the meet

will be based on how the time stands up to other athletes' marks in the same event. Erik Sproll eclipsed the provisional

qualifying mark for the national meet when he finished third in the 800 with a time of 1:50:07. His time ranks as sixth all time for the Wildcats in the event.

Shadrack Kimeli raced to 10th place in the men's 3,000, and with a time of 8:09.29. he also earned proviosional-qualifying

Sproll and Kimeli were joined as provisional qualifiers by the men's distance medley relay team, which finished at

9:39.44 and in fifth place. All together nine Wildcats, five women and four men, have provisionally qualified for the NCAA National's meet so far this season.

K-State returns to Ahearn Field House for the first time after two straight competitions on the road. This weekend the Wildcats will host the KSU Open. The women will compete on Thursday, while the men will be in action Friday.

The Open will be the last tune up for the Cats before they travel to Lincoln, Neb.,

#### for the Big 12 Indoor Championship on Feb. 22 and 23. CLUB SPORTS IN BRIEF

#### Men's rowing competes indoors; Henke leads K-State in Denver

The K-State Rowing Association had rowers finish near the top of the pack in all four of its events last Saturday at the Mile High Indoor Sprints in Denver.

While the crew team wasn't actually on the water this weekend, Team president Philip Henke said that Saturday helped prepare his team for what they'll see later this

"The indoor sprints are a physical challenge to get us ready for the spring season," he said.

The weekend was especially important for K-State to see some of the competition they'll be going up against later in the year.

"We were very happy with the way we competed," Henke said. "With the level of competition we faced, we were very pleased."

Henke led the Wildcat rowers, placing first out of 28 competitors in the 500-meter heavyweight event. K-State also collected a second-place finish in the team four race and Tristan Pyle placed third in the 2000-meter heavyweight race.

Jess Vahsholtz also finished ninth for the Cats in the 2000-meter lightweight.

#### Roller hockey finishes season, captures league championship

K-State's roller hockey team finished its regular season on a high note last weekend by clinching the Great Plains Central Roller Hockey league title and earning its second consecutive invitation to the national championships.

Three of the top four spots in the league changed places, but the Wildcats managed to maintain to first by the end of weekend

The Wildcats will now head to the regional tournament, Feb. 23-24 in St. Louis, before the national tournament, April 5-7.

This season marks the first time the national championship will be played in the Gateway city.

#### DISMISSAL

Continued from page 1

U.S. District Court, Jones alleged that Capt. Mellgren refused to promote him and refused even to consider his promotion because he was black.

According to the complaint, Jones' income from employment diminished, and his prospects for promotion or alternative employment were curtailed or elimi-

K-State responded to Jones' 1999 complaint by denying most of his allegations, including his

claim of racial discrimination.

Jones told the Collegian that since he filed the 1999 charges, the department's "ultimate intent has been to get me out the door using whatever they can.

"The treatment continued to escalate until my environment was totally hostile," Jones said:

He says police department employees who weren't his direct supervisors were directing his evaluations.

Jones said department administrators ordered his supervisors to write him up, and he said people who weren't his supervisors wrote him up.

These write-ups include

#### More information

The police department terminated Gary Jones because of gross misconduct, in accordance with K.S.A. 75-2949f(a). The Kansas statute defines this as personal conduct detrimental to state service. Grounds for dismissal, demotion or suspension of a permanent employee for personal conduct detrimental to the state service include, but are not limited to, the following: (a) Gross misconduct or conduct grossly unbecoming a state officer or employee.

misuse of sick leave and allowing employees to call him by his nickname, "Miami," he said. Campus police director

Ronnie Grice, Assistant Director Capt. Robert Mellgren and Human Resources Director Gary Leitnaker declined to comment on matters concerning Jones aside from his employment dates.

The write-ups and evaluations resulted in probation and no pay increase, Jones said.

He also says he was denied promotions and people outside of the department were solicited to make false statements about

Attorney Harkins said Jones' actions concerning the Aug. 23 traffic stop do not define gross misconduct.

"It really has to be stealing or

planting evidence" to justify gross misconduct, Harkins said. Harkins said his law firm, Steve A.J. Bukaty, Chartered of Overland Park receives calls daily from law enforcement employees in both Kansas and Missouri.

"This is as bad as what I've seen. He did nothing wrong," said Harkins, who's been with the firm since July 2000.

"It's pretty clear it is retaliation against him for what he did in the

Lt. Richard Herrman of the police department referred to a dictionary definition of gross during closing statements at the peer review committee hearing.

"If you go to the dictionary, gross is described as - in the dictionary - as shameful," said Herrman, patrol commander, according to the transcript. Herrman also said he considers Jones' alleged violation of policy to be shameful behavior.

Jones' employment with the department officially ended Jan. 10. He's spent more than 10 years in law enforcement, including work in the Florida City Police Department and Key West Police Department.

Once the civil-service review board receives the appeal, there should be a hearing within 45

Megan is."

More impressive still, Mahoney hasn't required a lot of coaching by the older players.

"She brings a lot of it herself, and my role with her probably is just teaching her and helping her understand better what the coaches want," senior guard Kristin Rethman said. "She brings a lot of energy and tenacity and get after it herself."

Despite such praise, Mahoney said her court behavior is not that of a cocky, successful freshman. She's just being herself and probably isn't going to change.

"It's just being who you are and being real about it," she said.

"If they don't like it, if they think I'm being cocky or whatever, I guess so be it. I'm just trying to get them

to stay in front of the ball." The loss keeps the Cats tied with Texas A&M for 10th place in the Big 12. A&M has lost four of its last five

games, with its lone win a two-point victory over Iowa State, the last-place team in the Big 12.

Leading the Aggies offensively is 6foot-5 junior guard Bernard King, who averages more than 16 points per game. Six-foot-six forward Nick Anderson also posts double-digit scoring with a near 11 ppg-clip.

With Saturday's loss to Nebraska, Reid said tonight's matchup with A&M becomes a must-win for the Cats.

'We've got to get a win and protect our home court," Reid said. "We've got to play with more poise, find open shots, and run with the ball a little bit. And we've just got to be more confi-

# Volunteer fair features opportunities for residents in community

BY LINDSEY BURKET

Kansas State Collegian

A little bit goes a long way when it comes to volunteering.

K-State students found out how their little bit could make a big difference in both national and local community service organizations Monday at the 2002 Volunteer Fair in Justin Hall.

The fair, co-sponsored by Career and Employment Services and the Department of Family Studies and Human Services, featured 19 service organizations.

They included local chapters of hational groups such as Big Brothers-Big Sisters of America Inc., Habitat for Humanity, the American Red Cross, and the United Way. Local

BreadBasket and the Stoneybrook Retirement Community, also took part in the fair.

"Students get excellent work experience and skills from their volunteer positions," said Kristy Morgan of Career and Employment Services.

"It is also a great way to meet people, network, become involved in the community and helps to build a strong résumé. Many students are able to find positions that let them put into practice the ideas and concepts learned in the classroom."

The fair was especially beneficial to students studying family life and community services, who looked for internships with some of the organizations featured at the fair, said

Karen Myers-Bowman, assistant professor in family studies and human services.

By focusing on community service, these students receive a broad view of their future career options, as well as a wide variety of training through hands-on experiences in different areas of the industry, Myers-Bowman said.

Upon graduating, these students then pursue careers in case management, family support counseling and volunteer coordination within service organizations.

"This fair is a big help to me because all of the businesses for companies come to me instead of me having to go to each one of them individually," said Amy Carroll, junior in family life and community

science. "Most of the major service groups are all here, so I can get all of my searching for my internship done in one day."

Volunteering and internships with service groups is a crucial part of a career in family and community service, but it also might benefit the life of any student, no matter what major or career they choose to

"Any time you volunteer, it makes you feel good," said Ailleen M. Cray, executive director of the Riley County United Way.

"Sometimes it's helping those people who are less fortunate, sometimes it's helping kids, but volunteering is always doing something productive and learning something in a fun way."

Drew Rose/Collegian

Alison Antonetti, senior in family studies and community service, talks with April Burson, office manager for the Manhattan chapter of the American Red Cross, about how she can volunteer her time. The fair was held to get more students involved with volunteering.

# Faculty Senate committee proposes resolution for Web access

BY JENNIFER FARR

Kansas State Collegion

Faculty Senate will review a Web site access resolution at 3:30 p.m. today in the Union Big 12 Room that would aid people on campus with disabilities.

Technology committee members are trying to gain Faculty Senate support to use Macromedia Dreamweaver and Microsoft Frontpage 2002 to help

make Web images larger on any K-State-affiliated Web sites.

In order to make it easier for those who cannot see the Web pages, there also will be translators who would read the screen verbally

Jennell Corkill, Web specialist who serves on the university's accessibility committee, is helping to coordinate the campus project. Web Access for

Corkill said the main costs have been labor from the human hours needed to educate and train more than 300 Web developers to adapt the pages to the new guidelines. All of the colleges on the campus have been

working on this, she said. "I think we found there are a lot of things we left out when we designed the pages in the first place," she said. "But as we do this, we are not only making it

more Web accessible for people who have disabilities, but the overall student and faculty population.

She said there are some overall guidelines they have to follow that the state and federal government set in place.

The deadline the state set for the project to be finished is March 2002, but John Pickrell. Faculty Senate Technology Committee chair, estimates the

project will not be completed until closer to August.

This will be instated whether or not the Faculty Senate does or does not support it," Pickrell said. "I think they should support it. My guess is they probably will, but you don't know beforehand, though. People tend to do differently than you predict them to."

Cia Verschelden, Faculty Senate president, said that while she cannot comment on how

faculty senators will vote, she thinks the plan is a good one.

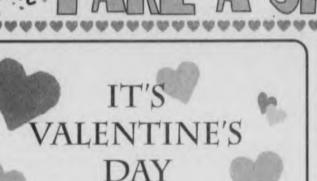

"There is a federal law for all people to have access to information, and I believe there should be considerable access for people around campus, whether they are students or faculty," Verschelden

Pickrell said the improvements would benefit those faculty members and students who have disabilities on campus.

#### **LOCAL TALENT**

#### WHO: Adam Hayes, Artist

The Recent Drawings and Prints of Adam Hayes, senior in printmaking, will be on display until Feb. 28 at Espresso Royale Caffe.

The seven drawings and two prints on display were all created last semester and are just a few of Hayes' best pieces, he said. Hayes said his strengths are in his line work and how he shows movement and gesture.

Hayes said he has been drawing since he was in elementary school, and it always has been what he does best at, so he hopes to make a career of it. Since drawings take less time than prints, Hayes said they free him up to be more spontaneous, but he spends a great **HAYES** 

deal of time on his print-making.

After starting to work on prints more than two years ago, Hayes made it his major. The variables and possibilities available in print-making about that.

Hayes said he hopes that people react to his art.
"I like to hope that I'll move a person somehow with my artwork," he said. "I don't know how successful I'll be at that, but it's what I aim for, whether it's a

positive or a negative

# Noodle art

Doug Armknecht, senior in computer science, displays his Ramen art gailery that is being shown in his room at Putnam Hall. The gallery, which opened in November, includes 10 pieces made of Ramen noodles, as well as a quilt and photo display. Nicole Donnert/

# Student creates art with Ramen noodles

BY BETSY STVERAK

Kansas State Collegian

Instead of a cheap, quick meal, one student sees Ramen noodles as a way to express himself.

In a room plastered with pictures and colorful glueddown noodles, Doug Armknecht's art collection sits comfortably. With Christian rock music echoing and Christmas lights pinned to the walls, Armknecht's environment tells as much as his art.

Armknecht, senior in computer science, said the idea to use the noodles came to him because he decided it was time to create some decorations.

"It was a way to put a lot of stuff on the walls and I didn't want to spend a lot of money," he said. "I got this silly idea I could pretend that a chunk of Ramen noodles was art work."

Armknecht said that even though he works with Ramen, he doesn't find it too appetizing.

"I don't even eat it," he said. "I just had a big box of it and realized the supplies are very

Ramen viewings
Doug Armknecht's Ramen noodle

Doug Armknecht's Ramen noodle art is on display in his room, 248 Putnam, and private viewings can be scheduled by calling 395-2047. supplies are very cheap."
When he realized his artwork was entertaining, Armknecht said he

decided to put together a gallery for

the public. The 10-piece gallery arranged in a professional manner comes complete with a guide that explains the imagination behind each work of art.

"I just had this idea to have a formal art show with a reception," he said. "I thought it would be fun to invite a bunch of people and have a good time."

Armknecht said many people attended the grand opening, which took place Nov. 16, 2001.

"About 100 people showed up for the opening and since then 50 have dropped by to visit," he said. Also at the grand opening, Armknecht said he sold a

piece titled "Spoon of Gold."

"I sold it for \$15," he said. "It was through a closed bid

Armknecht said "Spoon of Gold" depicted Ramen noodles coming off of a spoon. The Ramen noodles were painted in rainbow colors to create a neat effect, he said. Although he's sold one piece, Armknecht said that's all he's willing to sell.

"It really wouldn't be a gallery anymore," he said. "I would just like to have these around."

With him not selling anymore, Armknecht said he also doesn't think he is going to create anymore.

"I consider the gallery mostly complete," he said. "I don't consider myself an artist. It was just something on the side to spice up my room. I am pretty happy with what I have."

Although the individual art pieces are different from each other, Armknecht said they all represent him in some way.

"The piece 'Bachelor' is a personal self-portrait," he said. "The whole gailery is a representative of me. It's so silly, fun, crazy and a little bit serious, and that's who I am."

One of Armknecht's works of art titled "Carried Along" is one that stands out in the gallery. "Carried

ABOVE; Seasonings in the Su

ABOVE; Seasonings in the Sun (far right), The Fall of Ramen and Crushed can be seen displayed with other pieces of work along the top of a wall in Doug Armknecht's room.

LEFT; Air Ramen, which depicts a serving of noodles glued on a poster board of clouds, is the first piece of art Doug Armknecht made and is included in his gallery of Ramen noodle art.

Photos by Nicole Donnert/

Along" is made of Ramen noodles glued together with wings in a torus donut shape and is carried with dental floss. Armknecht said the idea for "Carried Along" was taken from a very sacred Christian song.

"It's a song by Andrew Peterson and how he was carried along by God's grace," he said, "It had a deep meaning for me."

Another piece, "Basin Creek Meadow", is taken from one of his personal experiences. Armknecht said it's based on an actual photograph he took while backpacking in Yellowstone National Park. The Ramen noodles are colored with tempera paint in blue, maroon and green and illustrated like the photograph, he said.

Mari Johann is one fan of Armknecht's work. Johann, junior in criminology, said she feels his art relates well to him.

"It's hilarious. There's a lot of humor in it," she said.

"It's very much Doug to anyone who knows him."

Johann said she thinks of Armknecht's art as impor-

tant because the idea is so original.

"He used Ramen as metaphors for life," she said. "I have never seen Ramen used as a medium for art." As inventive as this idea is, Johann said she thinks students can really show an interest in Armknecht's work.
"It's kind of college because it's Ramen noodles," she
said. "Ramen is something people associate with college
life."

Out of all of Armknecht's pieces, Johann said "Bachelor" is her favorite because of the reactions it gets.

"It's the way different people interpret it when they come in." she said, "whether the bachelor is lonely or he's simply alone yet self-sufficient."

Another supporter, Ryan Gove, said he encouraged Armknecht to pursue the idea to make art out of Ramen.

"It was a joke at first," he said. "I said for him to take it to the next level and he took off with it." Gove, assistant residence life coordinator for Putnam

Hall, said he attended the gallery grand opening.
"It wasn't just about art, but everyone really liked the

"It wasn't just about art, but everyone really liked the art," he said. "It was a chance for people to know about him."

Even though Armknecht doesn't see himself as an artist, he said he feels that his art is still special.

"It is art in a sense," he said. "Some titles are silly and some have meaning. It's not something you see every day."

Continued from page 1

"I thought I'd want to drive big trucks after they didn't need me at camp anymore," Calhoun said. "Then I learned that it is hours of boredom mixed with moments of terror when something goes

He needed a different way to spend his retirement. Substituting as a computer science teacher at his alma mater, Graceland University in

Iowa, has passed some of his time. Yet after a semester teaching, he

willingly went back to his yellow

"It's good to have retired people drive because they still have lots of energy," said John Maberry, director of transportation for Manhattan-Ogden USD 383. "They're good mentors for the students.

"They're one of the first people they see in the morning. They might have had a hard morning. and they see the bus driver who smiles and says hello. It helps those kids. It brightens their days."

**PRIVILEGE FEE** 

■ Continued from page 1

e-commerce, people are buying books online. We had problems getting books in last fall. Sept. 11 has impacted all business."

In order to solve the problem, Pitts said he hopes to out-source the

Out-sourcing means bringing in a business that will operate the bookstore and make it more efficient and productive, he said.

The committee voted to propose

an allocation of \$150,000 to make up the deficit, assuming there will be additional revenue from a privatized bookstore.

If a bookstore contract does not come through, an emergency allocation could be made to maintain the current level of service in the Union.

#### **Union Program Council**

UPC requested a total of \$210,000, almost quadruple their current budget.

Ryan Walker, senate vice chair, said he encouraged the funding,

entertainers and speakers.

"I think we need to buy into the concept of programming on campus and lead other students in that," Walker said.

However, Joe Pacey, engineering senator, was cautious about fully funding the proposal.

"We don't have a lot of concrete data to show students are willing to pay for this," he said.

Gayle Spencer, coordinator of student activities and services, said she thought money should not be the issue.

"It becomes a matter of how we

can enhance students outside of the classroom," Spencer said.

However, the committee decided to compose legislation that will increase the budget by \$139,984 with a 3 percent inflation rate included, funding only half of the request.

Committee members also voted a one-time proposed allocation of \$66,000.

These funds will allow the First Friday event to occur weekly instead of monthly. The UPC hopes to fund the program through grants after the

#### Education Majors

Have you thought about the **incentives** in California?

> California has more financial and professional development incentives than any other state to assist the starting teacher in a new career.

JOB OPPORTUNITIES AT THE ACADEMIC AND CAREER

statewide to

bring qualified

teachers into

system.

the public school

INFORMATION CENTER for students interested in helping other students starting fall semester.

REQUIREMENTS:

·Satisfactory academic standing with a minimum cumulative GPA 2.75

·A team worker with good communication skills ·Ability to work with minimum supervision •Time commitment of at least eight hours per week

> MUST ATTEND ONE INFORMATIONAL MEETING

Monday, February 11, 3:30 p.m. Tuesday, February 12, 6:00 p.m. Vednesday, February 13, 4:00 p.m. Holton 14

For more information call 532-7494

You chose to become a teacher to make California has a difference in the lives of children. But when you choose your first teaching committed position, shouldn't it be one that can make the difference of a lifetime for you? \$53.3 billion to education

California has just signed into law the largest education budget in the nation's history, and many of the dollars are earmarked for financial incentives to make it easier for you to get here - and stay here. A variety of grants, bonuses, income tax credits and home loan assistance programs are offered by districts looking for the best and brightest teachers.

And inside the classroom, you'll receive outstanding support from state-funded professional development programs.

Bring your teaching degree to California

Our commitment to education translates into real benefits for teachers: Starting salaries of \$34,000 to \$44,000 for first year teachers; up to \$19,000 in grants for education loans; no-moneydown mortgages with low interest rates; and other incentives for teachers in areas of high need.

We need you in California. It's easy to get here. For more information, call toll-free 1-888-CalTeach (888-225-8322) or visit our website at

www.calteach.com.

Feb. 13, 2002 Kansas State University Manhattan,

# marijuana, make arrest

BY AMY LINK Knesas State Collegian

The Riley County Police Department arrested a Manhattan man Monday night after searching his home and finding approximately 181 marijuana plants.

At 7:45 p.m., police served a search warrant at the home of Ronnie Owensby, 2310 Kraig Street, police officials said.

The warrant was issued under suspicion of marijuana distribution in Riley County. As a result of the search warrant, a small amount of processed marijuana was seized, along with 181 marijuana plants that were in different stages of

Owensby was arrested on four felony charges. They include cultivation of marijuana, possession of marijuana, possession of drug paraphernalia and no Kansas drug tax stamp.

Owensby's bond was set at \$10,000.

# Connecticut student lets hostages go

BY JOHN CHRISTOFFERSEN The Associated Press

FAIRFIELD, Conn. - A former student claiming to have a bomb held nearly two dozen students and an associate professor hostage Tuesday before releasing them

unharmed, authorities said. At one point, there were 23 people inside the Fairfield University classroom. The suspect, identified only as a recent graduate, freed the hostages a few at a time throughout the evening. He was taken into custody about an hour after the last student was released.

Nancy Habetz, a spokeswoman for the Roman Catholic school in southwestern Connecticut, said the suspect "came out and gave himself up peacefully."

Fairfield First Selectman Kenneth Flatto said the package the student claimed was an explosive device was left in the classroom and was being examined by a bomb squad.

The suspect took over a religious studies class in Canisius Hall late Tuesday afternoon, Habetz said. Some 300 students were evacuated from the building. WCBS-TV in New York said the suspect ordered one of the hostages to call the station, demanding that a statement be read over the air.

The class, "Voices of Medieval Women," is taught by Elizabeth A. Dreyer, an associate professor. Her husband, John Bennett, spoke to his wife after her release.

"She's OK, she says the man is clearly disturbed," he said.

Evening classes were canceled and students held a prayer service in one of the residence halls, student Joni Saunders said.

Canisius Hall is home to the academic vice president, the College of Arts and Sciences, the university registrar and other offices as well as faculty offices and classrooms.

Fairfield is about 20 miles from the New York state line.

# RCPD finds | Students receive referral in absence of attorney

BY JENNIFER FARR

Kansas State Collegion

The student attorney, who suffered a stroke in November, has been unable to offer legal counsel, and the Office of Student Activities and Services is referring any students with legal difficulties to Flint Hills Legal Services.

Dianne Urban, K-State student attorney, said she does not know when she will be able to return to her position or if she will return at all. This decision. she said, is based upon her recovery.

"It all depends on how I recover," Urban said. "And it's a day-by-day process."

Kyle Barker, student body president, said the office had considered hiring a temporary attorney to fill the position, but found there was not enough funds to Legal advice

provide one.

Barker said if Urban does not recover by the end of the spring semester, they will find someone else to fill the position.

Nothing else has been done for the student population other than the referral to Flint Hills, he said, but he has not heard of any student complaints.

"I've personally talked and had contact with about five or six people who've had legal problems, but they haven't complained to me about the situation," he said.

Gayle Spencer, coordinator of student activities, said the issue was not just

about the lack of funds in the budget.

"I understand that students are missing out on having easy access to an attorney, and it's unfortunate for them," Spencer said. "But under law, we can't hire someone else to replace her while she is under sick leave."

Spencer said Urban saw about five to six students a day asking for legal services.

She said that while the situation is unfortunate, she believes that students are receiving quality legal help at Flint

A portion of the student activity fee funds K-State legal services. The services provide legal counseling, documents and letters, limited representation and appropriate referrals. These services are free with the exception of representation in court and the drafting of wills.

Gabrielle Thompson, managing attorney at Flint Hills Legal Services, said that under its application process, a person would have to fit into a financial bracket in order to receive legal help.

Thompson said representation fees would be similar to the fees they would have been charged by the student attorney, but only if they qualify.

Since Urban's illness, she said she has not noticed an increase in cases from K-State students.

'We've always helped students at K-State with their legal difficulties, so really, there is no difference in the situation." Thompson said.

She said she does not see any problems in the future. She said if the firm could not handle students'

# Baseball's Opening Day marks beginning of spring

BY DAN SMITH

Kansas State Collegian

he ping of aluminum signaled the beginning of spring yesterday at Frank Myers Field at Tointon Family Stadium.

At least for supporters of the K-State baseball team.

Brisk winds and a dipping temperature didn't seem to matter, as 123 fans made their way to the newly remodeled venue to take part in Opening Day activities at 'The Frank.

"It's a good time to spend with friends and enjoy a baseball game in a brand-new facility," Austin Thayer,

sophomore in finance, said.

The Wildcats didn't disappoint, recording a 21-8 win over Doane (Neb.) College. But despite the win, Coach Mike Clark said his team's performance wasn't quite up to his standards.

"I was very disappointed," he said. "I have not felt this bad after a 13-run win in my life. It's early in the season and we've got a long way to go."

Clark's club couldn't shake off the rust from a long offseason rest, committing six errors in the game, but the Wildcats got the win to go to 1-0 in their first action of the year.

Rough defensive play or not, Tony Hymen, freshman in theater, said he

**BLACK HISTORY** 

remains confident K-State will have a good year.

"They're kind of young and I've heard a lot of good things about the team," he said. "I'm optimistic."

Part of that optimism sprouts from the mix of talented youth and experienced veterans that peppers this year's opening season roster.

The Wildcats have 23 newcomers on the team and 12 returning lettermen from last year's 25-28 club, including four returning starters.

One of those veterans, Pat Maloney, had a particularly big day for K-State. The senior outfielder went 3-for-5 with three RBI and three runs scored to lead

"The atmosphere was pretty good," Maloney said. "We'd like to see some more fans out there, but it was exciting finally playing again after this last fall Junior catcher Tim Doty also

connected on his first career home run in the second inning, and K-State had plenty of offense for the fans, collecting 16 hits off eight different Tiger pitchers. The Wildcats used nine pitchers of

Junior transfer Ross Hawley started the ballgame and struck out two of the

#### Speaker says future success depends on exceeding expectations That night, Johnson learned that becoming a

BY SHANNON HARTENSTEIN

Kuesas State Collegian

On a warm summer Friday night in Detroit, Mich., Joseph A. Johnson and his friends challenged another

group of young black men to a casual game of street basketball on the rough side of town. What Johnson didn't realize was that, at age 17, his life was about to change forever.

When the game ended, Johnson's friends noticed the other men concealing guns. As they ran for their car, Johnson was shot in the arm and in the back.

He stumbled to a nearby house for help, yet the owners refused to call authorities. When he finally found himself at the end of a busy

emergency room line, it seemed he would die before being treated. But a doctor passing by intervened, treated him immediately and saved his life.

successful young black man was a matter of destiny, exceeding expectations and overcoming all obstacles. He would rebound from his misfortune, go on to play basketball at the University of Michigan and later attend law school.

Johnson, now an attorney in North Carolina, shared his story, "Against All Odds," with K-State students Tuesday night in Forum Hall. The

MONTH presentation was sponsored by the Black Student Union as part of Black History Month

activities. Johnson stressed the relationship between black history and achievement and related the obstacles overcome by historical figures like Martin Luther King

Jr. and Harriet Tubman to his experiences. "I learned very early not to question my

### STATE IN BRIEF

#### Companies unsure about response to Sebelius order

TOPEKA - Officials of Blue Cross-Blue Shield of Kansas aren't ready to say whether they will pursue another deal following denial of the company's proposed sale to Anthem Insurance Companies Inc.

The decision Monday by Insurance Commissioner Kathleen Sebelius drew expressions of disappointment from both Blue Cross and Indianapolisbased Anthem, which continued to defend the transaction.

But groups representing doctors, nurses and poor and working class families were pleased.

#### Wreck victim's family sues driver, university, fraternity

LAWRENCE - The family of a Lawrence woman who was killed by an intoxicated teen-age driver is suing the University of Kansas and the fraternity house where the youth allegedly drank before the crash.

The lawsuit, filed Monday in

Douglas County District Court, also names as defendants the driver's mother and stepfather and a fraternity member, who allegedly provided him with alcohol the night of the crash.

Felicia A. Bland, 39, was killed Sept: 16, 2000, when a car driven by Sean M. Scott, 16, collided with her car on Kansas 10 in western Johnson County.

### NATION IN BRIEF

#### FBI warns of attack in U.S or Yemon; target unnamed

WASHINGTON, D.C. - The FBI considers a tip about a possible terrorist attack against the United States or against Americans in Yemen to be credible, even though the information does not cite specific targets and is not corroborated by other sources.

Investigators distributed photographs of men believed to be involved and police nationwide were put under orders to detain any of them immediately.

The warning identified one possible attacker as Fawaz Yahya al-Rabeei, a 22-year-old from Yemen, A U.S. official, speaking on condition of anonymity. said al-Rabeei is believed to have links to al-Qaeda but is not believed to have been involved in the attack against the USS Cole in the Yemen port of Aden in

#### Former Enron chair refuses to testify before Congress

WASHINGTON, D.C. - Kenneth Lay, the presidential pal who built Enron into a darling of Wall Street

only to see it collapse in scandal, exercised his constitutional rights Tuesday and refused to testify to Congress.

He said his attorneys had advised him not to testify. "I cannot disregard my counsel's instruction," he said.

In a brief statement, Lay expressed a "profound sadness" about what had happened to Enron. Before being called to the witness table, Lay sat glumly as he was criticized by senator after senator for maintaining his

#### ATTACK DEVELOPMENTS

- The United States will investigate allegations that Afghans mistakenly taken prisoner in a raid by American forces were beaten and mistreated. U.S. officials insisted they had no evidence supporting the claims.
- A review released Monday by The Associated Press suggested Afghanistan's civilian death toll might be in the mid-hundreds, much lower than previous estimates.
- Three men accused by Pakistani police of sending e-mails announcing the abduction of Wall Street Journal reporter Daniel Pearl were charged with kidnapping Tuesday and ordered iailed for two more weeks.
- French authorities said they've arrested a man who claimed to have connections with key figures in the Sept. 11 attacks.
- Germany's defense minister flew into Kabul for visits with German troops protecting the Afghan capital and with Afghan officials.

# THE GONGFARMER'S Traveloque

Well, here I am in the Bucknakedupatree Islands. The origin of the name is shrouded in the sands of time, but the natives say the name comes from everyone being buck naked up a tree on an island. How's Kansas? Wish you were here.

#### WHAT DO YOU WANT TO BE WHEN YOU GROW UP? K-State professional describes basics of degree program

#### **Business Management**

1. How many hours are required to graduate?

2. What careers could I pursue with this degree? It varies a lot. There are four different types of specializations in management degrees: operations management, human resources, management information systems (MIS) and general mana

3. What are the advantages of this major?
Lots of companies are looking for people with training or a background in business. The advantage of a management degree is that it makes one more adaptable to other areas of busine

4. What is the average starting salary of a graduate in this major? About \$38,000. MIS majors are in big dernand and get the highest salary of any of the management majors, about \$50,000 to \$55,000.

5. What is the hiring rate in this field? In the past five years, the hiring rate has been greater than 90 percent.

# national recognition

BY KASEY BROWN Kansus Stote Collegies

Women in Aviation received

chapter status recently at K-State-

The group is an international, non-profit organization that encourages advancement of women in aviation career fields and interests.

Women in Aviation began as an international group in 1990. Salina adopted Women in Aviation as a group in 2000. Individuals were involved on their own in the international group until 2000 when women at Salina took steps toward getting organized and working toward chapter status.

"Becoming a part of Women in Aviation seemed like a good opportunity to bring all the girls together." said Rosalee Harris, president of Women in Aviation of Salina. "Another woman pilot went to a national conference for Women in Aviation and brought it to our attention that we should get a group started.

"There were only seven of us at first, so we started taking steps to growing by getting chapterized."

Harris said, she got a chapter application and started having meetings for people to sign up. In order for a chapter to be considered at Salina, they had to have at least 10 members who were already recognized as individuals in Women in Aviation.

"We started getting organized and having meetings. We elected officials and went to the international conference," Harris said.

The conference Harris attended was in Reno, Nev. Women organized the conference to put together a network for everyone to be involved on a social and networking level.

The mission of the conference was to promote women in all aspects of the aviation industry and for men to play a part if they would like. There also were many job opportunities there. Airlines from around the country set out applications to be filled and began hiring for available positions.

The Women in Aviation of Salina reached their goal of getting

Nancy's Hours:

Tues & Thurs 5-8

chapterized in January. They will receive recognition in the Women in Aviation magazine.

Not only have they received national recognition, but they also have grown to have 22 members.

"This is a great way to get connections in the aviation field and promotes a good experience. It's great to have in a maledominated field," said Lynsey Burnett, secretary for Women in Aviation of Salina.

After becoming a chapter, the group set more goals for the semester.

"We would like everyone to be able to attend this year's conference. It is a great opportunity for job placement and scholarship awards," Harris said.

Harris said, the conference in Reno last year handed out more than \$800,000 worth of scholarships and hired eight people in three days for Alaskan Airlines.

There have only been two members of the group at Salina who have been able to attend the conference. They are working on creating a bill for the Student Government Association to pay for hotel rooms. Their budget has been set at \$7,000, and they have raised \$2,700.

The group had bake sales and car washes to raise money for the conference. They also are selling votives and participating in other fund-raisers for their cause.

Besides the conference, Harris would like to see more from the

"I'd like to get everyone involved in seeing what Women in Aviation is all about. I would like to get together with a chapter out of Wichita and get some speakers in. Perhaps some women out of airlines," Harris said.

Harris said she also would like to develop a mentoring program at area high schools based on what the Women in Aviation do.

"It is not just for women or for women pilots. Men are welcome in taking part, too. It is also open to anyone in the engineering and aviation marketing interests. Anyone from a flight attendant to a mechanic is welcome in the club," Harris said.

# Salina club receives | Pair announce candidacy Tuesday

Kansas State Collegian

Another pair of students entered the race for student body president and vice president Tuesday.

Zac Cook and Todd Kohman officially announced their intentions on the steps of Fairchild Hall.

Cook, a senior in biological and agricultural engineering, said he decided to run for president because one of the issues he and Kohman will focus on - the internationalization of the K-State campus - is very personal to him.

"I studied abroad last spring in the Czech Republic and found it to be beneficial to a graduating K-State student," Cook said.

He explained that many large organizations make cultural experience in their employees a priority when hiring.

Cook also said the 2000-01 strategic planning committee, established by provost James Coffman, made a list of high priority actions the university needed to take, which included enhancing international emphasis on the K-State campus.

"Another priority the committee made was to enhance a diverse and multicultural environment at K-State," Cook said.

"We want to work on those

Kohman, a senior in operations management and marketing, said he is running because he believes in the pair's platform issues.

"They are achievable and realistic issues," Kohman said.

He said the pair wanted to increase voter registration in the Manhattan area. He said that since most students do not vote, they have no say in what goes on in Manhattan.

"Most people are here for at least four years, and some are here longer than that," he said. "Students should get involved in the community of Manhattan."

Cook also talked about an opendoor policy. He said students might have felt intimidated going and talking to the president and vice president before, but he would encourage that kind of communi-

"We want students to know they can walk right past the secretary in

Zac Cook, right, and Todd Kohman, left, announced their intention to run for student body president and vice president Tuesday in front of Fairchild Hall.

the OSAS office and come back and with parking and tuition, when in talk to us," Cook said.

Josh Sturgis, co-campaign manager for Cook and Kohman, said he supported the pair because their platform was not a typical SGA platform.

"They want to better K-State in ways that can actually be achieved," Sturgis said.

"Other candidates want to deal

all reality, SGA has no real control over those issues."

Mary Hoke, co-campaign manager, said she supported Cook and Kohman because the issues they were talking about meant something to them personally.

"They have some great issues, and they'll work hard to get them done," Hoke said.

# Senate president says redistricting map will pass

BY JOSHUA AKERS

The Associated Press

TOPEKA — Senate President Dave Kerr expressed confidence Tuesday that a redistricting bill he supports has enough votes to pass.

The bill, redrawing the 40 Senate districts, was scheduled for debate Wednesday. Republicans have a 30-10 majority in the chamber.

"We have well over 21 votes," said Kerr, R-Hutchinson. "I don't foresee any problems."

But not all Republicans favor the bill, endorsed earlier this week by the Senate Reapportionment Committee.

As he left a Republican meeting on the plan Tuesday, Sen. Stan Clark of Oakley said he was disappointed. The hill puts Clark and Democratic Sen. Janis Lee of Kensington in the same northwest Kansas district.

Clark and Lee last week presented a plan preserving both of their districts, but the committee ignored that proposal.

"Dave Kerr is showing his lack of interest in rural Kansas," Lee said.

Rural-urban balance has been a major concern as legislators redraw district lines to reflect shifts in population as shown in the 2000 census.

"The key issue is the population shift and the growth in Johnson County, which this map recognizes," Kerr said.

Lee said the plan she and Clark devised would be offered as an

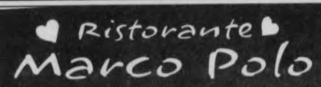

"The chances aren't great, but we will wait until the vote is counted," she said.

Senate Minority Leader Anthony Hensley said he wanted the debate postponed until Thursday.

"It would give members a little more time to prepare amendments," said Hensley, D-Topeka.

But Senate Majority Leader Lana Oleen, R-Manhattan, said the debate would take place Wednesday "unless there is a computer glitch."

The Women in Aviation organization at K-State-Salina recently has grown to the level of earning chapter status. The international organization encourages women involved in aviation programs.

Organizations such as this are an asset not only to Salina's campus, but also to the entire nation. Aviation and other fields are comprised mostly of men. This can discourage younger women from choosing to study them.

Women should feel comfortable

studying what interests them and not be afraid to pursue male-dominated fields.

K-State-Salina's Women in Aviation members also should be congratulated for their efforts. They started with only seven members - not even enough to be considered for chapter recognition. The group has grown to 22 women.

It is this type of determination and effort that will help women advance in different careers. The women on the Salina campus took initiative to promote something they thought was important.

The organization gave the members a chance to come together and support each other. It was the foundation for a group that could end up meaning a lot to many students on the campus.

Organizations like Women in Aviation are an asset to the university. Hopefully, it will serve as a reminder and example to women interested in other fields. The more support groups can offer, the more opportunities students can utilize.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

I've noticed that Ph.D's are easily entertained.

Damn guys, why do they have to be so charming?

Peanut butter is the duct tape of food.

Ninety-two percent of women at K-State are sexually active. That means 92 percent of women are walking around thinking, "Class or sex? What shall I do?" 92 percent.

Let's see, we stole the Harry Potter chant from Texas A&M, and the newspaper thing from KU. K-State basketball fans, show some originality.

Let's invest in a new Jumbo Tron and sound system for the K-State football stadium.

Do you guys want a place to take your date on Valentine's Day? I'd highly suggest the Sirloin Stockade sirloin for two for \$18. You can't beat it.

Who does this Paul White guy think he is? The American Taliban?

After reading Monday's Collegian, Paul. White for president.

Hey girls, if you buy me some brakes for Valentine's Day, I'll give you a free lube and filter.

#### READERS WRITE Columnists don't have an

educated view on issues

Editor,

As a recent graduate, I read the Collegian online nearly every day. One section I have a particular interest in is the opinion page.

While once motivated by wanting to hear some valid, pointing editorial pieces, I am now motivated, because of the writing of two columnists, by the same feeling that makes a

person watch a train wreck. Recently, I've read David McCandless' and Paul White's columns about our nation's recent political and military actions. I've also been enlightened to the faults of our political system of our leaders. I've seen how wrong the two-party political system is to

McCandless On Feb. 11, White began a statement with "Even though I love America and the U.S. Constitution..." This implies, to me, that despite White's unwavering affection for his country, he believes they are wrong.

How has our country existed this long with such a flawed government system and such horrible leadership? Apparently, we are lucky to have existed in this system for so long, according to White and McCandless. Perhaps they should join the ranks of the leaders of whom they are so critical.

I will tell you this country, or this world (at least in my limited experience) is not a political science classroom. Sure, these principles of which White and McCandless have been so critical might be flawed in theory, but if these two writers know how to resolve it, I hope they approach our leadership with their solutions.

In addition to the content of White and McCandless' columns, they also show inept writing abilities. These columns show nothing other than the ability to flip through some old magazine and newspaper articles, and pick out the most shocking things they can say.

I also realize, as a journalist myself, the value of columns of such a pointing nature. But just as the overwhelming patriotism is starting to become more of a fad than genuine feeling right now, writing like what McCandless and White have been doing is starting to wear thin among readers throughout the U.S. and the world.

Perhaps these two gentlemen could spend their time writing columns on more constructive and useful topics.

## Smoking while pregnant endangers health, life of unborn babies

magine a newborn baby, addicted to nicotine, lying helpless in an

It is struggling to breathe, gasping for every ounce of air available. Tiny arms and legs so small a person could cup his hands around them multiple times.

The infant probably will grow up to have asthma, chronic ear infections, or other health-related problems, all because its mother smoked while she

was pregnant. When I see pregnant women smoking, I get this uneasy feeling in my stomach. I think about what the smoke is doing to their fetuses and I see how the women don't

seem to care who they're hurting. Imagine if the above scenario happened to someone close to you. Would you reconsider lighting a cigarette if you knew these would be the results of your action?

Thope so. Smoking while pregnant is wrong. It's child abuse,

In the American Heritage college dictionary, abuse is hurting or injuring by mistreat-

Pregnant women who smoke are mistreating their unborn children by exposing them to the harmful effects of nicotine, and their children can't do anything about it. Babies are suffering because their mothers are too ignorant or too selfish to change

Why can't these mothers realize what they're doing to their children? The deadly carcinogens in the smoke obviously affect the lifestyles of the young infants, and doctors have repeatedly warned women of the dangers of smoking while

pregnant. Even parents who smoke around their already-born children are being abusive. The

Amber Koehn

scene where small children are sitting in the backseat of a car while their parents enjoy cancer sticks without rolling the windows down is all too

Second-hand smoke can do just as much damage as first-hand

When a mother smokes while she is pregnant, she is inflicting a punishment on her child so harsh it could mean death. The child is unable to tell its mother to stop. So, unwillingly, it has to suffer the consequences of its mother's action.

The harmful effects of the deadly drug we call tobacco already have destroyed numerous lives. Low birth weight, respiratory diseases and, ultimately, death are just a

few effects that can be avoided if parents, especially women, don't smoke. I am by no means trying to deter people from ever smoking. If they want to harm themselves, that's their prerogative and I don't really have the right to stop them.

I am, however, trying to deter people from smoking around children. I am speaking up for the rights of those babies, because they cannot do it themselves.

People have the right to smoke. But like freedom of speech, their rights only go as far as the rights of their children. When their habit infringes upon their child's rights to have a healthy life, they've gone too far.

We live in an age where it has been proven that smoking and drinking and abusing drugs will harm unborn babies. It infuriates me when people ignore the facts.

How stupid can you be to know all of the dangers yet still take part in them? People are hurting their children just as much as they are hurting themselves, and they don't even seem to care.

We as a nation should care.

By speaking out and warning people of the dangerous effects smoke has on unborn babies and small children, we can save lives. This column is my way of speaking out. Maybe people will read this and rethink lighting up, especially if they're pregnant or around small children.

Hopefully, they'll think about their abusive action from their children's point of view. Amber is a senior in print journalism. You can e-mail her at adm9559@ksu.edu. Line art by Ben Dolezal/Collegian

# Valentine's Day commercializes love, relationships

t's been brought to my attention that Thursday is Valentine's Day. Also known as "Give girls a bunch of worthless but expensive crap" Day. Also known as "Haha, look at all of the pathetic losers who don't have a date"

**David McCandless** 

find Valentine's Day ironic. This is a tradition started by a Catholic priest about to

Lactually

be beaten with clubs and then beheaded. Tell me again what that has to do with stuffed bears and little candy hearts? Or drunken mutual-self-pity sex?

For those of you who haven't picked up on it by now, I hate Valentine's Day.

The nice part of me wants to be happy for all the couples who wander around campus hand-in-hand each Feb. 14.

But the other part of me is secretly laughing inside, because most of them will break up within a few months and spend all their time whining about how much they hate each other.

Why can't people realize how shallow most of their relationships are?

For example, why is it that men have to search for the perfect gift? Why is it that if they don't spend enough money on their gift, or don't buy just the right thing, they are less of a boyfriend?

It's sad that our feelings can be bought

It's terrible that we have now put a price on love. Last I checked, the going rate was \$29.99 (for one-half dozen arranged roses). What does this say about our culture and the things we value?

This is a time when more than half of marriages end in divorce, an age where "Temptation Island" and "Who Wants to Marry a Multi-millionaire?" are popular television shows.

It is one thing to commercialize sex, but quite another to commercialize love. How can we have illusions that many of

our own relationships are meaningful? Don't get me wrong. I'm not trying to moralize. Whatever decisions people want to make are their own business.

My problem is with people who try to make their relationships more than what

I think it is time for many people on this campus to grow up.

I've seen far too many people who are just plain bad at having relationships. They are looking to use and get used. They're in relationships for the social benefits.

This is not high school; it is time to put effort into our relationships, or not have them at all. If you're in a serious relationship with

someone, don't mess around. If you mess around, everybody you "do it" with has the right to know that the

relationship is not serious.

It's not fair to lead people on, and it will come back and bite you in the butt.

So if you're one of those people who has a boyfriend or girlfriend only for the sake of having one, it's time to re-evaluate your priorities and let them loose.

It's just common courtesy. And for those of you who do get cut loose, don't cry about it. Sure the sex was good, but it would have only hurt you more

in the long run.

If you were in the relationship only for the physical benefits, more power to you. If you thought you were in love, but it turns out you only loved his hair, don't complain when things are over.

David is a junior in political science and public relations. You can e-mail him at dlm7676@ksu.edu.

## Construction to begin on new grain complex

BY KASEY BROWN

Kansas State Collegian

Buildings involved in the new Grain Science Complex will begin construction in October after a pledge of \$2 million from Hal and Mary Lou Ross of Wichita.

This pledge will begin the building of the bioprocessing and industrial value-added center and flour mill.

Hal Ross graduated from K-State in 1949 with a bachelor's degree in milling science and management. He now is an attorney and graduate of the University of Kansas School of Law, and was in the flour-milling business with Ross Industries for many years. He administers the Ross Foundation in Wichita and is on the K-State Foundation's board of trustees.

"At my age, the important things from the past stand out. High among these was the education I received at Kansas State and the friends I met there. I felt - as many others do - in wanting to give something to the institution that provided these things to me," Ross said.

Individuals and industries have pledged money to support construction of a new Grain Science Complex.

The complex will consist of five buildings: a feed mill, flour mill, bioprocessing and industrial valueadded center, International Grains Program Executive Conference Center and a teaching, research and administrative building.

"The facilities now are old with a lot of infrastructure problems. We needed more modern facilities and equipment to train students with," said Brendan Donnelly, department head of grain science.

Each building will begin construction in phases. Scouting out a site begins this spring and probably will last until October when construction

The flour mill will be one of the first buildings constructed and will be named after Ross for his support.

The projected time of completion for the complex is 2010.

"The primary benefit of these buildings is for undergraduates to train on the most modern equipment in the food, feed and fiber industry and conducting graduate and research programs at a more advanced level to solve industryrelated problems," Donnelly said.

### Police detain suspect in Journal reporter's abduction

The Associated Press KARACHI, Pakistan - The

chief suspect in the abduction of Wall Street Journal reporter Daniel Pearl was arrested Tuesday, and an official close to the investigation said the suspect told police Pearl was alive.

Pearl's whereabouts remain unknown, although police said they believe he is still in Karachi and alive. They did not elaborate. Pearl has been missing for three weeks

Ahmad Omar Saeed Sheikh, a British-born Islamic militant, was arrested Tuesday afternoon in the eastern city of Lahore and sent to Karachi for questioning, ministry secretary Tasneem Noorani told The Associated Press.

Jamil Yousuf, head of a citizenpolice liaison committee, quoted Saeed as saying of Pearl, "He's alive. He's OK.

Saeed, now 27, was freed from an Indian jail in December 1999 in exchange for passengers of an Indian Airlines jet that was hijacked to Kandahar, Afghanistan.

His arrest was announced one day before Pakistani President Pervez Musharraf is to meet

President Bush in Washington, D.C. The kidnapping embarrassed the Musharraf government, which is seeking U.S. aid as it attempts to combat Muslim extremism in this predominantly Islamic

country of 147 million people. Saced's arrest is a significant achievement in the case, Noorani said, adding that "we have to wait" to learn about Pearl's fate.

Lonnie Kelley, spokesman for the U.S. Consulate in Karachi, said American officials had no word on Pearl's fate and were trying to confirm that Saeed has been arrested.

"We are looking into it, but nothing on Daniel yet," he said. Steve Goldstein, a vice president and spokesman for Dow Jones, the Wall Street Journal's parent company, declined to comment on whether the arrest revealed new information about Pearl's abduction.

We continue to remain hopeful." Goldstein said in a telephone interview. He also declined to comment on specifics of the case.

A team of police officers from the southern province of Sindh had been in Lahore searching for Saeed for the last few days, the government-run news agency

Associated Press of Pakistan reported Tuesday.

Police identified Saeed as the prime suspect in the case after arresting three men suspected of sending e-mails that announced Pearl's kidnapping.

One of the three men who was found to have the e-mails on his laptop computer told investigators that he got them from Saeed. police said. The other two said they had met Saeed in Afghanistan, police said

Several more arrests were reported in Karachi, Rawalpindi and other major cities Tuesday.

Yousuf, of the citizen-police liaison committee, said the key break came Monday night with the arrest of a suspect in the capital of Islamabad who gave crucial information. Yousuf did not elaborate.

Also Tuesday, the three suspects accused of sending the emails announcing Pearl's abduction were charged with kidnapping and ordered jailed for two more weeks.

Those suspects were brought to Sindh province's High Court in an armored personnel carrier surrounded by 20 machine-gun toting policemen wearing helmets and bulletproof vests. They were

chained together at the waist, their heads and faces covered by shawls and bath towels. They were led into a second-story courtroom but presiding Judge Shabir Ahmed decided to hear their case in his

chambers. The trio had been due in court Monday but proceedings were delayed after officials decided that an anti-terrorism judge, not a civil one, should hear the case.

Pearl, the Journal's South Asian bureau chief, was abducted on his way to a Karachi meeting with Islamic extremists. He hoped they would provide information about e-mails exchanged by Pakistani militants and Briton Richard C. Reid, the so-called shoe bomber arrested on a Paris-to-Miami flight in December with explosives in his sneakers.

Four days later, an e-mail sent to Pakistani and international media showed photos of Pearl in captivity and demanded that the United States repatriate Pakistanis captured in Afghanistan and now detained at the U.S. naval base in Guantanamo Bay, Cuba.

A second e-mail sent Jan. 30 said the 38-year-old reporter would be killed in 24 hours. That was the last known message from

# Women to face tough OU tonight

BY DAN SMITH

The calendar still says February, but it'll feel like March at 7 tonight in Bramlage Coliseum when No. 12 K-State takes on the No. 3/4 Oklahoma Sooners in a matchup of the Big 12's top two teams.

#### Midweek matchup

No. 3/4 Oklahoma (20-2, 10-1) at No. 12 K-State (21-4, 9-3)When: 7 tonight Where: Braml Coliseum (13,340) TV: Tape delayed 12:30 a.m. Thursday - Channel 13 dio: Wildcat Radio Network: WIBW-AM 580

With the conference tournament less than a month away, and the Wildcats (21-4, 9-3) sitting two games back of the first-place Sooners (20-2, 10-1), tonight's game could be K-State's last chance to make an argument for the league title.

Still, Coach Deb Patterson said tonight's game doesn't hold any more significance for her team than any other contest this season.

"I look at the Oklahoma game as the next game on our schedule," she said.

But for weeks now, the Oklahoma game has garnered extra attention among K-State

Patterson's club could have taken over the conference lead with a win, but losses in two of the Cats' last three games have made that scenario impossible tonight. K-State lost to then- No. 16/12 Iowa State, 86-72, on Feb. 2 and on Sunday fell again to unranked Nebraska in Lincoln, 67-52.

Regardless, freshman Kendra Wecker said the team is ready to put the past behind them

OKLAHOMA on PAGE 7

# Cats to get 1st taste of postseason

I'm going to pick the winner of tonight's K-State/Oklahoma game. But before I do, let

Dan Smith

me caution you. Lately, I haven't had a lot of success predicting which side of Coach Patterson's squad will show up in big games.

Lately, in fact, it's been a toss-up. On two occasions this season, I've watched the Cats disappoint me. Once in Bramlage on Feb. 2, and again in Lincoln last Sunday.

Visions of the Big 12 regular-season title and a No. 1 seed in the NCAA Tournament faded after the Cats' latest let-down against Nebraska. But have faith, purple patrons. K-State will return to the conference spotlight tonight against the Sooners.

Everyone knows the Cats come up big when it counts. Early-season upset wins are evidence of that. Still, No. 3/4 Oklahoma stands as the purple's biggest test to date.

K-State will need to put together its best effort of the season to get by the Big 12leading Sooners. A win tonight would bring the Cats one game closer to the Sooners, but more than that, it would silence the many critics who have appeared, saying Patterson's club has had its 15 minutes of fame. Think that's enough motivation for Megan Mahoney to jump up on press row again? You better believe it.

Every team in the Big 12 has waited for its opportunity to burst K-State's balloon, and the Cyclones and Cornhuskers have done it. Now's the time the Cats need to come together and show the rest of the conference they're for real.

Can K-State win tonight? That's the real question. The answer is yes - if Patterson can convince her team they deserve to be in the hunt. The Cats are 25 games into a long, tough season. It isn't right to call these players freshmen anymore. They've been beaten and bruised. Now it's time for them to recover.

In their own house, on their own terms, and with everyone in the Big 12 watching, this is the time for a triumphant return to the top.

A win tonight and K-State can legitimately call itself the best team in the conference, despite its midseason shortfalls. A loss and the Cats will still have some work to do before they deserve a top two seed in a regional. My prediction - K-State 75, Oklahoma 72.

Dan is a senior in print journalism. You can e-mail him at djs4444@ksu.edu.

# ANSWERING THE CALL

# Wooldridge's challenge met in A&M win

BY DEREK BOSS

Kansas State Collegion

Coach Jim Wooldridge had a message to send his team following its 99-82 loss to Nebraska Saturday in

At Sunday afternoon's practice in Manhattan, Wooldridge did a little house cleaning. He took the pictures off the walls, the players' names off the lockers and removed all the chairs from the film room. He even disconnected the TV and electronic equipment in the

'He just came out and told us that we're not going to get the privileges that we get in the past," senior guard Larry Reid said. "I think that really put something in everybody's mind that if we're not going to play good, this is what we deserve. We don't deserve any of that stuff, and I think guys responded to that.'

Apparently so. K-State (10-12, 4-7) limited Texas A&M to just 13 points in the first half Tuesday night - a Bramlage Coliseum record -shot 51 percent from the field and led by as many as 37 in a 69-38 victory over the Aggies

Wooldridge said he felt a challenge was necessary after the road loss to the Cornhuskers, in which the K-State defense allowed 57 percent shooting and 12 NU

Some games you need to move on - you get beat and you have got to move on," Wooldridge said. "But I don't think that was a game we needed to move on from.

"I've really tried to be very even-keel to this team throughout the year. I knew there were going to be bumps in the road and all that, but I thought it was an appropriate time to let it go a little bit.'

Wooldridge did, and K-State's win over the Aggies marked a 61 point swing from the Husker defeat, the fourth-largest in school history and the biggest since the

A&M's 38 points were also the fewest the Cats have allowed in a game since Coppin State (36), the reigning school record, and the least against a conference opponent since Jan. 12, 1952, when K-State downed Nebraska 71-36.

Yet, Wooldridge said no matter what he did to motivate his team, his players had to respond in the

You've got to have people after that happens that believe in the system and believe in the coaches and believe that it's the right thing to do, or a team can really crack," he said.

"And I think we had some guys that probably spoke up and said, 'You know, that's right.' And that's the learning curve we hope to be able to adopt with this team and teams in the future."

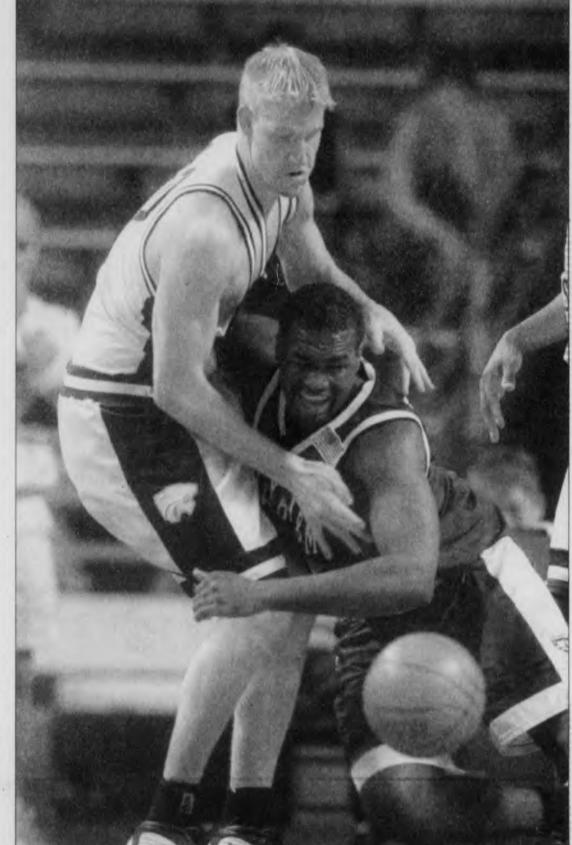

It didn't take K-State long Tuesday to build a commanding lead in the first half.

A&M took an early 6-4 advantage, but little did the Aggies know they would score just seven more points in the half. A Nick Williams three-pointer at the 14:34 mark sparked a 19-3 run for the Cats, giving the purple a 23-9

"They left me wide open," Williams said. "They just left me wide open, and I can make those shots when nobody's on me.'

From there, K-State outscored A&M 14-4 to end the period, taking a 37-13 lead into the locker room.

The Aggies started the second stanza with a 6-0 run, and got as close as 17 on a Bradley Jackson three-pointer

Kelly Glasscock/Collegian

Texas A&M's Keith Bean, right, pushes K-State's Travis Canby, left, as he dives for the ball Tuesday night at Bramlage Collseum. The Wildcats recovered from Saturday's loss at Nebraska with a win over the Aggles.

with 14:54 to play, making the score 42-25.

But that's when the Cats put it away.

The purple reeled off a 17-0 run spanning nearly seven minutes to take a 35-point lead.

"Better effort," Wooldridge said. "Better defensive effort. Shot the ball well. Distributed the ball to the open player better. A lot of things made a lot more sense out there tonight in how we played."

Eight different players scored for the purple, and four

finished in double figures, led by Nick Williams and Phineas Atchison with 13 apiece.

In fact, the Cats' bench outscored the starters 36-33

"They just came in with the same energy that we came out with," Reid said of the reserves. "Once they subbed in, they didn't let the energy drop. They kept on

See TEXAS A&M on PAGE 7

# Aggies' top scoring duo kept quiet in K-State's 69-38 victory

Kansas State Cuffegian

Texas A&M's two big go-to players were held in check Tuesday night as K-State cruised to an easy victory over

Nick Anderson and Bernard King, who combine for 27.7 points per game, had just 12 in the Aggies' 69-38 loss to the

It was the second time in conference play both players failed to score in double-figures.

"We challenged them that this was a big game and we couldn't handle that," Aggies coach Melvin Watkins said. "Bernard King wasn't feeling himself. That was the game.

"He was just very sluggish. Couldn't move, couldn't cut. I could get all over him but he just didn't have it tonight. He gives to us game after game and tonight he just didn't have it."

King didn't have it from the opening

K-State's Nick Williams and Quentin Buchanan were dealt the assignment of guarding King. The assignment received an A+ from Coach Jim Wooldridge after

"Quentin and Nick Williams did a good job against King for us," Wooldridge

"I felt like the matchups were right for

us - that was a big advantage."

That big advantage translated into K-State's ability to establish a defensive tone for the entire game.

Texas A&M's leading scorer had just one point going into intermission, shooting a dismal 0-for-6 from the field. Anderson couldn't help him either. The sophomore was just as poor, hitting two of seven shots in the first half, for a total

"We knew we had a good advantage going into the half, with King just having one point," K-State guard Gilson DeJesus said.

"We didn't want to lose that advantage in the second half though, so we just kept at it."

The Cats did keep at it. King and Anderson were never factors in the King finished shooting 2-for-10 from

the field, and Anderson again didn't complement King in any way. The Aggies leading post scorer had six

points on the night, shooting 3-of-10 from the field.

Anderson's six points were half of the total points Texas A&M had in the paint for the game. The Aggies, as a team, shot a pitiful

35.4 percent from the field for the game, including just 25 percent in the first half. King and Anderson tallied 10 of A&M's 48 shots on the night.

Kelly Glasscock/Collegian K-State's Pervis Pasco, left, drives around Texas A&M's Andy Slocum, right, during the first half at Bramlage Collseum. The Wildcats defeated the Aggles 69-39.

From the arc, the Aggies were even worse. Texas A&M was just 3-of-14 from

long range. In fact, no Aggie player scored in double-digits against the Cats. The Aggies' top scorer was Bradley Jackson.

"We really have to play according to the other team," forward Marcelo Da Barrosa said. "They were a real physical team so we had to respond physical to

"I am very proud of the way the team played against their big shooters. We put our minds to it and focused on stopping each guy and we did that."

Watkins found King's play to be a lost cause midway through the second half. King, normally playing in the upper 30minute range, finished with just 21 minutes on the night. It was at that point when K-State seemed to have the game all but won.

"When he went out, we knew they weren't the same team," Delesus said.

"It felt good when they were frustrated but that is what we are supposed to do - take out their big

# New football coaches to follow old system

BY DEREK BOSS

Kansas State Collegian

Coach Bill Snyder's trio of new defensive coaches seem to be buying into the "if it's not broken, don't fix it"

Co-defensive coordinators Bobby Elliott and Bret Bielema, along with assistant Del Miller, know and respect the defensive tradition at K-State and they plan on sustaining it.

"Before we talk about any kind of evolution or tweaking of the defense, I know this," Elliott said. "I don't want to get too far away from the tree here, and we won't. Over the course of time, the defense may evolve into something that looks a little bit different, but I'm going to let that happen naturally.

"I'm not too concerned about whether I can put a stamp on it or not. All I want to do is win."

The K-State defense has been ranked in the top six nationally in total defense for six of the past seven years, including No. 1 in 1995 allowing just 250.8 yards per game. During that stretch, the Cats finished in the top-three four times.

Even last season, despite its 6-6 record - the team's first non-winning season since 1992 - K-State still was No. 3 in total defense (262.4 ypg) and set a school record in rush defense as well, giving up just 96.5 yards on the ground per contest.

"It's been a dominant defense for years," Elliott said. "These players have a reputation in the Big 12 of being aggressive, tough and playing with great effort and emotion.

"Every player in this league respects that from Kansas State, and that's not going to change. But this team has not done anything yet, and we have to earn our spot in that legacy."

That legacy arguably could be

best defined at the linebacker position.

Jeff Kelly (1997-98) and Mark Simoneau (1996-99) both earned first-team All-American honors in their Wildcat careers and Simoneau was also named a consensus All-American selection. Both play for the Atlanta Falcons, and others such as Percell Gaskins (1993-95), DeShawn Fogle (1993-96) and Elijah Alexander (1988-91) also have spent time in the

Moreover, K-State has either had a preseason or postseason candidate for the Butkus Award - given annually to the nation's outstanding linebacker - in all but one year from 1992-2000.

Ben Leber was a preseason pick for the award last season, and finished his career as a third-team All-American.

All that has Bielema, a former linebackers coach at Iowa, very

"The thing I'm excited about here is the tradition that's been established over the years of having great linebackers," Bielema said. "The good foundation for what this program's been built on - great defenses - has been here for a number of years, and that's what we're trying to establish

Elliott and Bielema have worked together before at Iowa, but their exact duties this season have not been finalized - only that Elliott will handle the secondary, and Bielema will coach the linebackers.

"I think it's work in progress," Bielema said. "As you know, Coach Snyder wants things done yesterday, so there's a big push to get things, the terminology and the way we go about it. But right now, we're just getting to know our players."

At Iowa, Elliott said he was in the press box on gameday, while Bielema

Boggas back in program Six-foot-5, 315-pound offensive lineman Chris Boggas will return to the K-State football team this fall, Coach Bill Snyder said Feb. 7. Boggas, a redshirt in 2000, wasn't with the squad last season

Cats still searching for 12th game
Although K-State has an 11-game schedule in place for 2002, the purple

are still seeking a 12th game.
"It's difficult," Snyder said Thursday,
"and considering the fact that we've lost

tant for us to have a 12th ballgame in order to gain some experience. So we're not going to give up in the process."

Spring game in question K-State fans might not get a peek of the Wildcats in the annual Purple-White Spring game this year. Due to the turf replacement project at KSU Stadium, Wagner Field will probably not be an option, and Snyder is seeking other possi-

"I would've loved to play it down at Memorial Stadium," he said. "That would've been great, and our players

would have loved that as well, but the turf down there is just not conducive to that We'd probably run the risk of some injuries if indeed that was the case."

The main alternative is Bishop Stadium at CiCo Park, where Manhattan High School plays its games, as an out-of-town site is highly unlikely. But Snyder said it's his intent to try and have the

"You've heard me say it before, I'm not necessarily a great advocate of spring games," he said, "but it is something our support people and fans are accustomed to and appreciate, and our players enjoy it as well. If there's any conceivable way for us to do it, we will."

Alsup playing both ways Redshirt freshman Carlos Alsup, a 6foot-1, 195-pound tailback out of Liberal, Kan., will spend a portion of each practice on the defensive side of the

Snyder said Thursday that Danny Morris, Darren Sproles and Alsup will be the top trio of running backs heading into spring practice, but Alsup also will practice at defensive back.

- Compiled by Derek Boss

was on the sideline, but neither have discussed the procedure with Snyder as of last Thursday.

Concerning play-calling, Elliott said he will have the final say, but he has a host of assistants he will rely on.

"I'm not egotistical enough to think that I want to make every call based on what I want to do." Elliott said. "I'll lean very heavily on Bret because I've done that before, and it's had good results with it."

Joining Elliott and Bielema as new faces on the defensive front will be Miller, who takes over Bob Fello's duties as defensive ends coach. Miller was an administrative assistant at K-State, and a former assistant under Snyder in Manhattan, but always on the offensive side of the football.

"I spent most of my career

coaching offense, but what I studied was defense - what defensive people were doing, what they're doing to cause you problems, and how they're going to take particular schemes away from you. So, most of my preparation has probably been in that direction, and I think that's really an-

advantage for us.' YOU'LL LOVE THIS HANDBAG SPECIAL SAVE 25% **MANHATTAN** SHOE REPAIR 776-1193 8-5:30 M-F

#### **OKLAHOMA**

Continued from page 6

and tackle the Sooners tonight. "We'll be OK," she said. "We just gotta regain our focus and forget about the two games we've lost recently. We've got Oklahoma at home, so that's gonna help not

having to go on the road again."

The home crowd has been favorable for the Cats this season. K-State has lost just once at Bramlage all year, but that loss came earlier this month against an Iowa State team that many picked the purple to roll over.

The tables will be turned tonight, though, as K-State enters a contest as the underdog for the first time in 12 games. With that in mind, Patterson said recognition is key to preparing for OU.

"You have to understand now you're playing against a team that's No. 1 in the league," she said. "That's a probable final four team. It's a team that has been there, that is proven.

"I think it would really peak your sense of urgency about stepping on the floor and competing at your highest level."

#### TEXAS A&M

■ Continued from page 6

with the pace."

K-State scored 25 points on 18 A&M turnovers for the game, topped the Aggies 30-12 in the paint and notched 20 assists and nine steals. The Aggies shot 35 percent, and hit just 6-of-24 shots in the first half.

But Wooldridge isn't sure if he should return the locker room to the way it was, with No. 4 Oklahoma, Colorado, Iowa State, No. 2 Kansas and Nebraska still on the Cats' agenda.

"We'll see, I kind of like it bear," he said. "But look, we've got five games left, and you look at that schedule. These are all going to be very difficult games for our team. This is a great win for these kids tonight. I think they're happy about the win, but the league offers the next severe challenge.

"That's what we've got to do. So pictures or no pictures, chairs in the film room or no chairs, it doesn't matter. We're going to have to come to play."

# State budget might affect local schools

Kansas State Collegian

Kansas legislature is threatening to reduce the amount of funds that will go to public schools across Kansas as a result of the projected \$426 million shortfall.

While Gov. Bill Graves hopes to find alternate methods of compensating for this budget setback, the state legislature might have to reduce education funding.

Katie Philp, principal of Northview Elementary School, said it costs money to deliver a high quality of education, and cutting funds could prove detrimental.

"It's pretty bare bones as it is now," Philp said.

Larry Liotta, principal of Amanda Arnold Elementary School, said a cut in funds will set the district back.

"Any kind of cut in funding will take away all the little gains we've made over the years," he said. He said the district already is

facing budget problems because there is a decline of 250 students. The district is going to lose

funding from the decreased enrollment alone, he said, so any more cuts would mean the district would

The district might have to

compensate for this loss by reducing the amount of money that would go to faculty salaries, he said.

"Most of our dollars are tied up in salary," he said. "Our only choice is to reduce the staff."

If the education cut passes, decreasing staff might not be the only cuts the district will make.

Bruce Stiles, director of business for Manhattan-Ogden USD 383, said he is afraid the district will have to reduce some of its education programs.

Stiles said the district has been preparing itself for these setbacks. An advisory committee is looking at different options the district can use to compensate for its reduced enrollment and other potential budget cuts. He said the school board reviews the committee's solutions.

Stiles said this committee was created in the early 1990s to help solve past budget problems. He said they create solutions that the board ultimately will pass.

"I hope we reach some type of balancing act," he said.

Bob Seymour, assistant superintendent of USD 383, said he is uncertain of the effects if this budget cut comes through.

"There are a lot of things under discussion right now," he said.

# Speaker says AIDS, HIV affect young women in Saharan Africa

BY JAMIE BARRETT

Kansas State Collegian

Young women are affected the most by HIV and AIDS in sub--Saharan Africa, Karen Stanecki of the the U.S. Census Bureau told K-State students and faculty Tuesday afternoon.

Stanecki gave her lecture. "HIV/AIDS in Africa: How Changing Demographics are Affecting Women and Youth" as a part of the Donald J. Adamchak Distinguished Lecture Series in the K-State Student Union Little Theater.

Scott Velasquez, graduate student in sociology, said Stanecki was chosen to give a presentation because one goal of the lecture series is to bring expert speakers to K-State.

"Beyond a doubt, we achieved

that goal this year with Karen Stanecki," Velasquez said. "

She is considered to be one of the top experts on AIDS in

Women and youth are the most affected by the AIDS epidemic in South Africa and other southern African countries, Stanecki said.

"Twenty-eight million of the current 40 million people living with HIV and AIDS live in sub-Saharan Africa," Stanecki said. "Over the past two decades, over 16 million Africans have died from HIV and AIDS.

Stanecki said the amount of infections in South Africa began later than in other African countries, but now South Africa has the most amount of people infected in the world.

"In the early 1990's, the rates

"Over the past two decades, over 16 million Africans have died from HIV and AIDS."

> Karen Stanecki, U.S. Census Bureau

were low," Stanecki sald. "The prevalence took off in 1993."

Stanecki said studies have shown that young women are becoming infected with HIV and AIDS before marriage.

She said young women who have sex with older men before they are married are infecting their partners when they get married.

"For the longest time, it was thought that the greatest risk

factor was marriage that women were getting infected by their partners when they entered into marriage," Stanecki said

"Women, in fact, were becoming sexual before marriage. Younger women were with much older men and there were age differences with sexual partner-

Stanecki said young women are more susceptible to the HIV and AIDS virus because their organs are more vulnerable.

Like how young girls have more complications with pregnancy, young girls' sexual organs have not matured yet. Stanecki said.

HIV and AIDS in Africa also has had a significant impact on youth and children, Stanecki said. She said that by the year 2010, 80 percent of child deaths will be

because of HIV and AIDS.

"It is the number one cause of death in sub-Saharan Africa," Stanecki said.

The growing number of orphans is also another problem. she said. By the year 2010, there will be three times as many orphans as there were in 1990.

"How are they, as a society, supposed to bring up children with all the adults dying of AIDS?" Stanecki said.

Stanecki said some of the ways the South African government and other countries have been trying to combat the problem is by having youth donate blood, but the policies and systems are not always consistent.

"They feel there is less prevalence of the disease among young people," she said. "We keep

a breakthrough."

Mariah Lovgren, freshman in pre-medicine, said the lecture helped her to realize that she should be concerned with the problems of other countries as well as our own.

'We have to be aware of other countries," Lovgren said. "What happens there affects us, too. We can't be oblivious to the problems of others."

Stanecki said the question of who will take care of future generations arises when there are so many people dying from this disease.

"When we are losing so many people, who will be there to train the younger generations coming up? Who will educate the future generations?" she said.

"We don't know who will help hoping that South Africa will have those younger generations."

# Longhorn's listens to crowd, books Green to perform

BY COURTNEY DUFFIELD

Kansas State Collegian

Country fans at Longhorn's Bar & Grill tonight might wake up tomorrow morning with Texas on their minds.

Pat Green, known for his song, "Texas On My Mind," will perform at Longhorn's tonight, and Matt Church,

Concert

Pat Green will perform tonight Bar and Grill. Doors open at 8 p.m. Admission is \$12 at the door.

owner of Longhorn's, said he anticipates a good response.

"He has a really big following in the South and people here really like his songs, especially the ones about Texas," Church

said.

Church said he booked Green to play because the crowd at Longhorn's has been requesting his songs for a long time now.

"There's been great crowd response," Church said. "People have requested his music for years now and

the opportunity arose to have him and I took it."

Green is currently touring in support of his newest album, "Three Days." Released in October, it debuted at number seven on the Billboard Top Country Albums Chart.

The video for the first single, "Carry On" went all the way to number one on the CMT countdown.

"Pat has a really big college following," Kurt Willms, public relations manager, said. "A lot of time he tries to find cities that have been very supportive of his albums.'

Willms said this album was the first one Green has recorded with a major record label,

Republic/Universal Records. All of Green's past albums have been done independently. The new album has garnered much attention for Green, Willms said. The singer started in Texas and most of his fan base is in the South.

"The biggest bonus for us is getting people to see his music," Willms said. Church said Green's most popular

"He has a really big following in the South and people here really like his songs, especially ones about Texas,"

> Matt Church, owner of Longhorn's

songs at Longhorn's are "Carry On." "Southbound 35," and his songs about Texas. He said he thinks college students can relate to Green's music because they are energetic songs with lyrics about partying.

"It's not your typical country. It's country with a twist." he said.

Willms said Green is not a typical country singer. He gives an energetic performance and does not just sit and

"From what I have seen, he gives a great live performance. He's got a lot of energy," Willms said. "I think a lot

of country singers just give a performance and just walk around the stage and sing, and he gets into it."

Church said this will give people a chance to see a new face in country. Green is becoming known outside of Texas and having him perform at Longhorn's gives an opportunity for-Kansas fans to see him, Church said.

Kim Hoglund, senior in modern languages, said she looks forward to? local country performances.

"It's really neat to see the different kinds of country singers show their stuff," she said.

Green's next video, for the song Three Days" is being completed and should be released in March. The fan response to "Carry On," and his new album has been great, Willms said.

Church said he enjoys hosting an artist who is on his way up.

"I think this is an opportunity for people to see a young new rising star," he said. "An opportunity to see someone that will probably some day be really big in a small venue.'

## misdirection

# Community speaks out for Warner Park

COMMISSION

Kansas State Collegian

History has shown that keg parties and vandalism would be a problem if Warner Memorial Park reopened its roads to vehicles.

Parents listened with their children and other neighbors of the park, as the City Commission discussed reopening the roads throughout the park which have been closed to vehicles since 1990.

The discussion was to direct the Manhattan Parks and Recreation Advisory Board for its 10-year plan.

Riley County Police Chief Mike Watson said there were a lot of parties in the park when it was still open. He said opening the roads would make the situation worse.

"We do run into situations now with kids partying there," he said, "but there would be more if it was

Commissioner Brad Everett .

said he took a walk through the park the other day, and when he looked around he did not like what he saw. He said he saw beer cans, and he was afraid that there would be a lot more of them if

the park was opened to vehicles.

He said opening the roads throughout the park would make it every other Tuesday evening in the city much easier for people to take kegs to the back of City Hall. The of the park and have a public is welcome to attend.

Watson said there would need to be a gate that could be closed at 11 p.m., when the park closes to keep people out.

Eric Ross, a neighbor of Warner Memorial Park, said he does not want roads to be open at night or during the day.

"I don't think vehicles in the park is a good idea," Eric Ross, neighbor to the park, said. "This is a very special place. I take my 5-

year-old and my 19-month-old there. It's a great place to turn them loose and not worry about cars.

There were a dozen more

neighbors and members of the community who echoed the same comments.

Bill Warner, grandson of Kern Warner, who donated the original land for the park, said he supported reopening the park to vehicles.

"We need to allow access to the area that has been abandoned and unused," he said. "That is what Kern-donated because he felt it was the most beautiful part of the park."

There was no motion necessary, but the commission recommended that the park remain closed to traffic to keep it as one of the only natural parks in the area.

Other recommendations made

by the commission were to reevaluate the need for restrooms in the park

Commissioner Mark Taussig said they are needed if they are maintained. It has been awhile since he raised young kids, but he said "When they gotta go, they gotta go."

Other commissioners said they felt the proposed cost for restrooms, about \$80,000, was too much, and urged the parks advisory board to consider other options or keep restrooms out of the proposal.

Lew Cocke, park neighbor, said if there is money to be spent anywhere in the park, it should be used to benefit the thing that he sees people using most.

"Warner Park Military Trail is being used more and more," he said.

"If money is to be spent, it should be spent on a parking lot at the entrance of the trail.

## Faculty senate receives report of poor advising

SENATE

meets from 3:30 to

month in the Big 12

Union. Students and

faculty are welcome

Faculty Senate

5 p.m. the third

Tuesday of every

K-State Student

to attend.

BY JENNIFER FARR

Konsas State Collogian

Advising Enhancement Task Force was under discussion at the Faculty Senate meeting on Tuesday. **FACULTY** 

The task force was appointed by the provost and the student body president because some units have failed to effectively fulfill their advising responsibility. Almost one out of seven recently graduated alumni, according to a survey, indicated that poor

advising required them to attend one or more additional semesters.

Danny Callahan, Student Senate representative, advised Faculty Senate to work with Student Senate regarding the issues within the report.

"Our main concern is to solve the issues within the report." Callahan said. "If we could come up with a solution it would be most helpful-for both students and faculty."

John McCulloh, College of Arts and Sciences senator, said he disagrees with the implications of the report and said it would restrict the way students would be advised.

"We spend an awful lot of time providing a good education for students and I think this goes

against the fundamental principles where to set certain activities expectations,"McCulloh said. "We all use different ways to accomplish the same ends and to expect

all of us to conform into a certain path is asking too much."

Mike Lynch. advisory council member, said the advising committee would have the evaluation results at the end of the month. The results were provided by about 14,000 respondents. Lynch said the

reason they received so many respondents to the report was that; before students could enroll they would have to fill out the evalua-

"It is a good system," Lynch said. "Their advisers provided a red flag for the students before they could enroll, and for it to be lifted they would have to meet with

Since the advisory council committee has not officially met, they will need to evaluate certain terms. The advisory committee includes faculty and student representatives from each college.

While Faculty Senate voted to accept the report, the decision of what to do with the results was passed back onto the shoulders of the advisory committee.

# Professor elected fellow for excellence in field

BY LINDSAY FETTERMAN

Mohammad Hosni, professor and interim head of the Department of Mechanical and Nuclear Engineering, was elected 'a fellow by the American Society -of Mechanical Engineers Board.

Fellow is the highest grade a person can have at ASME. About -10 to 15 people are chosen as fellows nationally each year,

Sheryl Miller, administrator at the ASME Midwest Regional Office, said in order to qualify for fellow, one must have at least 10 \*years of active practice in the gengineering profession, and 10 years continued membership in ASME, or 20 years active

practice and five years of ASME membership.

At least five nominations and letters of reference must be submitted in order for one to be elected fellow, Miller said.

"Fellow is a recognition of attainment of exceptional engineering achievement and contributions to the engineering profession," Miller said.

Hosni said he was deeply honored to have been elected fellow "This is the highest-elected

position one can have with ASME," Hosni said. "I'm very pleased with my involvement for so many years. Certainly, it's a great pleasure to

ASME is a worldwide organization consisting of 125,000 members. The levels of membership are student, associate, full

member and fellow. Founded in 1880, the nonprofit organization is dedicated to promoting education and the practice of mechanical engineering.

Hosni became a member of the organization as a student in 1982. He has been actively involved with ASME since that time

His involvement in the organization include membership on the honors and awards committee of the fluids engineering division and chair of the National Young **Engineer Paper Contest** 

In 1995, Hosni was named the American Society of Mechanical Engineers Faculty Adviser of the Year for his region.

Hosni earned his undergraduate degree at Southern University in Louisiana, and he earned a master's degree at Louisiana State.

He earned his doctoral degree at Mississippi State and then came to K-State. Hosni has been at K-State for the last 11 years.

From 1993 to May 2001, Hosni was director of the K-State College of Engineering's Institute for Environmental Research.

Currently, he teaches thermal dynamics and continues to remain active in research.

three Doane hitters he faced, but it was another fresh face, junior transfer Mitch Walter, who notched the win, retiring all three batters he saw in the

K-State led 8-1 by then, and added 12 runs in the fifth and sixth innings to cruise by the winless (0-5) Tigers.

"It's a win, and it's in the books," Clark said, "and we have plenty of stuff to work on."

The Wildcats will get their next chance to improve when they return to Frank Myers Field at 2 p.m. Friday to take on Southern Nazerene.

# Pentagon officials defend budget hike

BY CAROLYN SKORNECK

The Associated Pross

WASHINGTON, D.C. -Members of the House Budget Committee criticized the Bush administration Tuesday for demanding so much money for the Pentagon while doing little to upgrade the military as candidate George W. Bush promised.

Deputy Defense Secretary Paul Wolfowitz, defending the \$379 billion budget request, which includes \$48 billion to prosecute the war on terror, said transformation plans were stymied by the war.

Committee Chairman lim Nussle, R-lowa, called the war "a good short-term excuse" but said "I'm not sure what I've seen translates into progress in transformation" of the way the military does

The panel's top Democrat, Rep.

John Spratt, D-S.C., also was not swayed.

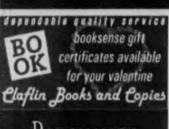

"We stand behind the president on funding the war on terrorism and homeland security, but ... those seem to be relatively small shares of the (Pentagon) budget," Spratt said.

He objected that "as large as your budget is," it neglects pressing needs of the surface Navy and will have to be financed from the Social Security Trust Fund.

While running for president, a favorite campaign theme for Bush and running mate Dick Cheney was that the Clinton administration had overextended the nation's military forces while letting their battle

preparedness slump dangerously. In his testimony Tuesday. Wolfowitz said transformation means developing new capabilities that will dramatically increase the military's power but won't necessarily save money.

# HEART OF THE 'VILLE

Life in Aggieville convenient; students balance school, fun

Photos by Jenny Braniff/Collegian

TOP: Residents of an apartment above 12th Street Pub and Cowboy's Palace have a view of 12th Street from their window. The students who live in Aggleville Penthouse Apartments enjoy the short walking distance to campus and businesses. LEFT: Mardi Gras beads and fake flowers fill the window box of Apartment #7 In the Aggleville Penthouse Apartment complex.

BY BRYAN SCRIBNER Kansas State Collegian

The noise subsides at 2 a.m. every morning, there is no tenant parking, and vomit and cigarette butts often become an early morning obstacle

But that's the price some students pay to live in Aggieville, and for most, the benefits exceed the

Four students who live in Aggieville Penthouse Apartments, above 12th Street Pub and Cowboy's Palace, agree that socialization is one of the best parts about living in the heart of Aggieville. K-State

"I like to party," he said. "I also like to people-

Andrew Towner, senior in mass communications, said he and his friends also enjoy watching the crowds. After all, he said, everything is in his

"We get to watch people come out of the bars," he said. "When we really want to have fun, we take our camera and take pictures of them."

Rigdon said he likes the recognition of living above the action.

"People look up here and see us," he said. \*

graduate Will Rigdon said it's the center of energy in "Before I lived up here, I always looked up and said, 'That would be cool."

The students also reside within walking distance of campus and Aggieville businesses. This convenience, Towner said, keeps the residents aware of changes in Aggieville.

This is not only a business district and bar district," he said. "This is also a residential area.

You're a lot more aware of all the new businesses that come into the area. It's kind of cool to have a first-hand knowledge."

Aggieville's offering of restaurants and

See LIVING on PAGE 3

# Residents' attraction to district includes business proximity

BY NICK BRATKOVIC

Kanaus State Collegian

The Aggieville entertainment district is an attraction for people from all around the area.

Some travel into the area after watching an event on the K-State campus, such as a football game, while others enjoy the shops in the area.

Some never leave, and live in Aggieville, or within walking distance of the district.

Cheryl Sieben, director of the Aggieville Business Association, said living in the 'Ville is about convenience for those residents.

"I think it is handy for the kids, with all the services provided and living so close to campus,"

Services can be anything from a place to have dinner to dry cleaners and hair-cut shops.

Tyler Olsen, owner of 12th Street Pub, which is below the Aggieville Penthouse Apartments, said those who live above the bar often will come in and eat, or drink in the bar.

Atom, a spray painting artist, entertains sightseers on the Gateway Plaza in Sait Lake City Wednesday afternoon. Atom mixes spray paint and fire while he paints pictures he sells for \$20.

BY SARAH RICE

Kansas State Collegian

SALT LAKE CITY - I begin to see the Olympics more clearly when the cloud of smog began to clear over Salt Lake City's mountains.

The Swedish Olympic Committee greeting its beloved athletes serves as a first impression. Dressed in their official Olympic jackets, they hoist long bags of ski equipment from the baggage claim conveyer belt.

Along the airport sidewalks, people cover their faces with scarves and rub their hands together to stay warm, since the temperatures are in the teens.

In downtown Salt Lake City, wooden barricades, bright orange cones, and lines of police cars prevent drivers from accessing the main media center, venue sites and Olympic Square.

Groups of fans huddle together to trade Olympic pins at every street corner. Vendors lay out blankets on the sidewalk, hoping to trade for a rare pin. Those loyal to the pin-trading tradition wear vests covered with

Although advisories of insane traffic and impossible parking are blaring across the local news channels, traffic is light. Along main streets, businesses display homemade cardboard signs advertising parking spots. It reminds me of the scene in Kansas City, Mo., outside Kemper Arena before a big concert.

Olympic Square is the most heavily guarded spot in the city. A high purple net surrounds the area while army soldiers check cars. A line of tourists, two blocks long, wait to enter the Square, while every bag, purse and coat pocket is checked.

Josh Jensen, a Utah University student, said "there are tons of security, but I think we

Someone told us that several people have fled the city to avoid traffic and potential terrorist attacks.

Although the fear of an attack is always present and tight security as a constant reminder, the diversity and spirit of the

games prevail. Jamie Packhan, also a student at Utah University, talks to visitors while waitressing.

"I think it's fun to talk to them all and hear what they think of Utah," she said.

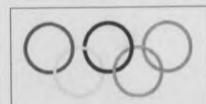

And the diversity is definitely widespread. I see an Elvis couple waving cardboard signs with "we need tickets." Thirty

school children dressed in red, white and blue sing "God Bless America" on the steps of Gateway Plaza. Then there is Atom, the world's fastest painter, showing off for a Washington, D.C.,-based news channel.

Although the security is overwhelming and makes me

uneasy - it is worth it to realize why it's there. When I look at the snowy mountains, the Austrian hockey team buying tourist knickknacks and Chinese tourists taking pictures of the American flag, I realize what the Olympics

We are all the same, deep down. We have that Olympic spirit, a competitive nature and we all definitely have red noses in the cold.

#### Olympic medal count

Want a brief look at who's ahead in the Olympics? Here's a rundown of what countries are sweeping the medals.

# Shooting suspect arrested

Kanens State Collegism

Police arrested one man in connection with the murder of a Fort Riley soldier Feb. 2. They are still searching, however, for the suspect of a second Junction City shooting.

In Talledega, Ala., police arrested Christopher Goins, 22, Junction City, on Feb. 8 and charged him with the murder of Sgt. Maurice Simpson, 25, whom police found shot Feb. 2 in Junction City.

Simpson was transferred to Wesley Medical Center in Wichita where he later died.

Goins was apprehended on an outstanding Geary County warrant and remained in custody late Friday in Talledega, according to AP wire reports.

Christie Vanover, Fort Riley spokesperson, said they had no further information regarding the arrest.

Police are still looking for a suspect in a second Junction City shooting that occurred

Christopher Johnson, 24, was transferred to Geary County Hospital after being found with a gunshot wound.

Lt. Royce Rasmussen of the Geary County Sheriff's Office said no arrest had been made as of Wednesday. Rasmussen said that although Johnson was found near Junction City High School, the incident was not school- or student-related.

"The case is still under investigation, and we are following up on some leads," Rasmussen said

Information about Johnson's condition was not released.

# Senate endorses K-12 cuts

BY BRYAN SCRIBNER

Kansas State Collegian

A Senate Ways and Means Committee endorsement Wednesday to cut \$158 in perpupil aid to public schools is a worst case scenario, said Don Brown, communications director for Gov. Bill Graves.

"The Senate Ways and Means Committee is a starting point for every budget issue," Brown said. "It's not a good proposal."

An economic slump and decline in tax revenue predictions left Graves with a decision to cut the state's budget for the 2003 fiscal year, which begins July 1. Brown said Graves would probably not support cuts in K-12

education, though. Graves has increased per-pupil aid by about \$300 in the past seven years. Brown said he has never decreased public education

"It's unlikely he would sign that," Brown

Brown said other sources of revenue most likely would be sought to avoid budget cuts in education. He said Graves has proposed a quarter cent sales tax increase and a 65 cent tax increase on cigarette sales.

Alternative sources of revenue, Brown said, might eliminate the need to make cuts in aid. In fact, he said, funding could increase by about \$20 per pupil.

"It's clear that any source of revenue is going to be directed to education." Brown

Bruce Stiles, Manhattan-Ogden USD 383 director of business services, said a cut of \$158 per-pupil would translate into about \$1 million in cuts to the school district.

USD 383 was forced to cut about \$1.2 million from its budget last year because of declining enrollment. This resulted in the closure of two of the district's Manhattan elementary schools.

The district also is making plans to cut another \$1 million from this year's budget, said Robert Seymour, associate

#### Today On the

Read about how brands influence consumer behavior? Read about how Individuals for Freethought celebrated Charles Darwin's 193rd birthday.

#### STATE IN BRIEF

#### Student struck by train, walks away with bruises

HAYS - It's not often someone is hit by a train and lives to tell about it.

Preston Gronemeyer, a senior at Fort Hays State University, apparently was struck by a train early Saturday morning after leaving Sip 'n' Spin, a local nightclub, with a friend.

He doesn't remember anything after stepping onto the tracks, Gronemeyer said. It was when he attempted to cross the tracks that the eastbound train approached and knocked him to the ground, Lt. Julius Schoenberger of the Hays Police Department said.

Gronemeyer was taken to the hospital with an 8-inch cut on his arm, a large bruise on his back, a bruise on his right thigh and scrapes on his face.

#### Topeka man fatally shot by ex-girlfriend's boyfriend

TOPEKA - A man who arrived at his ex-girlfriend's home for an unarranged visitation with his 4-year-old son was

shot to death within feet of where the boy had been standing, police said.

James Collins, 33, was shot Tuesday morning by the woman's current boyfriend after he tried to attack him with a knife, said Lt. John Sidwell, of the Topeka Police Department.

Detectives questioned but released the boyfriend because they don't believe the shooting was a crime, Sidwell said. The district attorney's office still will review the case.

#### NATION IN BRIEF

#### College student charged with 28 kidnapping counts

FAIRFIELD, Conn. - A legally blind college graduate, described by a former roommate as a paranoid "hermit," was in police custody Wednesday after allegedly taking 28 people hostage in a university classroom and claiming to have a bomb.

Patrick Arbelo, 24, of nearby Bridgeport was charged early Wednesday with 28 counts of first-degree kidnapping. Authorities said additional charges were pending.

The hostages, including an associate professor and students, were released gradually - some by faking illness during the seven-hour standoff at Fairfield University. No one was injured.

#### Police interrogate suspect; location of reporter unknown

KARACHI, Pakistan - Police were interrogating a British-born Islamic militant suspected of masterminding the abduction of Wall Street Journal reporter Daniel Pearl, but so far the militant has not revealed the reporter's whereabouts, police said Wednesday.

In Washington, D.C., Pakistani President Pervez Musharraf said he believed Pearl is alive, adding, "We are as close as possible to getting him released." He suggested that the journalist might have been abducted in response to the government's crackdown on Islamic militants.

#### ATTACK DEVELOPMENTS

- The House and Senate intelligence committees will conduct a single joint inquiry into why the U.S. government failed to detect the Sept. 11 attacks and to examine its overall response to terrorism, committee leaders said Tuesday. Hearings are expected to begin in mid-April and end in July.
- Attorney General John Ashcroft urged Americans to adopt the highest state of alert in the search for 16 men believed to have planned an attack against the United States or U.S. interests in Yemen.
- The Army announced Tuesday it has invoked a rarely used authority to stop active-duty and reserve soldiers in numerous specialties from leaving the service. The order covers more than 10,700 soldiers.
- Pakistani President Pervez Musharraf was scheduled to visit President Bush in the White House for the first time Wednesday.
- At a Pentagon news brief Tuesday, Defense Secretary Donald Rumsfeld said the CIA is operating armed, remotecontrolled spy planes over Afghanistan independently of the military and had been doing so even before the U.S. military arrived in the country.

## English GTA's poetry earns distinguished nomination

BY MICHAEL NOLL Kansas Stato Collogian

eaching creative writing has been compared to coaching athletes of the mind.

If that is true, then English graduate student Francine Tolf is a major league talent, Jonathan Holden, distinguished professor of English, said.

Tolf has been nominated for the Pushcart Prize, which selects and publishes the most distinguished short stories, essays and poetry first published by small presses and magazines nationwide.

It is the fourth time Tolf has been nominated for the prize for her poetry.

Tolf has been nominated for her poem, "Maybe She Dreams Of Rivers," which was published in the fall/winter edition of Rattle, a literary journal.

The poem is based on a woman Tolf watched sleep on a train in Chicago,

"I imagined what she was dreaming about. She looked like a poor woman, maybe a cleaning lady," Tolf said.

What I found very touching, what touched a chord in me was that she had a book on her lap -'How To Create Poetry.' She was an unlikely person to have such a book, and I found that very engaging."

Though the woman on the train was an interesting topic for Tolf, people are not common subjects for poems, Holden said.

Jenny Braniff/Collegian

Francine Tolf is a graduate teaching assistant in the English department. Tolf had a poem, "Maybe She Dreams Of Rivers," published in the fall/winter edition of Rattle, a literary Journal.

"She tells adult stories and does so with uncommon eloquence. She writes like a great fiction writer, but she does it with poems, which is unusual," he said.

"The trick is how to write eloquently about people and yet with the intensity which great lyric poetry possesses, too."

Holden said there is prose subject matter, but the compression of poetry.

"It's a paradox, and she does it, and it's rare," Holden said.

#### LIVING

Continued from page 1

entertainment give the students a convenient way to complete daily errands and unwind.

Devan Fort, senior in hotel and restaurant management, said he enjoys the access to some of what he called Manhattan's best businesses. He eats lunch and dinner, gets his hair cut and shops in Aggieville's retail stores.

Matt Meier, senior in architecture, said he is also a regular customer of the surrounding

"It's easy," he said. "You can go downstairs and have a beer instead of turning on the TV.

Meier said the only drawback, though, is age. He said Aggieville residents 21 and older would enjoy themselves the most.

"You couldn't handle it if you weren't 21," he said.

Although late-night partying noise must be dealt with, most residents said it doesn't compete with their sleep or academic work. They have learned to study during the day or drown out the noise with ear plugs at night.

In fact, Towner lived two blocks from Aggieville two years ago and earned the best grades of his life. So he moved closer.

"I had an opportunity to live in the heart of Aggieville," he said. "So I thought, 'Hey, maybe I'll get a 4.0," but that didn't happen."

There are few financial limitations to living in Aggieville, too. Most of the students said rent is competitive with other rental units

in Manhattan. Rigdon said he would recommend living in Aggieville to any student. He said, though, that in his five years as a K-State student. he has observed a decrease in the amount of students who visit the

"I've seen the student body get bigger and Aggieville, as a business district, get smaller," he said. "Wednesday nights, the streets used to be lined - now they're not."

#### BUSINESS

Continued from page 1

"Over the years, the people who live there often come down to the bar," he

Olsen said the people typically come into the bar at night, along with the majority of the other customers. He said he has heard of few noise complaints from residents.

I think the ceiling between us and the floor below them is pretty well insulated, and that keeps in a lot of the sound," he said. "We have never had any complaints. I think that is

something that people know going

Additionally, Olsen said the apartments on top of the building help to keep the bar's heating costs down, by trapping heat and warming the

Other Aggieville businesses said they enjoy the overall effect students have on Aggieville. Tim Anderson, a worker at Ideal Cleaners and Tailors in Aggieville, said students make up 20 to 25 percent of the total business. However, he also said the business doesn't see a significant drop in patronage when the summer time rolls around

Sieben said she expects that

A cup stands in the window box of an **Aggleville Penthouse** apartment above 12th Street Pub and Cowboy's Palace along with beads and Mardi Gras decorations left over from Fat Tuesday. The Penthouse Apartments overlook Aggleville and are a convenient place for students to live.

Jenny Braniff/ Collegian

students living close to Aggieville would frequent the entertainment. district's businesses.

"I think it is Aggieville services available to you," she said. "I assume that is part of the attraction of living in Aggieville."

Sieben also said it is up to the individual landlords to decide whether to rent space above the

It would be an added bonus, she said, for landlords to have retail on the bottom and tenants paying rent

#### **CUTS**

Continued from page 1

superintendent for central support services and personnel. Seymour said an additional cut in aid from the state could force programs to close.

"We'd have to look at programs and weigh our priorities," he said. "It's hard to say what it's actually going to mean for teachers.

"It would be difficult to have salary increases.

Seymour said that although the state budget is tight, an increase in per-pupil spending is possible if other revenue sources are utilized.

"Per-pupil spending hasn't come close to meeting inflation," he said. "Everybody's competing for very, very scarce resources."

Brown said the committee's

endorsement would provide about \$2.2 billion in funding for the state's 304 school districts. However, the state now spends about \$130 million more than that figure.

A cut in funding, Brown said, would damage the image of K-12 education in Kansas. He said Graves believes that without a concentration on education. everything else in the state would suffer.

Brown said that if the committee's endorsement was enacted, it could decrease teacher salaries and result in unemployment and larger numbers of students in classrooms. These effects, he said, could lead to a decrease in educational perfor-

"A cut of this magnitude goes beyond crayons and paper clips,' Brown said.

# Holiday history

Traditions traced back to ancient Rome

h, Valentine's Day. Most coupled women love it, men curse it and single folks gener-

ally avoid the topic altogether The exploited holiday

rolls around once a year, and most of us go through the motions, single or attached.

Ever wonder why a mid-February day has been declared the day for lovers? Allow me to explain the haphazard evolution of St. Valentine's Day.

The fundamental urge to be paired on Valentine's Day can be traced back to ancient Rome. The god Lupercus was considered a protector of Rome from fierce wolves that inhabited the nearby woods. He was honored on Feb. 15, with the feast of Lupercalia.

On the eve of the festival, it was customary for the youth of Rome to hold a drawing. Each young man drew a slip of paper containing a girl's name, who would be his sweetheart for the year.

How romantic. Imagine that custom in practice today - and you stuck with that oaf in accounting or the girl in psychology that has a question about everything.

Obligatory flowers don't seem so bad

And what about those sappy Hallmark valentines? They never seem to honor the man they're named after, but I suppose a caricature of a decapitated priest wouldn't be a bestseller.

Yes, Valentine, according to www.holidays.net, was a priest during the reign of Claudius II. He was a man of the cloth at the time Christianity was emerging in Rome. Claudius was concerned with soldiers' loyalty, and ordered them not to marry. He figured a soldier with a family would rather stay at home than fight. Silly man.

Valentine ultimately defied Claudius and secretly married the young soldiers to their significant others. As a result, Valentine was arrested, imprisoned and beheaded. The date of the execution? Feb. 14, the eve of Lupercalia.

As Rome became a more Christian society, Valentine was named a saint, and the priests moved the holiday from the 15th to the 14th. The day now honor the

romantic Saint Valentine instead of the protector Lupercus.

While imprisoned, legend has it that Valentine received many notes of support from fellow Christians and romantics. Such notes became ancestor to Hallmark and Power Puff Girl valentines.

began to appear in 15th century Europe. They were exchanged in the place of actual gifts (try that this year, guys. I dare

should be. No need for that personal touch when it can be mass produced, right? Progressively the candied madness ensued, and for one gloriously horrific day, men outspend women. In fact, men spend twice as much as women on these expected presents, according to the International Mass Retailers Association.

Our local shopping centers and specialty stores crowd pink and red teddy bears onto sagging shelves, adorned with Cupid cut-outs and glitter hearts.

Thaven't seen a Saint Valentine doll with a detachable head yet, but I'm still looking.

Susan is a junior in English. You can e-mail her at sjp8478@ksu.edu.

# Love doesn't take that much — just a single touch

brush of their hand against the back of your neck, or perhaps a gentle nudge of

There are more obvious ways to show someone you love them, but the true power of love is that it doesn't take that much.

their hip against

All it takes is a single

Wars have been fought, gifts have been bought. All for love that someone sought. Sadly, most times it's all for naught. All for some silly thought. The

thought of love. All rhyming schemes aside, it boggles the mind to think that something as indefinable as love has shaped the human

record as much as it has. Love has been marginalized as a chemical reaction, chastised as emotional baggage and patronized as mere crushes

So many ways to hide love as the strongest power in the human psyche.

We don't like to admit that there is something out there that powerful. Instead we put it in neat little categories, package it in cellophane-wrapped hearts, then point and joke about how cheesy it

But deep down, no matter how deep you have to look, there is that innate desire to have someone else care about you. At times, it takes a significant

event to bring those feelings back to the surface. Sometimes, all it takes Matt Killingsworth

is a single touch. When you are blessed to have someone bring these feelings

back to conscious thought, the intoxicating perfume of their presence is enough to make your knees weaken and your heart to race. Your waking thoughts are of them. Or if you're fortunate enough, you wake

your arms around them and slip back into Suddenly, your dreams are shattered. Maybe someone else caught their eye. Maybe you snore too loud. Maybe they

curled up next to them and get to wrap

just don't love you. Your blissful utopia comes crashing down around you like a crystal chandelier, shards of happy memories and loving embraces cascading around you, indif-

ferent about who's hurt as it falls. Endless daydreams of her smile or the way he would hold you turn to painful

bouts to keep them out of your mind. But quite put your finger on. it's usually in vain.

The more you think about not thinking about them, the more you think about them.

Cheer, warmth, bliss and contentment are soon replaced with frustration, confusion, anger and pity. You scramble to reimmerse yourself in activities that keep you busy enough to not think about

You grasp your blankets, trying to form the shape you've become accustomed to cuddling against at night.

All you want is a single touch.

You miss the smell of them on your clothes. The annoying yet somehow charming way they tried not to sound cliché when they complimented you on your shoes. The beat of their heart you felt as you watched movies together on the

Then, one day, as you're minding your own business, it happens.

Maybe you both reached for the same brownie at the Union Food Court. Or perhaps you're both stuck in line at the Copy Center, and they bumped into you. All it took was a single touch.

The bitterness melts away with thoughts that there is something about this new person. Something you can't

But you like it. And you want more of it. The grace of love is that you never know when it will rush back into your life.

Like the life of a used text book, there's a sort of cycle to love. Sometimes you're stuck on the shelf and sometimes you're out in the world being used by someone

OK, maybe that's a bad analogy, but you know what I mean.

Just because you might not be in a relationship this Valentine's Day doesn't mean that you won't find that someone Feb. 15, assuming you're looking. And for those lucky kindred souls that have found someone to row down the tunnel of love with, congratulations.

I hope that everyone out there has at least one moment in their life when they can look into someone's eyes and see nothing but pure, undying love for them. Hopefully those moments happen more often than not.

Love is a grand thing and it doesn't take much to spark those feelings. All it takes is a single touch.

Matt is a senior in advertising and public relations. You can e-mail him at smk8583@ksu.edu.

#### **READERS WRITE**

#### Relationships should be operated like business

Editor,

As my roommate and I pondered the mysteries of life last night, we came up with an idea. An idea so simple, yet so profound, it could change relations between men and women forever.

It's simple, really. In short, men and women should operate their love life more along the lines of a business than a haphazard mess of confusion. "Excuse me, are you by chance

looking for a boyfriend at this time? Yes? May I fill out an application please?" This would be much easier than the

way things are now, for some of us

anyway Take for instance, that pretty brownhaired girl with the eyebrow piercing that sat across the room in general

psychology, charming even though she always looked so sad. The one you never got around to introducing yourself to. Or the girl from

mass communications that always sat just a couple rows down. No more will men succumb to appre-

hension, the fear that says just because you're in the same class as that girl doesn't give you any right to talk to her.

Under the new application system, you could approach her after class, and ask her with a friendly smile if she's seeing anyone. If not, why not go ahead and take an application.

The application itself will include standard information such as name, age, height, weight, phone number, hair, eye color, interests and dating history. There will be space provided on the application for several color pictures, which should show the applicant from all possible

Both males and females will carry the

applications. But a female dissenter will say, with guys you can never tell if they want a girlfriend or just a bed buddy.

At the top of the application, under 'position applied for,' you may indicate your intentions and expectations from the relationship. Thus, the awkward

mornings of eye contact can be avoided. Imagine rifling through stacks of applications at your leisure when making your weekend plans. So get on your computer, and start making your applicar tion.

> -Tristan Hinderliter Freshman, pre-journalism and mass communications

# Black Panther show teaches about party

BY EDIE HALL
Kansas State Collegian

History Month.

A Black Panther Party photo display has been set up in the Kemper Art Gallery in the K-State Student Union as part of Black

In 1995, Bobby Seale, who founded the Black Panther Party along with Huey Newton in 1966, came to the K-State campus to speak about the Party and about moving past stereotypes. Now, in 2002, students have another chance to learn about the Party.

Sponsored by the Union Program Council, the display includes many captioned pictures of members of the Black Panther Party, including Seale and Newton.

Erica Smith, multicultural chair of the UPC, said the display was set up as part of Black History Month.

"We wanted to put it up to show black history and black power in the 60s and 70s," said Smith.

Smith said she hopes students will see that black history is a part of all history. K-State will have the display until Feb. 22, when it goes back to an agency in Minnesota.

Madison Turner, junior in graphic design, said he found the display interesting.

"You don't get to see this kind of display very often, especially at K-State," Turner said.

"The pictures are pretty riveting," he said, pointing at a picture of Newton sitting on a couch with his family, blowing a bubble. "I don't think I've ever seen a black family depicted that way."

Mike Davis, who taught African-American History last semester, said the Black Panthers were a black

revolutionary nationalist group.
"They were known as militants."
Davis said. "They openly displayed weapons and patrolled the neighbor-

hoods to watch the police."

Originally named the Black
Panther Party for Self Defense, the
Party was the only black organization
in history that was armed and
promoted a revolutionary agenda.
The Party also began programs that
included tutoring children, sickle cell
anemia testing, breakfast programs
and free medical clinics.

During his trip to K-State in 1995, Seale said at the height of the Party's success, they had 40 chapters, more than 5,000 members, an international section, a weekly newspaper with a 350,000-plus readership and programs implemented.

"I think black people were looking for people to look up to or things to follow," Davis said. "They became popular because of the poverty and crime in the black neighborhoods."

The Party began to fall apart in the late 1970s. Many of the Party leaders were in jail or exiled at the time, and police raids and IRS investigations furthered the process.

One of the controversies surrounding the Party was carrying of weapons. Although the Party had the right to bear arms, the guns along the Party's revolutionary ideals and activities attracted the attention of the FRI

Former FBI chief J. Edgar Hoover called the Party "the greatest threat to the internal security of the United States," according to www.blackpanther.org

In his 1968 autobiography "Seize the Time," Seale spoke of myths about the Party's gun use.

"We don't use guns, we have never used our guns to go into the white community and shoot up white people," Seale said.

Davis said people may have a tainted view of the Party.

"When people think of the Black Panthers, they think of militancy," Davis said.

#### **Routine walk**

Kelly Barker, freshman in openoption, walks up the front steps of West Hall on Wednesday afternoon after attending class.

Matt Stamey/ Collegian

# House expected to approve redistricting map

BY MICHAEL WATSON

Kanzas State Collegias

Facing the possibility that their House minority would shrink even further, Kansas Democrats said they see nothing good in redistricting a map that their party accepted as its "least worst" option.

For legislative debate Wednesday in Topeka, Democrats were permitted to choose between two proposed maps which varied in the number and location of Democrat-held districts that would be collapsed.

The House is redrawing the 125 Kansas districts to account for population shifts recorded in 2000 Census figures. The goal is to map each district to include people with similar interests in how they vote.

Regardless of how the House voted Wednesday, City Commissioner Brad Everett said redrawing the lines would not affect Manhattan.

"Redistricting is more for politicians," he said. "One mile east or west, if the map is redrawn for either of those areas, Manhattan will be represented with two great leaders."

He said the map does not make much difference. Everett said he hopes Manhattan leaders would continue the success they have had in bringing dollars back into the community.

"We have great leadership here," he said. "We've got Kent Glasscock, who is respected locally and on a state level. On a national level, those who look for direction in the state of Kansas look to him. "We obviously want to maintain the representation we have in Manhattan," Everett said,

Russ Frey, Riley County
Commissioner, said downsizing Fort
Riley could affect the Manhattan area
some, but the proposal would mostly
affect metropolitan areas like Johnson
County, which have seen large
population increases.

"The state map does not affect Manhattan much. Larger areas will see the most change," he said.

Rep. Jeff Peterson, R-Manhattan, said when areas like Johnson and Sedgwick counties grow, those areas will have larger districts with more county seats in the House.

The chamber recessed after the full House voted to undo some of the work endorsed by the House

Redistricting Committee last week that would have paired six incumbent Democrats in three new districts and put a Republican and a Democrat together in a northwest district.

The tentative plan debated
Wednesday instead was to pair four
Democrats in two new districts and
put incumbent Republicans against
Democratic incumbents in two other
new districts.

The chamber recessed late in the afternoon to give legislative staff time to review the various amendments. The House, dominated by Republican's 79-46 majority, was expected to give the bill first-round approval Wednesday and pass it today, sending it to the Senate.

 The Associated Press contributed to this story.

# Cut short

# Oklahoma solidifies Big 12 lead

Konsos Stute Collegian

It took No. 12 K-State just 4:07 to score its first 11 points against No. 3/4 Oklahoma on Wednesday at Bramlage Coliseum.

Unfortunately for the purple, it would take more than three times as long for the Wildcats to double that tally in a 76-68 loss to the Sooners.

Oklahoma (21-2, 11-1) bounced back from an 11-point deficit in the game's early stages, and forced the Wildcats (21-5, 9-4) into a hurried version of their offense after that, stomping out any chances for a mid-February upset to take firm grasp of the top spot in the Big 12.

The purple got all 11,789 fans into the action early, jumping out to a 13-2 lead behind a solid defensive effort that kept the Sooners under wraps in the low post and the crowd on its feet.

Oklahoma started the game hitting just one of seven shots in the paint, while K-State gained points from four of its five starters by the 15:53

"I was real pleased that we got off to a good start," Wildcats' coach Deb Patterson said. "I thought it was important when you're playing a team of this caliber. You certainly don't want to be in the hole having to climb back out of it.

"Quick starts are great in that you're not in the hole climbing out, but they're a bit of an illusion because if you think the other guy is not going to score eventually, that's sort of a dream," she said.

That's when Sooner guard Rosalind Ross stepped up and began to bury K-State.

The senior pulled the trigger from three-point range on each of Oklahoma's next five possessions and connected on three of them to cut the Wildcat lead to four at 11:22.

"She got on fire and we didn't communicate," K-State's Megan Mahoney said. "That was big for them and got them back in the game. Threes can be backbreakers when they hit on you, and we need to

work on recognizing who the shooters are.' Answers, especially for Ross' three-point threat, were hard to come by after that stretch for the Cats, and after the Sooners tied the game at 17 with 5:54 to go in the first half, both K-State's spirit and the

wind in the crowd's sails seemed to leave. It was a little bit disheartening just to know that we had worked hard to build that lead and then them coming back like that," freshman Kendra

Oklahoma would finish the half scoring 12 of the period's final 16 points to take a 29-22 lead into the

K-State started the second half much the same way as it did the first.

The Wildcats put together an 8-2 run to cut the lead to four points at the 15:27 mark, but surrendered a 13-4 spurt to the Sooners to give OU one of its biggest leads of the contest at 49-30.

We stayed with them up until halftime and then we got a few runs in the second half where we were within four," Wecker said. "You just gotta be tough and take care of the ball when you get back on those runs like that."

K-State didn't, committing eight of its 19 turnovers in the game's final 20 minutes, giving the Sooners all the extra opportunities they needed, to fall three games back of Oklahoma for the conference lead with three to play.

There were a couple times where we didn't execute," Wecker said.

"Having a few turnovers and not making stops on defense got us in a hole and we just weren't able to dig ourselves out of it."

K-State's Laurie Koehn, left, tries to hold on to the ball while being pressured by Oklahoma's Jamie Talbert, right, during the first half of Wednesday's game at Bramlage Coliseum. In a match-up of the Big 12's two top teams, the No. 4 Sooners defeated the No. 12 Wildcats.

# OU takes advantage of young Wildcat lineup

BY MICHAEL NOLL

Time remaining - 6:07.

Nicole Ohlde steals the ball and passes it to Megan Mahoney, who finds Kristin Rethman wide open for a three-point shot on the left wing. The Cats close to within 49-55 of Oklahoma, and the crowd explodes in a deafening roar.

It might have been the biggest shot in the game - for Oklahoma.

The Sooners called timeout, and then went on a 6-2 run. From then on, Oklahoma matched almost every Cat basket with one of

K-State could have avoided relinquishing the lead by holding onto the ball. For the game, the Cats finished with 19 turnovers and allowed the Sooners 19 more shot attempts.

"We have to be better possession by possession - take care of the ball." Mahoney said. "Every possession is an opportunity to score, and when we give them the ball 19 times, it's going to be hard to stay in it if they have that many more shot attempts."

The gap that K-State faced was made even bigger by Oklahoma's overwhelming experience. The Sooners started four seniors and one junior, compared to the Cats' three freshmen, one sophomore and one senior.

Oklahoma turned its experience to its

advantage, K-State coach Deb Patterson said. "I don't want to say it's just because they're older. It's because they're older, smarter, more experienced and great basketball players." she said. "They stepped up and found a way to get

Guard Rosalind Ross was a big part of Oklahoma's victory. The senior hit three consecutive three-point shots in the first half to help the Sooners fight back from an early deficit, and hit two more treys in the second half on her way to finishing with 17 points.

That performance was an indication of K-State's youth, said Oklahoma forward Caton.

"Just the fact that they left Ross open for those threes in the beginning. I think that shows a little bit of inexperience. If they scouted her, they knew that she was going to hit them," she said. "They left her open three times in a row, right in the beginning. That let us back in the game."

While the Sooners could take pride in their experienced play, they also recognized the potential in K-State's game, said Oklahoma senior guard Stacey Dales.

"They play with a lot of confidence and intensity. I think in the end, they showed signs of a lot of confidence," she said. "They're going

# Love in sports often skewed

Happy Valentine's Day from the sports world, where everybody loves everyone else.

At the Olympics in Salt Lake City, the French and Russian pairs figure skating judges love each other so much that they agreed to fix their scores. The result was the Canadian pair, Jamie Sale and David Pelletier, skated a perfect routine but ended up with the silver

medal. NBC's perpetually perky announcer Scott Hamilton gushed that the Canadians would earn "giant, huge, high, enormous marks." Instead, the less-than-perfect Russians won the gold, and now the French and Russian judges are being compared to Tonya Harding, who, if you remember, loved Nancy Kerrigan very much.

The Olympics are also home to

many athletes who love themselves. For instance, the skeleton athletes

view

Michael Noll

love themselves so much they hurtle down a giant tube of ice headfirst on a little sled. The skeleton winners are determined not only by speed but by how much ice they plow up with their faces.

The competition — a variation of luge, which is French for "Aaaaaaaaah" — is in its first year as an official Olympic sport. That status came after much debate, though, because many people were concerned about skeleton athletes suffering injuries, among others, death. Overall, the sport is reminiscent of a more prominent athlete, O.J. Simpson, who said, "Even if I did do

it, it was because I loved her, right?" There's also quite a bit of love in boxing. Last month, Mike Tyson tried to caress Lennox Lewis's face with a left hook at a pre-fight press

conference. Tyson also has shown his love to another boxer by expressing his desire to eat that boxer's children. Tyson also likes to show his love to

women - whether they want him to Of course, the sports scene has always been home to displays of love.

In fact, one of the few athletes to not get into the Valentine's Day mood is Charles Barkley. For instance, Barkley hates white people, people who talk to him at the

bars, the windows at those bars and the cops who handcuff him after he throws people through the windows

On the other hand, K-State's women's basketball coach Deb Patterson loves all kinds of things.

Just this season, Patterson has said she loves senior guard Kristin Rethman's unselfishness, sophomore forward Nicole Ohlde's work ethic,

# K-State track team prepares for final home meet of indoor season

BY JOEL REICHENBERGER

Kansas State Collegian

The nationally ranked K-State indoor track team is set to compete at home for the last time this season. On Thursday and Friday, the Wildcat tracksters will be in action at the KSU Open at Ahearn Field House.

The women's team, ranked eighth by team-power.org, will compete today, while the men's team, ranked ninth by the same organization, will be in action Friday.

The Open will mark the fifth time K-State has competed at home this indoor season, but is the first time they have done so in the last three weeks. The meet will feature some of the Cats' most fierce in and out-of-state rivals. Big 12 foes Kansas and Missouri are scheduled to be in attendance, as well as out-ofconference squads Wichita State and Fort Hays State.

Events will kick off this afternoon, with the women's weight throw and high jump starting at 4 p.m. The running events will get under way with the

women's Mile Run starting at 6 p.m. Rebekah Green and Austra Skujyte are scheduled to

throw the shot put at 7:45 this evening. Green and Skujyte lead the Big 12 in the event and rank No. 3 and No. 4, respectively, in the nation. They both have qualified for the NCAA National Championships,

Amy Mortimer, Big 12's female athlete of the week, will race in the women's 3,000-meter run, set to begin at 8 p.m. Mortimer qualified for the national meet last weekend in the 3,000, and her time ranks as the fourth fastest in the nation this season.

The men will see their first action Friday, following

the same schedule as the women. Freshman Erik Sproll provisionally qualified for nationals last weekend in the men's 800-meter with a time of 1:50.07. He'll aim to cut that time in search of an automatic bid to nationals. Sproll will race in the 800-meter, scheduled to start at 7:40 p.m.

The Open is the last regular season indoor meet for K-State this season. After the meet, the Cats will compete in the Big 12 Conference Championships in Lincoln, Neb., next weekend, and the NCAA National Championships at the University of Arkansas in three

# Suspect in driver's license scheme dies

BY BILL POOVEY

The Associated Pross

MEMPHIS, Tenn. - A chief suspect in a fraudulent driver's license scheme with possible terrorist ties died when her car was set on fire the day before her court hearing, an FBI agent testified Wednesday.

Katherine Smith, 49, was found burned beyond recognition early Sunday on a rural road 20 miles from her home. It initially appeared the car had struck a utility pole

She was scheduled to appear in federal court Monday on charges that she sold driver's licenses to five Middle Eastern men, primarily from New York City, who did not have proper documentation.

Three of the men - Mostafa Said Abou-Shahin, Abdelmuhsen Mahmid Hammad and Mohammed Fares were denied bond after a court hearing Wednesday. Authorities did not give their ages.

Attorneys for the men said they were being punished because of their ethnicity. "They seem to be trying to tie this to Sept. 11," defense attorney Clifton Harviel Jr. said.

But Assistant U.S. Attorney Tim DiScenza said the men, all illegal immigrants, participated in a conspiracy to provide them a "completely false and untraceable identity." He said their motivation could be "further criminal activity, whether fraudulent activity or some other illegal activity."

The other two suspects — Khaled Odtllah, 31, and Sakhera Hammad, 24 were being held without bond.

FBI agent J. Suzanne Nash testified Wednesday that "superheated gases" from burning gasoline killed Smith, who was driving a car she had bought from Odtllah.

Witnesses told investigators they saw flames from the back seat before Smith's car struck the pole. Nash said the gas tank was intact.

Authorities said the woman's family last saw her Saturday night. An autopsy and forensic tests on the car remain incomplete

Smith and the five men were arrested Feb. 5 after they left a driver testing station in Memphis. Prosecutors said Smith had processed

# Russians to speak on space projects

BY EDIE HALL

Kansas State Collegian

K-State students will have the chance to attend a lecture given by two Russian cosmonauts today.

The lecture, "From Mir to Mars," will be at 2:30 p.m. in Forum Hall of the K-State Student Union.

Alexandre Martynov, head of the foreign relations department for the Korolev administration in the Moscow region of Russia, will talk about the history of space exploration and technologies. He also will discuss space labs and future space exploration projects.

Pavel Vinogradov, who works at the Rocket and Space Corporation in Korolev, spent many months aboard the Mir space station and will discuss his work and what his stay on Mir was like.

The cosmonauts will come to Kansas after staying in Columbus, Mo., where they lectured at high schools and colleges.

Emmett Wright, director of the ARIOS-Kansas program, a Russian-American exchange program, said the cosmonauts want to share what they are doing with the American public.

The lecture will include a video and slides to supplement Martynov's and Vinogradov's comments.

Wright said the cosmonauts come to the United States once a year to travel and give presentations at various places.

"I met these individuals in the

past while working in Russia," Wright said. "We at K-State were fortunate enough to get on their schedule."

Wright said that while at K-State, Martynov and Vinogradov will meet with the bio-serve group, an organization on campus that designs experiments for space.

"They actually designed one for Mir," Wright said. "So, that will give them an interesting link with the cosmonauts."

Martynov and Vinogradov will meet with K-State educators to work on joint education projects. They also will tour the Manhattan area.

Next, the pair will go to Hutchinson, Kan., to spend a few days touring the Kansas Cosmosphere and Space Center, which houses the Hall of Space museum, an I-MAX dome theater and planetarium theater. The pair also will give a presentation there.

Wright said the cosmonauts usually spend around two or three weeks in the United States. They will head to Seattle, Wash., after leaving

Wright said students could benefit in more ways than one from the lecture.

"I think the Russian effort in space has been phenomenal, and students will have a chance to meet first hand individuals who have been a part of it," Wright said.

"It will also give students at chance to expand their horizons and understand another culture

# Lindh pleads innocent to 10-count indictment

BY LARY MARGASAK The Associated Press

ALEANDRIA, Va. - John Walker Lindh pld innocent Wednesday to a 10-count deral indictment which charged hn with conspiring to kill Americans nd aiding Osama bin Laden's terrist network. The widow of a CIA offier killed shortly after questioning indh called him a

"Not guiltysir," Lindh answered, after U.S. Distrit Judge T.S. Ellis III asked, "How doou plead to all the

It was Lindh'third appearance at the federal courtouse since he was brought back to te United States by

military aircraft on Jan. 24. His parents, John Lindh and Nancy Walker, were there for the arraignment, as they had been for his previous court appearances. Also present were Johnny and Gail Spann, the parents of CIA officer Johnny "Mike" Spann, killed in a prison uprising in Mazar e-Sharif in November, and his widow.

Lindh no longer has the shaved head he had in his initial appearances and his black hair, still closely cropped, is starting to grow back. He was clean-shaven, a sharp contrast from the long beard and long hair seen in televised images of him from Afghanistan.

Lindh answered, "Yes" and "Yes"

and "Correct, sir," when the judge asked whether he had seen the indictment and had reviewed it with his attorneys.

If convicted on the charges, the 21-year-old Lindh could face life imprisonment.

"John Walker was a traitor because of the way he lived," Gail Spann said.

After the hearing, Lindh's father attempted to speak to Johnny Spann, but several officials from the U.S. attorney's office intervened and prevented the conversation, said Sam Diddley, a spokeswoman for the U.S. attorney's office.

"We told him (Lindh) that no one could talk to the family," she said.

Ellis did not set a trial date, but said that as a target, he would like jury selection to begin in late August. He scheduled a hearing for Friday to set a trial date and go over a pretrial schedule, which likely would include hearings on handling classified infor-

mation in the case. The government and defense counsel had suggested in motions Tuesday that the trial not begin before mid-November, but Ellis said that was too long to wait.

"November is too far," Ellis said, adding that he was thinking of a trial in September.

Assistant U.S. Attorney Randy Bellows said he expected the government's case to take two weeks.

# Thongs to grannies

Don't be that guy who leaves the lingerie department in a cold ear because he can't make a choice between hi-cut briefs and

Before you even consider hitting the women's underwear racks or the Victoria's Secret barrel-o-pantiprepare to be

Nancy Hull

overwhelmed. Women's underwear is a little more complicated than just briefs, boxers and boxer-briefs.

But before you start thinking about style, you need to figure our size. Women's underwear basically comes in three sizes - small (5), medium (6) and large (7), If you know what jeans or dress size the

woman wears, store employees can help you. "The number one problem is that they don't ask when they

don't know something," said Teresa Purvis, Patricia's Undercover employee. "That's what we're here for."

To figure out sizes, Purvis said she'll ask a man if the woman can wear his jeans and how large she is compared to herself. As far as underwear style goes, Purvis says men don't usually know the exact names of styles.

"I'll say," Do they lit on her hips, or does she wear them to her waist?" she said.

Predicting what style and material a woman likes can be tricky if you haven't seen her skivvies. It's tough to know whether or not she's a thong girl, and sometimes women prefer cotton blends versus nylon and silk blends. Those silkler ones can move around and creep up. Some women like a big clastic band. Some don't.

If this is too confusing for you, it's probably safest to go with a basic bikini style. When a woman prefers bikinis to higher cuts, she won't always wear the high cuts, but when she prefers high cuts, she'll usually wear a bikini.

Lower-cut underwear are gaining popularity since jeans are sitting lower, Purvis said. Peaking panties only tempt would-be

So you can put the underwear giving task behind you right. when you leave the store, and always ask for glit wrapping - it's usually either free or pretty cheap.

# Boxers and briefs

Everyone knows that buying girls undergarments is an involved process that requires the understanding of certain technical aspects, but everyone lorgets about the tribulations of

JJ Duncan

First of all, each guy has an idea of the comfort that his equipment requires. The debate always has been focused on boxers or briefs. but don't forget the amazing third option of boxer-briefs. The trick is

to know your guy. One rule is that whitey tighties are

absolutely out of the question. Not only are these the most uncomfortable of all options, but just try to look sexy in these horrendous remnants of a time when fashion didn't mean anything behind the zipper. Note: If you actually do uy it, make

sure no one else is looking. Boxers can look great, and since they come in a variety of tabrics, can be very comfortable. Flannel keeps you warm, cotton gives you air and silk just feels nice. However, some guys don't

like having all that free space downstairs. The third option, boxer-briefs, has many benefits. These long, tight undergarments first caught attention when Mark Wahlberg was plastered all over billboards wearing his Caivin Kleins. They have the security of briefs while being a bit looser, and they're as

As far as novelry underwear printed with lots of hearts or with Tashionable as any boxers. phrases like "Home of the Whopper," they're usually rediculous. If your guy is into bikini briefs, just hope he's buff enough to pull it

off. G-Strings are right out. Other options exist like sturdy learner briefs, usually with accessories used for restraining the wearer. If a riding crop is hanging on your guy's wall, he might like these, but that's a side of guys most garls might not want to encourage. If you're a really nice gutfriend you'll accompany such a gift with a full set of shackles and some tope Gerrerr baby

The most important thing is to know what your guy is comfortable in, and then find something that will look good onhim. You know he can't do it himself.

# Olympic referee questions judging

The Associated Press

SALT LAKE CITY - An Olympic referee raised questions about the scorecards of judges who narrowly awarded the gold

medal to the Russians in pairs figure skating, the head of the skating union said

Wednesday. The referee, American Ronald Pfenning, has made certain allegations about the controversial decision which left the Canadians with the silver medal, said Ottavio Cinquanta, International Skating Union president.

Cinquanta did not provide details of the allegations, which were made in a letter to the union. Others also had questioned the results, "but the most important is the one of the referee," he said.

"He is the coordinator of the competition.'

Cinquanta also said he was embarrassed by the furor over the Russian win despite an obvious technical error. Canada's Olympic delegation has demanded an investigation, and the union said it would conduct a rare "internal assessment.'

That assessment could lead to revisions in judging, Cinquanta said.

The Canadian Olympic Association sent a letter Wednesday to Cinquanta seeking an independent inquiry

"We respectfully suggest to you that in order for such a review to have credibility with the athletes, the coaches and the public, it must be independently structured," COA president Michael Chambers wrote.

Controversy is practically a staple of figure skating, whether it's the Tonya-Nancy brouhaha, complaints about the standings in ice dancing, or a ban on "undignified" moves.

But this one has really struck a chord with both fans and skating insiders - prompting calls for reforms in judging and the ISU's organization itself.

"This is the worst thing that's appened to figure skating in a long time," said veteran U.S. coach

Frank Carroll. "I can understand where, watching that, if the International Olympic Committee said, 'We don't want figure skating in the Olympics anymore,' who's going to argue

with that?" The IOC isn't giving figure skaters the boot yet, but it is "concerned," said Francois Carrard, its director general. "The ultimate responsibility for the results lies with the ISU.

over Canada's Jamie Sale and David Pelletier on Monday night. They won a 5-4 split, even though Sikharulidze stepped out of a double axel.

Not only did Sale and Pelletier skate cleanly, they displayed the kind of passion fans will remember years from

now. The crowd was

already chanting "Six! Six!" by the time they finished, begging the judges to award the Canadians a perfect score.

"When Jamie and David finished, I thought, 'That's easy. They made it easy," said Sally Rehorick, Canada's chief of mission, a former skater and judge for 25 years.

Instead, the Canadians got only four 5.9s for artistry compared with seven 5.9s for the Russians. Boos rained down as the marks flashed.

Carroll boldly raised the question about whether the French judge, Marie Reine Le Gougne, voted for the Russians in a deal to avenge a loss by the French dance team to the Canadians at the Grand Prix in Canada in December.

"Does that mean now the Russian judge possibly is going to give the French dance team first (in these Olympics)?" Carroll asked.

The ice dancing competition begins Friday.

In the meantime, Chinese judge Yang Jiasheng, who favored the Russians in a tiebreaker, withdrew from judging the men's short program Tuesday night due to illness, according to the Olympic information network.

Sikharulidze, however, defended the judges' decision.

"We were the first to skate, and there was nothing to keep our rivals from getting a 6.0 presentation mark for skating after us," he told the Sport Express, a Russian newspaper.

"But they didn't, and that means they were not head and shoulders above us. ... So let me repeat, I think that our victory is a worthy

Russian President Vladimir Putin sent a congratulatory telegram to Berezhnava and Sikharulidze, the Kremlin press office reported Wednesday, expressing "his sincere congratulations on the superb victory."

Almost everyone else disagreed. Scott Hamilton, the 1984 gold medalist and an NBC commentator Monday night, said it was clear to him that Sale and Pelletier

outskated the Russians. "The judges really weren't judging the program," he said. "Maybe they'd come in with preconceived notions that they didn't want to dismiss."

# Bush keeps option of force to oust Saddam

BY BARRY SCHWEID

The Associated Press

WASHINGTON, D.C. - President Bush on Wednesday left open the option of a military attack on Iraq to oust Saddam Hussein. Bush said the Iraqi president "needs to understand I am serious.

A senior U.S. official told The Associated Press that Bush's top advisers and agencies of the government had been directed to develop

and refine a full range of options.

The official, speaking on condition of anonymity, said the recommendations would then be circulated within the government and sent to the White House so Bush could make a decision.

After meeting with Pakistani President Pervez Musharraf, Bush acknowledged he is considering various options to deal with Saddam, but he would not disclose any details.

"I will keep them close to my vest," Bush said. "President Saddam

Hussein needs to understand I am serious about defending our country."

But Bush also said any alliance between terrorist organizations and terror-supporting nations with a history of pursuing nuclear or other destructive weapons would be "devastating for those of us who fight for freedom," and the United States would not tolerate it.

"We, the free world, must make it clear to these nations they have a choice to make," Bush said. "I will

keep all options available if they don't make the choice."

CIA Director George Tenet is said to favor a plan that relies heavily on covert action, rather than an open military campaign.

In fact, the Central Intelligence Agency already is authorized to try to destabilize the Baghdad government. Secretary of State Colin Powell

suggested Tuesday, apparently in jest, that "natural causes" might be the

# Missed paperwork disqualifies pair

BY MICHAEL WATSON

Kansas State Collegian

Only seven pairs will be included on the Student Governing Association primary ticket, the Elections Committee chair said, after an eighth pair was disqualified for not filing required paperwork.

Presidential candidate Bill Mahan, senior in political science, filed his registration packet by the 4 p.m. deadline Tuesday, but vice presidential candidate Sam Hays, sophomore in electrical engineering, did not file at all.

"The verdict is that he is disqualified, and so is his running mate," Elections Committee Chair Ted Conrad said.

Hays did not know about being disqualified until 5 p.m. Thursday when he learned the news from the Collegian,

and the Elections Committee did not disqualify the pair until 5:30 p.m.

26 and 27.

held March 5 and 6.

The committee still was trying to verify that Hays had not filed, until they talked to him over the telephone.

Hays said he and Mahan were under the impression that only one registration form

needed to be filed for each pair of candidates. "Nobody let me know," he said. "We were

under the impression that we filed together." Hays said he was not upset about being disqualified, but he would have liked to run

and represent K-State, but rules are rules. He said his only concern was for Mahan by keeping him from running. He said he is sorry because he knows it meant a lot to him.

Mahan said he was surprised when he heard they would be kicked out of the race this "On the form I picked up, it said it was for

president and vice president," he said.

The election packet

clearly states that everyone who wants to run for president, vice president, senate or college council needs to file, Conrad said.

"The rules are pretty self-explanatory," he

While he was disappointed, Mahan said he would shoot for Student Senate this year, and would consider running for president again if he does not graduate in December. He said he was sorry to hear the news so late.

With a Tuesday deadline, it is unfortunate the pair did not learn they could not run until two days later, he said.

See DISQUALIFIED on PAGE 10

# Senators introduce 3 privilege fee bills

BY BRYAN SCRIBNER

Karrens State Collegian

Student Senators introduced three bills Thursday evening that could increase student privilege fees about \$10 per student.

K-State Student Union administrators are requesting an increase in the Union's funding for operations budgets, repair and replacement and Union Program Council.

Ben Harder, privilege fee committee chair, said proposed allocation increases consist of \$150,000 for operations, \$73,000 for repair and replacement and \$135,000 for UPC.

The Union's operations budget has reached a \$431,000 deficit. Harder said this is due in part to decreasing sales in the bookstore.

Harder said the Union hopes to out-source the bookstore in order to generate increased

This would place another business in charge of the store's operations. If an outsourcing contract is not agreed to, additional emergency allocations could be made to maintain the Union's services.

The main sources of revenue for the Union are the bookstore and food services. Harder said the Union generates about 90 percent of its own revenue. Forty-nine percent of this is generated by the bookstore.

# House adopts redistricting amendment

BY JOSHUA AKERS The Associated Press

TOPEKA - House members on Thursday approved a redistricting bill redrawing the chamber's 125 districts.

The bill passed 105-16, sending the bill to the Senate.

As endorsed last week by the House Redistricting Committee, the new map would have paired six incumbent Democrats in three new districts and put a Republican and a Democrat together in a northwest Kansas

But during debate Wednesday, the full House voted to undo some of that work and decided instead to pair four Democrats in two new districts - and put incumbent Republicans against Democratic incumbents in two other new districts.

The Republican-dominated House advanced the bill on a voice vote and passed it on final action.

Legislators this year are redrawing all of the state's Kansas House, Kansas Senate,

# Deliveries abundant at residence halls

rom stuffed animals to extravagant floral arrangements, companies delivered a plethora of gifts to residence hall occupants on

"The deliveries started Wednesday," said Leah Dunham, community assistant in Ford Hall, "and we got 200-plus packages. Starting around 7 a.m. on Valentine's Day, we were getting flowers after flowers."

All-female dorms receive the largest number of deliveries on Valentine's Day, said Derek Jackson, assistant director of the Department of Housing

"Halls like Ford and West receive the most because women typically get more packages than men," he said. Jackson said the deliveries were continuous throughout the day, and the

residence halls took measures to make sure everything got delivered in an He said that late morning to early afternoon was the busiest delivery

time, but it depended on the delivery schedules of the companies

"We tried not to let everything pile up by notifying students as soon as possible that they had something to pick up," Jackson said. Kate Blubaugh, freshman in agricultural business, said she was happy

"I got flowers from my boyfriend, but my mom owns a flower shop back home, so I kind of expected them," she said.

Blubaugh said she likes to get a variety of gifts on Valentine's Day, but she never has sent a gift to someone else.

received a floral arrangement from her father.

and excited to receive a gift.

"My parents have sent me care packages before, but I like to get a mixture of things like balloons and flowers," she said. "It's just fun." Sharon Hess, junior in horticulture therapy and resident of West Hall,

"This was the first time my dad got me an arrangement," she said. "I was so surprised." In addition to gifts from significant others and family, students received

valentine treats from their friends. "I gave my friends little metal roses because they won't die," said Sarah Maddox, junior in pre-veterinary medicine and resident of West Hall.

"When you're single, it's nice to do something for your friends." Maddox and her friends renamed the day Singles Appreciation Day, or SAD, so they wouldn't feel depressed about not having boyfriends.

Jennifer Bakumenko, sophomore in human resource management, said being single on Valentine's Day made her appreciate her friends.

"I thought about my friends a lot more, and the roles they have played

in my life," she said. "I just really appreciate them."

Zach Long/Collegian

Kris Cannon, Junior in elementary education, kisses his girifriend Blair Plaete, sophomore in architecture, after presenting her with a Valentine's Day gift Thursday at Ford Hall. Cannon, who has been dating Plaete for almost a year and a half, said that sometimes the simplest gifts get the point across the best.

### Kansans vote on party lines on campaign finance bill

WASHINGTON, D.C. - Members of the Kansas delegation voted along party lines early Thursday as the House passed campaign finance legislation that would ban soft money contributions to national parties and limit some political ads.

The measure was approved 240-189, with Democrat Dennis Moore voting with the majority. Opposing the bill were Kansas Republicans Jerry Moran, Jim Ryun and Todd Tiahrt.

The bill had the support of 198 Democrats, 41 Republicans and one independent. Voting against it were 176 Republicans, 12 Democrats and one independent.

### Kansas senators oppose their chamber's farm bill

WASHINGTON, D.C. -Republican Sens. Pat Roberts and Sam Brownback opposed a Democratwritten farm bill Wednesday, saying it would encourage overproduction of subsidized crops.

The Kansans voted against the Senate bill, which passed on a largely partisan vote of 58-40. The measure limits subsidies to farmers, adds new payments for crops including milk, honey, wool and lentils and doubles conservation spending. It also bans meatpackers from owning their own supplies of livestock.

# NATION IN BRIEF

### **Enron executive to appear** before Congress as witness

WASHINGTON, D.C. - The Enron Corp. executive who warned the company's chairman of dubious accounting practices last summer is appearing before Congress as a willing and knowledgeable witness following a parade of top Enron officials who have refused to answer questions.

Sherron Watkins told Kenneth Lay she worried about the fate of her company and her own career as word spread in Enron's glass tower in Houston about financial improprieties that ultimately pushed the huge energy trading company into the biggest bankruptcy in U.S. history

### **Bush offers incentives to** reduce pollution voluntarily

WASHINGTON, D.C. - President Bush is proposing an array of tax incentives to encourage businesses, farmers and individuals to reduce pollution as an alternative to an international global warming accord he said would hurt the U.S. economy.

Bush last year rejected the Kyoto Protocol, which required 40 industrialized nations to reduce the carbon dioxide emissions - the so-called greenhouse gases believed to cause global warming. He said the treaty could have cost millions of American

# SHE said / HE said

Q: My roommate hooked up with my ex-boyfriend. Do I have the right to be mad, or should I get over it? - Sleepless in the Little Apple

Dear Sleepless in the Little Apple: Your question is a good one since

many people leave their morals at home when they come to college. Moving in on someone off-limits is

cruel. The concept of free love should be left in the '60s where it belongs. There is a code between girl

friends. If your roommate wants your ex so bad, she better be willing to trade in your friendship for him. If you choose to be mad, it is well

within your rights. However, if you are mad at one, you must also be mad at the other. Forgiving him would be a mistake due to his obvious lack of respect for your feelings.

How mad you get is totally up to you, but you do have to live with one of them. For the household's sake and your sanity, you might want to consider trying to move past this.

Express how you feel to your insensitive roommate. Make sure she knows she crossed the line and it

forgotten soon. If they decide to be a couple, then all bets are off.

won't be

Sarah is a junior in print journalism.

Dear Sleepless in the Little Apple: This is a very touchy matter. Every situation in every domicile is different. Assuming you have been

separated for some time, I feel this is a non-issue. They are consenting adults. If their act of passion really struck a nerve, perhaps you still have feelings for this person.

In that case, you are the one who needs help with closure. There are plenty of therapists who will gladly help (and charge) you to vent.

On the other hand, you could realize that in the broad scope of things, this act of selfless passion does not matter. If your anger does persist, girl-fights are always fun to watch.

Women tend to take situations like this more seriously than men. People make mistakes.

Whether I am right or wrong, I feel you should let it slide for now and plot an evil

revenge against your scheming roommate. Just remember. "He who laughs last laughs

> loudest." Derek is a senior in milling science

# 7th pair announces presidential candidacy

BY TARA PATTY

Ransus State Collegian

Standing near the center of the university they hope to represent, a seventh pair of candidates announced their intentions to run for student body president and vice president in front of Waters Hall on Thursday afternoon.

Michael Day, junior in golf course management, is running for student body president and Tyson Steffen. junior in agricultural business, is running for vice president. They said their mission is to bring the student body president to the students.

"Instead of students coming to us, we want to reach out to the students," Day said.

They plan to use questionnaires and one-on-one contact with students to help raise awareness and combat student apathy toward Student Governing Association and the position of the student body president, Day said. The candidates also said they plan to attend various club meetings as a way to meet and interact with students. Many people,

Tyson Steffen, junior in agriculture business, and Mike Day, junior in golf course management, announce their candidacy for student body president Thursday afternoon in front of Waters Hall.

Day said, do not know who the president is or what he looks like.

"Instead of being passive and just complaining, we want students to speak out," he said.

Day also said he wants to inform

students on issues that must happen for the university, even if they are met

understand what is going on.

with resistance. Tuition increases have to happen, he said, and a key is for students to

"I think a lot of what is going on now is that some people are not being heard that really want to," he said.

He said he wants people to know him and know his face so he can be more in touch with the student body. He plans to make this goal a reality in several ways that focus not simply on encouraging feedback from students, but by reaching out and hearing student issues firsthand.

Steffen and Day said they plan on setting up a table in the K-State Student Union next week and are looking forward to one-on-one conversations with students.

Throughout their campaign, the two will be meeting people and simply listening.

Both said people are a reason to be a student at this university.

"I love it here," Steffen said. "I've been to several major campuses, and this is still my favorite. People here are nicer than others.'

Day said not only are students supportive, but teachers are as well.

"No one wants to see you to fail,"

"You're not just another number."

### **OLYMPICS**

■ Continued from page 1

some of the problems, Morton said. "A ton of people started using buses," she said. "I think it is a positive thing in the future."

Not only did the physical campus change, but so did classes. With a month-long break in the middle of the semester, teachers had to be creative with their lesson plans.

"We went to class for three weeks," Morton said. "Then, we were bombarded with mid-terms, finals week times 10.

BreAnna Valdez, junior, said her classes were pointless before the

break

"The first month we didn't really do anything," she said. "Once we get back, there will be a lot of work."

Now that the Olympics have arrived, students are working for the Salt Lake Olympic Committee as parking supervisors, drivers and information desk employees.

The university newspaper, The Chronicle, was paid \$175,000 to print the Olympic Record, an official newspaper of the Olympic village, seven days a week, editor in chief Matt Canham said.

"I think they had to give us a break since they have so many college-aged people working for them," Morton said. "They couldn't have pulled off the Olympics without us."

# RCPD seizes 2nd meth lab found within last month

BY MAGGIE GRUSZNIS Kanses State Collegian

Within the last month, two methamphetamine labs have been seized by the Riley County Police Department. Officers seized the second methamphetamine lab Thursday at the Holiday Inn and

Holidome, 530 Richards Drive. Capt. Gary Grubbs, from the Riley County Police Department criminal investigations division, said four arrests were made Thursday related to the manufacturing of methamphetamine.

Robert L. Jones, 31, and Sarah Jones, 25, both Manhattan residents, have been charged with conspiracy to manufacture methamphetamine. Their bond was set at \$25,000 each.

Michael B. Willis, 37, Manhattan, was charged with conspiracy to manufacture methamphetamine, and possession of marijuana,

methamphetamine and drug paraphernalia. Willis' bond was set

Aaron Bowser, 18, Clay Center, was charged with possession of marijuana and methamphetamine. His bond was set at \$3,000.

Grubbs said the four people arrested checked in to the hotel the night before.

"We had police surveillance," Grubbs said.

Due to the police surveillance, the lab was seized and the individuals were arrested, Grubbs said. Grubbs said the lab was

contained in a "Playmate" beverage cooler, and officers were able to obtain the lab before it was brought into the hotel. Part of the successful investigation was due to the cooperation of

"They assisted us in the investigation," Grubbs said.

# Committee makes right decision, takes too long for action

► OUR VOICE and debated by the editorial board and written after a majority opinion is formed. OUR VOICE is

Jessica Pitts April Middleton **Nancy Foster** Dana Strongin Alyson Raletz Nancy Hull Matt Killingsworth the Collegian's official Dan Smith Paul Restivo Katle Lane JJ Duncan

> Zach Long **Nicole Donnert**

Micah Hawkinson

One presidential ticket was removed from the primary election roster Thursday night. Bill Mahan and Sam Hays will no longer be allowed to run in the race for student body president and vice president.

The removal of the two students from the race was appropriate, but SGA took too long to make the decision.

Hays and Mahan turned in one application when they should have turned in two separate ones. Although the reason

for this mistake might be pure misunder- behind their backs. standing, SGA made the right decision.

SGA must stick to its rules. The association cannot let mishaps slide by. Rules are set for a reason and must be adhered to. Candidates who are not careful enough to be responsible for application materials might not be organized enough to lead the university.

However, SGA should have notified the two candidates earlier. For two days, the association debated their legitimacy

The two men were not aware there was a problem until they were told Thursday afternoon they were disqualified. Both the candidates and the student body as a whole should know earlier if a ticket is out.

SGA made the right decision, but it should not have taken so long. It should be easy to see that not meeting requirements means getting booted from the race, no exceptions.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

What the heck is she if she's not a girl and not a woman?

Chicks driving F150s do not turn me on.

The model agency called. They're looking for some more posers.

Does Jeff Caldwell have any idea what he was talking about? Paul White's articlewas nothing but facts.

Happy single awareness day! Love, mommy.

Hey, David, maybe you wouldn't be so bitter about Valentine's Day if you got some

You all may have the Derb, but we have

February is national frozen potato month. To celebrate, my favorite way to enjoy spuds is vodka. Yes. that's right, vodka in the freezer. Cheers.

Maybe the weed's just making me paranoid, but there were a lot of cops on campus yesterday.

Why is 91.9 doing their own call in forum? I hate hearing my own voice.

I think I witnessed a squirrel stealing a bicycle today outside of Seaton.

I wonder if professors call into the Fourum. Or even better, if Wefald has called into the Fourum. I guess we'll never know.

Japanese music videos are the greatest.

To all of you guys who can't find a date on Valentine's Day, try throwing a girl into oncoming traffic. That's how girls work. They love butt holes.

Somebody tell the halftime guy at the women's basketball game to shut up.

Curling is the best Olympic sport.

I just wanted to make a recommendation to the Project Wellness folks. Start surveying K-State students instead of Manhattan Christian College students.

David McCandless, you just don't have a girlfriend.

Your roommate sleeps with other people's girlfriends? Well, my ex-girlfriend sleeps with other people's girlfriends.

I love my boyfriend.

David, if you had finished reading your source, you would know why Valentine's Day is a day of love.

Is there some sort of jest for those. basketball refs? If so, they must have pretty low standards.

Damn the people who leave the bathroom window open.

Way to bring back good old K-State basketball ladies.

That means I have a 92-percent chance of embarrassing myself.

I need sex.

Can you hear me now? Good.

To the guys who stole our house on College Heights: we know where you live.

Parking patrol is the scum of the earth. I respect politicians and prostitutes more than them.

Hey, I didn't get dumped on Valentine's Day again this year. Sweet.

Would someone please tell the halftime guy to shut up?

This is to the couple who was fighting by Nichols Hall the other day: why don't we keep our fighting inside the ring?

LOSS OF LOVE

# Reflection of relationships bears flaws within self

alentine's Day has passed once again. This week I have noticed a trend in some of the Collegian columnists' writings about why girls suck because they always go for jerks and why Valentine's Day sucks in general.

Following suit, (and due to many Campus Fourum comments) I would like to write a column in a slightly different direction.

Why I suck at relationships. Now, I know most of you are saying, "Kyle Brownback sucks at a lot of things, so why narrow it down to

relationships?" Quite simply, it's because people like me are reminded of their relationship suckiness several times a day.

Whether it is through watching my roommates play grab-ass with their girlfriends or being labeled an "ineffective dirtball" by my friends, I know that I truly suck when it comes to dealing with women.

You name any flaw that could destroy a relationship, and I have it.

Fear of commitment? Yes. Bad listening skills? Yes.

Poor personal hygiene? Well, maybe, but we won't delve into that topic.

But perhaps one of my most damaging flaws is a

lack of patience with women. When writing about this topic, I am reminded of the song "When It's Over" by Sugar Ray. The lyrics, "When it's over, that's the time I fall in love again," seem to be very close to my life. In the past, whenever I have

been lucky enough to start dating a girl, everything has gone smooth for the first three weeks.

It's all downhill from

point is when the grass starts

looking greener on the other side. Other girls that I hadn't noticed before somehow begin to interest me.

I think, 'Man, if I wasn't with (insert name here), I could get together with (insert a different name here.') Soon, I find some way to screw up the relationship in which I am involved.

Then, when I try my luck with the new lady, I find myself confronted with an old, faithful friend: rejection.

my

view

Kyle Brownback

From these experiences, I've learned that the grass is also greener around the septic tank.

So when I'm single again, I think, wow, maybe (insert name here) didn't suck so much.

Maybe it was my fault all along that we didn't work out. I bet it would be nice to get back together with her.

But by that time, it is already too late. She's forgotten me and moved on to another unsuspecting That, or her hatred of me is so deep-rooted by

this point that she won't look at me without the flames of hell flaring in her eyes. I can only find some sense of solace in knowing

that at least my life doesn't suck as bad as Kyle Barker's, and even that isn't a very great comfort. I should be quick to point out that I am also

receiving a degree in biochemistry.

By now, some readers might be wondering why I wrote this. I know that I probably won't have another date while I'm at K-State after this column. But to be honest, there was a pretty good chance of that happening anyway. So, that's how my romantic life goes, plain and simple. It's pretty much a vicious cycle of loneliness and rejection, with brief interludes of happiness.

Whether it is through watching my

roommates play grab-ass with their

"ineffective dirtball" by my friends, I

know that I truly suck when it comes

Biochemists, by definition, are nerds. We aren't

supposed to have any knowledge of how to talk to or

If biochemists were ever given the chance to

children in need of an optometrist and orthopedic

breed, we would only fill the population with

girlfriends or being labeled an

to dealing with women.

be around the opposite sex whatsoever.

But don't get me wrong, as far as vicious cycles go, this one is pretty fun. For all of you who hoped to find answers to romance in this

column, I apologize. I'm really not the person you should ask those As far as women go, I can only

offer two pieces of advice. Don't wear too

much cologne on a first date, and never pay

Kyle is a senior in biochemistry and pre-medicine. You can e-mail him at krb4706@ksu.edu.

# Enron CEO should take responsibility for his actions

respectfully decline to answer your questions." With those words, former Enron CEO Kenneth Lay

confirmed my suspicions: he's just another cowardly corporate weasel. He lacks both honor and a concern for the public's best interests.

In short, he's a sleezeball. According to the

Washington Post, Lay claimed his Fifth Amendment rights Tuesday, refusing to testify in the Enron probe. As a general rule, I'm all for invoking the Fifth, but this case is a little different; it involves the hopes and dreams of hundreds of thousands of people.

When former energy titan Enron took a field trip to Davey Jones' locker last December, it left stockholders in the lurch. The corporation was once the seventhlargest in America, according to ABC

This, coupled with perennially high

revenues, made it a hot stock pick for would-be millionaires everywhere. Prices and consumer confidence were high, and

view

Micah Hawkinson

Then, last fall, prices began to plummet. Before anyone knew what was happening, Enron stock had plunged lower than my chances of getting a date for tomorrow night.

life was good at Enron HQ.

The excrement struck the ventilation unit Dec. 2, 2001. Enron filed for bankruptcy, thus declaring to the whole world, "Hey, look! We are losers!" Much money was lost.

Thanks to accounting acrobatics, revenues continued to climb throughout Enron's demise. This translated into big bucks for the corporation's top brass. Ironically, more money went to top officials as the company drew closer to ultimate failure. This is why, as the Associated Press reports, 21 Enron officials raked in a total of \$1 billion during 2001.

Thousands of Enron employees have seen their 401(k) retirement accounts vanish into thin air.

Hundreds of thousands of investors have had their hopes crushed by the corporation's collapse.

The U.S. economy, already weakened by a slight recession, has taken another blow in the solar plexus. To some extent or another, all of us

have been affected by the Enron affair, From vaporized college funds to a weakened economy, it has left nothing but destruction in its wake. Enron officials should be held respon-

sible for their mistakes. This is especially true if they knowingly made poor business decisions just to get

more money. Preying off of the misfortune of others is despicable, and if guilty, top Enron officials should be punished.

If Lav and other corporate officers have behaved selfishly, they ought to confess. It's going to be hard enough to sort things

out even with their help. If they refuse to comply with the investigation, we could have even more economic problems on our hands. The U.S. Congress is attempting to sort

out the matter. After all, the financial ruin of thousands is a pretty big event. The question is whether Lay and his colleagues will help fix their mistakes. Enron officials need to show some guts.

Lay should set an example by stepping up and taking responsibility for his actions, regardless of his lawyers' advice. He said Tuesday he had a "profound sadness" over the affair. If that's true, why doesn't he just do the right thing?

It's almost as if he's only grieved because his actions have had bad repercussions, not because he did something

But I could be mistaken.

Micah is a junior in English and history. You can e-mail him at mph7686@ksu.edu.

### **READERS WRITE**

# Mother remembers life of former K-State student

Editor,

To David Miller's Friends and Classmates,

I feel like I let you down by not telling you about how I loved David and what it was like for him to grow up here in Wilson, Kan.

I was a protective Mom. I loved David, like your parents love you. I taught him right from wrong, to be kind and loving, not to waste food. to be dependable and a Christian.

I let him have a messy room. I'd like him to make his bed, but he didn't have to.

We ate our meals at the table, after saying the blessing, and he took his turn doing the dishes. We did this from little on up. He liked to cook and was in the kitchen a lot.

I remember him peeling his first hard-boiled egg when he was 3, and knowing the Lord's Prayer when he was 2 and a half.

I was sort of in awe of him as he was growing up. He seemed to always know what to do and when to do it. He was good at it, too.

I remember his second grade teacher at parent/teacher conferences when I was a single parent telling me, "You have done a wonderful job raising David." I remember looking at her so surprised and saying, "It's not me or anything I've done. It's him. He just knows what to do."

He was a good student, athlete and employee. He worked at the family recreation center, Wilson Bowl, after football, basketball or track practice, and on weekends throughout school.

Our customers loved to have

him wait on them. He always smiled and visited with them and was thorough in his service to them. He worked in the kitchen, and learned many of his cooking skills there.

He filled in a couple times during semester break last month. Some ladies playing bridge one evening when he was there commented that they enjoyed having David wait on them. It was like old times.

He wanted to try something new the summer after high school graduation, so he worked for Eschbaugh Advertising in the silk screening department.

He and Sasha would get up and go in at 5 a.m. so they could get off at 2 p.m. He liked it there, and made more friends. Getting off at 2 p.m. enabled him to go hiking or fishing in the afternoon or evening with his Uncle Dave.

When he wasn't doing that he was shooting baskets with buddies or watching sports on TV.

I loved going to his games in junior high and high school. He could run full speed and cut in and out and fake the other guy out. That is exactly how his little dog runs.

Gary, his father, and David really bonded during semester break.

David never got to learn the ropes of farming in high school because he was busy with sports and the Center. During December and January, though, David helped Gary almost daily.

I told some of you last night that it was nice hearing all your wonderful stories of David and your times with him.

I cherish all your words. I know many others were like me and couldn't get up there and say anything. That is OK.

We all remember David, Miller to most of you, Dave to some of you, in different ways. Most of us remember his smile.

We gave David his roots.

Manhattan, K-State, and all of you gave him what he loved. He called that his home.

I remember when he was a freshman there and when he called the Theta Xi house "home." He said it to shock me. He did.

I didn't say anything, but I was really hurt. Gary consoled me later and said, "You know, Joyce, you have to let him go. He is 18 now and an adult." I knew that, but he was still my little boy.

I love him and I always will. The K-State family gave him his wings, and now he is complete with his halo.

Heaven got another angel, January 28, 2002.

— Joyce Kraus

# Nutrition story brings focus to healthy eating

Editor,

I read with interest Tara Patty's article on "Diet trend cuts out majority of carbs" in the Collegian on Friday, Feb. 8. Nutrition and fitness are health issues, and I am pleased to see the Collegian focusing on this...

The nutritionists mentioned in the article, with whom I have visited, were concerned that a diet heavy on protein for too long of a period could cause kidney problems, and in some cases, failure. I have always believed that moderation in the variety and quantity of foods we eat, as well as adequate exercise, is important to maintain our health. I believe that eating too much of a food group such as cutting out all proteins or all carbs can create difficulties for one's health.

Serving sizes of a balanced intake of all food groups can lead to a healthy life style. In our culture, super sizing and ordering large food quantities are harmful to maintaining healthy body weight. It is sometimes difficult to know how to size-up a serving size.

I am told that to cut calories, we need to keep our diet nutritious. For more information on nutrition or serving sizes, the Web is useful. You can check with the Wheat Foods Council – www.wheatfoods.org and the Kansas Wheat Commission – www.kswheat.com

— Harvey L. Kiser Senior Agricultural Economist, International Grains Program

# Officer's support will be missed by residence hall

Editor,

This letter is in support of Officer Gary Jones.

I am not familiar with the rules that police officers must follow or what Officer Jones might have said or done in the past. I do know, from many interactions with him, that he is a good man and officer.

Officer Jones was in our building several times this year, and has helped us deal with some tough situations. He displayed competence and the utmost professionalism each and every time we worked with him.

In addition to doing his job well, Officer Jones was also a really nice guy. He was always friendly to the residents and staff members of our building.

His skills in dealing with people and his ability to do his job effectively will be missed by our building and this campus.

— Joe Timson Assistant residence life coordinator, Haymaker Hall

# Evaluations should rely on advisers, students

Editor.

In response to Jennifer Farr's article, "Faculty senate receives report of poor advising," I feel compelled to respond.

First, what was brought to the floor of Faculty Senate was acceptance of "Culture, Priority and Resources: Keys to Enhancing Academic Advising at Kansas State University," the final report of the Advising Enhancement Task Force.

The report consists of: (1) a review of current policies affecting academic advising, (2) a summary of the student feedback available to the committee prior to August 2001, (3) an examination of the different ways in which academic advising responsibilities are handled across the university, and (4) a set of recommendations for strengthening the current academic advising program.

It was hardly a report "of poor advising," as the headline suggests.

To be sure, some students report they are receiving poor advising.

Based on the data available to the committee, however, most students are satisfied with the academic advising they have received.

Farr neglected to provide any context for Dr. McCulloh's comments.

What Dr. McCulloh was referring to was a recommendation that academic advising be categorized as a teaching activity in all evaluation materials.

Dr. McCulloh was concerned that the language in this recom-

mendation suggests that academic advising should be the sole responsibility of the faculty.

About half of the departments ask their faculty to provide all academic advising.

Others supplement faculty efforts with professional advisers and still others use professional advisers only.

The complete report makes it clear that this diversity of approaches toward academic advising is to be acknowledged and valued.

Based on the wording in the executive summary of the report, however, Dr. McCulloh's concerns are understandable.

concerns are understandable.

Finally, the action taken at
Faculty Senate was to accept the

report.

There is not yet agreement among faculty, however, that all of the recommendations need to

be implemented.
Faculty Senate Academic
Affairs is considering the recommendations and will work with
the Provost's Office toward
improving the existing advising
system.

We will, however, first look carefully at the responses gained through the Fall 2001 study reported by Dr. Lynch

reported by Dr. Lynch.

I find it curious that Farr
chose not to mention the role of

students outlined in the report.
Problems with academic
advising are shared ones - there

must be an advisee as well as an adviser. Our best estimates of "poor advising," is that it is limited in

scope and difficult to attribute solely to the faculty. Current problems, however,

do need to be dealt with.

Jacqueline D. Spears,
 Chair of Faculty Senate
Academic Affairs Committee

# Baseball looks for another NAIA win

Kansas State Collegian

K-State's baseball team has a victory and nine pitchers with game experience coming into Friday's match-up with the Southern Nazarene University Crimson Storm.

The Wildcats also have a coach who is very disappointed.

Coach Mike Clark said the Wildcats' performance Tuesday against Doane was both misleading and shallow.

"It was a sloppy win," Clark said. "It is important for our players, and our fans, to not be satisfied with a win like the one we got against Doane"

Clark said mistakes must be cut down Friday at Frank Myers Field if K-State is to beat the Crimson Storm (2-1) — a small school that can pack a solid punch.

"Southern Nazarene is a very good division II ballclub," Clark said. "For whatever reason, for grades or for whatever, they have a number of division I caliber players."

Clark said Nazarene presents a welcome and necessary challenge for his team.

"Nazarene is going to give us all we want," Clark said. "It is a challenge I look forward to. I want to see how our guys respond. We need to play at a higher level, and this will be good

Despite K-State's 21 runs against Doane. Clark said Tuesday's score was the result of poor defense rather than good offense and noted erratic Kansas weather as part of the

"We just have not been outside enough," Clark said. "We got outside a little bit in January, but then we were inside for three

"I think the guys lost some of their fundamentals as far as playing defense on the grass goes. The ball stayed down and created some

problems for us." Despite the Cats' problems on defense, pitching was one area Clark was impressed with

"Pitching was not all bad against Doane," Clark said. "We had some pitchers who were able to show their stuff and we did strike out

"Pitchers are like hitters in that, as the game goes on, they make adjustments. When you throw nine guys, it is difficult for anybody to make the necessary adjustments, and we did a pretty good job with that on Tuesday.'

Clark said pitching is just one ingredient the Cats will need in their recipe for a victory over the Crimson Storm Friday.

"Talent wise, we are going to see a very good ball club," Clark said. "About half of their ballplayers should be playing division I baseball, so this is not your true division IItype squad.

"They are not going to give us as many runs as Doane did. We are going to have to build our offense and do positive things around a game situation. I look for my players to respond to this challenge and do very good things."

# With nationals on the line this weekend, the English team is feeling

# PRESSURE TO PERFORM

BY ERIKA SAUERWEIN

Kansas State Collegia

t's been more than two months since the K-State English team has competed.

But the show this weekend at Texas A&M is much more than a refresher. Qualifying for national competition is on the line.

K-State is one point behind first-place Oklahoma State in overall team standings. The Wildcats are tied with the Aggies with 142 points for second place. The team with the highest point total after this weekend will qualify for nationals.

"Basically, we need to come up on top this weekend," Kristy Rue, senior in earth science education, said. "I think it puts pressure on us, but I am confident that if we continue to do what we have been doing, we will be there. I would love to go to nationals."

English coach Meghan Cunningham said she, too, is confident with the team's chances to go to the postseason.

"The team has been practicing very strong," Cunningham said. "Providing we continue placing consistently, like we have, we can come out on top and go on to nationals. Winning the show this weekend is absolutely within grasp.'

With the race for nationals so close and the Aggies holding the home-ring advantage, the show is not going to be easy for the Wildcats.

Texas A&M will be a challenge this weekend," Cunningham said. "If the girls draw a difficult horse, they will just need to figure it out and adjust to it. There is always an ideal draw for each girl, but I would like all the girls to be able to ride every horse.'

Despite the two-month break from competition, Rue said the team feels better than before.

"Coach has told us that many people have increased their intensity over break," Rue said. "We were ready for a break at the time, and we have had a lot of time to prepare. I like the way we have been practicing. I feel

Individuals are also aiming for a shot at postseason competition. Junior Maureen Reynolds said she is looking to qualify in both open flat and open fences.

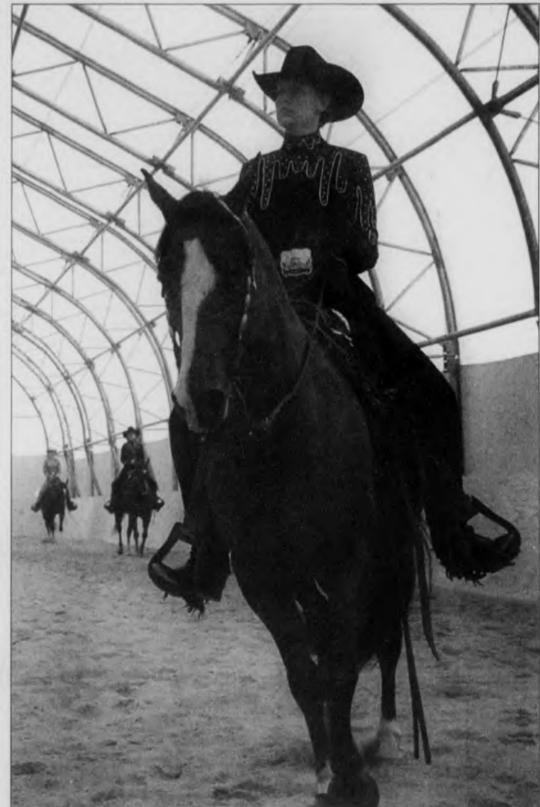

This weekend also marks the last chance individuals have to qualify for regionals.

"Texas A&M has a good show, and we did well there last year at regionals," Reynolds said. "I need about 13 or 14 points in each division to qualify, but it is a definite possibility."

Rue was one of three K-State riders to go to nationals last year, but this year she wants the whole team to be able to enjoy the experience.

If the English team qualifies for nationals, it would be another first for the team.

"We are so excited to be in the position we are in," Rue said. "I want to set that standard for K-State history.

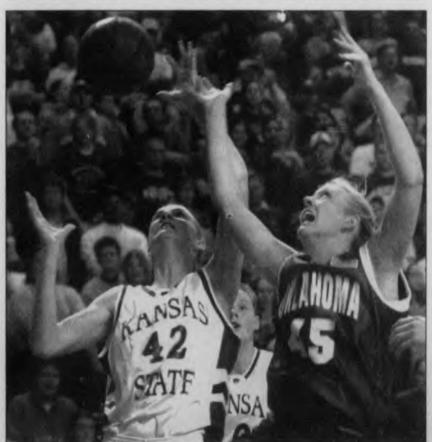

File photo by Nicole Donnert/Collegian

K-State's Kelly Gratny competes during the Wildcats' first ever home show earlier this season. K-State could clinch a regional berth in their next show.

Basically, we need to come up on top this weekend. I think it puts pressure on us, but I am confident that if we continue to do what we have been doing, we will be there.

Kristy Rue, senior in earth science education

# K-State women look for 1st sweep of Kansas since '91

K-State's Brie Madden(42), tries to recover a loose ball after blocking the shot of Oklahoma's Jamie Talbert(45) during the first half Wednesday at Bramlage Collseum. The Wildcats will try to rebound from the loss to the Sooners when they play at Kansas on Sunday.

BY DAN SMITH

Kansas State Collegian

It's been a long time since K-State's women have swept a season series with intrastate-rival Kansas.

In fact, the last time it happened, the other Bush was in office, America was at war in the Persian Gulf and the Soviet Union was on the verge of collapse.

The year was 1991, and K-State's wins over the Jayhawks turned out to be one of only a few bright spots. A postseason berth wasn't a reality.

Oh, what a difference 11 years makes, KU (5-21) limps into Sunday's 3 p.m. tip against K-State winless in the Big 12 with no hope for a postseason appear-

The Wildcats (21-5, 9-4), on the other hand, enter the game with plenty of storylines in tow.

With a win in Lawrence, K-State would hold on to second place in the conference, keep from taking a nosedive in the polls and end its first losing streak of the season.

That streak grew to two after the Wildcats followed up their loss to Iowa State on Sunday with a 76-68 loss to No. 3/4 Oklahoma on Wednesday night at Bramlage Coliseum.

But although the purple's chances for a regular-season conference title fizzled

### Sunday standoff

No. 12 K-State (21-5, 9-4) at Kansas (5-21, 0-12) When: 3 p.m. Sunday Where: Allen Fieldhouse (16,300) Radio: Wildcat Radio Network: WIBW-AM 580

out Wednesday night, freshman Megan Mahoney said the team is ready to finish the stretch run on a good note.

"We just take it one game at a time," she said. "Our goal, coming into the season, wasn't to win a Big 12 Championship, but we knew we were in the run for it.'

Now, the race for the league's No. 2 spot takes precedence. K-State stands one game ahead of Colorado and Baylor, and two games up on Iowa State and Texas in the conference standings with

three weeks left in the season. Still, freshman Kendra Wecker said her team's performance against the Sooners was indicative of a team on the

rise rather than a struggling one. 'We were back to where we were," she

"Up at Nebraska, we were down a little bit - our shots weren't falling and our defense wasn't where it needed to be, but we're back. We just gotta pull it all together and we're gonna be all right."

# Cats hope to snap 7-game losing streak

BY DEREK BOSS Konsas State Collegian

K-State might be catching No. 4

Oklahoma at an inopportune time.

The Sooners fell 79-72 in overtime at No. 16 Oklahoma State on Wednesday night, and Coach Kelvin Sampson's club doesn't seem to like losses.

In fact, OU (19-4, 8-3) hasn't lost back-toback games all season, and the OSU defeat snapped a four-game winning streak for the Sooners, who now sit two games back of No. 2 Kansas in the Big 12 title race.

But K-State has enough problems of its own to worry about.

Despite a 31-point home win over Texas A&M on Tuesday, the Wildcats (10-12, 4-7) return to the road to face Oklahoma on Saturday.

And, the road hasn't been kind to the

Coach Jim Wooldridge's team is 0-7 away from Bramlage Coliseum this season, and only one of those losses was fewer than 10

points. "I don't know. I don't know what

# BROTHERS DIVIDED

# Play tackles racial issues in Twain novel

BY KAREN MIKOLS Kansas State Collegies

An interracial child switch by a slave mother sets the scene for the stage adaptation for Mark Twain's 1894 novel, "Pudd'nhead Wilson."

The play will show at 8 tonight in McCain

Its backdrop is a pre-Civil War community in Dawson's Landing, Mo., where race is still a dividing factor of everyday life.

Judge Driscoll, an elite member of the community, has two sons. One child, Tom, is from his legal wife and the other, Chambers, is from his house slave, Roxy.

Following his wife's death, Roxy is left in charge of the two infants.

"The two boys look extremely similar at birth and as children," said Thom Jackson, development officer for McCain Auditorium. "Under threat of being sold away from her son, Roxy switches the babies."

This switch causes the two to grow up with a false identity of who they are, and one is brought up as a slave and the other as a master. The play is pulled along by the irony of the reversal in several ways

The script calls for a black man to play Tom, the white son, and for a white man to play Chambers, the black

"That's caused the most controversy when the audience sees it," Coleman Zeigen, who plays Pudd'nhead, said. "We do talk-backs after the show. Audience members stay and talk. They ask why not cast

a mistake has been made in the casting, the playwright, Charles Smith, carefully planned it.

portrayal of a white man by a black man and vice versa makes the audience think more deeply

message of the book into the audience's face," Zeigen said.

my character makes me question the position I take as an American on racial issues. I hope it makes the audience

Wilson" by Mark Twain was written in 1894, and the stage adaption was recently written by Charles Smith, an award**Tickets** 

"Pudd'nhead Wilson" will show at 8 tonight in McCain Auditorium: Tickets are \$10 for students and children and \$20 for the general public and are available at the McCain Box Office, 532-6428

winning black playwright.

"Pudd'nhead Wilson" is one of the two plays in The Acting Company's tour. The other production they are performing is Shakespeare's "The Taming of the Shrew," which will not be performed in Manhattan.

Margot Harley and John Houseman founded the company in 1972 with the first graduating class from the Julliard school

drama division.

Harley, the producing director, said the company was started to provide a wider variety of theatrical options to actors, as well as the

"The idea was to help develop great classical American actors," she said. "They are actors who are capable of doing the classics that involve elevated language, as well as contemporary

"If you can perform Shakespeare, you can do anything else."

Shakespeare is performed, but the company brings other contemporary plays on the road, as is the case with "Pudd'nhead Wilson."

While "Pudd'nhead" is not by any means Shakespeare, it is familiar to many audiences.

> "It's hard to book a new play, but it's easier to book a new play based on a novel that people recognize," Harley said.

> > The Acting Company is in

the middle of a five-year program that is commissioning five plays from American novels, beginning last year with "O Pioneer!" by Willa Cather. While performing is a main focus of the troupe, they are involved with smaller workshop in the towns

> teach the workshops. "Teaching makes me think about what I'm doing in the shows," actor Zeigen said. "I try to apply what I teach to what I

along their tour. The actors

The Acting Company will conduct two workshops today that are open to the public. At 12:30 p.m. in the Purple Masque Theatre, an improvisational workshop will be taught. In Nichols Theatre at 3:30 p.m., the troupe will prese workshop called "Clues to

Shakespeare." The company might be on stage for a few short hours and most of the faces are not big names, but Margot Harley said to give them a few years.

"It's a young company." she said. "We had Kevin Kline and Patty Luponne in our first troupe. It's a company that becomes actors people will see again and again in their lifetimes."

### MORE INFO?

The Acting Company will present a free improvisational workshop at 12:30 p.m. in the Purple Masque Theatre and the Shakespeare workshop, "Clues to Shakespeare," at 3:30 p.m. in Nichols Theatre.

# Cosmonauts come to campus, discuss possibility of life on Mars

Kansay State Collegian

K-State students and faculty were scattered through the K-State Union Forum Hall on Thursday, waiting in silence for the lecture "From Mir to Mars" to begin.

Alexandre Martynov and Pavel Vinogradov, two officials from a Russian space agency, traveled to Kansas to lecture about the histories and wonders of space exploration, space technologies and future space

exploration. The pair spends about three weeks in the United States each year lecturing about the Russian space program.

Vinogradov, who spent 192 days on the space station Mir in 1997, also talked about life aboard the station.

Martynov began by describing the surface of Mars. He said Mars is the most suitable planet for forms of life to survive.

"It is highly possible that there are other civilizations in space," Martynov said.

He said so far, there has been no proof of life on Mars, but scientists aren't giving up. After discovering micro-organisms that can survive in extreme conditions, officials wonder if the same type of micro-organisms could survive in Martian meteorites,

Martynov talked about the possibility of humans landing on Mars. He discussed the problems and prospects of such a trip. He also played a computer-generated video showing the audience what a human-manned trip to Mars would be like.

While on Mars, humans would dig wells 50 to 60 meters deep and bring back soil samples to be scanned for traces of life.

Vinogradov said not all of the technological and psychological

"I enjoyed hearing about how dedicated they were to work with the United States,"

Wes Nelson, freshman in mathematics

problems of a trip to Mars are solved, but he said he thinks space officials are very close to realizing this dream.

Both men spoke about the importance of American astronauts and Russian cosmonauts working

together to realize these goals.

"I feel the most important experience of my time on Mir was learning to walk together with Americans and Europeans," Vinogradov said in Russian as Martynov translated. "We worked together in many ways."

Vinogradov said space travel is still not comfortable, although it is livable. He said cosmonauts and astronauts must relearn how to eat. sleep, move, drink and perform other elementary aspects of life.

"It can be very difficult," Vinogradov said.

Vinogradov played a video that let the audience witness a walk through

# Local officials OK with redistricting

BY JAMES HURLA Kansas State Collegian

Manhattan officials were unfazed by the announcement that the redistricting bill passed through the Kansas House.

"In general, it will have a minor impact on the Manhattan area," John Armbrust, Manhattan Chamber of Commerce, said.

The bill, which redraws the 125 House districts, passed through the House and now must pass the Senate if it is to take effect.

Armbrust said the Chamber of Commerce is more concerned with the congressional districting for the U.S. House than with the redistricting for the state House.

City Commissioner Mark Taussig also was more concerned with the congressional redistricting, which the House will discuss later in the session.

"Ideally, Wamego, Manhattan and Junction City will all remain in the same district," Taussig said. "Right now we are economically and geographically linked in our own district.

Taussig also said he would like to see Fort Leavenworth and Fort Riley both stay in the same district because the two military bases should have similar repre-

"Eventually, though, as the population shifts, we'll have to bump into a different district," Taussig said.

### REDISTRICTING

Continued from page 1

State Board of Education and U.S. House districts to adjust for population changes reflected in the 2000

On Wednesday, the House first rejected and then approved an amendment putting Reps. Bruce Larkin, D-Baileyville, and Dennis Pyle, R-Hiawatha, in a new 63rd District in northeastern Kansas.

The amendment was offered by Democratic Rep. Bill Reardon of Kansas City - the chamber's longest-serving member. The original bill paired Larkin with a fellow Democrat, Jerry Henry, D-Cummings.

Another amendment, approved by voice vote, keeps Jackson County whole instead of splitting it between two districts. It did not affect any incumbents.

As amended, the bill keeps the cities of Atchison and Hays intact

and maintains the same number of seats from southeast Kansas. All three were contentious issues early in the process.

The map puts Democratic Reps. Doug Spangler and Broderick Henderson in a redrawn 35th District in Kansas City. However, Spangler already has announced he won't seek re-election.

The new 116th District would be home to Reps. Dennis McKinney, D-Greensburg, and Alan Goering, D-Medicine Lodge.

In northwest Kansas, Reps. Dan Johnson, R-Hays, and Laura McClure, D-Osborne, would both be in the 110th District.

One question during debate was whether Republicans would hold McClure to a promise that she will not run against Johnson.

Rep. Clay Aurand, R-Courtland, said the map endorsed by the House Redistricting Committee had been drawn on the assumption McClure would retire - an assumption he attributed to a misunderstanding.

Senators also introduced legisla-

### BASKETBALL

■ Continued from page 6

problems we have playing on the road, but we have problems," guard Nick Williams said. "Being here is a lot more comfortable than being anywhere else, but we need to bring that same intensity on the road."

K-State's last road outing was especially disheartening, guard Larry Reid said, as the Cats' were handed a 99-82 loss to Nebraska in Lincoln.

The Huskers shot 57 percent from the field and hit 12 threepointers in the rout.

"I was embarrassed. I thought that was a road win we were going to get," Reid said.

So Wooldridge felt the need to send a message. He removed pictures on walls, chairs in the film room and even the players' names on lockers - anything he considered a privilege instead of a necessity.

And the Cats responded with a 69-38 win over A&M.

The Aggies scored just 13 points in the first half, tying a Big 12 recordlow, and were limited to 25 percent shooting in the first period.

stand the disparity between K-State's last two outings.

Williams said it's tough to under-

"I don't know. I wish I could tell you," he said.

"We were really disappointed with our defensive effort at

Saturday showdown

K-State (10-12, 4-7) at No. 4 Oklahoma (19-4, 8-3) When: 12:45 p.m., Seturday Where: Lloyd Noble Center (12,000) TV: ESPN Regional - WIBW Channel

Nebraska, but they shot the ball very well. We wanted to come out, and we wanted to really prove to ourselves again that we have the ability to shut a team down."

That challenge will be a bit stiffer on Saturday.

Leading Oklahoma offensively are four players in double-figures, with junior guard Hollis Price topping that list at 16.9 points-pergame. Joining him is 6-foot-8 senior forward Aaron McGhee (14.7 ppg) and a pair of 6-foot-5 junior guards - Ebi Ere and Jason Detrick - who post 14.7 ppg and 10.2 ppg, respec-

Reid said defense will be the key to the game for the purple, especially against Price, one of the top scorers in the conference.

"He's a quick guy," Reid said of

"He can shoot the ball, penetrate and find open guys. He's a good player, and it's going to be a real challenge for our team going into OU Saturday.

### SENATE

Continued from page 1

The proposed allocation increase for operations would cost students \$4.50 in privilege fees.

Repair and replacement needs would include service equipment, modernization of the mechanical rooms and the installation of double-paned windows. Harder said many of the Union's projects would enhance its energy efficiency and cut down on utility costs.

These improvements, and a list of additional enhancements, would cost the student body an additional 2 in privilege fees. Harder said, though, that the committee's discovery of \$600,000 in excess

funds from the Union's original renovation project has reduced the amount of student fees for the projects.

UPC is seeking to fund First Friday events along with its additional programming. Student fees would increase \$1.75 for First Friday activities and \$1.90 for additional services.

First Friday activities are the first Friday of every month. Based on the program's success, Harder said UPC is hoping to provide the service once a week. He said K-State is the first school in the Big 12 to start the program.

Students need to have options on what to do on Friday evenings,"

Harder said the evening events

offer students free breakfast, games, crafts, movies and other sources of entertainment. About 200 to 300 students attend First Fridays, Harder

Additional program funding would go toward recruitment of entertainers and speakers.

Privilege fees per student last year were \$257. This year, students paid \$251.

Harder said the proposed increase in privilege fees for the next fiscal year also include about \$4 for additional funding on campus. The total increase in student fees for next year would be \$14. This would bring the per student fee to \$265.

The privilege fee committee's proposals will be voted on next Thursday.

# Crematory neglects to fulfill job

BY KRISTEN WYATT

The Associated Press

NOBLE, Ga. — Distraught families began the wrenching task of trying to identify loved ones Sunday in this rural community where dozens of decomposing corpses were discovered in the woods and in sheds behind a crematory

People completed Red Cross paperwork to help identify the bodies, and several dentists opened their offices to make dental records available

Pat Higdon of Chattanooga, Tenn., made the drive to fill out paperwork for her husband, Tommy Higdon, who died of lung cancer last fall. She said she chose to cremate his body because she couldn't afford a burial.

"He looked like a corpse for two months before ne died. He just laid there with his mouth open and his eyes open," Higdon said. "I can't bear to think he still looks like that, only he's lying in a shed somewhere."

The crematory's operator, Ray Brent Marsh, 28, was charged with five counts of theft by deception, a felony, for allegedly taking payment for cremations he didn't perform. Walker County and state authorities said other charges are likely against Marsh.

A magistrate released Marsh on Sunday after he posted a \$25,000 bond.

At least 80 bodies have been found in storage sheds and scattered in woods behind Tri-State Crematory in this hamlet about 25 miles south of Chattanooga, Tenn. Of those, 13 have been identified. The discoveries began when a woman walking her dog found a skull.

Officials said they also will search Marsh's entire 16-acre property and a small adjoining lake. Officials, who have set up a morgue at the site, say the property could yield several hundred bodies

"They've found so many other partial skeletal remains and evidence of graves, we don't know how many more are out there," Georgia Bureau of Investigation spokesman John Bankhead said late Saturday.

When asked why the bodies had not been cremated, Marsh said the crematory incinerator was not working, Bankhead said.

Stanley Payne of Chattanooga said he believed the Marshs' crematory would properly handle the remains of his mother, who died two years ago.

"We were childhood friends growing up together," Payne said of the Marsh family. "We trusted them.'

Dr. Kris Sperry, Georgia's chief medical examiner, said authorities suspect Marsh might have provided ashes from wood chips to clients as the remains of loved ones.

Authorities have asked families to return ashes for examination and have established an information center.

# SGA candidates begin campaigning on campus

SGA

Kansas State Collegian

Candidates for Student Governing Association positions began posting campaign materials Sunday at noon.

Feb. 18, 2002 Kansas State University Manhattan, R

All candidates must follow election regulation codes that are available at the Office of Student Activities and Services or online at www.ksu.edu/elections

"Everyone is subject to campaign regulations. It's usually not a huge issue," Ted Conrad, elections committee chair

Most of the infractions occur if candidates put posters or chalk in residence

hall zones, Conrad said. Campaign materials only can be placed in these areas if they are on a resident's door with the resident's permission, he

Gayle Spencer, SGA adviser, said there have not been many problems with campaigning or posting violations in past years. "It really just depends on the | 26 and 27. General

elections will be March 5 year. Last year, we didn't have and 6. any problems," Spencer said. "If there's a violation, the election committee hears it. Other people put in complaints against other people."

If there is a violation complaint, the

election committee handles it on a caseby-case basis, she said.

Kyle Barscewski, member of the

elections committee, said if other students think a candidate is violating campaign regulations, they can fill out a complaint form online to report the infraction.

Last week, all candidates were required to attend informational meetings where

election committee members explained and presented campaign regulation information.

Barscewski said the meetings were

standard to keep all candidates up to date.

"Generally what we look for is that people meet filing deadlines, post where they're supposed to post, and don't chalk where they're not supposed to chalk," he said. "I think for the most part, rules are clearly understood."

Candidates also turn in expense and contribution reports by 4 p.m. Friday for presidential and vice-presidential candidates prior to the primary election Feb. 26

All other candidates, including presidential and vice-presidential candidates that participate in the general election, must turn in reports by 4 p.m. March 1.

# Olympian experience

# Free simulator gives spectators experience of Olympic athletes

BY SARAH RICE Kansas State Collegian

SALT LAKE CITY - After waiting in a security line for up to three hours, Olympic fans entered Coca-Cola World, at the heart of Olympic Square in downtown Salt Lake City.

Coca-Cola "On the Ice," features free simulations of athletes' experiences while competing in the luge, curling, bobsleigh and hockey. Participants of all ages had the opportunity to compete in miniaturesized events.

"We are just trying to help people have a better experience," a Coca-Cola

See what's going on in Salt Lake City with exclusive Collegian coverage. Look for stories in Tuesday's edition to find out the latest news from the Olympics. See past coverage at www.kstatecollegian.com.

employee said. The line for the luge event was 3 hours. **Participants** 

sled around a 110-foot long ice track with a 90-degree turn, while a scoreboard kept track of their time. After the qualifying heats and

final runs, the top three finishers were awarded small medallions.

ABOVE: Olympics fans of all ages are given the opportunity to try out the short luge track at the Olympic Square. Participants waited two hours In line for their chance to experience an Olympic sport. LEFT: Families at the Coca-Cola tent in the Olympic Square were able to participate in a bobsleigh simulator that looks like the real thing.

Nicole Donnert/Collegian

Hannah Hardaway, the U.S. athlete who placed fifth in the moguls, came for a special appearance and tried out the luge track.

"It was pretty scary because when you come around the curve, you feel like you are going to tip over," she said.

At the bobsleigh event, Jim Purser and

his daughter Rachel, 9, waited in line for an hour. They pushed the bobsled on a 45-foot long sheet of ice as fast as they could, ending up with the bronze medal.

"It is fun for the kids," Purser said. "It meant more to her."

# Local businesses experience some changes, shifts in retail sales

Bad economy hurts, benefits everything from car dealerships to Aggieville, downtown stores.

BY SARAH BAHARI nsas State Collegian

Business in Manhattan might not be booming, area business owners say, but it is definitely not sinking

"I think it's going to be stable, but not strong," said Patricia Yeager, owner of Patricia's Undercover in Aggieville. "People are cautious.

And in some parts, they might have reason to be.

Nationally, the retail industry has been hit hard. Kroger, Dillon's parent company, announced layoffs at the beginning of the year. Toys R Us slashed 1,900 jobs and closed 64 stores in January. Kmart recently filed for bankruptcy.

Comparatively, Manhattan's had it pretty

Business has gone in waves, Yeager said. In the first few weeks following Sept. 11, spending was down a lot, she said. Yeager usually buys merchandise in October, so she was unable to purchase as much as usual last

"It's a fall-out effect," she said. "The effect is still being felt, but it's about to dissipate."

Randy Crow, marketing director the Manhattan Town Center, said this town was lucky.

"We stayed up while some centers went down," he said. "Given the circumstances, we were pretty happy.

While the mall suffered some setbacks, Crow said, it didn't rival that of shopping centers in some big cities. In fact, only one store closed, and its mall location was only temporary, he said

the slumping economy is affecting Manhattan

and K-State. Look in

an update on how

hard K-State families

will be hit when tuition

Tuesday's Collegian for

This is the first in a

There are a couple reasons. First, a university town offers

stability, Crow said. Many employees are students who work part-time, and students' spending habits aren't likely to change much.

Riley County's unemployment has stayed comparatively low at 2.7 percent, while the national unemployment dropped to 5.6 percent in January.

Second, mall employees decided to move forward, Crow

said. "It was consistent with what the president said, and we did the best thing we could," he

said That included providing the mall and individual stores with sales incentives during the holiday season, which encouraged people to go out and spend, Crow said.

In some industries, spending just shifted.

# Professor explains signs of economic downturn

BY SARAH BAHARI Kansas State Collegian

Cutbacks. Layoffs. Shortfalls. Unemployment rates.

Lately, these words have become all too familiar.

At the local level, officials worry they could have to raise taxes. At the state level, the Kansas Legislature is divided over how to compensate for a \$426million hole in the budget.

And at the national level, unemployment hit a 6-year high. Businesses cut 1.08 million jobs from their payrolls in 2001 the largest, single-year loss since 1982 when the country struggled through the steepest downturn since the Great Depression.

But how bad is the economy, really? That's hard to say-Michael Oldfather, associate professor of economics, said.

"It's not as good as it was in 1999 and 2000," he said. "One of the problems is we won't know for a couple of years just how bad it is. We always get conflicting signals during any given week. Good news and bad news.

The National Bureau of Economic

Research (NBER), which determines when a recession begins and ends, doesn't make that decision until months after it has

The NBER said the recession began in March. Typically, recessions last about a

Sept. 11 caused the economy to worsen, while consumer confidence dropped more than 10 points.

begun and passed.

Manufacturing was hit the hardest, Oldfather said. That's why Kansas hasn't had it as bad as the rest of the country. The state has some manufacturing, but not nearly as much as other parts of the

"We tend to move up and down with country," he said. "But we go up slower when the economy rebounds and fall

slower when the economy retracts." In fact, Kansas was one of the last

states to enter the recession. Still, there are a few signs of a reces-

sion, even in the Midwest. The first is unemployment. In only a few months, unemployment grew from less than 4 percent to almost 6 percent.

## STATE IN BRIEF

### Senate committee to take up congressional map issue

TOPEKA - Legislators, U.S. House members and even White House staffers will be watching as a state Senate committee turns its attention to Kansas' congressional

The Senate Reapportionment Committee planned to meet Monday to decide how best to redraw the state's four U.S. House districts to even out their populations. Whatever the committee approves then will be put before the Legislature.

The committee already has rejected four plans this month.

### State's budget problems force a debate on tax policy

TOPEKA - Budget problems this year have forced legislators to reopen old debates about tax policy.

In the late 1990s, when the state seemed to have more money than it needed, Gov. Bill Graves and lawmakers argued about which taxpayers deserved a break and which tax cuts best boost the economy

Now that they're looking for new revenue and hoping to avoid severe cuts in government programs, legislators have started arguing about which tax increases will hurt families the least, do the least harm to the economy and anger voters the least.

Graves and legislators must close a \$426 million gap between expected revenues and spending commitments for the next fiscal year.

The figure is expected to grow when the revenue forecast is updated March 8.

## **WORLD IN BRIEF**

### Government agency takes control of airline security

CHANTILLY, Va. - On the first day the government took responsibility for airport security, some passengers noticed extra vigilance and felt reassured by the change. Federal officials pledged Sunday to protect travelers and treat them with courtesy.

The second major deadline in the new airline security law passed as smoothly as the first, when airlines last month began inspecting checked baggage for explosives. A new federal agency now oversees aviation security rather than the airline industry and Federal Aviation Administration.

### Israeli leaders to consider response to recent attacks

JERUSALEM - Israeli police foiled an attack on an army base Sunday as the country's leaders considered their response to a new level of Palestinian attacks: a suicide bombing in a Jewish settlement, the destruction of an Israeli tank and rocket fire at Israel.

After sunset, police stopped a suspicious car at the entrance to an army training base near the northern Israeli town of Hadera, six miles from the West Bank.

Police said one of its two occupants started shooting, and they

One of the assailants was shot and killed, said police commander Yaakov Raz.

The other tried to escape but could not get through a roadblock, so he set off a bomb he was carrying, killing himself. Six other people were wounded, including three policemen, rescue officials said.

### Jury to decide if Yates was sane at time of drownings

HOUSTON - The fate of Andrea Yates hinges on whether the jurors who start hearing evidence Monday will believe she knew the difference between right and wrong when she drowned her five young children in their bathtub, then called 911 and told police what she had done.

The 37-year-old woman faces two capital murder charges in the June 20 deaths of three of her five children, ranging in age from 7 years to 6 months.

Defense attorneys say the former nurse turned stay-at-home mom is innocent by reason of insanity.

They will try to prove that she suffered from a severe mental disease or defect which prevented her from knowing that holding her children beneath water until they could no longer breathe was wrong.

### France changes currency from franc to new euro

PARIS - France officially buried the centuries-old French franc - out of business at midnight Sunday and hailed the euro at a ceremony hours before the clock pronounced the old money dead.

Giant sparklers mounted on the ground in the Finance Ministry courtyard consumed flags representing francs in a frenzy of fire. Flags representing the euro climbed the flagpole.

France was the third country after the Netherlands and Ireland to officially part with its national currency since the euro went into circulation in 12 of the 15 European Union countries on Jan. 1.

The other euro countries will give up their local currency by Feb. 28.

Golden Key National Honor Society

Meeting on February 21st at the Union at 6 p.m.

Zach Long/

Michael Day and Tyson Steffen are seeking the student body presidential and vice presidential spots. The pair said student interaction is their main platform

Zach Long/Collegian

# Presidential pair's platform focuses on improving international program

BY EDIE HALL

Kansua State Collegion

Zac Cook, candidate for student body president, is excited about making K-State the multicultural leader of the Big 12.

The enhancement of the international program at K-State is the biggest issue on Cook's and running mate Todd Kohman's platform.

Cook said the pair wants to do several things to strengthen K-State's international programs. Some of the basic things they want to do are increase scholarship support for international programs and increase the programs in

Cook said part of the goal could be accomplished by adopting an international education privilege fee of approximately \$1 per student per semester, and integrating an international studies curriculum into the undergraduate program in every college on campus.

Cook said it's his personal goal for 25 percent of graduates to have some form of international

experience by fiscal year 2008. Now, there is a little more than 1 percent per year of students with international experience.

Kohman said he would like to increase student voter registration in Manhattan.

Kohman said the pair plans to set up booths in the K-State Student Union where students can register to vote in Riley County. They also will try to incorporate voter registration into the freshmen and transfer student orientation process.

"Students need to have a more active stance on what goes on in the city they live in," Kohman said. "Some are here for four or five years and have no say about what goes on where they live.

Kohman also said he and Cook want students to be able to approach them about opinions or issues they have. He called this an open-door policy.

"Students may feel intimidated coming into the OSAS office," Kohman said. "We want to make it a warmer atmosphere, so students can feel like they can walk right past the secretary and see us without making an appointment."

Kohman said the pair got the open-door policy idea from listening to students' concerns and questions.

Another issue Cook talked about was setting up a recycling program at K-State. He said the Students for **Environmental Action** organization has worked on a recycling program

"We want to put some legitimacy behind their campaign and show our support for it," Cook said.

Kohman said the pair wants to represent students to the best of their ability.

"You hear all these things from students, and you wish you could put it all on the platform, but you can't do that," Kohman said.

"We are students, too, and we want to let others know what's going on and where their money is

# Student interaction important aspect of candidate's platform

Feb. 26 and 27.

March 5 and 6.

Kansas State Collegian

Michael Day and Tyson Steffen want to speak with students one-

> on-one to discuss their concerns and suggestions instead of sitting in an office waiting for students to come to them.

Day is running for student body president and Steffen is running for student body vice president. The pair said student interaction is an important part of

their platform.

The pair said they want to emphasize their commitment to reaching out to students instead of placing the responsibility on the students.

Day said, if elected, the two would be happy to meet with anyone, anytime.

'That is if we don't get to them first," Steffen said.

Most presidents say their door

is always open for students to come talk. Day wants to go talk to the students, he said.

"It's more than sitting in an office, you have to go and find issues people want addressed," he said.

Another aspect of Day and Steffen's campaign, they said, includes helping students to understand necessary measures the university will have to take, even if met with student resis-

"Students, people don't like spending money on frivolous things," Day said. "The tuition increase has got a lot of people worried."

He said the next step is to help students understand that the tuition increase must happen for the university, even if they don't

"We have the ability to listen," he said. "I want people to know who I am and get something good accomplished for the students and the school."

Steffen describes Day and

himself as more typical students.

"He's really good at listening to what people want, he's really good at networking," Day said of

The two grew up in opposite sides of Kansas and had not met each other before attending

Day grew up in Lawrence, with the Jayhawks, but said he would not trade his time at K-State for anything. There are great educational opportunities, the teachers are great and it is easy to meet friends, he said.

He met his running mate Steffen when the two resided in the same wing of Haymaker Hall. The meeting proves a testament to the ease of making friends at K-State, Day said.

"The whole wing is still good friends," Steffen said.

Steffen was born in Burdett, Kan. He said he was raised a Wildcat.

"I've made connections here that I'll have for the rest of my life," he said.

### Education Majors

Have you thought about the **Classrooms** in California?

> California has committed \$53.3 billion to education, and we need you to fulfill our promise to students.

incentives for

reducing class

sizes in other

grades, too.

Whether you're seeking your first teaching experience, or a first-class teaching experience, California is your answer. We're seeking graduating and experienced

teachers to lead our six million students into the future. And we're hiring in all areas of the state, for many types of teaching positions.

California has a uniquely diverse population, and we're looking for teachers who embrace these differences and use them to enhance the learning environment. Because the Classroom Reduction Act of 1996 reduced class sizes to 20 students per teacher in grades K-3, we have a renewed need for teachers in those grades. We also have a great need for teachers who specialize in math, science, ESL/bilingual education and special education at all grade levels.

### Bring your teaching degree to California

Our commitment to education translates into real benefits for teachers: Starting salaries of \$34,000 to \$44,000 for first year teachers; up to \$19,000 in grants for education loans; no-money-down mortgages with low interest rates; and other incentives for teachers in areas of high need.

We need you in California. It's easy to get here. For more information, call toll-free 1-888-CalTeach (888-225-8322) or visit our website at www.calteach.com

CalTeach Left Coast. Right Job."

# WHAT IF?

# Past presidents had many options, deserve respect for choice

n honor of Presidents' Day, and the fact that since we're in school we don't have time to celebrate it, I would like to take a little "what if" walk in the past regarding the presidency.

What if George Washington had wanted to be a king and not a president? Would we have generations of leaders surnamed Washington? The marketplace for ideas would have been stale. There might not have been the growth that has accompanied this

nation by a new set of ideas.

Thank you, Mr. Washington.

What if Abraham Lincoln had decided the Civil War isn't really worth fighting? We can

just allow the country to split up, and those who want slavery can have it, and those who want all men to be free could do as they please. America would have been in a world of hurt.

The United States would likely be like Europe, and who knows how long the split nations would have banded together. They might have split up the next year. Let's face it, that war taught us we are one, and the country will be forever unified.

As a result of the decision to fight for what Lincoln believed was right, we no longer have ludicrous ideas that one human being can own another. It helped pave the way for the civil rights movement, and eventually all Americans began to see that the "separate but equal" ideas were ignorant and outdated. Thank you, Mr. Lincoln.

What if Franklin D. Roosevelt hadn't turned the country around from the Great Depression? Would we have succumbed to another nation? How long would the United States have been able to survive? I am not saying the country would have been destroyed, but we wouldn't be where

We might have gone on with few federal programs for those who need them, and retirement savings might have only been for the rich. However, we probably wouldn't have had a social

security debate.

Thank you, Mr. Roosevelt. Jumping forward, what if John E. Kennedy hadn't handled the Cuban Missile Crisis the way he did? Would we have won the Cold War? Would there be a world here today? Who knows the answer? That was the road America never had to travel. Eventually, the U.S.S.R. collapsed.

Thank you, Mr. Kennedy. History will never write what ifs. At least they will not be based

upon fact or principle. Now, today, we find ourselves at a new crux in the road. How George W. Bush handles this war on terror will define our generation. It will set the tone for the future. Undoubtedly, he will change the course of the world.

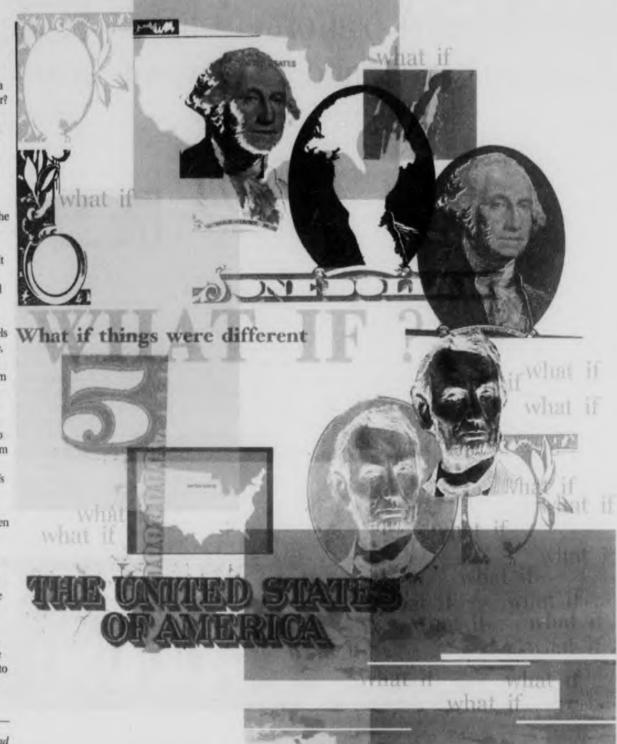

These truly are historic times we live in, and the unification of our country feels somewhat unreal. Personal politics aside, Bush has a larger than life quality about him when he is introduced. Watching him walk across the stage last week at the Winter Olympics brought chills to the

It was as if to say, there's the man who is in charge of our safety. We will need him to answer the call that Washington, Lincoln, Roosevelt and Kennedy did. Let's hope he can.

It will give us another reason to celebrate Presidents' Day. There have been 43 of them in all, and each has left a legacy. They have contributed to what America is today. I outlined some of my favorites, perhaps you have yours. I just thought today we would to take a chance to say thank you.

I guess that might not be the most important thing for us to do today. After all, there are tests to take, papers to write and lives to be lead. Just take a moment to thank those aforementioned leaders for the what ifs that never occurred.

# Citizens must realize impact of foreign policies

all me a traitor, a Commie or the "American Taliban." The bottom line is that I, unlike our president, am interested in

the business of saving lives rather than cashing in on

I know it's hard to grasp that we actually have other options available, other than letting Dr. Strangelove at 1600 Transylvania Ave. play high tech cowboys and

Indians with our troops, as well as with innocent lives overseas like pawns on a For every action, there's an equal and

opposite reaction.

John Stockwell, 13-year veteran and former station chief with the CIA, assessed in his book "The Praetorian Guard" that by 1987 alone, 6 million innocent humans had lost their lives as a direct or indirect result of our covert actions

(http://www.peace.ca/stockwell.wmv). For example, consider the CIA's involvement in the 1985 targeted car-bombing of Sheikh Mohammed Hussein Fadallah in Beirut - an incident that claimed the lives of 80 innocent Muslims, and injured 200 more as they left worship at a mosque (http://www.nwmissouri.edu/nwcourses/mar

tin/devread/statcrim.html). Too bad the Sheikh managed to walk away unscathed, and a brother of one of the victims became one of the most notorious terrorists in the region.

How about those United Nations reports about how U.S. sanctions on Iraq are responsible for the deaths of at least 500,000 innocent children? (Reuters, July 22, 2000)

Harsh sanctions restricting medical supplies, food and other vital necessities are another form of terror.

Until Americans understand what we're involved in around the world, covertly and overtly, they cannot understand "why they hate us," or why this "50-year" war on terror is a bigger fraud than Miss Cleo.

We lost a lot of respect in the region when the Clinton administration launched hi-tech attacks on the Al-Shifa pharmaceutical plants in Sudan, responding to bin Laden's atrocities in Africa.

my

# Rodeo club, team members help with Kids Rodeo

BY MICHAEL WATSON

Kansas State Collegian

Bound and determined, some children kept trying to lasso the bull-roping dummy. Others were less interested in roping the bull and more interested in climbing on it.

Children competed for the gold medal in horseshoe tossing, barrel racing and bull roping Saturday in the Manhattan Town Center at the annual Kids Rodeo, K-State Rodeo Club members and rodeo team members helped children practice their technique.

Justine Staten said her 3-year-old son, Garrett, wants to be a saddle-bronc rider. She said he has a real pony on their ranch, and he has a stick horse, a spring horse and a roping dummy. He came to the event to compete in full getup - wearing his tucked-in plaid shirt, cowboy hat and his cowboy boots.

"I really liked watching him," she said. "I know he had a lot of fun out there."

Tarrah Bammes, 4, said she liked all of the events, but said she really liked riding her pony around the triangular-shaped barrel course. Bammes used a trotting technique.

When asked how she rode around them so fast, she said, "My horsey is fast."

"She has three stick horses at home and she lives to ride them around the house. She gets a lot of practice," her mother Crystal said.

Crystal said the Kids Rodeo was a great event, because there are not a lot of things for young children to do in Manhattan.

"This was a lot of fun," she said. "We had no idea this was going to be here. We just came out shopping, and since it was here, we decided to rodeo.

Although Tarrah's trotting technique did not

earn her a medal in the barrel race, she was one of three contestants vying for No. 1 in the roping event as one of the Rodeo Club members announced a tie-breaker was needed to declare

The first girl was not able to lasso the bull, but when Tarrah stepped up, she watched her mother as she waved her arm in the air to show her how to throw the lasso. Then Tarrah faced the bull and threw her lasso.

Tarrah roped the bull and won the gold.

"I think it's good for all the kids," Crystal said. "Especially in Manhattan, because there isn't a lot of stuff for kids to do."

After contestants finished the three rodeo events, they got to keep the pony they rode during the barrel race. The ponies were a donation of Vanderbilt's of Wamego, a western

love competing, and it encourages them to come see the rodeo next weekend on campus at Weber Arena, just off Claflin Road.

There will be four performances on starting

# KSDB call-in forum to air listener comments

BY RYAN DONAHUE

Kansas State Collegian

K-State students have a new venue for expressing their opinions with the introduction of a call-in forum on KSDB-FM 91.9. Students will be given a

Call them Students can call KSDB-91.9's forum at 532-2331.

chance to record their thoughts and opinions over a phone line about current events,

sports and whatever else they feel like talking about for a later broadcast.

"I came up with the idea while reading the Campus Fourum in the paper. I thought to myself that, 'What would these people sound like?' I think it will be neat to know if they are male or female," said Jessica Strecker, the station's promotions director and senior in advertising and public relations.

The radio forum debuted during Friday night's Godfather's Top 25 Countdown.

"I think the advantage will be that there will be more real emotion in the quotes. I think the only disadvantage will be that people have the ability to scan the paper and read what they want to. On the radio, they will have to listen to everything," said Matt Jolly, the station's program director and senior in mass communications.

The radio station has set up a phone number that will run 24 hours a day to record caller messages. The phone number has been operational since Thursday morning, Strecker said.

"Right now we're thinking it will be more of a free-for-all. Hopefully, they will stick to current events," said Bill Hurrelbrink, the station's production director and senior in social sciences.

Strecker said the calls will be approved and screened by Jolly, Hurrelbrink and herself for appropriate content before being placed on the air. But the station staff plans on giving some leeway for crudeness and profanity in

"We will just bleep them out," Hurrelbrink said.

Leaving the profanity in will give the radio forum more of an edge and give way to some humorous quotes, Jolly said.

Strecker admits that one disadvantage to the station's audio version of the forum is that the caller's actual voice will be broadcast.

"Hearing their voice on the air might hinder some callers, but I think that brave souls who will actually call will want to be heard," Strecker said.

Jolly also said good sound bytes from callers will be posted on the station's Web site later this

The Web site also will have guideline information for callers about what they can and cannot say, as well as the forum phone number.

"Callers will get on the phone, express it the way they want to, and just say whatever they want to," Jolly said.

Hurrelbrink said callers should not be scared.

"They should have a good time and have fun with it," he

# 5 houses participate in National Pan-Hellenic Council Greek Week to honor black history

BY AMBER KOEHN

Kansas State Cullogian

K-State's minority greek houses are coming together this week as "The Five Elements of a New Revolution" for the National Pan-Hellenic Council Greek Week.

The week, established to honor Black History Month, is the first of its kind, Delvin James, the week's organizer, said.

"It's been a tradition for each of the separate houses to have their own greek weeks, but this is the first time we are all getting together,"

James, senior in social science and member of the Phi Beta Sigma, said he hopes the week becomes an **BLACK HISTORY** MONTH

annual tradition.

"We always do individual things, but we want to come together more often," he said.

The five houses participating are: Phi Beta Sigma, Delta Sigma Theta. Sigma Gamma Rho, Zeta Phi Beta and Alpha Phi Alpha. They represent wood, fire, metal, water and earth. respectively, James said.

"Each house signifies an element, hence, our theme," he said.

James said the houses decided to come together to promote unity

throughout campus and make

"Since this is a predominantly white campus, we work hard as minorities to get ourselves known," he said. "We like to show others how unified we are. We don't just party. We do community service and sponsor events for the students on

James said the minority houses have a hard time recruiting members because most people either don't know about them or have preconceptions about them.

"We want people to know us personally, not just for the letters we represent," he said. "We are somewhat at a disadvantage because of our small numbers."

Orion Carrington, junior in

finance and Alpha Phi Alpha member, said the houses also are coming together to do different things for the community.

'We're going to do different community service projects and uplifting events throughout campus," Carrington said. "Tuesday is professional-dress day where we're all going to dress up."

Carrington said when students dress professionally, they feel more professional

"Since we are role models to our peers, we can show the mind set everyone should have at college," he

Other events for the week include a free wings night at Gilligan's on Thursday and community service projects at Wonder Workshop on Friday, Carrington

"We're going to be buying up 10cent wings at Gilligan's and giving them out free to the public,' Carrington said. "We're also going to be going to Wonder Workshop on Friday and doing the stuff they're unable to do because they're so busy with the kids."

Carrington said the houses do several activities with Wonder Workshop and other charity organizations in Manhattan.

We usually work with the kids or help to clean up the workshops. In the past we have raked leaves," he said. "We also help out with Boy

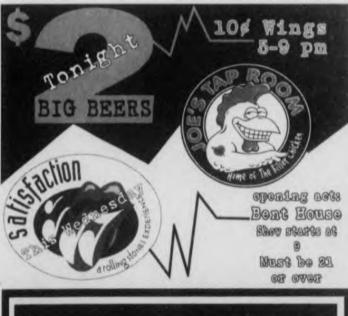

and the Boys and Girls Club of Manhattan."

Both James and Carrington said they were looking forward to the week's events.

"We have a lot of hard workers who have put a lot of time into this week," said James. "I am looking forward to interacting with the campus and letting the students know that we are here, and we are

Carrington said this week is very important for the unity of the

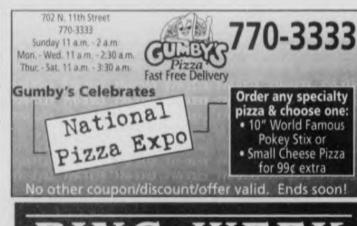

"I enjoy the togetherness of it all the most," he said. "When you see that many African-Americans together doing something positive, it's always a powerful thing."

# Road woes continue for K-State

BY DEREK BOSS

Kansas State Collegian

K-State had much to smile about after a 69-38 rout of Texas A&M on Feb. 12.

But guard Nick Williams said the team wasn't content. It had a matchup with No. 4 Oklahoma Saturday in Norman, and the Wildcats hadn't won away from home all year. In fact, K-State was 0-7 on the road at that

point, and just 3-28 during the past three years. "It was a lot of fun to get this win," Williams said after the A&M win, "but we're still not satisfied. We want to get a road win, and we

have three more games left." Make that two games. Despite a strong-shooting first half, the

Cats (10-13, 4-8) lost in Norman, 73-62.

'We couldn't put a full 40 minutes together today," Coach Jim Wooldridge said Saturday. "They are a very quick team, and they exploited that today. At times we played really well, and at times we couldn't hit anything."

The game was tight early and the Sooners never led by more than five in the first half. A Jason Detrick three-pointer before the buzzer gave OU a 35-32 advantage at the break.

But five minutes into the second half, with the Sooners on top 39-37, things started to unravel for the purple, after an Aaron McGhee jumper sparked a 9-0 Oklahoma run.

Larry Reid then hit a three to cut the deficit back to single digits, but the Sooners reeled off 10 more points - all from Detrick and guard Ebi Ere — to nab a commanding 58-40 lead.

Collectively, it was a 19-3 spurt for OU. K-State would get no closer than 11 again.

"We just had to bounce back from the OSU loss," Detrick said, referring to the Sooners' 79-72 overtime loss at Oklahoma State last Wednesday. "We just had to find our defensive

OU found that attitude in the second stanza, holding the Cats to 37-percent shooting - 15 under their first half effort.

K-State did limit the Sooners' top offensive weapon - guard Hollis Price - to just 3-of-11 shooting and seven points. But he had help.

McGhee led all scorers with 22, and Detrick, who was making his fourth start of the season, added a career-high 21. OU also capitalized on the boards, as the Sooners grabbed 17 offensive rebounds.

"They are so quick and very deep that we just couldn't hang with them," Wooldridge said. "They asserted themselves really well on the boards, and that was a big difference." - K-State Sports Information contributed to

# 6 tracksters get victories at KSU Open

Kansus State Collegian

Three was K-State's magic number at Ahearn Field House last Thursday and Friday during the KSU Open track and field meet.

The Wildcats got a trio of wins from both its women's and men's teams to finish the home portion of the indoor season.

"The things we wanted to accomplish, for the most part, we did," Coach Cliff Rovelto said. "We had some season-bests and personal-bests in some events."

K-State's women kicked off the meet on Thursday with wins in the shot put, weight throw and long jump.

Senior Austra Skujyte improved on her NCAA automatic-qualifying mark in the shot

put with a 54-foot, 7.5-inch throw. The Cats went 1-2 in the shot put, as Skujyte won the event over teammate Rebekah Green. Green would come back later

to win the weight throw at 56 feet, 7.5 inches. K-State's Carmen Wright took first in the long jump, finishing 10 inches ahead of the

second-place jumper at 18-feet, 10.5-inches. Friday's competition was also successful. Wildcat tracksters C.J. Jamison, Jared

MacLeod and Terence Newman each earned wins for K-State.

Jamison won the triple jump at 50 feet, 1.25 inches.

MacLeod followed up his 8.01-second preliminary time in the 60-meter hurdles with a 8.07-second first place finish in the finals.

Newman took the 60-meter dash in 6.7 seconds after recording an NCAA provisionalqualifying time of 6.69 in the preliminaries.

The home meet was a chance for several athletes to get a week of rest before the conference championships next week in

# Wildcat faithfuls dominate stands at Allen Fieldhouse

BY MICHAEL NOLL

Kannas State Collegian

LAWRENCE - It took K-State two hours to defeat Kansas 65-40, but for the fans, the result might have been a foregone

A mass of purple chanting "K-S-U" crowded outside of Allen Fieldhouse 90 minutes before tip-off, and the enthusiasm only increased once the Wildcat faithful entered the

Of the 11,858 fans in attendance, nearly two-thirds wore purple. One man even brought a trumpet to play "Wildcat Victory" when the Cats took the court.

"It's beyond description, our fans. It seriously did feel like we were at home," freshman guard Laurie Koehn said. "They were just loud and noisy. I think I even heard some guy with a trumpet playing our fight song.

"They were just unbelievable, and we can't thank them

For their part, the Wildcat players gave the fans plenty to cheer about early on. After KU hit the game's first basket at the 19:07 mark, three different Cats took their defenders one-onone and scored three consecutive baskets.

K-State didn't slow down, either, eventually running the score to 19-4 halfway through the first period. The Cats led 30-14 at halftime, forcing the Jayhawks to fight an uphill battle the entire game

"If we're on the other end of that, it's hard to come back from a deficit like that," freshman forward Kendra Wecker said, "That's something we try to do is jump on teams early and get the crowd into it and get our intensity up and everyone on our team and our bench into it."

K-State's early lead was due more to its defense rather than offense. The Jayhawks didn't score a single basket in the paint in the first half, and KU's most potent offensive threat, KC Hilgenkamp, had just four points.

"I thought we took our defense to another level today," Coach Deb Patterson said. "I thought between our defensive intensity and our intensity on the boards, we made this a very, very tough basketball game for our opponent.

"I thought we played true to the game plan, and credit the individual players for that. They stepped up and did their jobs, individually and collectively.

The fact that K-State out rebounded KU 56-29 was a key statistic, especially since the Cats have been on the opposite side of those number for most of the season.

"We haven't really been doing the job on the boards lately." sophomore forward Nicole Ohlde said, "so I think we just wanted to come out and put a body on someone from five positions and try to dominate on the boards."

Ohlde and fellow forward Wecker also created havoc on the offensive end, combining for 37 points.

"What we have seen in the last two games is Ohlde and Wecker beginning to become a double low-post threat, and that bodes well for our team, and is something that we need to continue to develop," Patterson said, "They were both, I thought, exceptional in the paint today."

The end result was that KU coach Marian Washington was left wondering what happened.

"We were never in the ballgame, as far as I'm concerned. I thought Kansas State did a good job," Washington said. "We

obviously didn't score very well in the first half and struggled throughout the ballgame defensively. We were simply not

K-State, however, was ready to celebrate after the win. After the final buzzer sounded, the Cats huddled and then took a victory lap around KU's gym. A female fan held up a sign that read, "Bramlage East."

"It was a lot like a home crowd. It was absolutely fabulous," Patterson said. "I've never seen anything like it. To be on the road and walk into the arena and feel like the arena was packed with our fans was just beyond description."

Kansas State Collegian

After committing six errors in last Tuesday's 21-8 season-opening win over Doane College, K-State coach Mike Clark knew his club had some work ahead of it. Apparently Clark's players bought into that philos-

ophy during the week's practice, too. K-State (2-0) reduced its error total to two in a 12-2 win over Southern Nazarene (2-2) Friday at Frank

Myers Field at Tointon Family Stadium. The Wildcats scored runs off four of five Crimson Storm pitchers and spread seven Southern Nazarene hits between seven K-State hurlers to stay unbeaten in

"This was a much different game than on Tuesday," Clark said following the contest.

Junior Ross Hawley got his first start of the season and struck out two batters in two shutout innings to keep the Crimson scoreless long enough to get the Wildcat bats going in the third inning.

K-State took a 2-0 lead when junior designated hitter Pat Maloney's homerun cleared the right-field scoreboard off Southern Nazarene's Bryan McCann.

The Crimson Storm starter dropped to 0-1 on the season

Amad Stephens didn't fare much better for the The SNU reliever faced six Wildcat hitters in the

fourth and surrendered three runs on three hits while

Junior third baseman Ryan Baldwin broke open the inning with a double to left-center followed by a run scoring triple by junior catcher Tim Doty. Doty scored a batter later on a sacrifice fly by senior outfielder Nick

"We had a whole different mental attitude when we came out for batting practice today, and we just carried that on through the ballgame," Clark said.

K-State tacked on four more in the sixth, following up a scoreless fifth inning with runs on two Southern Nazarene errors and a two-run double by Doty.

The Wildcats led 9-0 at that point, but didn't need near as much as they got, thanks to a solid fielding

Senior Brock Smith faced eight batters in the third and fourth innings, giving up one hit and a walk, to get his first win of the season. Clark, who had planned to use seven pitchers in the contest, got what he wanted out of all of them, as the Crimson struggled all day.

"I thought our defense kept them out of the big inning, and our pitchers did a good job of throwing strikes," Clark said.

"It was a great step in the right direction for this team, but we have to keep working hard."

K-State wraps up its three-game homestand 2 p.m. Tuesday at Frank Myers Field against the Creighton Blue Jays, before heading to Homestead. Fla., this weekend for the Homestead Challenge against Lipscomb and St. Francis.

Zach Long/Collegian

K-State shortstop Brett Williams makes a throw Friday at Frank Meyers Field. The Wildcats beat Southern Nazarene.

# Still torn

# Imbruglia's lyrics improve, music lacks

Attempting to transcend her current status as a flash-in-the-pan diva who sang that song ("Torn") that's been on the radio for the past five years, Natalie Imbruglia has done enough to secure her position as a singer.

The result of her sophomore effort, "White Lilies Island" is an album that extends the current trend of smarter, more introspective pop albums. Imbruglia proved she was more than a soap-opera queen on 1997's "Left of the Middle," but on this album she proves the album was no fluke.

This is the darker side of Imbruglia's personality. These are tougher, smarter lyrics hidden by big, slick, produced pop.

Take the pain of every heartbreak you've ever felt and cram it into a disc of music that sounds like a rocked-out version of Jewel, and you'll have an idea of what to expect.

On "Butterflies," the allegories sound more like something you'd hear on a Leonard Cohen album as she sings "Sickened by the notion / I give myself again / Choking on the bullet, the gun that's found a friend / So raise your glass to sorrow / And drink to all the pain.

The unfortunate thing is that such excellent lyrical skill is hardly highlighted by the overdone music. Instead of working with producers aiming for a radio-ready sound, the lyrics would have been handled better under White Lilies Island"

the care of someone like Aimee Mann ("Magnolia" sound(rack) "White Lilies Island"

ALBUM REVIEW BY JJ DUNCAN comes off with a sound that, while well done, is nothing new or memorable. It sounds like a lot of other things (Jewel's new

that makes you want to repeat a song.

The strong point is that the album is very well rounded. If anything, the weak links are in the singles. This is a well thought out CD you can let play the whole way through.

The first single, "Wrong Impression" takes on the insecurity of love, but is far from the best work

than many of the songs as she sings "Didn't want to leave you with the wrong impression / Didn't want to leave you with my last confession / Of

Her true lyrical skill is shown on songs like the hopeful ballad, "Hurricane," and "Butterflies."

"White Lilies Island" is worth checking out possibly even for people who didn't like "Left of the Middle," but the music could be better.

# New release more than another war movie

The recent flood of war movies probably has audiences wondering what happened to those legal suspense movies they used to make all the time.

The answer to that question is that the two genres have now been melded together to make "Hart's War." Think of it as a cross between "A Few Good Men" and "The Great Escape."

Lt. Thomas Hart (Collin Ferrel, "American Outlaws") has served his time in the Army behind a desk. His highly influential father made sure that when World War II called Hart away from Yale Law School he would be far from the front lines. But when Hart is captured in Belgium by German reconnaissance, his days of office work and safety are over.

The Germans put Hart through a relentless series of interrogations in

hopes of learning the locations of Allied fuel and munitions dur Hart's resistance is worn down after three days of mental and physical abuse, and he identifies the locations to his captors

\*\*\*\*

Hart then is transported with

hundreds of other captured Americans to a prisoner of war compound deep within Germany.

Inside the gates, Hart meets the commanding American officer of the camp, Colonel MacNamara (Bruce Willis, "Sixth Sense"). After learning that Hart was in interrogation for such a short time, MacNamara assumes he disclosed important information and

houses him in the enlisted men's

Before Hart has a chance to settle in, the stability of the camp is shattered when two black pilots are placed in his quarters. The two officers immediately are undermined, insulted

and even threatened by their white subordinates. The catalyst for the story comes in the form of Sgt. Bedford (Cole

Hauser), a self-serving bigot that plants a weapon on one of the black airmen, resulting in his execution.

When Bedford is found dead, the prime suspect is the surviving pilot (Terrence Howard), and Hart is chosen to be his legal counsel in the court

martial. In his search for the truth, drives the camp and the actions of its

Intriguing characters and strong performances make "Hart's War" an entertaining film. Both Ferrel's and Howard's performances radiate a sense of sincerity that adds weight to their characters' progressions.

The relationships between the men of the prison camp examine the double standard between German Nazism and racism in America, the honor and sacrifice of soldiers, along with the betrayal and fear that occur in

While "Hart's War" might appear to be cliché in some aspects, there is enough to set itself apart from the recent batch of machine gun movies.

# Stupid-guy plot produces ridiculous, hilarious results

MOVIE REVIEW BY JJ DUNCAN

\*\*\*

MOVIE REVIEW BY ADAM LEE

Moustaches and cops go together like peanut butter and jelly, and "Super Troopers" is a movie that exploits that and every other cop stereotype for hilarious results.

The movie pokes fun at modern images of police and brings "the man" down to the audience's level and lower. This is a ridiculous stupidguys-make-good type comedy. Think "Dumb and Dumber" in a patrol car.

A small highway patrol unit is on the verge of being shut down due to state budget cuts and also because they issue hardly any tickets and barely make any busts. A rivalry has developed between the unit and the local police who are moving in on the unit's jurisdiction.

The guys see a chance to save their jobs by busting a drug ring, but they have to compete against the local

cops and triumph over their own stupidity. If they can stop smoking weed

and playing practical jokes on speed violators long enough, they might have a chance.

The Broken Lizard writing team wonderfully makes full use of every gag the movie could possibly offer. Kevin Heffernan as the uptight Officer Farva is hilarious as he gets in a fight

with a kid working a fast food counter for messing with his order. And it might sound stupid, but watching a naked cop get shot in a bulletproof

jockstrap is about as funny as it gets.

Most of the cast is totally unknown and made up of the Broken Lizard

writing team. The brain behind the lizard is Jay Chandrasekhar, who directed, co-wrote and starred in the movie. The team first gained recognition for writing this season's shortlived college life sitcom, "Undeclared."

Look out for whatever Broken

Lizard puts out next. These guys are the next generation of stoner humor heroes, sure to take a place next to Kevin Smith and Cheech and Chong. In fact, "Super Troopers 2" is definitely something I would check

The movie isn't for everyone though.

If you don't like stupid-guy comedy, "Super Troopers" will have you groaning in pain for over 90 minutes.

The Broken Lizard team has cast themselves into full view, moustaches and all, and this is sure to draw the attention they need to make another

# misdirection

# K-State-Salina aviation program sees growth, changes

Kansas State Collegian

The aviation program at K-State-Salina has grown continually for the past few years and is now one of the top-10 ranked programs in the nation, but officials expect further increase in student interest.

"We are always continuing to grow. Compared with previous years' inquiries and admission pertaining to the program, we are equal to or higher than the average. Other aviation schools are seeing continued growth, and we expect to also," Dennis Kuhlman, dean of K-State-Salina said.

Kuhlman said the campus has had to make accommodations for students in the program through the years. Flight schedules have had to increase. The allotted times students could schedule flights were originally on just Mondays and Wednesdays. Now, the flight times have been expanded to include Monday through Saturday. If needed, they will include

"Universities are always in a state of change. We are always changing to effectively utilize our resources," Kuhlman said.

Marlon Johnston, head of the aviation department, agrees.

"We try to meet needs every year, and so far, we have always been successful," Johnston said.

Johnston said there is always potential for the aviation program to grow beyond its means. Right now, the program includes 290 student- professional pilots and

about 65 others in the aviation field. As long as resources are met and programs are maintained, students will retain the ability to be trained and to keep in step with demand.

Some students said if the department doesn't expand the program, other actions will need to be taken.

"If we don't make some changes, we are going to have to be more selective of people wanting in the aviation program because we are growing so fast," Tom Schmieding, student professional pilot said.

Officials in the aviation depart-

ment are making changes to next year's programs. Students bear the costs of flight fees, and some of those fees will be going up next

There has been an increase in the cost of insurance premiums that will have to be met by students. Warranty has expired for the Cessna 172, which means maintenance costs rise. The student government approved a \$2-per-hour salary increase for flight instructors. The Kansas Legislature also is working. on a tuition increase.

Besides the accommodations being made, the aviation department would like to see a particular benefit for students.

As of now, K-State-Salina's aviation program isn't affiliated with a specific airline or corporation. This is a change Kuhlman and

Johnston would like to see. "I would like to establish a firm pipeline towards a corporate use or major air carrier. This way a pilot or co-pilot could get an internship and have some company loyalty after graduation." Kuhlman said.

### OLYMPICS

Continued from page 1

Hardaway said the simulations give kids a wider variety of experi-

"A lot of these kids wouldn't be exposed to curling or the luge," she said. "This might spark their interest and make future Olympians.'

Ron Coleman, senior public and media relations manager for Coca-Cola, said Coca-Cola "On the "Ice" is for faithful fans who might not be able to experience the Olympic Games firsthand.

"It's for the fans who can't get

tickets to every event," he said. "This way, they are able to experience what it is to participate. It makes the fans feel a little bit special.'

In addition to the event simulations, Coca-Cola World featured an entertainment area where Olympic athletes appeared every hour for interviews and audience questions.

"We have fun with the audience and play some games," Coleman said.

Coke representatives also passed out their new product, a biodegradable cup made of 100 percent corn starch to audience members.

Finally, the pin trading center

Honest Abe Says:

Let's party and send the bill to my

featured lines of tables after tables with opportunities for visitors to trade Olympic pins.

"The pin trading is where individuals can trade and barter pins," Coleman said.

"We have a huge map of the world with pins that you can trade

A member of the U.S. men's curling team, who wished to remain anonymous, said he was serious into the trading.

'We design a pin for a fundraiser to finance athletes' trips," he said. "It is for the families of athletes - we have three in our family in the Olympics. We bring the extra pins here to trade."

Briggs Auto Group sold more new than used cars because manufacturers provided customers with zeropercent interest, co-owner Russ Briggs said. The store experienced one of its busiest third quarters last fall and stayed pretty busy throughout the fourth quarter, he

Now, business is starting to go back to usual, and people are buying more pre-owned cars again, Briggs said.

Future business is hard to predict, he said

"It'll be volatile," he said. "But the manufacturers have proven they're gonna be there for people."

The economy even helped out some businesses. Olson's Shoe Service in Aggieville

saw an increase in shoe repair, owner Edwin Olson Sr. said.

"People aren't spending money on new stuff," he said. "They're tightening their belts and fixing old shoes."

Olson said the store, which has been in his family since 1913, usually does not follow national trends.

"We always seem to do better

when people tighten their belts," he said. "When everyone's getting rich, we never seem to go that way, either."

Amelia's Home Ambience, in downtown Manhattan, experienced a boom late last year, owner Teresa Rickel-McMillin said.

"People were ready for a change by that point," she said. "A lot of families came in. People mentally needed that change."

Being locally owned helped, Rickel-McMillin said.

"We definitely have clientele that wants to support the downtown people who will only shop in locally owned stores," she said. "We're really fortunate for that."

Regardless of how strong or weak business has been, the economy has changed some retailers' outlooks.

"I buy more carefully," Yeager said. "I sort of advertise my niches that are unique to my store - things I know are not just gonna be everywhere. It's probably made me a better retailer."

Crow said the mall is trying to focus on the future. "We're cautiously optimistic," he

said. "The way the economy is going, there's a lot of uncertainty."

Briggs said his dealership will follow suit.

"It's business as usual, and we're still here," he said.

### RECESSION

■ Continued from page 1

While that might not sound like a lot, 1 percent equals about 1.4 million people, Oldfather said. One-tenth is 140,000 workers.

To economists, the Gross Domestic Product (GDP) is the most concerning.

"We had very little growth in GDP last year," Oldfather said. "We do know that we had more people to spread that GDP around to. We can say with some

certainty there was less available output per person."

Brad Harper, owner of Manhattan Check Service, a collection agency, said he sees some trends during recessions.

Overall, the number of checks that bounce stays the same, he said. However, what bounces changes.

"When the economy goes south, there's less discretionary spending," Harper said. "Checks. that people write are for staples -food and shelter.

"People rein in their spending."

Charlene Smith points out which pin she wants to trade with Anthony Sierra at a pin trading tent in Park City, Utah. Smith was looking to complete a collection of pins from every Olympic country.

# Mom's fate in hands of Texas jury

BY PAM EASTON

The Associated Press

HOUSTON - Andrea Yates faced the jury that will decide her fate for the first time Monday as a prosecutor described the scene police found after she drowned her five children in their bathtub.

The jurors must decide whether Yates had a severe mental illness that kept her from knowing right from wrong. Prosecutor Joe Owmby told jurors in his opening statement that under Texas law the defense must prove she is insane.

"She is presumed to be sane, to know right from wrong," Owmby said. "The state bears no burden of proof to prove she was sane."

The 37-year-old woman faces two capital murder charges in the June 20 deaths of three of her five children, ranging in age from 7 years to 6 months.

Defense attorneys say the former nurse turned stay-at-home mom is innocent by reason of insanity and suffered from a severe mental disease or defect that prevented her from knowing her crime was wrong.

"We know that drowning children is wrong," defense attorney George Parnham said during jury selection. "Objectively, we could all sit here and say those actions are wrong, but you're going to be asked to view those actions through her eyes.

Legal experts say he could face a difficult job during the trial, which is expected to last three weeks.

"When you have a crime like this that is so heinous, I think the jurors' inclinations are likely going to be somewhat disinclined to find insanity," Baylor University law professor Brian Serr said. "The fact that she was feeling psychological or mental pressure to kill them does not mean she was in some sort of psychotic state or that she - in a twisted fashion - perceived it

"The fact that she called the police right afterward and reported herself in essence really undermines the fact that she thought what she was doing was right."

Before jurors get to hear evidence about Yates mental state at the time of the drownings, they will hear the details of the case, including the 911 call Yates placed after she drowned the last child, Noah, 7, whose body was discovered face down in a bathtub half full of water.

They also will hear the confession Yates gave to police when they arrived at her door, how the officers found the youngest four children's wet bodies on a bed covered with a sheet, and a taped interview that followed her arrest.

Prosecutors also will likely point to testimony from Yates' competency hearing that she made the decision to drown her children the night before, and that after her husband left for work she drowned her children one at a time before her mother-in-law was to arrive.

"All of this indicates this wasn't a spur of the moment act," trial consultant Stacy Schreiber said. "But again, it goes back to explaining the nature of mental illness and a person's fight to stay in control."

# Tuition talk scares some; officials say changes will be minimal

BY SARAH BAHARI

Kansas State Collegian

Loretha Lewis has three kids in college. She helps pays for their tuition, room and board, and other expenses.

With the dwindling economy and talk of tuition hikes, Lewis can't help but worry a

"With our economy inflation and recession - 1 think it's going to be even harder," Lewis, a Wichita resident, said. "There will be people who simply won't be able to do that."

Lewis' daughter Angela is a freshman at K-State. She also has a stepson at Wichita State University and a daughter at Newman State University, who plans to attend K-State or the University of Nevada at Las Vegas

Like many parents, Lewis is maxed out and is considering taking out loans, especially if

her daughter attends an out-of-state college And with K-State considering tuition increases in the double digits, Lewis said many families will have trouble shelling out that kind of cash.

TOUGH TIMES

ncies will deal with

In Wednesday's Collegian read about

how social service

funding challenges.

four-part series about how the slumping economy is affecting

"A 20-percent increase would make it very difficult for people to adjust," said Lewis, who works in adult and professional studies at Newman University. "We are trying to promote educational availability to many people. This will affect the whole society."

Academic Management Services, which helps families pay tuition by arranging extensions or securing low-interest loans, reported a large increase in phone calls seeking

> information. In December alone, AMS fielded 17,000 more calls than it did in the previous year, an increase of about 25 percent. The company took about 1,000 calls from families directly affected by

Sept. 11. K-State will announce its tuition increase in March or April. The university is considering

increases from 3 or 4 percent to 27 percent, which will begin this fall and last for five years. University officials say raising tuition is necessary to keep up with university costs.

Officials do plan to make more financial aid available. Seventy percent of K-State students already receive some type of aid,

said Larry Moeder, director of student financial assistance.

The university's financial aid office has not had many more calls regarding finance, Moeder said. That could be because K-State parents haven't been hit as hard as others.

The lack of manufacturing sometimes shelters Kansas from the brunt of the recession, and the majority of K-State students are from Kansas, Michael Oldfather, associate professor of economics, said. Families on the east and west coasts are probably having more trouble paying off tuition bills.

When the economy worsens, Moeder said the financial aid office usually gets a few more inquiries, but nothing dramatic.

A tuition increase still will have a trickledown effect, Oldfather said. For example, retail stores could lose some sales, he said.

"If students are paying higher tuition, they'll have less money for recreation, entertainment, clothes," he said. "It would undoubtedly have a negative impact, but it's not certain how big the impact would be."

Talk of the increase has not affected the university's recruitment, said Dean of Student

Life Pat Bosco. "Finance is always a major concern," he

See TUITION on PAGE 10

### Paying the price

K-State officials plan to announce a tuition increase this spring to keep up with the costs of running a university. Proposals include hikes from 3 percent to 27 percent. The increase will go into effect this fall and continue for five years. Here's a breakdown of how much we could be paying

What we pay now for in-state tuition: \$77.75 per credit hour \$1,166.25 per semestr

\*With various hikes 1 year - \$1,201 2 years - \$1,237 3 years - \$1,274 4 years - \$1,312

5 years - \$1,351

2 years - \$1,411 3 years - \$1,552 4 years - \$1,707 5 years - \$1,877

What we pay now for out-of-state tuition: \$308.65 per credit hour \$4,629.75 per semeste

### STATE IN BRIEF

### 1 dies, 24 evacuated after apartment fire in Lawrence

LAWRENCE - An early-morning apartment fire Monday left one person dead, fire officials said.

The victim's name was not immediately available.

About two dozen people were evacuated from the 18-unit building, Deputy Fire Chief Mark Bradford said. No other injuries were reported.

The alarm for the fire at the Coachlight Apartment complex was turned in shortly after 1:30 a.m., Bradford said. The fire was brought under control in about an hour.

# Boonville girl found dead; FBI looks for information

KANSAS CITY - The FBI is looking for the occupants of a car spotted in front of the home of a Boonville girl found dead last week.

Eight-year-old Alyssa Owen was found dead Tuesday along a gravel road about eight miles north of

She was last seen Monday getting off a school bus at her home.

The FBI also has been seeking Alyssa's mother, Janice Marie Owen, 43, since Tuesday. Agents interviewed a man in Texas, but FBI spokesman Jeff Lanza said Monday that agents have no suspects in the girl's death.

### Student driving wrong way on Wichita freeway killed

WICHITA - A foreign exchange student driving the wrong way on a freeway was killed when his car collided with two other vehicles,

Tom Kariuki, 20, a Kenyan exchange student at Butler County

Community College in El Dorado, was killed in the accident Sunday morning on the Kellogg freeway near downtown Wichita.

Police spotted Kariuki, 20, traveling west in the eastbound lanes about 4:30 a.m., Capt. Gary Tabor said. They pursued Kariuki to a nearby exit, Tabor said, but stopped at that point for safety reasons and contacted the Kansas Highway Patrol.

## NATION IN BRIEF

### Top defense official praises Japan for help in terrorism

WASHINGTON, D.C. - A top defense official Monday praised Japan for its participation in the war on terrorism, but said recovery of the Japanese economy is just as important to international security.

Deputy Defense Secretary Paul Wolfowitz said there have been "extraordinary changes in Japanese security attitudes" since the Gulf War, and he praised Japan's contributions to the U.S. effort in Afghanistan.

Speaking to the U.S.-Japan Business Conference, made up of top companies from both countries, Wolfowitz said Japan has committed a third of its C-130 transport fleet to the campaign against terrorism. Japan also has been refueling naval vessels engaged in the operation.

### Sept. 11 tape shows FDNY response from inside tower

NEW YORK - The firefighters' movements are calm as they arrive at the burning north tower of the World Trade Center. Their eyes grow wide as the magnitude of their mission becomes clear. Then come the thumps - one after another - and a voice saying that people are jumping.

The horrific noises continue as the videotape shot by two French filmmakers keeps rolling. A drone followed by a sudden bang accompanies the image of a second plane slamming into the south tower and later, a white noise builds to a

crescendo as that tower collapses and people run for cover.

It has made the rounds of New York firehouses since Sept. 11 and recently was reviewed by The Associated Press. CBS plans to air footage March 10 to commemorate the six-month anniversary of the

### French judge says no deals made in skating scandal

SALT LAKE CITY - The figure skating scandal that has become one of the biggest soap operas in Winter Olympics history isn't going away.

In a newspaper interview Monday, the French judge at the center of the dispute denied that any deals were made and said she falsely implicated skating officials from her own country out of fear.

The judge is Marie-Reine Le Gougne, who allegedly favored a Russian couple in last week's pairs skate to ensure a gold medal for the French in the current ice dancing competition.

### ATTACK DEVELOPMENTS

- Afghan officials scrambled Monday to bring would-be pilgrims to the annual pilgrimage in Mecca, Saudi Arabia. A lack of flights has blocked thousands from making the journey.
- President Bush and Japanese Prime Minister Junichiro Koizumi engaged in three hours of private talks Monday in Tokyo, the first stop of Bush's Asian tour. "Japan shall continue to support the United States," in the war on terrorism, Koizumi said.
- The leader of Afghanistan's interim government said Sunday that more suspects had been arrested in the killing of the country's aviation minister and vowed that the perpetrators would be dealt with "very, very sternly."
- A new federal agency took responsibility for airline security Sunday, the first step toward a system where bettertrained, higher-paid federal employees screen passengers and luggage.

# Pair's platform to concentrate on campus environment, recycling

Candidates Al Gard and Jon Krasnoff are seeking the presidential and vice-presidential office. Gard and Krasnoff's platform Issues are energy conservation and campus recycling.

Jenny Braniff/Collegian

BY AMBER KOEHN

Kansas State Collegian

Al Gard and Jon Krasnoff are speaking out on behalf of the environment

"Our No. 1 issue is the campus environment," Krasnoff said. "We want to make the campus recycling program more efficient, and we want to help the university save money."

Gard, student body presidential candidate, and Krasnoff, Gard's running mate, said they want to increase awareness of energy efficiency and environmental conservation

"We are running for the good of the university," Gard said.

Both Gard and Krasnoff were involved in student government in Moore Hall and want to expand what they accomplished there throughout the entire campus, Krasnoff said.

"We found out we really liked government and wanted to get back into it before we left," Krasnoff said. Gard said he decided to run on

an environmental platform because

he thinks the university definitely needs to make some changes.

"I went to a recycling task force meeting for the city and thought about what I could do for the campus program," Gard said. "I realized the campus needed something better. I think we can save buku bucks.

Gard and Krasnoff did some research on energy conservation and found that the university can save a lot of money if it turns off unused lights and puts unused computers in the computer labs to sleep.

"The monitors are turned off, but some of the computers are left on," Krasnoff said.

Also, Krasnoff said they want to regulate facility temperatures to conserve energy.

"We want to go through each of the facilities to see just how much money the university can save," he

Gard and Krasnoff said their campaign goals can be successful.

'We have a physical, concrete platform, and we're focusing on

issues that can be accomplished," Krasnoff said. "If not now, then

definitely in the near future."

Gard said it is really important for students to get out and vote on the issues that are really

"If people got out and voted, they could really make a difference,"Gard

important to them.

Gard and Krasnoff said they want students to recognize their ideas for how good they are. "We're focusing on

what will better the entire student body, not just a few," Krasnoff said. "If we can't get

votes for the issues that matter, then Gard said environmental issues

are important and have been overlooked in the past. "I think this deserves attention from the students, but if having a cleaner campus and more money in

your pockets is not what you want,

then don't vote for us," Gard said.

Chris Greene and Greg Woodyard are seeking election for student body president and vice president. Their platform will concentrate on giving the students the most at the least cost.

SGA candidates want to make

quality improvements at low cost

BY MICHAEL WATSON

Kansas State Collegian

The most important thing the student body president should do is make quality improvements at low cost, presidential candidate Chris Greene said.

Greene, junior in pre-law and business management, and vice

presidential candidate Greg Woodyard, sophomore in accounting, said they want to give students the most benefit while they are here at K-State.

"K-State is already proposing tuition hikes," Greene said. "We want to make improvements that

K-State administration to get more time for students to relax during dead week Woodyard said they would try

to implement the new grading scale as soon as possible, so students could benefit from it immediately.

He said that if students work hard, but don't get an A in the class, the points would allow them to get a 3.5 on a 4.0 scale instead of getting a B and getting a 3.0.

Greene said parking also is a legitimate concern. He said the best answer to the problem is expanding the shuttle system from the KSU Alumni Association building to Edwards Hall.

"There are a lot of parking spaces at Bramlage," he said. "We are looking into the cost of the program and ways to fund the shuttle. The University of Texas has a shuttle that goes by apartments. We are looking into a similar shuttle that would pick up students and faculty at strategic locations."

Anneliese Snyder, executive director at the Smith Scholarship House, said

members Greene and Woodyard are more than qualified for the positions. "In a house like this, you

Zach Long/Collegian

don't get voted vice president if you don't stand tall. Chris is very active here, and he listens," Snyder said.

"He's a young man that motivates others. With Greg, the more work you give him the better he performs."

Integrity and trust - that is what she bases her knowledge on, she said.

Greene said he wants students to vote for the best candidates, and if the students elect him, he will be a good leader on campus and within the community. "Sometimes you have to look

people in the face, smile and

say, 'We're going to make it through this.' A good leader has to be willing to do what they have to do. "We'll both put in as much

time as needed or demanded of us," he said.

"I consider this the most important thing - representing K-State. We will do whatever is necessary to get the job done."

# K-State-Salina to have primary election for student body president, vice president

BY NICK BRATKOVIC

Karrian State Collegia

The K-State-Salina campus also is having a primary election to elect its student body president and vice president despite having three pairs on the ballot, Mike Higley, Salina student body president, said.

"We felt like it was in our best "interest to mirror what K-State does," Higley said.

He said the campus is having the primary for convenience and efficiency. If the campus does not run a primary election to determine the top two candidates things could get complicated, he said.

If Salina student senators had not chosen to have a primary election. one ticket would have had to receive at least 50 percent of the vote. If a pair did not make this requirement, there would have had to be a hand-counted run-off election, Higley said.

"That would have put us behind what the other campuses are doing," he said.

Originally, the vendor K-State uses to manage online voting didn't have

### Candidates

The following is a list of K-State-Salina SGA candidates. Salina Student Body Pres / VP

■ Lynsey Burnett/Betty Pina Kevin Gorman/Nick Sulzen ■ Seth Short/Jeff Taylor

Salina offices on the primary ballot. Ted Conrad, K-State elections committee chair, said this problem has been resolved, and the names are on the ballot. Salina students also will vote for the K-State student body president and vice president during the primary and general elections.

Online, Salina students will be able to vote for their campus' representatives who attend Salina senate meetings. Senators are voted on from departments, which is different from K-State where the senators are elected from colleges.

Higley said his key responsibility as Salina student body president is to represent his campus at the main campus' senate meetings.

"The main responsibilities are

outward communication between the Manhattan campus and the legislature," Higley said.

The key thing he does at K-State senate meetings, he said, is to ask himself how any issue might affect Salina. Three to four years ago, the Salina campus lost its ability to vote for student body president and vice president in the general body.

As a result, Higley said they had to lobby and work hard to get the voting privileges back. The ties between the

two SGAs are numerous, he said. Higley serves on the K-State presi-

FREE DELIVERY!

dent's cabinet. He also has speaking privileges at meetings, but he does not have the right to vote on issues.

In his duty as elections chair, he works with the K-State election

Higley said he does not see being both president and elections chair as a conflict of interest. "I won't be showing any favorites,"

he said.

This year he said student involvement in politics has risen. "The size of student involvement

is way up," he said.

dramatic 27 percent. The real decision is which plan officials will implement.

Students should be a part of this decision. Yet, for two reasons, they aren't.

One is that the majority of students did not take advantage of open meetings last semester. Instead of the students using these forums to state their opinions, chairs were empty.

If we don't take advantage of opportunities to make

ourselves part of the decision, we will have no right to complain.

On the other hand, students have been excluded from the decision this semester. This is wrong because tuition hikes seriously affect students and their families.

University officials should give students more opportunities to participate and voice their opinions - and students should use them.

Give us the chance to choose the method of increase, and, if we are smart, we will take our chance.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

To the guy who punched my window last night. Yeah, your mom still sucks.

# LESSON LEARNED

# Campus misunderstands holiday, looks for answers

State prides itself on promoting diversity and understanding. Despite this, an array of disturbing questions concerning race recently have achieved a prominent status around campus. Hopefully, this column will work to answer several of them.

"When are we going to have a White History Month?"

In the world of over-asked questions, this one is competing for

Throughout the past couple of weeks it has appeared numerous times, popping up in the Campus Fourum and casual conversation.

The motivation for such thinking stems from a misunderstanding of Black History Month, staged every February.

Those people who question the motivation for this monthlong celebration should first search its

As our nation has scholastically developed, history traditionally has been seen through the

narrow eyes of dead white males. In truth, every month is White History Month. A hundred years ago, the educational system of

the United States largely ignored many contributions made by black people toward the world and promoted many negative stereotypes. After a campaign by Dr. Carter Woodsen, a concerned Harvard graduate, the first Negro History

Week was established in 1926 to fight the distortions of history and draw attention to positive contributions made by black men and women.

After its initial success, the week eventually was expanded into the monthlong celebration we

view

Thus, Black History Month serves as a vehicle to furthering our understanding of the traditions and culture of a race important to the development of our nation. my

It is in Kansas, where schools are comprised of a mostly white population, that such education is especially warranted.

An unintended consequence of these

Jared Wiesner classroom dynamics is that history is often taught with a de-emphasis on contributions made by black Americans in the past

Every February, many teachers throughout the United States — often as a direct result of Black History Month — develop their lesson plans around a different look at history.

"Why is there a Black Panther exhibit in the Student Union? Isn't that racist?"

Sometimes a lesson is better learned through

pictures, not words. Despite the controversial philosophies of the Black Panthers, they were instrumental in the

evolution of civil rights in the United States. Without passing judgment on the Black Panther's activities, the Union provides a non-biased historical look at a crucial time in American history.

Just as exhibits on the Holocaust, Vietnam War and Ku Klux Klan trek across intellectual centers in the United States, the Black Panther exhibit helps provide students with a glimpse into a life many of us could never understand.

"Why is there a Black Student Union? When are we going to get a White Student Union?"

Honestly, we do have a white student union. It's called the Student Governing Association.

I'm not asserting that SGA in any way promotes racial discrimination or practices. It is my belief that the organization strives to balance the interests of all students at K-State.

Rather, I am alluding to the fact that the white voices on campus are being heard loud and clear. Those of us in the majority racial population on campus, including me, are well represented by our student government.

But with such a concentrated minority, it is necessary for some students to be able to come together as a group to have their voices heard.

K-State is a wonderful place to receive an education.

Since a wonderful atmosphere for learning is provided, the opportunity for mental and spiritual growth is extraordinary.

Despite this fact, I feel that many students are afraid to look past cultural stigmas and explore new ways of learning and interacting.

Through questions heard around campus, such as those above, I am continually reminded that we all have a lot to learn from one another.

To accomplish this, it is sometimes necessary to place a spotlight on certain groups, activities and

In this instance, by listening to a positive organization, showcasing visual presentations and highlighting the history of a minority group on campus, we are enriching our education in ways that a textbook cannot.

Jared is a sophomore in political science. You can e-mail him at jsw7333@ksu.edu.

to be some stinkers. However, we cannot let

# GTA's add leadership experience, humor to classes

walk into class on my first day of Public Speaking 105 expecting the worst. I am in some general education class and going to be taught how to speak good by some overzealous GTA. On the corporate table in front of me is a

Furby of a man swinging his view feet with all the formality of a mud-wrestling tournament. With his black

**Peter Morris** 

frame glasses and half-stubbled beard, Ryan Hurley barely looks old enough to drive, much less to teach a class.

By the end of the semester, I was convinced it was one of the funniest and most rewarding classes I've taken. All thanks to my GTA.

We all go through the hassle of trying to adapt to new teachers every semester. Certain questions arise when pondering the value of your future teacher on the first day of class:

What kind of teacher are they going to be? Will they know the material? Will they be able to convey the subject

matter? Will they buy me alcohol?

The main selling point of liberal arts colleges these days is the guarantee of a bona fide gray-haired professor to teach classes,

not a seventh-year senior. My question is, what's so bad about graduate teaching assis-

The application process for a GTA is well above asking your neighborhood Wal-Mart greeter and to teach Differential Equations.

Hurly, speech GTA, said the primary attribute of a good GTA candidate is a good academic record, consisting at least of an undergraduate degree with a considerable GPA from an accredited university.

This academic requirement makes sense, seeing that after studying four to five years on a subject you should possess the knowledge to teach a 100-level class.

The second criterion for a good GTA candidate is positive leadership experience. Leadership experience develops communication skills, organizational skills, conflict management, and assertiveness. All of these traits are exemplary of a good teacher.

The last criteria of a good GTA candidate is academic work outside of the class. The ability to demonstrate the knowledge of his or her area of study in the real world and to make a contribution to our understanding of the world clearly depicts someone worthy of a teaching position.

Liberal arts admission reps still will argue that professors are superior to GTAs, but consider the economic benefits to GTAs. Whereas professors are considered occupational professionals, and demand salaries stretching into six digits, teaching assistants

are given free tuition, a savings of more than \$2,000, and usually around \$8,000 in salaries. Keep in mind of course, that the poverty line in the United States is roughly, oh, \$8,000.

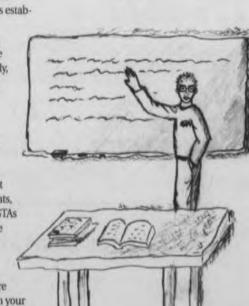

That's a lot of Ramen.

In effect, we are paying college graduates precisely squat, with a savings to the consumer of about \$50,000 a year per

Since GTAs are cheaper, we can hire more of them and allow a larger number of students to attend our university. As established in previous columns, the more college graduates we possess, the more inventive and competitive we are as a nation. More importantly, if it were not for GTAs, there would not be as many girls on campus.

Who can argue with that? Also, concepts like recitation classes would not be possible if not for the large number of graduate teaching assistantships at K-State. Although large lecture classes might mean more sleep for K-State students, in the end, the personal attention GTAs can allow students to develop a true learning relationship with the teacher.

By promoting GTAs, by no means do I imply that all of them are destined for Nobel prizes or will win your respect from day one. As with anything else in life, in every barrel of fish there are going

# Instructor takes on black history course

Kansas State Collegian

When students in an African-American History course walked into their classroom on the first day, they caught one glimpse of their instructor, and they immediately checked the room number to make sure they were in the right place.

Mike Davis, a white instructor of African-

American History, said students often are uneasy taking classes from him at first.

However, he said the students give him a chance to show them what he can do, and they usually like his teaching methods.

"I still hear some people that aren't in the class having problems with a white guy teaching a black history course, but I tell them to give me a chance and come see what I do," he said.

Davis said he first knew he wanted to be a black history professor when he saw the movie "Glory" in 1989 while he was an undergraduate student of history at Brooklyn College in New York.

He said that when he first started teaching black history at K-State, he had some fears walking into the classroom. He said preparing himself helped him to break his nervousness.

"I'm glad I thought about how I would handle it ahead of time," he said. "I found honesty to be the best policy. Point blank - I came out during the first 10 to 15 minutes of class, and I said, 'What do you think of a white professor teaching this course?"

He said there wasn't any hatred or animosity about him teaching the class, but the situation needed to be addressed.

This semester he is teaching American Ethnic Studies

nearly 70 students.

"I'm getting the kids to understand themselves better, but I'm also getting them to interact with each other. Wherever they go for a job, they may see a lot of diversity,"

Juanita McGowan, director of American Ethnic Studies, said Davis is unique. There are not many white teachers who can successfully teach black history

she said, but he is genuine, has an interest in the students and has the ability to communicate

serious dialogue.

"When students of color saw him teaching, they were suspect," she said, "but they were fascinated with him when they heard him

McGowan said putting him in the front of the classroom was definitely a risk because several national colleges have seen boycotts of white instructors teaching black history classes. She said one thing that makes Davis successful is his commitment to

Shay Wildeboor, senior in social science, said the American Ethnic Studies class is going really well this semester

"Mike is different from a lot of teachers. He doesn't sit behind his desk and lecture from the book. He gets students involved in class discussions," she said.

"We deal with and talk about past and present racial and ethnic issues.

Wildeboor said some people might be surprised when they first see Davis and wonder why a white guy is teaching the class, but he knows his history.

"I think that he really cares about his job and really cares about his students," Wildeboor

# Authorities expect to find 200 bodies at crematory

BY BILL POOVEY

The Associated Pres.

NOBLE, Ga. - The operator of a north Georgia crematory where dozens of corpses were found was arrested for a second time and charged with 11 more counts of theft by deception, authorities said Monday.

Ray Brent Marsh, 28, had been arrested Saturday and released from jail Sunday after posting \$25,000 bond on five original charges of theft by deception. He was arrested again Sunday night.

A call to Marsh was not immediately returned, and calls to the crematory were answered by a recording directing callers to the sheriff's office.

A bond hearing was scheduled Monday afternoon.

Authorities returned Monday to grounds near the Tri-State Crematory, where they had recovered 97 bodies stacked in storage sheds and discarded in woods.

Officials have said they expect to find as many as 200 bodies at the crematory, including some that had likely been decomposing for up to 15 years.

Walker County Sheriff Steve Wilson said authorities were asking relatives of people whose bodies had been sent to the crematory for any information that might help identify their loved ones, including surgical scars and dental records.

He said investigators were continuing the search, "bagging and tagging" the bodies as they find them.

Like hundreds of residents in this hamlet, Lisa Cash can't understand how anyone could leave her mother's body to rot alongside piles of other human remains.

Cash's mother, Norma Hutton, 55, died Dec. 31 of kidney failure. Based on her deceased mother's wishes, Cash asked for the remains to be cremated. They weren't.

Now Cash must try to reconcile

more on top. And then they just left them."

"They just piled them

on top and then piled

Dr. Kris Sperry, chief medical examiner

for her children the newly uncovered body of their grandmother with the urn that they were told contained her remains.

"They don't understand. How can granny be there and here too?" Cash said of her four children, ages 13, 12, 11 and 8. "I explained: 'Somebody lied."

Investigators said Marsh told them the bodies were not cremated because the incinerator was broken.

They just piled them on top and then piled more on top. And then they just left them," said Dr. Kris Sperry, Georgia's chief medical

"I wish we had a good explanation for this, but we don't.'

Authorities said they recovered 97 bodies - including one infant from storage sheds and in the woods behind the crematory. Sixteen have been identified.

"We're just barely skimming the surface," Sperry said. "Some of the remains are mummified."

Between 25 and 30 funeral homes in Georgia, Tennessee and Alabama routinely sent bodies to Tri-State for cremation.

One day after declaring a state of emergency to provide financial assistance to help identify remains, Gov. Roy Barnes visited Noble and met privately Sunday with about a hundred people who believed their loved ones were at the crematory.

"They are mad," Barnes said. "They are angry. I would be upset too. They thought they had closure on the death of a loved one and they do not."

U.S. AIR FORCE

# Tourney field still undecided

March Madness is upon us. Sure, I understand that it isn't March yet, but judging by the kind of basketball we're

Sean Purcell

seeing, it definitely feels like tournament

Maryland's 87-73 victory over top-ranked Duke proved that this

year's national

champion isn't as cut-and-dry as we thought. The Terps and Dukies have given us games during the past few seasons we won't soon forget, and both teams are in the hunt for college basketball's top prize in April.

This season, many teams have risen to the top, making the field of 64 that much more appealing. So what I'll do is break down where teams stand right now, and who might lay stake to Elite Eight and Final Four appearances in late March. First, we have to decide who will get the coveted No. I seeds.

Obviously Duke, Maryland and Kansas are front-runners for these positions. It looks as though Kansas will run the tables in the Big 12. and with the powerhouse strength of Duke and Maryland, these teams are a lock for top seeds barring complete fubars in their respective conference tournaments.

After that, things get a little hazy. Here are a few teams I think have the best shots of getting that last No. 1 seed:

Cincinnati: Don't let a stellar 22-2 record fool you. These guys aren't as great as advertised. It looks as though the Bearcats will get the final spot, but I would argue that they don't deserve it any more than No. 7 Gonzaga.

Cincy hails from Conference USA, where I believe they are just the second-best team in their conference. The Bearcats' two losses were to over-rated Oklahoma State and conferencerival Marquette

The Golden Eagles are 22-3 on the season, with a win over Cincinnati. The two square off later in the year, so we'll see who comes away with the Conference USA crown. Another loss to Marquette probably would bump Cincinnati down to a two-seed in the dance.

Oklahoma: The Sooners will drop a spot in the most recent poll because of their lack luster performance against K-State. In addition to a near upset to the hands of the Wildcats, OU has played less than top-seed basketball over the past few games.

Not only did the Sooners drop an overtime game to rival Oklahoma State, but Oklahoma also didn't show up against Texas A&M, winning by just four points. The Sooners are not making a strong case for the final No. 1.

Alabama: The SEC never has been stronger. Florida, Kentucky and Alabama all are in the top 10, with Georgia surging late in the season. Bama has posted a 10-2 conference record with wins over Kentucky and Georgia. The Tide still have a match-up with Florida on Saturday, which might decide who gets a final No. 1 seed bid.

Florida could sneak into that top slot, but five losses most likely will keep the Gators at a strong two-seed.

My pick - upset. Either way you go, the last No. 1 seed won't make it to the Elite Eight.

Cincinnati will be the Iowa State of last year, they might get by the weak 16-seed, but an eight-or nine-seed more than likely will send the Bearcats home crying in the second round. Oklahoma is a derailed train whose only hope of a turnaround is to make it to the Big 12 title game.

Alabama is streaky and unpredictable. They might be able to roll late into the tournament as a two-seed, but given the top spot, they might piddle down their shorts like KU is used to doing. The tournament will be fun, though.

Gonzaga is no longer Cinderella, which means an early exit. The Zags might get as high as a two-seed, but will be denied a chance to go to the Elite Eight.

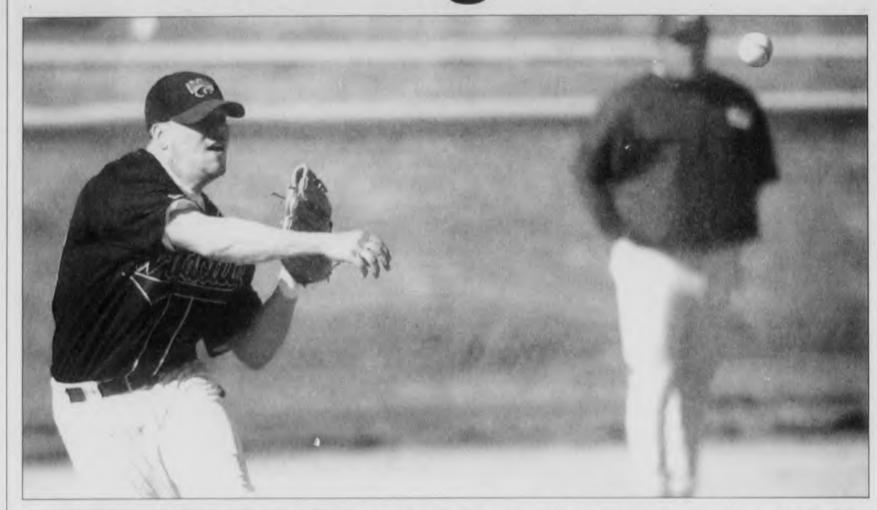

Teams like Pepperdine, Western Kentucky and Hawaii might step into the shoes the Zags, so graciously left behind. I also like the two Ms, Marquette and Memphis. These teams can put up points in bunches, so look for them to pull upsets against overrated teams like Illinois, Virginia and Pittsburgh.

But Brackettville still can't count out Duke to run the tables and repeat as champions. I will give Kansas more of a shot than I have in years past, but Jason Williams and Carlos Boozer will be too much for Harry Potter and his whining companion. Maryland just might meet the Blue Devils in a national semifinal, which will once again be a better game than the title contest.

One thing you can count on though, I will miss at least two classes just to stay in and watch the many upsets this year's dance will bring.

Sean is a junior in electronic journalism. 1 You can e-mail him at spu5598@ksu.edu.

# Challenge time

K-State third baseman Ryan Baldwin throws to second base during the Wildcats' winning game over Southern Nazarene Friday at Frank Meyers Field. K-State will be host to Creighton, a Missouri Valley Conference competitor, today at 2 p.m.

# K-State to face 1st obstacle in Creighton Blue Jays

BY ERIKA SAUERWEIN

Kansus Stare Collegian

Although today's 1 p.m. match-up against the Creighton Blue Jays at Frank Myers Field is K-State's third game this season, it will be the Wildcats' first challenge

After confident victories over NAIA teams Doane and Southern Nazarene, the Wildcats said they are looking to continue their streak against a tougher Creighton opponent.

"Creighton is a good ball club," Coach Mike Clark said. "They are an aggressive team. They are one of the better teams in the Midwest. It's going to be our toughest challenge yet."

The Wildcats outscored their two opponents last week 33-10, and although K-State didn't hold back on offense, Clark said the team lacked focus in the season-opener.

Tuesday tussle

Creighton (0-0) at K-State (2-0) Where: Frank Myers Field (2,549) Radio: none TV: none

"The first game was probably a lot of first inning jitters," he said. "In the second game, we were a little more comfortable. We got in a good game rhythm. The two games were like night and day. We did the things we needed

Junior catcher Tim Doty said he also saw a difference between the first two games.

"The defense was noticeably different," he said. "I thought we even hit the ball better, even though we didn't score as many runs.

We were better at the plate, and we fielded well, and just need to keep that going."

Today will be the 54th meeting between the teams and Creighton's season opener. K-State holds an overall 28-24-1 record over the Blue Jays. Last year, the Wildcats came out on top with an 9-1 victory in Omaha.

Although Creighton is picked to finish sixth in the Missouri Valley Conference this season, the Wildcats said they aren't taking the game lightly. The Blue lays have gone on to regional competition two of the last three years.

"They didn't go on to regional competition last year, but will be a challenge this weekend," Doty said. "In the past, they have always been a scrappy team. They play hard. They are always at the top in the region."

Creighton returns 15 lettermen and five starters. The Blue Jays could be starting three true freshmen today as well, but Creighton does have experience mixed in with its new faces. Junior catcher Tim Gradoville had 58 hits last season, including 12 doubles and seven homers.

But Clark said K-State isn't spending too much time talking about Creighton's lineup.

"This early in the season we are not worried about what other teams have," he said. "We are more concerned with our play. We don't want to worry about the other side." The Blue Jays' pitching staff is led by Steve

Grasley, who led the team last year with a 4.28 ERA. Grasley tallied 57 strikeouts in 61 innings last season.

Clark said he doesn't know what the Wildcats will face today on the mound. "We don't know what to expect to see

See CREIGHTON on PAGE 10

# Early pitching rotation starts to take shape for Cats

After using 10 pitchers in 18 innings of action so far this spring, Coach Mike Clark said it's time to see what the K-State baseball pitching staff can do with some real time on the mound.

"We are anxious to play and spread these guys out a little bit," Clark said. "We need to get their pitch count up, so we can see what adjustments need to be made.

Clark said Ross Hawley, Kevin Melcher and Brock Smith are potential candidates for

his club's starting rotation, and added that others are waiting for an opportunity to rock and fire for the Cats.

"Brock and Kevin really came on at the end of last season and pitched well for us," Clark said. "They have experience at this level, and Ross has thrown very well so far.

"There are also three or four other guyswho have established they could be in the mix as far as the starting rotation goes.

"Eric Rollins, Ryan Hawley, Mitch Walter and John Gutierrez have thrown well, and we are encouraged by what we have seen from

Pitching coach Mike Hensley said Ross Hawley, Melcher and Smith give the Wildcats experience and depth on a staff with talent to

"Melcher and Smith bring experience to an already experienced staff, and Ross gives us a clear-cut No. 1," he said.

A good starter recognizes the keys his staff needs to focus on to win baseball games. Hensley said.

Early on, it seems Ross Hawley has taken that role. The senior transfer has surrendered just one hit in three innings of work, but in the Cats' upcoming contests, Hawley said,

the staff will need to trust one another.

"We have a lot of depth," Hawley said. "We have a lot of guys who can go out and win games for us, but we need to keep the

"We have a good defense, and we need to let them work behind us. We are a close team. and we can win if we play for each other."

Pitching to start a game is one thing, but finishing it off is quite another.

Platooning 10 pitchers in two blowout wins has not allowed K-State to delve into its

PITCHERS OF PAGE 10

# Wildcats to treat week off as prep for postseason run

BY MICHAEL NOLL

Kansas Stare Collegian

K-State has its first weeklong break since mid-December, but don't expect the Cats to sit around getting their strength back.

They're not even tired.

"When you're really a big-time level competitor, the thought of fatigue or being tired or being run down doesn't enter the equation," Coach Deb Patterson said. "Exceptional players and great players and teams that are having success really don't look at or feel that way about their season. I think, in part, that's what separates them.

"Great teams and great players are just dying to play, and they're prepared for it,

and they don't think along other lines." Freshman guard Laurie Koehn might be one of those players. On the team's day off Monday, she could have spent the time relaxing, watching TV or any other leisure activity, but she didn't.

"If they let me shoot, I shoot," Koehn said. "If they don't let me shoot, I study."

Koehn's work ethic isn't an anomaly, either. Sophomore forward Nicole Ohlde said she also has to get in the gym.

"Most of us will go shoot today, just whatever you have to do to get the feel of the ball," Ohlde said. "You're sad when you're away from it for a while.

That kind of mentality hasn't always been a staple of K-State basketball, though, Last season, Patterson spoke often of the February grind as the Cats struggled through a 2-14 conference record.

"Last year's team was different in that we didn't have a lot of high-caliber players and athletes that were up to that challenge," Patterson said. "Losing wears

This year's team, though, has brought a new mentality along with its new players.

"A year ago we had different personnel, and probably mentally more than anything, that team may have approached their season or February differently than this group," Patterson said, "but that doesn't surprise me at all.

"This team could have lost 10 or 12 games, and I still think they would be dying to play the next day and would tell you that they're not tired.'

It's not as if these players never get winded, though. Everybody feels like they need a breather at some point, but they just have to push through it, freshman forward Kendra Wecker said.

Such determination might sound like inexperienced youth, but it isn't,

Wecker, left, tries to shoot while Oklahoma's Caton HIII (10) looks on during the Wildcats' loss to the Sooners on Feb. 13 at Bramlage Collseum. After their win at Kansas on Sunday, K-State will have a week off before playing at Colorado on Saturday.

K-State's Kendra

Zach Long/ Collegian

"A lot of people say, 'Well, they're just freshmen and they don't know,' but if you're as competitive as all of us are, that's just something that doesn't ever pop in your mind," she said. "When you're out there playing, you're out there to win and

nothing about being tired comes into your mind at all.

"There might be a few possessions where you feel like you need a break," she said, "but that's just something you have to overcome because you know that you need to be out there on the court."

### WHO: Vi Tran director of "Wildwood Park"

VI Tran, senior in theater and English, directs "Wildwood Park," showing at 11:30 a.m. Thursday in the Purple Masque Theatre as part of the free Lunchbag Theater series.

The play is about a realtor trying to sell a house that was the scene of a mass murder. She feels compelled to get the house sold as she grows more obsessed with it. "Wildwood Park" was written by "Quills" writer Doug Wright.

Starring Cindy Ellis, senior in music theater, and Brian Karlin, senior in accounting, Tran said this is his first experience as a director. Since the script calls for a bare set with no props, Tran said the illusion of the two walking through a vast colonial mansion must be achieved

through paritomime, lighting and sound With only two people in the play. Tran said the actors had to deal with an inordinate amount of lines and stage time. As a director, he said he had to make sure he was a good source for

> "I was surprised at how many questions they had for me," he said. "As a director, I'm their ultimate resource. I'm a guide, and I had to learn how to be that."

# SPACIOUS

# Gallery moves to newly renovated location

BY JJ DUNCAN

Kansus State Collegian

After putting the effort into renovating and moving the Strecker-Nelson Gallery to a completely new location, it's a good thing the dog is getting comfortable.

"Ann had a hard time adjusting to the new place at first, but she's finally decided she likes it here." Barbara Nelson, co-owner of the gallery, said.

Fortunately, the art hasn't complained about the new surroundings. With more wall space and room for larger pieces, Jay Nelson, coowner of the gallery, said some of the art looks better than it ever could have in the other gallery.

One example is Ann Piper's "Iceberg," which measures more than six-feet high and depicts a nude woman in a bathtub with heads of

"We couldn't have hung that painting in the other gallery." Jay said. "You couldn't get back far enough from it. We've got 12-foot ceilings in here so we can show things that are grand in scale, and they don't seem to dwarf the space."

Located at 406 1/2 Poyntz Ave. above Mid-America Piano & Organ, the couple has owned the new space since October and have spent \$85,000 on renovations, Barbara said.

Instead of being a space converted into a gallery, the new Strecker-Nelson is better for the art because it was designed from the beginning to be conducive to viewing the work, Jay said. Though the gallery is nearly identical in floor space to the old gallery, a great deal of wall space was gained in the move.

Working with interior designer and K-State graduate, Doug Demonbrum, the couple made full use of a chance to construct the site themselves from an empty space, Jay

"We gutted this place. We started all over." he said. "All the walls are intentional. All the rooms have two openings. There's no dead ends.

The walls are constructed so that you cannot see all of it at once, but you're tempted to go beyond the place where you are because you can see the next room from every room

The benefit of having a gallery designed this way is that more art can be shown. Jay said they can have a full show in the gallery, while always having designated space for certain artists. A room has been devoted to the sculpture of Eric Abraham, and another area is filled with Kansas landscapes by Ralph Fontenot, two popular artists at the

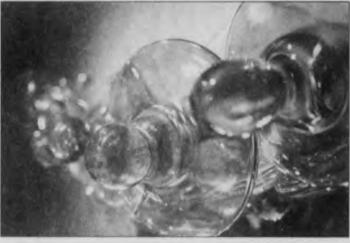

When working on the design for the gallery, Jay said they wanted to keep a feel for the old place while modernizing the look.

"Our focus was to maintain an architectural reference to the old space," he said. "People really liked that old gallery. We'd been there 22 years. But we also wanted to give it more of a contemporary feel."

Those familiar with the Strecker-Nelson Gallery will notice several differences. Colors were chosen to get away from the traditional white, and the light is more controlled with less glare from the windows, Jay said. This is also first-time work in the gallery that has been visible from the street through a large window in the front.

"When you drive by at night, there's a light on so you can see what

the show is, and it's pretty dramatic," he said.

Aside from a better place for the art, Jay said the integrity of the building is a step up as well. Refinished floors, new windows, central heat and air, plumbing and custom electrical work to accommodate the gallery's lighting scheme are all features of the new place, Jay said.

"The old place had window air conditioners and leaky windows," he said. "The main renovation aside from the mechanical was that we built these walls with an idea of the art we would show here."

Working on the new space took its toll. Jay said that for six weeks he

focused more on being a craftsman in the gallery than promoting art, so continuing to do business was difficult. To accommodate would-be buyers, Barbara said the gallery offers a payment plan for those who can't

So far, artist and patron responses to the change have been positive, and Jay said many artists have requested to show in the gallery. To research how the interior should look, Jay said the couple visited many galleries and museums, and took more cues from museums to avoid placing art too

afford to pay in full for a piece they

Barbara said they wanted to

TOP: Jay and Barbara Nelson are the owners of the Strecker-Nelson Art Gallery on Poyntz Avenue, which recently moved into a new building. They said they knew the move had finally been completed when their dog Annabelle became comfortable with the new surroundings.

LEFT: This glass work piece is by Patrick Martin. The array of glass pacifiers intertwined with a metal chain is an artistic look at the use of the drug ecstasy. create a space that was more welcoming as people walked in, as well as more logically organized.

"I like that now the offices and framing are centralized," she said. "It has the aspects of the other place but it flows more easily."

Barbara said she is glad to have the gallery in Manhattan, and she is pleased with the space, more than anything, because it was designed with a gallery environment in mind.

"This is a space that was designed to be an art gallery, not one big room where people decided to build a gallery, so they threw-white paint on the walls and hung up some paintings," she said.

# High school students get day's experience at college

BY JAMES HURLA Kanzas Stute Collegian

Going to class, club meetings and part-time jobs are all routine for many college students. But on Monday, high school students from all throughout the country

got a taste of what it's like to spend a day in the life of a K-State student. The College of Agriculture

sponsors Ag Experience, a type of shadowing program designed to introduce high school students to the agriculture programs at K-State.

Hundreds of students have participated in this event since it was started, and this year, 35 high school students attended, said Anne Davidson, co-chair of the event and junior in agricultural economics.

Davidson said Ag Experience played a vital role in her decision to attend K-State.

"It was actually this program that convinced me to come to K-State," she said.

Davidson said the opportunity to meet the professors and students in the college played a key role in her decision.

Each high school student

"It was actually this program that convinced me to come to K-State,"

Anne Davidson, junior in agricultural economics

followed an ag ambassador or ag representative enrolled in the same area that interests the high school student

The pairs spent the entire day together in order to give the high school students a more accurate impression of college life, Davidson said.

Jayne Bock, sophomore in feed science management, spent the day with Kim Malo, a senior at Topeka West High School.

"She got a chance to see what real student life is like," Bock

"It was more advantageous because she didn't have the prospective student folder to set her apart. She could blend in with the student population and go to class, which normally doesn't happen with regular campus visits.

Malo said she agreed that the visit gave her a realistic view of college life.

"It gave me a pretty good idea of what to expect next fall,"

Malo said.

In the morning, students were welcomed by Associate Dean of Agriculture Larry Erpelding and Keith Behnke, professor of grain science and industry.

Bock and Malo then toured the feed mill before attending

"There was a lot less interaction in the classes than in high school classes," Malo said.

In addition to going to class, Malo had the opportunity to see what Bock does outside of

"She got to see me doing some office work," Bock said. "She went with me to Lafene to get my allergy shot, too.'

With all the opportunities to see what college life is really like, both Bock and Malo said they especially enjoyed the one-onone aspect of the day.

"I love working with prospective students," Bock said. "It's really fulfilling to be involved in that transition decision.'

# Kansas girl's story leads panel to endorse ban on common law marriage

BY JOHN HANNA

The Associated Press

TOPEKA - Testimony from a 16-year-old southeast Kansas girl helped move the Senate Judiciary Committee to endorse a bill Monday ending common law marriage.

Sara Shelton, of Buffalo, Kan. told of giving birth to two children by a family acquaintance by age 14. Jerry Paul Crooks Jr. was convicted of rape and sentenced to 25 years - but claimed during his trial that they had a common law marriage.

Umbarger to advocate legislation invalidating common law marriages entered into after June 30 of this

"I don't see that we need common law marriages today," said Umbarger, R-Thayer, who serves on the Senate Judiciary Committee.

Both Umbarger and Sen. Derek Schmidt, R-Independence, said Shelton's case brought the issue to their attention.

Common law marriages, which require no marriage certificate, have been recognized in Kansas

since at least 1886, when the Supreme Court upheld a Shawnee County man's bigamy conviction based on the law

Only the District of Columbia and seven other states still recognize such marriages - Alabama, Colorado, Iowa, Montana, Pennsylvania, Rhode Island and South Carolina.

Tradition makes some legislators hesitate to ban the practice.

The House Judiciary Committee has a bill that would require a parent, guardian or judge's approval if one of the parties to a prospective

common law marriage is under 18.

House Judiciary Chairman Mike O'Neal, R-Hutchinson, said common law marriages give partners, particularly women, property rights should those relationships end.

"I would be reluctant to completely end it," he said of the practice. "Our bill modernizes it."

Sen. Ed Pugh, R-Wamego, raised the property issue Monday in the Senate committee's discussion, then voted against endorsing the

Since 1913, Kansas courts have

declared the common law age of consent for marriage is 14 for boys and 12 for girls, and that they do not need the permission of their parents or guardians. Also, courts have said a common law marriage is valid if the partners are able to marry and live together as a married couple - even if briefly.

Shelton told legislators she was 10 when Crooks, then living with her family in Texas, began having sex with her. She became pregnant, gave birth to a boy and put him up

Later, while Crooks was living in

Wichita, the family moved to Augusta, she said, and Crooks became a frequent visitor at their home. In 1999, at 13, she became pregnant again and had a second son. Crooks was then arrested for

Now living with her son in a Buffalo foster home, Shelton said she worried during Crooks' trial that his claim of a common law marriage would give him access to

She said he might have convinced a jury had she said she wanted to be married.

# What if you only had 24 hours

Have you ever thought about what you would do if you found out you only had 24 hours to live? The K-State Collegian would like to hear what you would do with that time. In 100 to 250 words, write what your plans would be. There are a few ground rules:

- NO KILLING YOUR EXES, THAT'S JUST NOT COOL.
- NO PROFANITY, VULGARITY, OR SLANG LANGUAGE.
- NO LIBELOUS COMMENTS ABOUT OTHERS.
- INCLUDE YOUR NAME, YEAR IN SCHOOL, MAJOR, & PHONE NUMBER ON YOUR ENTRY FOR PROPER IDENTIFICATION
- ENTRIES MAY BE EDITED FOR LENGTH & CLARITY.

We will be publishing the most creative, well-written pieces on the opinion page with the best submission's author being pictured next to his or her story.

Priority will be given to entries as they come in, so get them in early.

If you have any questions, please call the Collegian opinion editor in the

Submissions can be made electronically by sending them to letters@spub.ksu.edu, or you can bring them in person to Kedzie 116. Make sure to bring your K-State ID with you.

Peadline is Monday, February 25, 2002, at 5:00 p.m.

story of Jesus through colors.

"It is the most sought after pin at the Olympics and the only one with a story behind it," Sauls said.

Fiedler also said he is not into trading for the money.

"I do it for the fun of it, he said. "I'll trade anything. I'm not picky."

Whether the traders are motivated by money or pure curiosity, everyone has a bias toward certain pins, Sierra

"I think every pin is worth something to someone," he said. "Every pin has value."

#### TUMON

Continued from page 1

said. "I have not seen a substantial increase in that concern.

Hypothetically, a large increase could cause a decline in enrollment, Oldfather said. Whether that happens will depend on how elastic the demand for a college education is.

"If it's inelastic, some people will drop out, but most will stay and pay higher tuition," he said.

"The question that has to be answered is will higher tuition offset those who withdraw.

"My own gut feeling is people want to be in college pretty bad. We'll lose some enrollment, but the increase from those who pay will make

The bottom line, Lewis said, is that some students could be priced out of an education.

"I know there are needs. I understand the cost of running a university. I realize things do need to go up," she

"But people who might have gone to college five years ago won't be able to go now."

## Defending America

### ROTC provides nation's leaders

BY MAGGIE GRUSZNIS Kansas State Collegian

ince Sept. 11, K-State's Army ROTC program has changed in image, scholarship and potential deployment numbers.

Lt. Col. Arthur DeGroat said he has noticed an increase in commitment, support and appreciation for the program. DeGroat said the war on terrorism and the fact the program has reached the top 20th percentile in the nation have created increased interest.

"I have a whole stack of people who want to commit," DeGroat said.

DeGroat said he has twice as many people interested in the program, than he can fund. DeGroat must now develop scholarship money for students wanting to join the program.

"The desire and commitment is there, we just need to create the opportunities," DeGroat said. "My challenge now is to generate school assis-

DeGroat is trying to produce 10 new scholarships to meet the demands of increasing enrollment. One of those scholarships, the Richard H. Forsyth AROTC Scholarship, will help a student in

Richard Forsyth, professor in landscape architecture, recently completed a watercolor painting of the American flag. The events of Sept. 11 inspired Forsyth to create a painting, "Stars and Stripes ... Symbol of Freedom and Strength."

"It was originally created as a gift for my son,"

But Forsyth said his wife and daughter suggested he have prints made and sell them for a good cause. Forsyth was inspired to use his painting as a contribution to support those people involved with "Operation Enduring Freedom.'

Forsyth met with DeGroat and together they

### Recession causes increase in need, decrease in funding

BY SARAH BAHARI Kansas Stars Collegian

Karla thought she deserved it. It was just another part of life, like rainy days and speeding tickets.

It wasn't something she enjoyed, but it wasn't something she fought.

"I used to tell my advocate I don't know when the exact day and time was that I lost all self-esteem and thought it was OK to let people treat me like this," said Karla, whose last name has been withheld for safety reasons. "When I thought it was OK to let someone beat the crap out of me."

It wasn't until November that 29-yearold Karla realized no one deserved that. Not even her.

Karla pressed battery charges against her abusive live-in boyfriend and she and her 8-year-old son moved to the

Manhattan Crisis Center, a haven for

abusive relationships," she said. "This time - I don't know if it was

the look in his eyes or what something just clicked in me."

like Karla. And social service a year to help them.

and state grants, city and county funds, and private donations and fund-raisers.

graduating students will deal with the rough job With the economic recession, they are expecting an

increase in need and a potential decrease in resources. Their mission - to provide

the same services with reduced budgets. "Everybody kind of holds their breath," said Ailleen Cray, executive director of

United Way. "We just know it's gonna be a tough year all the way

around. It's a ripple effect. We don't live in a vacuum." Agencies like the Red Cross and the Salvation Army still are reeling from last winter's energy crisis. For the first time, Manhattan's Salvation

Army ran out of money, execu-

tive director Johnny Harsh

said. Families couldn't pay their electric bills. Some couldn't afford rent, he said. Agencies

scrambled to find the money to help

Now, the energy crisis is over, but some of its effects are still lingering. Many people who were put on payment plans

are still trying to pay them off, Harsh said. That, coupled with Sept. 11, has made things even tougher.

Many people who donated to the Sept. 11 fund did not donate to local charities. Harsh said he understands, but it has been difficult

"We see tragedies here on a daily basis," Harsh said.

Social service workers have been trying to think of creative ways to get people to donate, he said.

The Regional AIDS Project faces the same problem. The agency's funding was cut in half last year, executive director Victor Force said.

"We had to figure out how to do all the work with half the money," he said.

That meant turning to volunteers, he said. The agency continued to pay for four salaries, rent, phone lines and electricity.

The AIDS Project counsels HIV and AIDS patients and people who engage in high-risk sex. Workers also educate the community on risks and prevention.

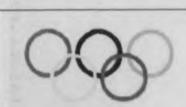

Its \$37,000 budget should stay steady through next year, but after that, Force said he is concerned. Less money would be devastating, he said.

"It just means that less information gets out there," he said.

"Ignorance and prejudice get out there. More and more people can become infected."

It is especially important that information is available in a college town, Force said.

Police testify at trial of woman charged with capital murder

The Associated Press

HOUSTON - When Russell Yates learned his five children had been killed, he fell to the ground and then threw a chair across the yard, a police officer testi-

"I just thought it best for me not to talk to him," Houston Police Sgt. David Svahn

said. "He was very, very upset."

He testified at the trial of Yates' wife, Andrea Yates, 37, who is charged with two counts of capital murder for the June 20 drownings and faces the death penalty.

She has pleaded innocent by reason of Svahn said he was the first to encounter the father after taking Andrea

Yates into custody. He said Russell Yates suddenly came running up to the house.

"He was screaming and hollering." Svahn testified. "He was saying, 'What did she do to my kids? What did she do to my kids?"

Svahn said he asked the man what was "He said his wife had called him at work and told him it was time to come

home," Svahn said. "His wife told him she had hurt all five of the kids and that she finally did it."

The officer said he then had the grim task of informing Russell Yates that his children were dead. "At that point he fell to the ground and

began hitting his hand on the ground," Syahn said. He then picked up a plastic chair from

the yard and threw it, the officer said. On Monday, the first day of the trial, Officer David Knapp said he followed Andrea Yates into the house after she summoned police, and in the bedroom he

saw a child's arm protruding from under a wet sheet.

Knapp lifted it and saw the lifeless bodies of Mary, 6 months, Luke, 2, Paul, 3, and John, 5. Noah, 7, was floating face down in the bathtub.

"She was standing behind me ... and I didn't hear her cry or show any emotion," Knapp said.

Defense attorney George Parnham told jurors that Yates had a history of suicide attempts and was so psychotic that her delusions drove her to drown her children.

features, as will be testified to from the stand, is the cruelest and most severe of mental illnesses," Parnham said. But prosecutors say she knew her actions were wrong when she held each of

"Postpartum depression with psychotic

her five children beneath the water in the bathtub until they stopped breathing. "She knew this was an illegal thing,"

Harris County assistant district attorney Joe Owmby said during opening statements Monday. "It was a sin. She knew it

was wrong." Knapp said Yates answered his questions in a monotone voice and followed his instructions to sit down and show identification.

"Her eyes were wider than what I'd

consider normal," Knapp said. Frank Stumpo, the second Houston police officer who arrived at the house, testified that he asked Yates if she realized

what she had done. "Yes, I do," was Yates' response, the

officer testified. If Yates is found innocent, a hearing will be held to determine whether she will be released or involuntarily committed. If found guilty, jurors will have to determine if there is enough mitigating evidence to sentence her to life in prison rather than

### LOCAL IN BRIEF

#### 10 people caught with fake IDs at Rusty's Last Chance

Ten people were charged with unlawful use of a drivers license while trying to enter Rusty's Last Chance and Rusty's Outback during the weekend.

On Friday, the Riley County Police Department charged two people, four on Saturday, and four more on Sunday.

Although ten charges was unusual, it wasn't due to anything out of the ordinary, said Nate Bagby, an employee at Rusty's. He said it was just a coincidence.

"People just walked up and tried to use them when the police happened to be standing there." Bagby said.

Lt. Kurt Moldrup, of the RCPD, said officers assigned to Aggieville are often just outside the bar when a bouncer will call them over to check a suspicious ID. He said this was probably the case on

"Aside from responding to calls, they also preform random bar checks looking for violence, underage drinking or fake ID's," Moldrup said.

Moldrup said there are two main ways police identify fake ID's.

"First, we just look and see if it looks fake, or we can run it through the computer to see if it is verified. If someone has changed the date, the computer won't have it registered, so we know it's false," Moldrup said.

### STATE IN BRIEF

#### Senate advances bill to require keg registration

TOPEKA - A bill requiring retailers to track beer kegs and their buyers won first-round approval in the Senate.

Senators advanced the bill on a voice vote Tuesday. Final action is scheduled for Wednesday, and passage then would send the measure to the House.

The bill would require retailers to tag any keg that can hold at least four gallons and keep a record identifying the buyer for six months or until the keg is returned. The bill would make it a misdemeanor to possess an unregistered beer keg or remove a registration tag.

#### **Budget panels endorse cuts** in SRS, higher education

TOPEKA - Proposed cuts in higher education and social services received committee endorsements Tuesday as

legislators said they still lack needed information on how much money the state can spend.

Gov. Bill Graves proposed some of the reductions in the balanced budget he submitted for the next fiscal year, when revenue is expected to trail required spending by at least \$426 million.

### **WORLD IN BRIEF**

#### 6 Israelis found dead after Palestinian attack Tuesday

IERUSALEM - In one of the bloodiest days of the 17-month Palestinian uprising, gunmen shot and killed six Israelis in a West Bank assault Tuesday. and Israeli raids left eight Palestinians dead.

The Palestinian attackers entered a building close to an Israeli roadblock near the village of Ein Arik and opened fire on the occupants, then escaped. Israeli television said. The army did not immediately comment.

The Al Aqsa Brigades, a militia linked to Yasser Arafat's Fatah movement, distributed leaflets claiming responsibility for the attack, Palestinians said.

The upsurge in violence threatened to increase still further the pressure on Prime Minister Ariel Sharon to take more decisive action.

6 Kausas State Collegian, 2002

The Union Program Council needs to fill all ten of its **Executive Board positions.** If you enjoy a challenge and are interested in further developing your leadership skills, we might just have what you need.

Get your application in the UPC office on the 3rd floor of the K-State Student Union. The application is due on February 27, 2002. For more information, call the office at 532-6571 or go to our new website at www.ksu.edu/upc.

LEADERSHIP **POSITIONS AVAILABLE** 

Candidates All Karimi and Eric Hoopingarner are seeking the presidential and vice-presidential office. Karlml and Hoopingarner's platform Issue is creating an Internet book exchange. Jenny Branlff/Collegian

### Candidates focus on Internet book exchange, student entertainment

BY MICHAEL LAWRENCE Kansas State Collegian

Running with their slogan, "Break the monotony of Manhattan," Ali Karimi and Eric Hoopingamer said they hope to make Manhattan a

more entertaining place to live. "There isn't a whole lot to do here," Karimi said.

Karimi, student body presidential candidate, and Hoopingarner, vice presidential candidate, said they will carry out three promises if elected. They said they want to establish an Internet textbook exchange, create two college TV stations and attract more artists to campus.

Karimi said their promises will greatly benefit students.

"It should affect them financially, socially and give them something to do," he said.

Karimi said the Internet textbook exchange is their main focus and will save students enormous amounts of money. He said the book venues

make a profit from selling textbooks. With the Internet book exchange, Karimi said students will be able to set their own prices.

Karimi said setting up this Web site would greatly benefit those students who traditionally have to pay more money for textbooks.

"People in engineering and business should jump for joy."

Karimi said. He said the project probably

would cost 37 cents per student. Karimi said his second focus would allow students to run their own TV programs.

He said students can show whatever they want, and the university owns the necessary equipment. "There's no cost to start up."

Karimi said. "All we need to do is pay someone to advise. He said the cost of the station would pay for itself because there are

enough sponsors willing to fund it. Their third focus, Karimi said. would bring in more recognized

comedians and musicians. He said he would like to have more acts perform in Manhattan.

"Who wouldn't want to get in a lounge chair, sit in a park and listen to a concert?" he said. **ELECTIONS** 

These activities would be free to students. The Union has the necessary funds for these events, he said, but they are being spent on other things. He said these events would not increase tuition.

"It's not going to be an increase, but a redistribution," he said

Karimi said he is a qualified candidate because he has been active as an arts and sciences student senator.

If Karimi and Hoopingamer are elected, Karimi said he will make sure changes are made at K-State.

"I won't let the agenda run dry like it has been," he said.

Luke Miller, left, and Jeremy LaFaver, right, are seeking the student body president and vice president spots. Miller and LaFaver's main issue is bettering the relationship between the student body and the president and vice president.

### Pair's platform addresses wait list, allocating funds to organizations

president and vice presi

General elections will be

Rising to the challenge of being student body president and vicepresident is the biggest incentive for Luke Miller and Jeremy LaFaver.

Miller, presidential candidate and LaFaver, vice-presidential candidate, said the challenge of representing

> more than 20,000 K-State students would be the most exciting thing for them, if elected.

"Trying to incorporate yourself to represent the vast amount of students from all the different colleges is intriguing. Miller said. "As a student senator, you just get to represent your college, but the challenge of representing the whole student

body is exciting." Focusing on four main platform issues within their "We Can All Make a Difference" campaign, Miller and LaFaver said they have chosen issues they think will help the student body

Their first issue, revamping the class wait list system, is a problem students run into each semester. LaFaver said.

"Every time enrollment comes around, the wait list system is a major gripe," he said. "I don't know anyone who has not been on a wait list

Miller said they would work so the system would ensure that if a student gets on a wait list, they would not get kicked off if they did not check on it every day.

There would be a cutoff so that the list would not get so long with people enrolling in many different sections.

Miller said another issue they believe to be important is the Educational Opportunity Fund. The fund, Miller said, is supposed to allocate money to different organizations that need it. The privilege feecommittee has been unable to distribute money to all the organizations that need it because of inadequate amounts in the EOF, he said.

"Being on Student Senate, I have seen groups that have requested

money have not gotten it because the funds are low and they were not able to allocate it," Miller said. "This is an important issue we need to look at."

The other issues Miller and LaFaver are focusing on are having the basketball Alumni game in Ahearn Field House and publishing a monthly presidential and vice-presidential report that informs students of the projects they are working on.

"We really want students to realize that we would be accountable for them," LaFaver said. "We want students to know that we are going to make a noticeable difference."

Miller said he thinks he is the best person to rise to the challenge of being student body president.

"In grade school, when you pick where everyone will be in x-amount of years, I remembered that everyone said I would be something like a senator," Miller said. "It is interesting to think that people thought about me as that when I was young and now I am a student senator and running for student body president. The thought of that really gets your blood

## DUD AWARDS

Awards show recognizes flops

he 74th Annual Academy Awards isn't the only show in March recognizing Hollywood's talent, or lack thereof. The Golden Raspberry Award Foundation, or G.R.A.F., has an awards show all its own.

Amber Koehn

The awards series, known as The Razzies, is entering its 22nd year of singling out the most god-awful movies, actors and screenplays of the year.

When the Razzies were first brought to my

attention, I let out this dry laugh, which later turned into some harder chuckles and a snort. I just couldn't imagine a serious awards show poking fun at people's mistakes.

Then I saw the list of this year's nominees, and everything became clear.

Leading the field in eight categories is Tom Green's disaster, "Freddy Got Fingered." This film deserves to win, not only because it flat-out sucked, but because of its grotesque references to various animal genitalia.

Freddy didn't just get fingered, he got goat-raped by reviewers who are the know-it-alls of what sucks on the big screen:

Second-place honors go to Sylvester Stallone's flop, "Driven," with seven nominations, followed by "Glitter" and "Pearl Harbor," which tied for six nominations apiece.

After pondering the lists of worsts, I came to the conclusion that the show isn't entirely a bad idea.

These nominees have a bug's chance in a spider's web of ever winning an award other than a Razzie, unless Academy members smoke insane amounts of cheeba.

This show gives everyone in Hollywood a chance

at winning an award, not just the Nicole Kidmans and Russell Crowes.

However, only Razzie members can vote for the nominees, and membership ranges from the basic annual fee of \$25 to the Berry Important Member fee of \$100, and the Lifetime Member fee of \$500.

That's a little too pricey for me. But in the spirit of fun and in the midst of movie hype, I want to submit my (free) votes of "dishonor."

Worst Picture: "Freddy Got Fingered" Worst Actor: Tom Green - "Freddy Got Fingered" Worst Actress: Mariah Carey - "Glitter" Worst On-Screen Couple: Tom Green and any animal he abuses - "Freddy Got Fingered" Worst Supporting Actor: Sylvester Stallone -

"Driven" Worst Supporting Actress: Drew Barrymore -

"Freddy Got Fingered" Worst Remake or Sequel: "Crocodile Dundee in Los Angeles"

Worst Director: Tom Green - "Freddy Got Fingered"

Worst Screenplay: Tie between "Freddy Got Fingered" and "Glitter"

Following tradition, Razzie winners are announced one day before the Oscars (this year it will be on March 23), and winners receive handmade, gold-spray-painted raspberry trophies at an estimated street value of \$4.29.

Hey, it's better than nothing.

For a complete list of nominees, or to sign up for membership and the chance to vote, log onto www.razzie.com and give these poor saps the recognition they didn't earn elsewhere.

Amber is a senior in print journalism. You can email her at adm9559@ksu.edu

### Separating church, state as important today as yesterday

n this age of increased religious fervor since the terrorist attacks of Sept. 11, the debate centering around the separation of church and state has intensified.

Everyone from professional athletes to President Bush has called on the

nation to pray. Several prominent religious leaders

**David McCandless** 

went so far as to suggest that the attacks were God's vengeance

on the States for,

among other things, the "secularists." It seems to me that many who are against the separation of church and state simply are using Sept. 11 as a cover to promote their own agendas. Some in the Christian majority

believe that, if they could only have official government backing, then they would set the world right. They could bring their faith to the

two million prisoners who sit in America's jails and prisons. They also could "save" the many millions of welfare, medicare and medicaid recipi-

Most importantly, there is the grand prize of the conversion contest, the millions of children in our public

Of course, we have the assurances of

these fervent believers that it would be be right.

would be forced to do anything. I fear, though, that these assurances would be forgotten somewhere between the morning prayer in our public school classrooms and the hanging of the Ten Commandments upon our courthouse walls.

Would we then begin shunning the children who refuse to pray, and arresting the "criminals" who worship "false gods," in clear violation of the first commandment? I'm afraid we

The mixing of church and state would lead us not into moral strength, but instead lead us into temptation with no deliverance

from evil. The very reason the United States was founded was as a haven from the religious persecution of the Anglican government of England.

Why would we now want to recreate persecution here in the land of freedom and acceptance we have worked more than 200 years to build? Because what a

religion wants

anything else is to

more than

This problem hits close to home as well. In the spring of 1999, the City Commission voted to remove the Ten Commandments monolith from City Hall.

In a 3-2 vote against strong public opposition, the Commission made the right decision for all Manhattan residents.

Manhattan Christian College now displays the monolith.

> The April 30, 1999 edition of the Topeka Capital-Journal quoted Manhattan resident Kirk O'Donnell as warning the commissioners that

> > removal of the Commandments would pose a danger to public morality. O'Donnell

is also quoted as saying, "I would also say if (some people) are offended, and I certainly respect a person's right to be offended, I would say that we leave them there anyway. During the

summer of 1999, many of the same residents who spoke

against removal of the monoliths began to circulate a recall petition against Karen McCullough, the only of the three commissioners who voted for the petition to be subject to recall by law.

The commission then spent the rest of the summer focusing on the recall, which failed, instead of other, more important matters.

There is nothing moral about threatening someone's job simply because you don't agree with them.

In my opinion, the most dangerous thing about mixing religion and government is that most religions believe they have a patent on morality, and they alone are the true judges of right and

This is a biased perspective, and would lead to government favoring one religion over another, and one group of people over another. I believe strongly in the right of

everyone to worship or to not worship as they choose, as the U.S. Constitution guarantees every citizen of the United

However, to allow any one or several religions into the official realms of government would violate this right for evervone else.

This is why church and state must remain separate.

David is a junior in political science and public relations. You can e-mail him at dlm7676@ksu.edu.

### READERS WRITE

#### Columns offer criticisms, but never suggest solutions

This letter is in regards to Paul White's op/ed columns that he has written throughout the semester. I am concerned with the content of Mr. White's columns for a number of reasons.

It is not my intent to condemn his views, nor do I wish to silence Mr. White. We all have the right to air our opinions, some just happen to be fortunate enough to have a weekly op/ed piece as the vehicle by which to disseminate them.

For the most part, I believe his views are healthy ones. He gives voice to a latent set of beliefs that one probably would not consider "mainstream." This has allowed the student

body here at K-State (and perhaps the surrounding Manhattan area) the opportunity to consider an alternative to the point of view that the mass media presents to us.

While this certainly is not the venue to take up such a discussion, I also tend to agree with his viewpoint that American foreign policy is flawed and has been the perpetuator of the great feeling of ill will many in the Middle East have toward the United States.

Let's face it, the United States has committed some atrocious acts toward members of the human community, the latest of which occurred in Afghanistan. Mr. White has every right to feel the way he does toward our government and its policies. He's an American (at least I presume he is). That is precisely what makes this country great.

However, I feel that Mr. White's arguments are long on criticism and short on solutions. Henry J. Tillman once said, "If you're not part of the solution, you're part of the precipitate."

I have no objection to hearing a

viewpoint that is contrary to my own. In fact, I enjoy stretching the boundaries of my beliefs by continuing to vigorously question them. Doing so opens one's mind.

However, a persistent argument begins to lose legitimacy when it lacks a solution as its culmination. I fear this will occur to Mr. White's viewpoints, as he has continually neglected to advance any sort of solution to the problems he routinely addresses.

After five weeks of subjecting myself to his criticisms, I still am left to speculate the purposes of Mr. White's endeavors. Does he desire to open the minds of the public by subjecting them to certain factual truths? Or is he merely utilizing a public venue to vent his personal frustrations and hostilities toward his government?

Unfortunately, after reading five weeks of his columns, I fear it is the latter. It is certainly much easier to criticize and chastise than to put forth real effort and develop solutions to the problems our world faces

Mr. White, you have defined and illustrated a set of problems. For five weeks, you have shown the spotlight of your contempt on the American public. Isn't it your responsibility to forward some solutions to those problems now?

As crazy as it might sound to you, what if some of us have discarded our "subconscious patriotic blindfolds"? (White, Jan. 28, 2002) What if we stop basing our opinions on "25second sound bytes" or "2 minute speeches more scripted than a Tarantino movie"? (White, Jan. 28, 2002)

Now, I cast the spotlight back on you. What do you suggest that we, as American citizens, do? As you contemplate your possible suggestions, please ask yourself one additional question. "Am I a part of the problem, or am I a part of a solution?"

> - Matt Sanderson senior in finance

### SGA candidates discuss priority issues at presidential debate

BY MICHAEL WATSON Kansas State Collegian

Candidates gave vague answers at a student body presidential debate Tuesday at the K-State Union Courtyard, an audience member said, but he said it gave him an opportunity to hear what candidates had to

Eric Nelson, senior in finance, said the candidates at the Union Program Council-sponsored debate just rephrased the questions. While he said he did not hear many solutions to problems, the debate did introduce him to the candidates.

"It was good to hear the candidates because I got a better idea for who I would vote for," Nelson said. "There were three or four candidates that had unique ideas.

The first question addressed by the presidential candidates was how the ticket would address tuition

Matt Wolters, presidential candidate and senior in agricultural education, said tuition is one of the biggest issues at K-State because of its effects on students. He said his ticket would like to set up a tuition advisory committee.

"The committee would be composed of students, students who can sit at the table and decide where their dollars go," he said.

and senior in architectural engineering, said tuition is the singlemost important issue facing K-State students. Miller said tuition affects the quality of education students receive.

"We want to make sure K-State is a good place for future students," he said. "One thing that we want is smaller classes and better teachers."

One platform issue to save money proposed by presidential candidate Ali Karimi, senior in social science, is an Internet book exchange that would allow students to trade old textbooks for new ones at the Union Bookstore.

"We did the math for it, and it will cost 40 cents per student each semester. It costs more to park for an hour at the Union," Karimi said.

When asked how many platform campaigns would be achievable, most candidates said they would hope to get their promises fulfilled in one

Zac Cook, presidential candidate and senior in biological and agricultural engineering, said his ticket would be working to fulfill a couple of campaign promises for next year, but he said he also is looking toward the

"We want to be the multicultural leader of the Big 12. Architecture students have the chance to get an international experience and culture in their curriculum, but we want to

Cook said the goal is to have 25 percent of K-State students studying abroad by fiscal year 2008.

Addressing another issue at K-State, presidential candidate Chris Greene, junior in pre-law and business management, said the shuttle system should be expanded to better serve students. Greene said he hopes to open up parking space at Bramlage Coliseum to shuttle students to campus.

"This won't cost as much as a parking garage," he said, "and it's something we can work to get done for next year. I really don't think it will cost as much as people think to get this done.'

Wolters said a parking garage would be a better solution than a shuttle system.

"Some of us are from small towns. and others are from larger towns, but regardless of where we're from, we're used to parking close," he said. "K-State students want to jump in their car to get where they are going."

He said a shuttle will not alleviate all parking problems, and his ticket is supporting a parking garage to be built as soon as possible

Another question posed to candidates is how to address poor advising in student course work. Greene said the only thing that can be done is to

work with administrators to make sure that advising is done right.

"Advising has improved a lot. There are still some problems, but the only thing we can do is work with the administration," he said.

Al Gard, presidential candidate and senior in English, said there are a lot of things that can be utilized to improve programs at K-State.

"The biggest problem with activities is they are under utilized," Gard said. "We need to advertise quality programs - things students will be interested in."

Karimi said the student body president and vice president need to be representatives of K-State and the community. With situations like the parking garage, he said he thinks Manhattan should help with costs.

"As president, I won't accept being buried by the city," he said. "That's not cool. K-State is 22,000 strong. If we're not here, this town wouldn't be here. I will personally go myself and raise hell on behalf of the students."

When an audience member asked candidates to comment on how achievable their campaign issues are, most said they hoped to fulfill their promises within a year.

"We think our ideas will be attainable," Miller said. "If not this year, we will set the gravel down for next year.

Matt Wolters, right, speaks during the first student body presidential candidate debate Tuesday In the K-State Student Union Courtyard as Lucas Miller, left, looks on. The candidates were given issues by a moderator and had a chance to state their positions.

We want to revamp the wait list, which should be very attainable." Gard had a slightly different

"Does anyone up here really have an attainable platform? No. It's politics," he said. "But we will be trying our best to save the environ-

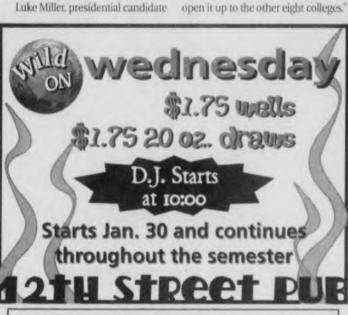

ment. One of Gard's main platform issues is improving the recycling

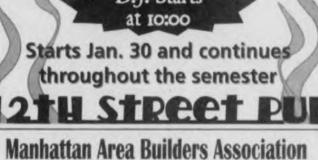

program - keeping it green, he said. "We also want to conduct an energy-efficient survey. Do you know how many computers are left on all the time, wasting money?" he said.

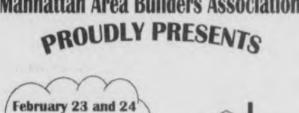

Cook said his main platform, promoting multicultural leadership, definitely would benefit students, and it is an attainable goal.

"We want to make students more marketable. When you go out in the world, we want people to know that marketable people come from K-State," he said. "That's done with multiculturalism.

### NG WEEK

You can be part of the K-State class ring tradition.

K-Staters are known for

Manhattan campus Feb. 20-22, 10 a.m. - 4 p.m.

In front of the K-State Student Union Bookstore.

site at www.k-State.com/ClassRing or call 785-552-6260.

IS GOD CALLING YOU AND GETTING

A BUSY SIGNAL?

In today's world, it's so easy to lose sight of why we're really here. So perhaps the thought of devoting your entire life to God has never crossed your mind.

Then again maybe it has. Maybe you're the one of the rare women who are being called by God to follow in the footsteps of Jesus. And if you'd only take a moment to really listen to your inner voice. God will get through.

We are the Sisters of St. Joseph, an international order with roots right here in Wichita. And we invite you to come live a life of holiness, in a community where we strive for unity and reconciliation among all people with God and with one another. Ours is a community of prayer and service. Our dedication to God motivates us and is the source of joy for all that we do.

But how can you know if you truly have been called? Do you feel a longing for more in your life? Do you feel a void in your heart? Do you radiate joy? Does love pour out of your smile and do you long to follow Jesus?

If so, you owe it to yourself to answer God's call. To learn more about The Sisters of St. Joseph, call or visit us online. You'll be eternally grateful you did.

### Women's pairings shaping up

K-State's women's basketball team hasn't taken a back seat to the Cat men all season on the hardcourt, but because of a quirk in the columnist schedule, Sean Purcell's NCAA men's bracket breakdown came first.

I'll let it slide, though, since he turned 21 this week. Poor guy.

Dan Smith

Seriously, though, this figures to be the first time in a while that K-State fans will follow every rebound, point

and nail-biter the women's tournament has to offer.

And with good reason. At No. 12 in the USA Today/ESPN and the Associated Press polls, the Cats have a chance

to make some noise. K-State will likely will be host to the first two rounds of the tournament at Bramlage Coliseum, so fans won't have to travel far to see Coach Patterson's club play. Sixteen teams will be host to the first and

second rounds, and seven Big 12 schools could be in the mix for those slots. Iowa State, at No. 10/13, will be host to a regional, and K-State got its first Big 12 win of the year there.

That means the purple could be looking at a possible Elite 8 run, but let's not get ahead of ourselves.

K-State hasn't been in the top 10 all season and you can bet that any team drawing the Wildcats' number will be itching for a chance to put Patterson's Cinderella season to an end.

Connecticut (27-0), Stanford (26-1), Oklahoma (22-2) and Tennessee (22-3) are the AP's top four teams, and all have a legitimate chance to leave the Big Dance with the prize.

The Huskies are the easy choice to win it all. Uconn is undefeated and hungry for the title. Swin Cash is averaging a near doubledouble this season for the Huskies, and takes the cake for most original name.

Connecticut's main opposition most likely will come from Stanford. The Cardinal's Ione blemish was a six-point loss to Tennessee on Dec. 16. Nicole Powell leads Stanford.

averaging 15.6 points and 9.8 points a contest, but the Cardinal will need a consistent stretch come March to finish on top.

K-State fans have seen firsthand what OU's arsenal offers. Stacey Dales, Rosalind Ross and company put the Cats' league title hopes to rest, and Patterson's club would love another

shot at OU in the tournament. Rounding out the top four is Tennessee, a mysterious team that recently lost to Texas. Coach Pat Summit's squad has an impressive

victory over UConn, but the Volunteers looked past the Longhorns last week. Predicting the sleepers is a lost art, and I haven't been able to find it, so I'll leave that to

we'll have to see how they finish the season. Bottom line, make sure you know which tournament pool you're entering when the brackets come out. You wouldn't want to pick Maryland to win it all this season. The Terrapins are a sub-.500 team this season

another column. The Cats could be one, but

compared with the No. 2 Maryland men. Then again, stranger things have happened.

## Sao Paulo style

### **Brazilians** bring flavor to Cat lineup

BY LAURA BOYD Kansas State Collegian

ilson Delesus and Marcelo Da Barrosa both call Sao Paulo, Brazil, home, but that's where the similarities end.

DeJesus, a 6-foot-5 junior guard came to K-State looking forward to the opportunities that come with playing Division 1 basketball.

As a two-time junior college All-American at Trinidad State, De Jesus also was nominated as one of the top 60 juco players in the nation. Though he was used to the spotlight before, he's had to share it this season with his teammates.

"It was a big change, but it was a change for the better," DeJesus said. "Here you play more as a team and in junior college you play more as an individual. Here we have to understand the game more, so not being the focus doesn't bother me at all."

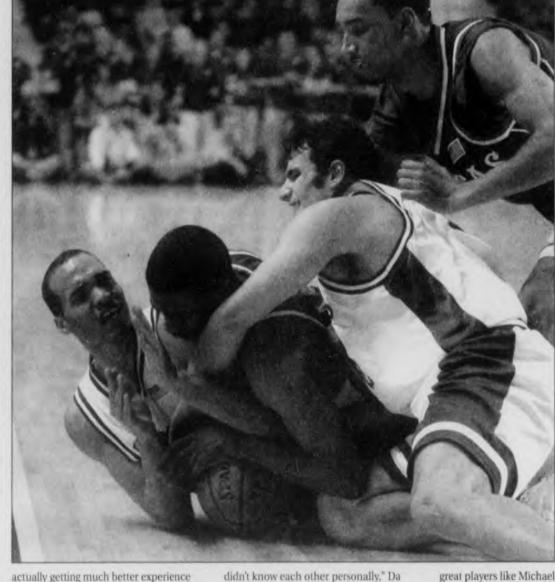

Da Barrosa made the leap from Sao Paulo last spring as a freshman. In 2000, he went to the Nike All-Star basketball camp in Indianapolis, where he met with K-State coaches and made connections.

Da Barrosa also contributes his attraction to K-State to Eduardo Galvao, who played for the Cats in the early 1980s and shared many of his experiences with Marcelo as a coach. Despite K-State's mediocre season. Da Barrosa said he doesn't regret his decision.

"Everything has been great here," Da Barrosa said. "The basketball season has been wonderful and the team makes everything so fun.'

Da Barrosa, a 6-foot-7 forward, gained much of his experience through club basketball and playing for the junior Brazilian National Team. Those experiences gave him the opportunity to play in Russia and South America. Despite those memories, Da Barrosa said he prefers the American game.

"Basketball here is so good and the competition is so high," he said. "I am

actually getting much better experience right now that I hope can carry over to next year.'

The fan support also has been a positive influence on both players. DeJesus said he's not used to the strong support system in Manhattan.

"The fans are a great part of the game," DeJesus said. "In Brazil, we are not used to it. If you lose, it feels like they are going to kill you. Here, they appreciate your hard

Coming from the same part of Brazil. DeJesus and Da Barrosa knew of each other, but the difference in age kept them from playing together until this year.

"We knew about each other but we

didn't know each other personally," Da Barrosa said. "We knew how each other played and where, but we never competed.'

One thing they did have in common was their parents' influence.

"Even though my parents never played and never related to basketball, my dad always loved basketball," Da Barrosa said.

Delesus received the same support from his parents, but his was a different story. His father was a talented basketball player, playing on the Brazilian National Team for 15 years.

"I think my parents have been much more of an influence than any outside players," DeJesus said. "I mean, you look at

### K-State looks to shore up 7th place in Big 12 standings

Konsus State Collegian

Coach Jim Wooldridge isn't hoping for a postseason NTT bid this season.

In fact, he's never had that talk with his

"No, we really haven't," Wooldridge said.

"We're just trying to scratch out another day and look at the next opponent."

That next opponent is Colorado, as the Buffaloes (13-10, 4-8) travel to Bramlage Coliseum tonight for a 7:07 p.m. tip with K-State (10-13, 4-8). The two teams are in a four-way tie for seventh in the Big 12 with Nebraska and Baylor,

In late January, Coach Ricardo Patton's club handled the Wildcats 85-71 in Boulder. Six-foot-7 reserve Blair Wilson netted a career-high 21 points on 7-of-11 shooting from three-point range, seven-foot freshman center David Harrison added 17 and Stephane Pelle notched a double-double with 14 points and 12 boards for the Buffs.

Wilson hit five treys in the first half alone

Midweek matchup

Colorado (13-10, 4-8) at K-State (10-13, 4-8) When: 7:07 tonight Where: Bramlage Coliseum (13,340)

TV: Wildcat Television Network lio: Wildcat Radio Network (WIBW-AM 580)

to single-handedly account for a 15-0 run spanning 5:41 in the first half, and CU took a 39-30 halftime lead.

"Wilson really hurt us early in the first

half, and then the gates opened up." Wooldridge said.

Colorado pushed its advantage to 16 early in the second frame, and took its biggest lead. 64-46, with 9:38 to play.

Five minutes later, Larry Reid lay-in cut the deficit to 10, but that's as close as the purple got

"If we have not improved or if we don't play a better ballgame than we did in game one, then I wouldn't think we'd have very much of a chance to beat these guys,"

Leading the Buffaloes offensively are four players in double-figures. Harrison tops that chart at 14.4 points-per-game, followed by Pelle (12.5 ppg) and Harrison's older brother, D.J. (11.7 ppg). Wilson also posts an 11.7-ppg clip off the bench.

K-State continues to rely on Reid (14.8) ppg) and center Pervis Pasco (11.3 ppg) for its offense, and the Cats are coming off a 73-62 loss at No. 4 Oklahoma.

The purple only trailed by three at the break, but a 19-3 OU spurt early in the second frame proved the difference. Coach Kelvin Sampson's club also capitalized on 17 offensive rebounds.

"There were several areas of that game where I felt like we needed to play well in. and we really didn't," said Wooldridge, whose team dropped to 0-8 this season on the road.

"We didn't do a very good job at guarding the ball, and rebounding was a tremendous problem that we couldn't overcome. We went through a five-minute stretch again where offensively we got rattled, and Oklahoma

K-State's back at home tonight, though, where the Cats have won four of their last five. Wooldridge's team also is shooting the

ball better, hitting nearly 49 percent from the field in its last five games. The purple also rank third in field-goal percentage in conference play at a 45.6-percent clip.

Meanwhile, Colorado has lost four of its last five, and all six of its Big 12 road contests. The Buffs fell 97-79 to Texas Tech Saturday. Wooldridge said containing David

Harrison inside might be K-State's biggest test, Forward Matt Siebrandt will start out defending the seven-footer, and reserves Travis Canby and Ivan Sulic should also see considerable minutes against the freshman.

"We can do several things," Wooldridge said Monday. "We're not sure what we're going to do right now, but the matchup problem is obvious with his size. We'll guard him by committee, and we might have to double him some and probably show some zone. There's just a lot of different things depending on his quality of play as well."

### Wildcats outlast Blue Jays with late-inning, pinch hit heroics from freshman

BY BEN FEHR

Kansas State Collegion

K-State baseball put together 8 1/2 good innings of baseball yesterday in a 10-9 win over the Creighton Blue Jays .

The winning run played out in dramatic fashion, the score coming by way of freshman Mark Montgomery's pinch-hit, run scoring single in the bottom of the ninth.

Coach Mike Clark said he was disappointed with the inability of the pitching staff to finish the Blue Jays off as K-State entered the ninth leading by four.

"We played 8 1/2 innings of good baseball," Clark said.

"Then we have a chance to put the game away and I think our pitchers got

"Hopefully we can learn from this,"

"Three walks and an error and all of a sudden you have a 9 to 8 ball game where a ground ball ties it up.

"There was no reason for that. We did too many positive things for things to go the way they did. We have to put people away when we get in that situation.' The Cats opened scoring in the

bottom of the first when Pat Maloney singled to center to score Gabe Luttrell. Luttrell led off the inning with a

single of his own and took second base when Osmar Castillo blooped a base hit to shallow right.

Creighton answered back with two runs in the top of the second, but then were kept quiet until the sixth.

The Cats started to put things together in the middle innings, adding a run in the fourth, three in the fifth, and four in the sixth.

Creighton countered in the seventh with a run, and blanked the Wildcats in the bottom half of the inning. The Blue Jays stopped K-State in the bottom half of the eighth as well, and entered the ninth trailing the Cats, 9-5.

In the top of the inning, Creighton

led off with a pinch-hit home run to pull within three.

The Cats followed that up with three straight walks to load the bases and gave the Blue Jays two runs on a throwing error to first base. A fielder's choice tied the game.

Senior closer James Brazeal was able to strike out the last batter of the inning and the Cats went to the bottom of the

Tim Foley's full-count base hit to right gave the Wildcats a runner.

Freshman Jason Long came in to pinch run for Foley and moved to second on a base hit by junior catcher Ryan Baldwin.

Montgomery came off the bench and worked the count to 2-0 before ripping a single to shallow right. Long beat the throw to the plate, and the Cats took the game in walk-off fashion.

Montgomery said he was cold, but ready when Clark told him he would be batting

towns

modem

via

ringing to life the Black History Month theme of celebrating diversity, Mariposa will perform a poetry reading Thursday at Java Espresso and Bakery.

Mariposa, a native of Bronx. New York, is a poet and spoken word performance artist who has been performing since 1989. She is a black Puerto Rican of African and Taino descent who advocates change and acceptance of diversity while performing poetry that relates to cultural life

"My main objective is to inspire people to express themselves," Mariposa said. "I feel a need to express myself. Growing up as women, we're not encouraged to express ourselves, and poetry is a way for me to affirm myself as a woman of color. I am very proud of my ancestry.'

Mariposa's message is that no matter what our racial differences are, we need to be more open-minded and sensitive to the other people around us spokesman Jeff Carroll said.

"Her message is different artistically," Carroll said "She is bilingual and has a hip-hop flavor."

Mariposa performs several pieces that deal with having pride in African descent, and she stresses the importance and effect that the African culture has made on the Puerto Rican culture.

"People are forgetful of the fact that there is a strong African presence in Puerto Rico." Mariposa said. "The African culture has influenced Puerto Rican culture. It's important to recognize African ancestry outside the context of slavery.

Before Mariposa's performance, students are invited to read their own poetry. The Union Program Council is hoping for a diverse selection. but one that fits the theme of "celebrate diversity."

Megan Hughes, UPC arts and entertainment chair, said UPC decided to sponsor this event after attending the National Association of Campus Activities Convention in Denver. While there, Hughes learned of Mariposa and thought she would have a good message to bring to the students of K-State during Black History Month.

Although Mariposa is the first poet of this kind that the UPC has sponsored, Hughes is expecting a good turnout because of her wellknown reputation and the fact that she will be a different type of performer, one that most K-State students aren't accustomed to.

"The student body can gain a new perspective from listening to her. She has strong messages and will open up a new point of view," Hughes said.

Mariposa, who earned a bachelor's degree in women's studies and a master's degree in arts and special education from New York University, said she started writing poetry at age 12, and she began reciting when she was a freshman in college. Her talent led to her current career.

Mariposa's poetry has been featured in an HBO documentary titled "Americanos: Latino Life in the U.S." The artist also spends time putting on workshops for

elementary and high school students.

In addition to Mariposa's performance in Manhattan tomorrow evening, she also will be performing at other schools nearby. Her tour includes stops at St. Mary's College, Leavenworth, and Central Missouri State

With a performance that focuses on unique cultural aspects, Carroll said Mariposa brings a deeper understanding of

The audience can gain a love for poetry and an understanding of how to express their feelings through poetry." Carroll said. "They can also gain an understanding of Puerto Rican culture.'

### Bluegrass group to perform today in Union

BY BETSY STVERAK

Kansas State Colle,

Banjos aren't just for hillbillies. Brock Benjamin, banjo player, said he chose the instrument because it's so

"It's so fun to play. It's a challenge different from the guitar," he said. "The banjo is reversed from the

Students will get a taste of the bluegrass sound today in the K-State Student Union Courtyard.

Three performers, mandolin player Kevin Schrag, Benjamin and guitarist Paul Schimming will play as part of the Lunchtime Lounge series.

Shanna Burruss, program adviser for Union Program Council, said when she first heard the three perform, she liked what she saw.

"I saw them at Expresso Royale," she said. "It reminded me of the bluegrass sound. It was very easy going and mellow.

Burruss, graduate student in

student counseling and personal services, said she decided to pitch this idea to UPC because the music was unlike most things usually heard.

"It has a different sound then we have had in years," she said. "It is a new sound to bring to the Union."

Schrag, senior in mechanical engineering, said that he Benjamin and Schimming first got involved with playing Lunchtime Lounge because someone recommended them.

Schrag said he has an experienced background in playing music.

"I have been playing guitar for about five or six years. I started out playing anything from blues to folk to

Schrag said the trio chooses to play bluegrass because of the unique style.

"It has a wide variety of sounds," he said. "It's high-paced and has slower ballads. It has good harmonies and a high, lonesome tenor sound."

Schrag said one reason bluegrass has such a unique sound is the instruments used. Typically, the banjo,

Musical appearance

A bluegrass performance will be from noon to 1 p.m. today in the K-State Student Union Courtyard. If any students are interested in performing in the music series contact Shanna Burruss at 532-7326.

mandolin and guitar are used to create the sound, he said.

Benjamin said his love for bluegrass music comes from the history of the

"It's getting back to the roots. The banjo has African roots," he said. "This

is string band music. It is mountain music and front porch-type music." Benjamin said that even though he, Schrag and Schimming perform

together, they don't consider

themselves a band. "We're just playing. It's more of a jam session than a show," he said "This will be our first time actually

performing together." Although they enjoy performing together, Benjamin said this isn't

something the guys want to focus on seriously.

"One of the guys is actually moving," he said. "So we're not really in a serious band-type setting."

Benjamin said he is looking forward to performing for K-State.

"It's good to share the old-time bluegrass music," he said. "I like to introduce young people into this traditional form of music.

Burruss said the Lunchtime Lounge first started three years ago. Although the performers usually are from Manhattan, she said they have had some performers from out of the local area.

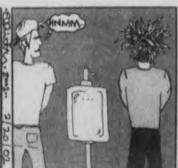

"One time, we had a girl come and perform from Seattle and a guy from Wamego," she said.

Burruss said that although it's a great chance for bands to perform, Lunchtime Lounge has run into problems.

"We are having the need for more performers," she said. "That is one of our challenges."

### misdirection

### More bodies dug up at Georgia crematory

The Associated Press.

NOBLE, Ga. - As the ground around Tri-State Crematory yielded more corpses, residents in three -states faced the horror of planning -funerals for loved ones they had long believed were resting in peace.

Forensics teams on Tuesday had recovered 149 bodies left to rot outside the northwest Georgia crematory, finding skeletons sealed in vaults and bodies that had been dragged into a shed.

"I feel like I'm in a horror movie," said Leatha Shropshire, a mother of three, whose own mother died Jan. 30 and was found dumped in the 16-acre area behind the crematory.

Clutching a framed photograph of her mother, Shropshire said she is more fortunate than hundreds of others who still are waiting to see if their loved ones can be identified from the intermingled skeletons.

"We just lost our mother two weeks ago and we are having to do this all over again," Shropshire said. "The waiting was killing us. There is no way to describe what that kind of waiting is like.

Ray Brent Marsh, operator of the crematory in this rural town 20 miles south of Chattanooga, Tenn., was arrested for a second time and authorities filed 11 new theft-bydeception charges against him. bringing the total to 16.

"By the hour, this is getting bigger and bigger and bigger," said Kris Sperry, the state's chief medical examiner. "I don't have a theory because none of this makes sense. I

don't think it ever will." Officials examined the contents of 51 urns that had been sent to relatives - some contained

powdered cement or potting soil rather than human remains, officials said. Other urns appeared to contain human remains, but it was not clear whose.

Sperry said there was no way to make a positive identity using cremated remains, but officials said at least one family received remains that did not belong to their relative. The relative's remains were identified among those recovered from the grounds.

Investigators have said Marsh told them the bodies were not cremated because the incinerator was broken. Authorities said they were unsure how long the incinerator was broken, but evidence shows some dumped bodies have been there for 15 years or more.

Sperry said some corpses were found in body bags, while others were dressed in clothing or hospital gowns or wrapped in sheets. They ranged from newly delivered to severely decomposed, even mummified, he said, predicting that some would never be identified.

A federal disaster mortuary team began arriving late Monday to open a mass morgue to sort the bodies. More than 400 people were involved in the investigation.

Marsh, 28, refused a request for a jailhouse interview. Calls to his home and the crematory went unanswered Monday, and voicemail boxes at both numbers were full.

As the body count rose, agents said they had begun examining the records of Marsh and his parents, Ray and Clara Marsh, who turned the business over to their son in 1996. The elder Marshes have not been charged, but authorities said bodies were being dumped before

### Speaker tells students to find a purpose

BY SHANNON HARTENSTEIN

In a North Carolina post office, Thomas Barksdale closely studied the envelope he was about to mail, and an important lesson became sealed in his mind - live life like a postage stamp.

"A postage stamp is not efficient unless it sticks to what it's on," he said. "What are you sticking to?"

It was one of many questions he asked students at the Black Student Union meeting Tuesday in Forum Hall. Barksdale was the keynote speaker for Black History Month.

In 1995, the 27-year-old entrepreneur from Greensboro, N.C., founded The Barksdale Foundation. The motivational speaking and educational consulting firm specializes in helping young adults deal with academic, behavioral and social concepts of formal development.

Barksdale wrote his first book, "It's All About You: A Young Adult's Guide to Positive Living," when he was 22. The book offers lessons on negative thinking, discrimination, acceptance and other issues students face. Traveling around the country,

Barksdale uses the lessons in his book to inspire students of all ages, races and backgrounds.

Barksdale stressed the importance of overcoming black stereotypes and striving to become more educated.

Barksdale also encouraged abandoning the negative stereotypes on television, including messages expressed in music and sports.

"People profit by me and you being ignorant," he said. "There's a whole industry created to keep you and me being dumb. You're supposed to be an upright young person, walking with confidence. Know where you're headed."

Barksdale recognized the role of events like slavery and civil rights struggles in molding black history.

"African-Americans are the only group of people to endure these atrocities - and still will," he said. "Celebrate black history by going into action, wanting to be something significant and knowing what you're

But even Barksdale questioned his calling in life. In 1995, when he had just launched his business, he called his twin sister, saying he wanted to

Thomas Barksdale speaks at Forum Hall In the K-State Student Union on Tuesday. Barksdale called on students to find their purpose and to live up to it.

quit because no one wanted to hear him speak.

"She told me, 'If you quit, that affirms that the Middle Passage didn't mean anything," he said. "I was out of alignment, not knowing what I was divinely designed, cosmically created to do. We need to get back in line, and we do that by taking some risks."

Barksdale encouraged black students to be passionate and determined to overcome obstacles.

"I want you to put on a whole new constitution that you have the birthright to be great," he said. "And when you do that, you'll be like me. You'll hate to go to bed because you can't wait to wake up."

### School board to discuss possible districting changes

BY MICHAEL LAWRENCE

Ranger State Collegia

School districting changes could cause 390 elementary school students to switch schools, according to Manhattan-Ogden USD 383 Board of Education 2002-03 projections.

School board members will discuss these changes at 7:30 tonight in the Robinson Education Center.

After board members voted to close Bluemont and Eugene Field elementary schools in November. they had to decide where to relocate the displaced students.

Bob Seymour, assistant district superintendent, said that with the two buildings out of commission, attendance boundary lines have to be

"I would prefer not to have to do it," Seymour said.

He said he regrets having to separate students, but it is important that every school is kept below

Every student attending Bluemont and Eugene Field could be separated from their classmates, but Lori Martin, Bluemont principal, said students are handling news of the

separation well. "Kids are pretty resilient," Martin

She said the separation only will

be temporary because the students likely will be reunited in middle

She said it is an unfortunate occurrence, but it can only expand a child's circle of friends.

Students attending Eugene Field and Bluemont, however, will not be the only scholastic communities that will have to say goodbye to some of its members.

Seventy Theodore Roosevelt

Elementary School students also might have to attend Amanda Arnold Elementary this fall.

Diane DeNoon, vice principal of Theodore Roosevelt, said she is saddened by the loss of these

"They're an important part of our community," DeNoon said.

She said she expresses sentiment for those sixth graders who have been attending the elementary school since kindergarten because they will be in a different building for their final year.

"It will be a loss," she said.

### RECESSION

Continued from page 1

"This is a very transient community. People come and go all the time," he said. "Someone may come into town who's had multiple sex partners and leave next year.

"You don't know here." Tina Long, director of marketing for the Kansas Children's Service League, said the weak economy causes people to lose their jobs, which decreases revenue to the state, which in turn can't afford to fund social-service

Research also has shown that when the unemployment rates go up, so does abuse and neglect. Long said this is why social service agencies become so important.

programs.

"It's a vicious cycle," she said. The Manhattan Crisis Center is also in the process of making cuts, said Judy Davis, executive director of the crisis center. Two positions have been eliminated through attrition.

If conditions worsen, the center could have to cut back some of its services, Davis said. It now offers a home to women who have escaped abusive relationships, face-to-face counseling and a 24-hour hotline.

Karla said abused women need these services.

"If there's no way to get out, you don't know what's going to happen," she said. "If it weren't for people helping me, I wouldn't have been able to help myself.

pride and ask for help. But everybody gets to the point where they need help."

With the help of the crisis center and the Salvation Army, Karla finally got her life back.

She continues to meet with an advocate, who helps her stay on track. She has begun to attend church and said God plays a big part in her life now.

She got a job where she works while her son attends elementary

Life at the crisis center wasn't perfect, Karla said. Fourteen women lived there, and group living is never easy. It was especially hard on her son because the other women didn't have kids.

Two weeks ago, she moved into an apartment with her son and a roommate she met at the crisis

One day, Karla hopes to open a crisis center for women and children.

"A more family-based place because women with children live very differently than women without," she said.

Still, Karla knows the center saved her.

"Through all my abusive relationships, I always heard 'You can't live without me. You can't make it without me," she said. "You start to wonder if you can do it. It's sad because everybody can do it. You just might have to ask for help.

When asked where she would be without the center, Karla becomes quiet.

She simply shakes her head, stares forward and says she does not know.

### **Candidates discuss** views on tuition hike

BY SARAH BAHARI

Kansas State Callogian

Only two of the seven student body presidential tickets did not mention the upcoming tuition increases in their platforms.

Presidential candidates Ali Karimi and Zac Cook left it out of their initial platforms, saying an increase was inevitable.

"It's going to go up. There's nothing we can do about that," Karimi said. "That's not a campaign issue."

Karimi said he understands the university has needs, but students shouldn't be forgotten.

He said out of the plans the administration has put forth, he supports a 9percent increase.

"It's not as drastic, but it gets the job done," Karimi said.

K-State will announce its tuition increase in March or April. The university is considering increases from 3 or 4 percent to 27 percent, which will begin this fall and last for five years.

Candidate Cook said he trusts the administration to make the right

"Our administration has done a great job of working with students and hearing what they have to say," he said. "I know **ELECTIONS** tuition increases are funding things that need to be done that are high priority items."

Although it's not listed as a platform issue, Cook said he would educate students about the increase.

"It should be assumed that anyone elected to student body president is taking care of the students in that category," he said. "I would make sure everybody knows what it's for so there's not a lot of unfounded criticism, because it is paying for things that need to be

funded." Al Gard, presidential candidate, wants to keep tuition as low as possible. He said one way to achieve that is by making the campus more energy efficient, which would include turning

SGA

spent," he said. "We have to somehow try and convince more students through SGA that they do have a voice, and the people they elect are directly responsible."

Candidate Matt Wolters said he agrees that students should have input. The best way to do that, he said, is through a tuition advisory committee.

"We should see a direct benefit when we go to class day-in and day-out by paying more for our education," he said.

San TUITION on PAGE 10

### Committee's endorsement small step toward solution

Acceptance of Graves' proposal one move closer to possible tuition increase

BY BRYAN SCRIBNER Knneas State Collegian

The House Appropriations Committee's endorsement of budget cuts in higher education Tuesday brought the possibility of tuition increases one step

The committee approved Gov. Bill Graves' plan to cut spending by \$27 million for the next fiscal year, which begins July 1. Total spending would be reduced to \$680 million if the cuts take

Spencer Stelljes, Student Senate governmental relations chair, said it's too early to estimate how much students might be expected to pay.

"We knew coming into this year that we were facing a budget crisis," he said. "It's going to be a definite burden on K-State students."

K-State is considering tuition increases to balance its budget. A 3 to 27 percent increase per student, which would begin this fall and last for five years, could be announced in March or April.

Student Body President Kyle Barker said operating expenses might be Increased, along with tuition, next fiscal year. He also said financial aid might

Barker said legislators need to look at the budget woes from a student's perspecrive. He said it's important to concentrate on the state's long-term needs.

"At a state level," he said, "it's hard to argue where you're going to take money

"At what point do we say that our youth isn't the most important factor? We're the future of the state."

It's difficult to estimate what students might have to pay in tuition for the next five years, Barker said. Right now, he said, talk of budget proposals puts students in a defense mode

Students, Barker said, would be able to adjust better to a possible increase once an estimate is finalized. He said the 3 to 27 percent figure offers a vague outlook.

K-State administrators have students in mind as they make budget decisions,

"I think students can adjust to an increase," he said. "Administrators are looking to not price students out of an education.

Revenue in the state is expected to trail required spending by at least \$426 million next fiscal year. Graves has proposed \$228 million in new taxes and fees to help close the gap, but action on these proposals and other alternatives has not yet caught the interest of lawmakers.

Stelljes said the committee's proposal should be viewed as a small step toward a solution. He said that while the issue is serious, the burden of increases could be offset by increasing student financial aid.

"We are one of the more economically diverse institutions in Kansas," he said. "The best way that we can combat increases is to influence legislature to increase need-based financial aid." - The Associated Press contributed to this

### Commissioners table Bluemont, Third Street traffic-flow proposal

BY MICHAEL WATSON Kansas State Collegian

The intersection of Bluemont Avenue and Third Street is the worst intersection in Manhattan concerning crash rates and

convenience, a Manhattan city engineer said. Scott Crain said traffic crash data, congestion and growing traffic volumes suggest that a solution needs to be found for this

intersection immediately. "To this point there has not been another viable option for turn lanes that will be supported by KDOT," Crain said. "In my opinion,

the only viable option is a median." After three and a half hours of debate, City Commissioners tabled the proposal 5-0. Commissioners said they needed more information since only five traffic engineers have looked at the

"There are elements I like and think we should go forward with, and there are parts of the proposal that are incomplete," Commissioner Ed Klimek said.

Consensus of commissioners was that more time is needed to develop a plan that would work well in the long run for all facets of the area.

#### The proposal

- Widen Bluemont to seven lanes from Fourth Street to Tuttle Creek Boulevard - add dual left-hand turn lanes and throughlanes on all legs of the Bluemont and Tuttle Creek Boulevard inter-
  - Construct a median down the middle of Bluemont Remove the traffic signal at the intersection of Bluemont and
- Third Street.

The \$2.5 million project would significantly reduce the number of accident conflict points in the intersection from 38 conflict points to four conflict points, Crain said.

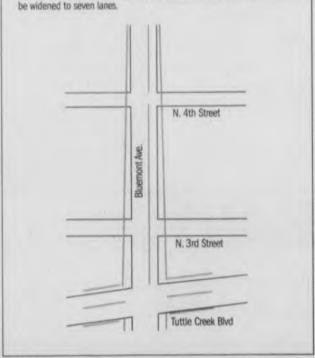

#### Problems with the proposal

The proposal stops traffic heading east on Bluemont from making a left-hand turn to Sonic or McDonald's because of the raised median. The same problem would be true for Pizza Hut, Long John Silvers and other businesses near westbound traffic.

Traffic would be directed to alternative routes such as Fourth Street to get to businesses along Third Street. Business owners at

### Intersection of the future

The intersection of Bluemont Avenue and Third Street is Manhattan's worst intersection, City Engineer Scott Crain said. The red lines show the change in street width if the proposal passes. There are 38 conflict points where accidents occur in the intersection. The new proposal would reduce the number of conflict points to four. To facilitate traffic, Bluemont would

the meeting said the problems with accessibility would hurt sales. Clark Linders, McDonald's franchise owner in Manhattan and Junction City, said the the proposal would hurt all businesses along Third Street.

"It would cause businesses to go broke," Linders said. "Putting a barrier across Third Street to Tuttle Creek would close off traffic." Crain said the median is important because it would allow for

### LOCAL IN BRIEF

#### 10-year-old boy charged with aggravated battery

A 10-year-old student at Lee Elementary School was charged with aggravated battery Wednesday.

Riley County Police Department Sgt. Lynette Woods said the student allegedly threw an undisclosed object at a teacher, but she could not disclose any further information. Officers responded to the call at around 10:30 a.m.

Lee Elementary officials did not return phone calls seeking comment.

### STATE IN BRIEF

#### Graves says he has made no redistricting decision

TOPEKA - Gov. Bill Graves says he has not endorsed any redistricting proposals nor has he been actively involved in redrawing the lines.

Legislators must redraw congressional, legislative and the State Board of Education districts every 10 years to reflect population shifts. Graves must sign their bills before they are reviewed by state and federal courts.

"I haven't told anybody I would sign off on any map, House, Senate or congressional," Graves told reporters Tuesday.

#### Attorneys optimistic about class-action gas lawsuit

HUTCHINSON - Attorneys representing plaintiffs in a class-action lawsuit against Kansas Gas Service over the Hutchinson gas explosions say the case should be resolved sometime next year.

The suit, against Kansas Gas Service and its parent company. ONEOK of Tulsa, Okla., seeks damages for the gas explosions on Jan. 17 and 18 last year that led to two deaths and destroyed two downtown businesses.

Kansas Gas Service should pay for lower property values, declining business and vacant rentals caused by last year's gas crisis, the team of attorneys told clients and prospective enrollees in a class-action lawsuit during a meeting Tuesday night.

### WORLD IN BRIEF

#### Israel kills 16 Palestinians in response to ambush

JERUSALEM - Firing missiles, tank shells and machine guns at Palestinian authority positions, Israeli troops killed 16 Palestinians Wednesday in reprisals for a Palestinian shooting ambush that killed six Israeli soldiers - one of the deadliest attacks on Israeli troops in 17 months of fighting.

After nightfall Wednesday, Israeli F-16 warplanes fired three missiles at a Palestinian police compound in Gaza. target of air strikes the night before, witnesses said. The Israeli military had no immediate comment.

The six soldiers were killed at a West Bank checkpoint, shot at close range by three militiamen linked to Palestinian leader Yasser Arafat's Fatah movement

#### Passenger train catches fire in Egypt, kills 373

REQA AL-GHARBIYA, Egypt - A train crowded with Egyptians leaving the capital for a religious holiday caught fire and sped on in flames for miles Wednesday, killing 373 people, including some who died as they jumped from the burning cars, police said.

The fire was reportedly started by a cooking gas cylinder which burst and swept through the last seven of the train's 11 cars. Workers in gloves and masks pulled charred and twisted bodies from the wreckage. Firefighters said some of the corpses were found curled up under seats and dozens more lay alongside the train tracks.

#### Judge allows jury to see 29 crime-scene photos

HOUSTON - Jurors in the Andrea Yates child-killing case will be allowed to see more than two dozen photos taken at the crime scene, a judge ruled.

State District Judge Belinda Hill admitted 29 of the photos after the state agreed to withdraw 10 others. Hill said the photos' relevance outweighed any prejudice they might cause the jury. Defense attorneys had sought to block prosecutors from using any of 39 photos taken at the home where Yates' five children were drowned last June.

One of the photos showed 7-year-old Noah Yates floating face down in the bathtub with his arms outstretched, submerged beneath the water. Others detailed bruising on the children and how the bodies of Noah's four younger siblings - John, 5; Paul, 3; Luke, 2; and Mary, 6 months - were laid out on a bed in the back bedroom.

Yates, 37, could face the death penalty. She has pleaded innocent by reason of insanity.

Johnny Coomansingh is a graduate teaching assistant in the Department of Geology at K-State. He originally is from Trinidad-Tobago.

### GTA travels world to earn degrees in variety of fields

BYTINA DEINES

Kensan State Collegian

laying the classic guitar is just one of the many things to add to the list of accomplishments of graduate teaching assistant Johnny Coomansingh.

Coomansingh, originally from Sangre Grande, Trinidad-Tobago, has acquired degrees from across the globe, and he is now working on his master's degree in cultural geography.

First, Coomansingh earned a degree from Andrews University in Michigan through a satellite program at Caribbean Union College in Trinidad. Then, he obtained a bachelor's degree in education from The College of Preceptors in London, England.

He also earned a degree in agriculture from the Eastern Caribbean Institute of Agriculture and Forestry. His next stop was Fort Hays State University where he attained a master's degree

in communication.

Although Coomansingh has acquired degrees in a broad range of subjects, he said that attaining a geography degree will fulfill his quest.

"To me, geography is what I call my comfort zone. I have a pension for geography now," Coomansingh said. "Maybe it's completing the circle I needed to complete.

Coomansingh said he decided to become a graduate teaching assistant mainly because of the money the job offered, but he also enjoys teaching.

"I have a lot of expertise that I would like to share. Where else to do that then in academia?" Coomansingh said.

Although Coomansingh is finishing his thesis in order to graduate, teaching is something he has done his entire life and likely will continue, he said.

He summed up his philosophy on education with one final thought.

"Education makes someone fit to live and fit to live with," he said.

### SGA candidates say platform is balanced, would improve K-State

Matt Wolters and Mandy Achilles are seeking the student body presidential and vice presidential spots in the upcoming election. Their top platform issue is ensuring the tuition hike is just for students.

BY SARAH BAHARI Kansas State Collegian

Matt Wolters became involved in Student Senate on a whim. One of his buddies suggested he run for senator.

day series profiling student

body president and vice

president candidates in

rimary elections will be

General elections will be

Iphabetical order.

Feb. 26 and 27.

He did it and won. Mandy Achilles watched other women in her sorority make a difference through Student Governing Association. She thought it looked like a great way to get involved.

She did it and won. Together, Wolters and March 5 and 6. Achilles say they have the leadership and commit-

ment to K-State to get the job done. "Our philosophy has been everyone gets their K-State experience from a different piece of K-State," said

presidential candidate Wolters. The candidates said they want to improve every area of K-State, whether tit be education or a student organization

"We've had a great experience here," said Achilles, vice presidential candidate and sophomore in advertising and public relations. "We want to make sure everyone else does, too." That is exactly what their platform

tries to accomplish, they said. It touches on education, tradition, picking the right major and finding a job, and it does so through realistic goals that can be completed in one year, they said.

> The first point tuition - is probably the most important issue K-State students face, Wolters said. While an increase is inevitable. there still is work to be done.

A tuition advisory committee would ensure student input, Wolters, senior in agricultural education, said.

"The bigger issue is, what can we do to make this a positive experience," he said. "We want an increase in the quality of education."

That includes smaller class sizes, more class availability and whatever else students deem important, Wolters said. If elected, the candidates plan to form a committee by May to address those needs.

Second on the pair's agenda is the Wildcat March. Fans would gather at Memorial Stadium on the Fridays of home football games before making their way through Aggieville.

HUNAN EXPRESS

\*\*\* Chinese Food Lover's Choice \*\*\*

Lunch 11:00 - 2:30 \$3.99

BUFFET

Wolters and Achilles also want to make a new service available to students, Wildcat Connection, which would enable students to contact alumni who can answer questions about the degree they pursued and where it took them.

"What we determined is we have a tremendous resource in our alumni." Wolters said.

This ticket brings diversity to the table not seen in some other tickets, Wolters and Achilles said. The two come from different areas of Kansas, different academic colleges and different student groups.

Wolters is a member of Beta Sigma Psi fraternity. He is an ambassador and orientation leader to the College of Agriculture, and he serves as Student Senate chair.

Achilles is the executive vice president of Alpha Delta Pi sorority. She is a senator and was a summer orientation leader.

Achilles is a sophomore, and Wolters will be a fifth-year senior.

"On a daily basis, we come into contact with a substantial crosssection of campus," Wolters said. "We feel like to effectively do the job of student body president and vice president, that would be a big benefit

### Primary election to replace run-off, encourage voters

BY TARA PATTY

Kansas State Collegian

Student Governing Association elections for student body president and vice president will feature a primary election prior to March's general election, eliminating the need for a run-off election.

K-State has always had runoff elections, Ted Conrad, elections committee chair, said.

SGA added the primary to this year's election because of lagging voter turnout in previous run-off elections, Conrad said.

In the past, he said, students would vote in the general election for all of the offices when encouragement from candidates was greatest.

They failed to vote, however, in the run-off election a week

"This is a better system because it narrows down to two candidates and then all decisions are made," he said "You don't have to wait a week to find out who won on the student body president, vicepresident ticket.

Students only will vote for presidential and vice-presidential candidates in the primary and the top two vote-getters from this election will advance to the general.

Students then will vote on

student senators and other SGA positions.

"It just makes more sense to

narrow it down and then have the big election all together," he The change to a primary

election also will shorten the campaign time for candidates by about two weeks, Kyle Barker, student body president, said. The campaign, which typically lasts six weeks, will last only four weeks, he said.

"It's definitely a trial basis to see what kind of voter turn-out we have," Barker said.

The new procedure was outlined in the election packet each candidate received. Conrad said he placed emphasis on the change at last week's mandatory candidate meetings.

"I think everybody is on the same page," he said.

Although Barker said he enjoyed the excitement of the run-off election, he said the primary should be just as exciting.

"I'm excited to see what will happen to voter turn out," he said

If more students do not vote, he said, the same Student Senate that made the rule will address the issue.

Another adjustment in the 2002 election process includes a change in the online vendor company that coordinates

voting, Conrad said.

The vendor contracted for last year's election went out of business, which is one reason for the change, he said. Vendors maintain annual contracts with K-State and are selected through a state-mandated process.

State guidelines require the university to submit a purchase order that multiple companies can reply to and send bids.

The company SGA is using this year happened to offer the lowest bid, but it is more expensive than the 2001 vendor, Conrad said.

Jennyfer Owensby, accountant for the Office of Student Activities and Services, said last year's vendor, Validity Systems, cost \$6,700.

This year's vendor, Iballot.com, will cost \$9,000.

The process students must go through to vote in both elections has not changed substantially since last year.

To actually cast votes, students must log on to KATS and then click on a link to the vendor, he said. Then, the student enters a user ID and password that will allow them access to vote.

"It should be pretty intuitive," Conrad said, "We're working with CIS and the vendor to streamline the process as much as possible."

A Manhattan city engineer proposed a do not know. We are not engineers. significant change to an important intersection at the City Commission meeting Wednesday night.

Scott Crain said widening and building a median would greatly reduce the number of traffic crashes on the intersection of Bluemont Avenue and Third Street.

Crane's proposal arose at a time when much more research was needed. Whether it is or is not the best idea, we

What we do know is, the addition of the median will place a serious weight on the shoulders of business owners and residents in the area.

The median will force drivers to use alternative routes to businesses on Third Street. At the same time, large delivery trucks will put a physical strain on the residential roads along the new routes.

Because changing the intersection affects so many people, city officials

need to allow more time to consider the proposal and create more than one proposal so Manhattan business owners and residents will have more choices.

It is important that residents are included in the research process. Why not show them their importance and let them play a role in the decision-making process?

City officials need to take their time and remember the importance of those who live and work in Manhattan.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

This is to Jared Wiesner: I seriously doubt there will ever be a Ku Klux Klan exhibit here at K-State. People on campus would have a complete fit if they ever had

All I have to say about Megan Mahoney and the K-State Wildcats is grrr, baby, yeah.

Jared Wiesner, we are all now dumber from reading your column. Nowhere in your rambling did you come even close to a right answer. I award you no points, and may God have mercy on your soul.

This is for the Johnson County Explorer parked outside Weber on Monday. One parking spot equals one car.

Do not throw toothpicks in toilets because crabs can pole vault.

What do business majors use for birth control? Nothing, they haven't thought that far ahead.

Attention ignorant residents of Manhattan - let the professional engineers figure out what to do with Third and Bluemont, and stay the hell out of their way. Thanks.

Do the ATOs really think they're going to get anything from the Valentine's ad they put in the Collegian?

Prison paradise

### Growing inmate population threatens justice

6 out of business. More people than ever are accepting invitations to check into a spacious concrete room, complete with steel bars for your protection and a very friendly bunkmate to enter-

tain you. Welcome to Hotel Paradise. Business here is good.

The United States has become the world leader in the incarceration business. State prisons are operating at 15 percent above capacity, while federal prisons are operating at 31 percent beyond their recommended occupancy, according to the Bureau of Justice Statistics.

Prisons seem to be a popular place to live, and they're getting more popular.

In 1970, the number of inmates in state and federal prisons was less than 200,000. By Dec. 31, 2000, the number of people living in prisons had multiplied to

ur prison system is putting Motel 1,381,900. An additional 621,100 were kept torships and militant rogue countries. in local jails.

In that 30-year time frame, the prisoner population skyrocketed 590 percent. All the while, the country's population rose only 40 percent. The number of persons on probation and parole also increased 240

percent since 1980. It comes as no surprise. The United States has the highest reported rate of incarceration growth in the world. We imprison 699 people per 100,000 citizens. We even have surpassed Russia, which

Tanner Ehmke

Even more disturbing, the land of the free will be the most incarcerated country in the world by 2010 if the rate remains steady

imprisons at 644 per 100,000.

This is not something to be proud of. The mass imprisonment of people is not a mark of a developed society. It's

usually associated with third-world dicta-

We have all heard people comment on how they think our country is going to hell in a hand basket because of a deterioration of morals in our society. It might certainly appear that way.

More accurately, specific populations in our society face a greater likelihood of imprisonment than the majority population.

So, we aren't a nation of criminals after all, as some would have us believe. We have just forgotten about the people who are at high risk of becoming one.

It's evident who those people are. Nearly a one-third of jail inmates in 1991 had annual incomes less than \$5,000 prior to their convictions.

Also, 60 percent of jail inmates in 1996 reported they were under the influence of alcohol or drugs at the time they committed their offense.

Race wise, black males have a 29 percent chance of serving time in prison at some point in their lives, compared to Hispanic males at 16 percent, and white

males who have a 4 percent chance. High-risk populations are falling

through the cracks of society. We are making it easier for crimeprone individuals to enter prison than to succeed in life. Rather than building a more educated and empowered society,

we are building more walls with steel bars. Criminals, the parasites of society, prey on others for their existence. Poverty breeds this dependency rather than selfsufficiency. If we want to effectively reduce crime, we must focus our attention

to empowering the poor and dependent. At a cost of more than \$146 billion per year, imprisonment is an expensive and ineffective method of prevention. At the same time, \$81.1 billion of all state and federal dollars was spent on education in

We are spending more money on our own mistakes instead of promoting selfsufficiency through education. Failure to educate people guarantees a dismal future

for those with a high probability of being a

criminal.

Mass imprisonment is a reactionary policy, not a progressive policy. Rather than solving or prohibiting problems, we try to fix the symptom. It has not been working.

In fact, problems are only perpetuated. "Correctional" facilities help develop the criminal mind.

We have an obligation to empower and educate those of high risk in order to bring them from the fringe of society rather than have them preying on the weaknesses of others or wasting away in prison.

tongue, at least venture off of the couch.

### New sensational television special not worth viewing contestants inhale sticks of butter and beef

'm not too surprised by TV gimmicks anymore, but this one has me banging my head against my

furious errors.) It seems FOX has topped itself as the king of sinsational television with its new special, "Glutton Bowl #1: The World's Greatest Eating Competition."

keyboard. (I edited out the

FOX already has exhausted the more entertaining of the deadly sins: greed being represented by a gameshow aptly named "Greed," the wrath of drill sergeants on "Boot Camp," and let's not forget the lust and envy prevalent on "Temptation Island."

Since a "World's Greatest Sloth Competition" wouldn't be the most exciting show to watch, and contestants lose pride automatically when agreeing to appear on reality TV, I suppose gluttony was the next best sin to exploit.

Though the concept of watching people gorge themselves is as oddly fascinating as a car wreck, I'll explain why you shouldn't waste your time.

First off, this is just another instance of network television's need to push the envelope. Each sad my ploy to gain viewership view

gets more desperate. Regis is tame compared to "The Chair." A few years back, a

game show pitched about alligators

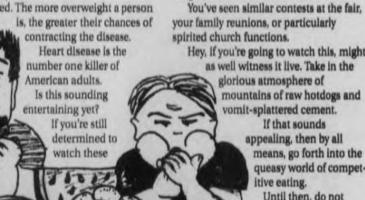

hovering above a contestant answering trivia would have been dismissed. Now it's perfectly acceptable programming. Besides the oddity of the subject matter,

Susan Powell

consider the potential danger of this show. "This gut-busting.

eat-'til-you-drop, twohour special pits 40 larger-than-life contestants against each other in unique competitive eating challenges."

In other words, FOX plans to line up America's obese, and encourage them to stuff their faces with eggs and mayonnaise. Obesity and heart disease are undeniably linked. The more overweight a person

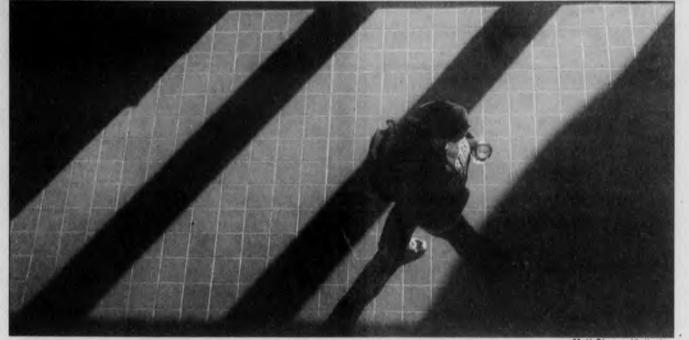

spirited church functions.

Hey, if you're going to watch this, might as well witness it live. Take in the glorious atmosphere of mountains of raw hotdogs and vomit-splattered cement. If that sounds appealing, then by all means, go forth into the queasy world of competitive eating. Until then, do not allow the commercialized version into your home, out of respect for those of us who cannot stomach

After all, this is just "Glutton Bowl #1." My pained forehead can't take any sequels.

Susan is a junior in English. You can e-mail her at sjp8478@ksu.edu.

Leaving Hale Library, a woman walks past a window, which is letting the 4 p.m. sunlight shine through its glass.

### Officials explore outsourcing of Union Bookstore

BY EDIE HALL Kansas State Collegian

The K-State Student Union is exploring the option of outsourcing to increase revenue from the Union Bookstore. Outsourcing is the practice of bringing an outside company into manage a business.

The president of the Union Governing Board, Bobby Allison-Gallimore, said the bookstore is one of the main sources of revenue in the Union. He said the Union provides services to the students in areas where the Union doesn't make a profit, such as providing meeting rooms for campus organi-

Allison-Gallimore said the cost of these services must be subsidized by increased revenues in areas like the bookstore.

"We have to make sure we are receiving revenue at a level that not only allows us to run the bookstore, but also subsidize our service areas," Allison-Gallimore

Although there isn't only one way to generate revenue by an

outsourcing situation, one way might be to receive a set dollar figure each year along with a certain percentage of profits, Allison-Gallimore said.

He said outsourcing is the only option Union officials are exploring, other than keeping the bookstore a self-operating business. He said the Union has brought in consultants who are helping them improve efficiency and maximize revenues.

"We might improve our revenues while we are going through the process of outsourcing," Allison-Gallimore

"If we decide not to go with that option, it may bring revenues to the level we need them to be at to support the Union.

The Union has had outside companies help run its operations before. The Union Food Court is run by Chartwells, and it houses a Taco Bell, a Burger King and a Chick-fil-A.

Allison-Gallimore said one reason the Union brings companies in is that Union officials feel the overall benefit derived from contracting operations are greater for students from if the Union remained self-operating.

"We ask ourselves, 'How are we going to be able to provide the most to students?" Allison-Gallimore said.

Union officials sent out information to eight businesses they thought might have an interest in running the bookstore.

A mandatory bid meeting was Feb. 20 for any company that had an interest in making a proposal.

Bernard Pitts, Union director, said representatives from Varney's Book Store, Barnes and Noble, Follett, and the Nebraska Book Company attended the meeting.

Pitts said the group reviewed the request-for-proposals document and went through the requirements and guidelines set by the state for request for proposals.

Representatives from the companies also were given a chance to ask questions and tour the bookstore.

A brief follow-up on questions the representatives had asked

earlier ended the meeting, Pitts

"We needed to make sure we understood their questions, so we can get answers out to them by Monday," Pitts said. "The whole process is all about being sure everyone is being dealt with fairly."

Pitts said the deadline for proposals will be March 20. In early April, an evaluation committee made up of five students, five faculty members, Pitts, and a consultant from the Duvall group will review all of the proposals.

After this process, companies might be asked to come back and prepare another presentation for the committee, Pitts said.

"My hope is that we will be able to have a recommendation ready for the Union Governing Board by the last week in April," Pitts said.

"They'll then take action and forward their recommendation to the Union Corporate Board around the first week of May.

Pitts said the Union Corporate Board will make the final decision on whether to approve the proposal.

### District map keeps representation in communities same

BY MICHAEL WATSON

Kansas State Collegian

The Kansas Senate Reapportionment Committee approved a map of the four Kansas congressional districts Tuesday morning. This reappointment will keep Riley, Geary and Pottawatomie counties all in the 2nd Congressional District. The map also shows Douglas County,

which includes Lawrence, Kan. This map would not separate Fort Riley, Junction City and Manhattan.

The four districts are being redrawn to account for population shifts recorded in 2000 Census figures. Sen. Lana Oleen, R-Manhattan, said she is happy about the new map, which is called the Kansas Day revision.

"It keeps communities of interest together," Oleen said. "That's where we want them to

She said the map would be beneficial since it places K-State, the University of Kansas, Fort Riley and Fort Leavenworth in the same district - the 2nd Congressional District .

"There will be debate and change there, but I see it going before Senate next week," Riley County Commissioner Russ Frey said.

"I really think this is the best map, and I think it will pass. It's especially beneficial when you're talking about keeping Fort Riley and Fort Leavenworth together in the 2nd District."

Congressman Jim Ryun, 2nd District, also is on the military affairs committee, and Frey said putting both bases in the same district would be beneficial.

"It will allow him to represent both forts and get more unity." Ryun said.

The map addresses population shifts in the larger cities, and they have redrawn the map in a way that seems to be fair to the people in those communities, by keeping people with similar interests together.

"It makes perfect sense to me," Oleen said.

While the map made sense to most Republicans, the minority Democrats at Monday's Senate Reapportionment Committee, who wanted to keep Lawrence in the Third Congressional District, sat out of the meeting.

Since the map was approved in the subcommittee by the Republicans in the Kansas House of Representatives, the map will proceed to the Senate floor.

Oleen said the Kansas Day revision answers concerns State Legislators have about placing part of Douglas County into the 2nd District, pushing Junction City into the 1st Congressional District, and splitting up a community of interest formed by Junction City, Fort Riley and Manhattan.

"That had a vote last week in the reapportionment committee, and it got two votes of nine," she said. "We really do think this map fits the community of interest, especially with K-State and KU together, and the military."

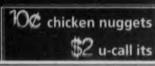

The district map has to be scheduled by the leadership in the senate before it is brought to the floor. The map should reach the senate floor next week.

### Good meals, fun would fill day off

There's nothing better than a day off. I know I could use one.

So when the women's basketball team gets a day off like today before its game against Colorado, the players could do lots of things to relax.

Instead, most said they will spend at least some time in the gym, which got me thinking

about what I would do on a day off from everything-

work and class. Here's the schedule.

8 a.m. -Roll over in bed.

9 a.m. — Roll over again. Possibly drool on my pillow while dreaming of sleeping on the beach.

Michael Noll

10 a.m. - Served breakfast in bed biscuits and gravy, pancakes, scrambled eggs and sausage links - by Aunt Jemimah, the most welcome face in breakfast history.

10:30 a.m. - Take 20-minute shower uninterrupted by anyone waiting to use it next. 10:50 a.m. - Put on boxers.

10:51 a.m. - Watch end of Sportscenter. 11 a.m. - Watch Sportscenter again. 11:30 a.m. — Put jeans and tee-shirt on.

Brush teeth. Consider fixing hair. 11:31 a.m. — Decide against fixing hair.

11:32 a.m. - Walk to K-State Student Union to get something to eat. 11:45 a.m. — Realize the thought of

eating Burger King, Taco Bell or Chick-fil-a again sounds about as good as eating a Pizza Shuttle box. 11:46 a.m. - Walk back home.

Noon - Martha Stewart arrives along with giant feast, including turkey, stuffing, sweet potatoes, pork chops, steak, barbecued ribs, shrimp, mashed potatoes and gravy, five different kinds of pie and ice cream.

12:01 p.m. — Eat.

1 p.m. - Unbutton my jeans and take a

1:30 p.m. - Get friends together and haul a couch to the Chester E. Peters Recreation Complex. Set couch in front of the giant window across from the exercise bikes.

1:40 p.m. - Sit on couch and eat ice cream while watching people exercising. Occasionally wave.

2:30 p.m. — Pack up everything to go back home.

2:32 p.m. - Drive through puddle next to Memorial Stadium, splashing joggers.

3 p.m. — Go to a random class armed with a cell phone. Have every person I know call and talk to me.

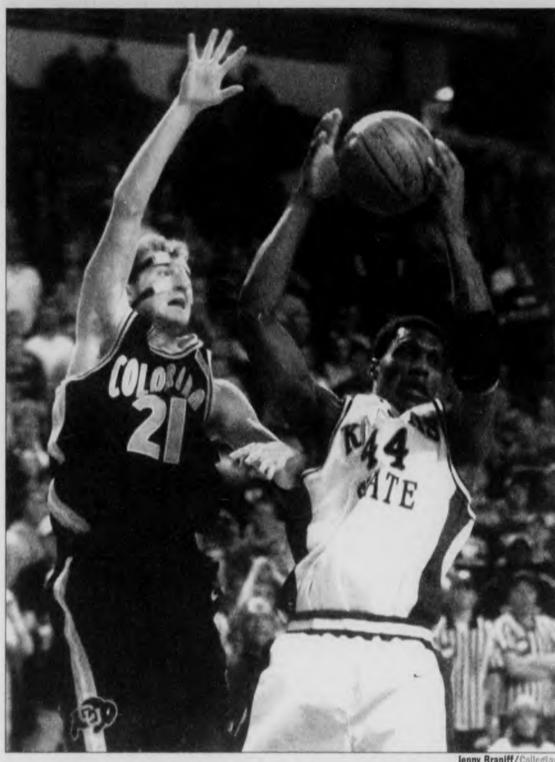

3:20 p.m. - Run like hell from class.

3:30 p.m. - Find a car on campus with a wheel lock and remove it with a blowtorch. Reattach the wheel lock to one of those parking services carts.

4 p.m. - Sneak into KSU Stadium and

Boulder, Colo., 2 p.m.

K-State's Pervis Pasco (44) rebounds over Colorado's Nick Mohr (21) during the first half Wednesday at Bramlage Collseum. The Wildcats moved into 8th place overall in the Big 12 conference standings with their win over the Buffaloes.

## Following lackluster first half,

Kunsas State Collegian

K-State dug out of a seven-point halftime hole to beat

Colorado 66-64 Wednesday night in Bramlage Coliseum. Coach Jim Wooldridge described the win as a tale of two halves, as the Cats sizzled on 46.9-percent shooting in the second half to overcome a 32-percent first period.

The biggest factor in the comeback, though, was K-State's first-half defense.

"The way we played on offense in the first half was something we haven't seen all year," Wooldridge said. "We maintained energy on the other end, which kept us in the ball

You look at the defensive field-goal percentage — that gave us a chance to come back in the second half. If they would have played offense better or if we didn't stop them then we're cooked and we can't come back."

Luckily for Wooldridge's club, the Cats were able to bring it

K-State scored on its first two possessions out of the break, prompting Colorado coach Ricardo Patton to burn a timeout.

The break in action did little to cool off the Wildcats. Soon after the timeout, K-State tied it with a Gilson DeJesus three-pointer from the corner.

"We came out and scrapped and fought and that run we had gave us the lead at a big point in the game," Siebrandt said. "It was tight the rest of the way but we just kept at it and came out successful."

Going into the intermission, however, the Cats' intensity

and desire to fight was lacking. In the first half, an 8-0 Colorado run was the difference, as the Buffalo's led 29-22 at intermission.

K-State relied on Pervis Pasco to provide most of its offense as Larry Reid was kept scoreless in the half. Pasco scored nine points on 4-of-6 shooting. The junior college transfer also had five rebounds, but the Cats were outre-

But K-State caught a break when D.J. Harrison broke his hand in the opening half, sidelining him for the rest of the

"I thought both teams fought hard to try and win the ballgame," Patton said. "These were two teams that have had some tough breaks out there. We got a break, literally with D.J. when he went out. That certainly hurt our rotation."

With Harrison out, Blair Wilson tried to fill the void, scoring 19 points on 5 of 10 from behind the arc. The CU guard even had a chance to win the game in the final seconds, but his three-pointer from the top of the key missed off the back iron.

The Buffaloes' last effort might have never happened if it weren't for the late free-throw shooting woes of Siebrandt. The junior missed two, giving Colorado a chance to win on their last possession.

"I had visions of Oklahoma shooting those last free throws," Siebrandt said. "They didn't get a good last look on the last possession - it was just a great team effort in the second half.

Siebrandt finished with nine points and a career high four blocks. Pasco tallied 18.

"This game was very physical for us," Pasco said. "That worked to our advantage and with the guards rotating the ball well, it got some open looks for Matt and I."

Defensively, the Cats forced 14 Colorado turnovers,

Jenny Braniff/Collegia

K-State's Pervis Pasco, left, fights for the ball with a Colorado defender in the second half Wednesday at Bramlage Collseum.

leading to 15 Wildcat points. In comparison, K-State committed just seven turnovers, the fewest since the 1993-94

"We picked up our execution on the offensive end and we got more scrappy on the defensive end," freshman Nick Williams said. "That was the difference."

### Wildcats hope to bring home 1st indoor Big 12 title

BY JOEL REICHENBERGER

Kansas State Collegian

A championship is the only thing on the minds of the K-State indoor track and field team.

The team capped off it's 2001 season with K-State's bestever finish in the Big 12 Conference championship — the women in second and the men in fourth. As the Cats go into the 2002 conference championship Friday and Saturday in Lincoln, Neb., they hope to eclipse that success, and bring home an indoor championship for the first time.

"We are excited about the women being in the hunt," Coach Cliff Rovelto said. "We are just as excited about the men's chances to finish in the top three."

Rovelto has good reason to be excited, too. His women's team is ranked No. 10 in the nation by team-power.org, and is led by three returning conference indoor individual champs that have posted Big 12 best marks in four events.

But, lying in the way of the Cat's hopes is the only Big 12 team ranked higher, No. 6 Nebraska.

Competing on their home track, the Cornhuskers hope to defend their 2001 title. Nevertheless, Rovelto said if all goes well, K-State will have a shot at capturing the championship.

"Between us, Texas and Nebraska, it should be very close," Rovelto said. "I think the women can definitely win."

On the men's side, K-State also has high hopes. The squad is ranked No 8. nationally, within reach of No. 3 Nebraska. Texas holds at No. 17, and competitive teams from Colorado and Baylor promise to make it a competitive race for the

"On the men's side, we will need some help," Rovelto said. "It is going to be one of the closest meets of the year probably on both sides."

A pair of speedsters on loan from the football team will

help lead the Cats into the meet. Terence Newman, a Wildcat cornerback, runs the 60meter dash and won last week in his only race of the year. Ricky Lloyd, a receiver, also runs the 60, and finished second to Newman in last weekend's KSU Open, earning the eighth fastest time in the Big 12 this season.

Newman, who sits at No. 3 on that list, is not even in top form yet, Rovelto said. He got a late start to his training, but Rovelto said that handicap hasn't done much to slow Newman down.

"Terence is a guy in terms of ability as good as anyone in the country," Rovelto said. "He is running faster than the guys

who have been training - he is that much better." Action begins at 10 a.m. Friday and Saturday at the Devaney Center.

One thing's for sure, though - the Cats will take the

weekend seriously.

"This is the most important meet without question. To us, it is more important than nationals," Rovelto said. "It's gonna (Pref.)

Exhibit shows art in relationship to humanity

BY JJ DUNCAN

Kansas State Collegian

Lecture

Glen Brown will

give a lecture on "Clay Body

7 tonight in the

Mananna Kistler

Beach Museum

of Art followed

by a dessert

reception.

The human spirit is brought to life through artistic metaphor in ceramics in the Marianna Kistler Beach Museum of Art's newest exhibit.

"Clay Body Rhetoric" will be on display at the Beach Museum of Art until March 24. Glen Brown,

curator for the exhibit, said the theme of the show is to bring in pieces that emphasize the relation ceramic sculpture has to the humanity.

"The vessel is a metaphor for the human form," he said. "Even the idea of a vessel being of solid, material existence, while inside there's a void, nothingness. It's characteristic of human beings because it separates it into two parts, just as many people separate us

into soul and body.

Brown, associate professor of art history, will give a lecture on the show at 7 tonight with a dessert reception afterwards. The lecture will go through a brief description of each piece and will tie them to the theme of "Clay Body Rhetoric."

All of the pieces in the show were brought in outside K-State from leading artists in the field of ceramics, Brown said.

The 7-foot tall "Wishes" by Nan Smith, professor of art at the University of Florida, depicts an ethereal woman surrounded by ceramic birds in what Smith calls a golden moment when the negative no longer has a place. Smith said she tries to focus on the surreal in her ceramic work.

'The feathers on the clothing are falling away, and they're from a bird of prey," she said. "So, it's a falling away of the negative in a moment of great opportunity, a golden moment."

Smith said she often works with multiple figures in one piece in a specific architectural setting, so this is actually a smaller example of her work.

Since the piece consists of the earthenware figure, 77 ceramic birds and a custom pedestal, shipping it was no easy task. Suzanne Hale, registrar and collections manager for the museum, arranged the shipping of all the pieces. "Wishes" was one of the more difficult works to ship. Hale said.

"It was complicated to get that here because of its size and because there are so many small pieces," she said. "She's a meticulous artist, and it's fortunate that she's so organized and had everything together. She gave us very well outlined

instructions for how to crate and uncrate the work." This year, the National Council on Education for the Ceramic Arts is having their yearly conference in Kansas City. Mo. The conference is attended by many artists working in ceramics, and takes place in early March. Brown said it was a major reason for holding a ceramics show in the Beach art museum.

Brown said some ceramics students from K-State will attend the conference, and hopefully the exhibit will help them in their education and work.

Many of the graduate students are already familiar with work from many of these artists," he said. "It gives them a chance to see it firsthand and spend time with it."

Though he has assisted as a curator for several shows. Brown said this was his favorite so far because he was given total control over the selection of artists.

"I had a lot more latitude with this," he said. "it's

been my best experience as a curator for a show so

Smith said that since the ceramics show is devoted to how the art relates to people, it was an excellent place for her work.

"I use the figure as a metaphoric vehicle, so it's an appropriate venue because I used body and gesture in that piece," she said. "I used figures that are live and ethereal in look to capture the consciousness they're in.'

Since much of the work in the Beach is more

traditional Kansas art, Hale said, "Clay Body Rhetoric" is a more modern exhibit for the museum.

Hale said hopefully this will draw more students interested in seeing the work.

"We want to have more interesting, cutting-edge type shows here," she said. "We would like to have some contemporary work but keep our traditional slant. We want to bring in pieces that make viewers think and are more challenging to

### misdirection

### Dangerous radon gas found in Riley homes

BY MICHAEL WATSON

Kansas State Collegian

A dangerous gas creeps into one out of every two homes in Riley

Bruce Snead, Kansas Industrial Extension Services instructor, said dangerous radon levels in Riley County can be found in 50 percent of homes. This percentage is higher

Testing Radon testing kits can be purchased at the Riley County Health

than the rest of the state, where radon is tested to be too high in 25 percent of homes, Snead said.

Radon, a naturally occurring gas, rises

from uranium in the soil and enters homes. The more people are exposed to the gas, the greater chance they have of developing lung cancer.

"The only way to know if you have radon is to test your home," Snead said. "You can't predict radon levels. Just because your neighbors don't have high levels doesn't mean you won't have high levels.

The gas, which is the secondlargest cause of lung cancer after smoking, is relatively new. It is hard to detect because it is tasteless, odorless and colorless.

Radon causes about 15,000 deaths each year.

"It is a chronic, long-term risk," Snead said. "As exposure increases, so does the potential of developing lung cancer.

Radon gas is a class A carcinogen, which means that studies on humans show it increases the risk of cancer, said Mary Etzel, coordinator of the Kansas Radon Program.

When radon levels are found to be too high in a home or business,

Don't want to see

you on page 2

BE

We Deliver During Lunch!

(Ask about our monthly specials)

a mitigation system can be installed to push the gas harmlessly into the atmosphere. The system costs \$800 to \$1,500.

Manhattan is one of the first cities in Kansas that has adopted codes for new construction that would include these systems.

Snead said new homes built in Manhattan will be radon resistant. He said that when something new is built and a vacuum is installed in the attic to mitigate the harmful gas, so exposure will be reduced.

The city does not require landlords or home owners to perform radon tests.

"Nothing requires anyone to test or fix radon levels," Snead said. "It's a risk people can decide to take or not to take.'

Because of the dangers of radon, the Kansas Radon Program at K-State has launched its largestever education project to inform the public.

The Kansas Association of Broadcasters gave the program inexpensive air time to run educational advertisements on 105 radio stations and 18 television stations across Kansas, Etzel said.

The educational air time has paid off, she said. Phone calls to the Kansas Radon Program have tripled since the educational advertisements began in January.

The ads will be running through

Snead said this is the first time the extension has launched a statewide radon education broad-

"It's not something to run screaming into the night, but it is something people should be aware of and concerned about," Etzel said.

For more information on radon, contact the Kansas Radon Program at (800) 693-5343 or at www.engext.ksu.edu/radon

### USD 383 school board finalizes redistricting plans

BY MICHAEL LAWRENCE Kansas State Collegio

Manhattan-Ogden USD 383 Board of Education members adopted and finalized 2002-03 districting changes at its meeting Wednesday evening.

In a 4-3 vote, board members voted to relocate 390 elementary school students throughout the district's schools. When the board voted to close Eugene Field and Bluemont elementary schools, the district had to redistribute the students who would have attended these schools.

Larry Weaver, board member, moved to accept the third out of five redistricting revision plans that were presented to the group.

Members voted to move 154 students who are attending Bluemont Elementary School to Woodrow

Wilson, Northview and Lee elementary schools. Members also voted to relocate 85 Eugene Field Elementary School students to Marlatt and Theodore Roosevelt Elementary schools.

The board also relocated 28 Ogden sixth graders who are attending Marlatt Elementary School to Frank Bergman Elementary

Nancy Knopp, board president, said students from Ogden only are attending a Manhattan school because, in past years, the district had to relocate them because schools were overcrowded.

Knopp voted against the proposal. She said schools are not overcrowded anymore and it is time Ogden students were sent home.

She said she saw no reason to move Ogden residents to Manhattan because there is room in Ogden

dependable quality service

Claflin Books and Copies

1814 clafiln rd 778-3771

"We have a building at Ogden and it's not filled to capacity," she said. Board Member Jim Shroyer, on the other hand, said keeping Ogden students in town is a form of discrim-

"We have segregation based on social economic status," Shroyer said. "School diversity is critical for educational excellence.

Shroyer said schools with lowerincome students tend to employ the most new, inexperienced teachers, have lower expectations of students, and exhibit a low level of thinking and learning.

"I would actually like to see them moved in sooner," Shroyer said.

Career and Employment Services, said finding a job has become more

"Two years ago if you had an MIS degree and good qualifications, you could pretty much write your own ticket," he said. "That's not true anymore."

Fewer students have come to CES for help this year. Bradenburg said.

There could be a couple reasons. The first is because students think the job market is hopeless.

which Bradenburg said isn't true. "You have to be diligent," he said. "Use every tool you've got - the Internet, mock interviews, networking.'

The second reason is because more students are opting to go to graduate school.

"They just want to prolong the graduation process, and when they get out, they'll be in better shape," Bradenburg said.

Seniors who planned to attend graduate school one day are just moving that date up. Kershner said she had wanted to enter the job market first and go back to school later, hopefully on the buck of her employer.

But that could change.

"I might as well just go instead of just sitting around waiting for a job,"

she said.

Michael Oldfather, associate professor of economics, said one of two things usually happens during a recession. People either find a job because they can't afford school, or they stay in school longer because they can't find a job.

In a mild recession, the latter is more likely to occur, he said.

"Once people start on the path to get an education, it's a high priority for them," he said. Another option graduates might

consider is studying abroad, said Barry Michie, director of K-State's Study Abroad program.

The number of students studying abroad has steadily increased during the last few years, Michie said.

While it always offers benefits, Michie said, people might find it more appealing now.

"I would advise any student to do that at any point simply because of the experience it gives them," he said. "It also looks great on a résumé. It's a plus to employers and graduate schools."

Finding a job depends heavily on the major. The market remains strong for engineering majors and certain business sequences, said Jim Ragan, head of the Department of Economics. Humanities majors could run into more trouble.

Bradenburg said he has noticed the demand for technical jobs has begun to decline. More students are going into the health field or

seeking government jobs.

The average starting salary in some fields also has dropped, Bradenburg said. Compared to just a year or two ago, salaries are down a couple thousand dollars. More companies are offering benefits as opposed to money, he said.

Stan Elsea, associate dean of the College of Business Administration, said K-State students who have good qualifications aren't having problems finding jobs. Accounting, finance and information systems are all still in high demand, he said.

However, it would not surprise him if the graduate school sees an increase from its usual enrollment of about 125, Elsea said.

Finding a job still is possible,

Elsea said. It just might take some more work and some compromise.

"Don't be afraid to go and work for a smaller company," he said. "It usually requires the student to be more pro-active and go look for these people. They don't come to

K-State. Kershner said fewer employers have recruited at the university this year, but it seems to be picking up.

For now, she's keeping her head up and waiting to hear back from potential employers.

"I'm hopeful because I think it's going to start coming back up," she said. "I just need to get a job, and not knowing what you're going to do when you graduate is kind of

### PROPOSAL

Continued from page 1

future growth in the area, and it would reduce the number of

Residents and business owners in the area took part in the public input session. There were at least 20 people who spoke against the proposal, and Linders presented a petition to the commission with 1.179 registered voters from the area signing against the construc-

Klimek said studies conducted by Intelligent Transportation Systems, an organization that promotes building accessible highways, show that adding lanes would not solve traffic problems.

"You can pour more concrete and add lanes, but traffic continues to grow and grow. Before you know it, you're adding another left-hand turn lane," he

said. Another concern expressed by several other members of the community was the danger traffic in the residential areas would pose

#### Resolution

To improve traffic flow, Linders said, widening the lanes to add a right and left-hand turn lane would be sufficient. He said a raised median is not needed.

"Access is No. 1." he said. "If there is a barrier blocking traffic, there will be a reduction in sales as soon as the concrete is poured."

Derrick Roberson, an attorney representing Pizza Hut on Third Street, said he has looked at the traffic situation at the discussed intersection, and he said he feels problems only are occurring during peak times of the day.

He said one problem he has noticed is that the traffic signals at Third Street and Bluemont Avenue and Tuttle Creek Boulevard and Bluemont are not synchronized.

"One light is green while the other is red." Roberson said. "It just seems like we're proposing a drastic change to address a limited issue. What can we do to synchronize the lights?"

Officials said the two lights could not be synchronized because of the close proximity of the lights.

While Everett voted to table the motion, he said not passing the proposal is only delaying the

Holding up a picture of the proposed improvements, he said, "This is the intersection of the future. We're viewing Fourth Street as a major corridor, and this is going to be what has to happen."

Luann Roth, access coordinator for the Kansas Department of Transportation, said KDOT is open to viable proposals to the area. She said the department would have to

look at how the highway operates. Any access to the highway has to have a permit approved by the highway engineer, she said. This gives KDOT the final say to what happens at the intersection of

Third Street and Bluemont. Financing still would come from city funds, general bonds or some other funding mechanism if a decision is made in the future to improve the intersection and affected streets.

"I think this is going to be the intersection of the future," Everett said. "Something needs to be done there. I don't like it, the people don't like it, but I think it's inevitable.

"Ultimately, we're going to have an intersection like this, but I'm not prepared to deal with the ripple affects," he said.

#### TUITION

Continued from page 1

Those benefits would include things like maintaining small class sizes and more class availability, Wolters said. These are realistic goals that can be completed in one year, he said.

If elected, Wolters said he would form the committee by May. All nine colleges would be represented because each has specific needs and qualities, he said.

Presidential candidate Luke Miller said he prefers a middle-of-the-road increase. "Twenty-seven percent is too high. The low end is

also unacceptable," he said. "You don't want to hurt the hand that's feeding you." Officials say the increase will further K-State's goal of

becoming a Top 10 land-grant university within the next five years. Miller said that might be too short of a time. "A longer span of time to accomplish that might be

better," he said. "I would rather see a gradual change instead of a dramatic one."

Candidate Michael Day said he also wants a

gradual increase.

"When the increase happens, we want to make it gradual and smooth, not just have a giant jump in tuition," he said.

Day said the most important part is ensuring available financial aid is consistent with the price of a K-State education. While he does not have a specific number in mind, he said it is important that the university works to save money.

'I'm trying to save money through examining how it is spent and where we could save money through different channels," he said.

Candidate Chris Greene said he would fight to keep the increase less than 10 percent.

"I draw the line there," he said. "Even then, it's too

Greene said he wants to implement quality changes with the least amount of money. That includes changing the grading scale and implementing a shuttle

"We would communicate to students what the hike will do for them," he said.

Specifically communicate where their money is going.

### Student Senate passes 3 Union privilege fee increases

BY SARAH RICE

Kamus State Collegian

Student Senate approved three student privilege fee increases for the K-State Student Union at Thursday night's meeting.

The Union's operations budget will be increased by \$1,308,808 for the 2002-03 school year and \$1,348,072 for the 2003-04 school years, which includes a 3 percent inflation rate. This increase will come to approximately \$4.50 per full-time student for each semester.

Ben Harder, privilege fee committee chair, said the money will help the Union's operations budget which now is in the red due to a lack of in-house revenue from the bookstore and catering service.

"We're not balancing the books in the Union operations right now," Harder said. "This meets the Union's budget halfway."

Senator Travis Weigel was the only senator who voted against the operations budget

"We've helped them out of the red before," Weigel said, "They are not making a visible

Weigel said he thinks the privatization of the bookstore is a solution to the problem.

rather than continuing to designate privilege

"It's something they need to address instead of continuing throwing money at the problem," he said.

The second privilege fee increase will go to the Union's Repair and Replacement fund, which will amount to \$178,798 for the 2002-03 school year and \$184,162 for the 2003-04 school year, which includes a 3 percent inflation rate. Full-time students will see an approximate \$2 increase each semester for

"We are going to take care of the highest

priority items," Harder said.

He named double-pane windows, mechanical room updates and improved food service equipment at the top of the list.

The final fee increase will be allocated to the Union Program Council and the First Friday events. The fees will amount to \$205, 984 for the 2002-03 school year, which includes the one year allocation to First Friday of \$66,000. For the 2003-04 school year, the UPC budget will receive \$144,184, which includes a 3 percent inflation rate. This amounts to \$1.88 per student for each

Harder said the allocation for First Friday will allow the program to occur every week with additional programming.

"It allows different programs for people who don't want to go to the bars every Friday night," Harder said.

Harder said the additional funds, which double the current UPC budget, will allow a graduate student to administer the program and look into grants for future funding.

Harder assured senators that student privilege fees would be put to good use.

SEN SENATE OF PAGE 10

### Committee endorses driving bill

BY AMBER KOEHN Kansas State Collagian

Kansas teen-agers could experience problems if they want to hitch rides from

In a 6-5 vote Wednesday, the Senate Judiciary Committee endorsed a bill restricting the number of people allowed to ride with drivers aged 16-18. The bill was sent to the entire Senate, and if passed, will only allow teen-age drivers to have one other minor who is not a sibling in their vehicle, unless they are going to school or school activities.

"I don't think it's fair," 18-year-old Haley Rankin, freshman in environmental design, said. "One person can distract drivers just as much as several people can.

Rankin said she doesn't understand why the Senate is targeting just the 16-18-year-olds.

'The Senate is acting like we're the only age group who gets distracted while

See LICENSE on PAGE 10

### Officials sure proposal will be approved

BY MAGGIE GRUSZNIS Kimson State College

K-State's \$40-million food-safety facility proposal passed out of the House of Appropriations committee Wednesday. It was supported by both republicans and democrats. Though the proposal has not yet been approved by the Legislature or the Senate, K-State officials seem to be confident that it

If approved, K-State will be able to expand its research. The facility is one of three research buildings the Kansas Board of Regents proposed. The proposal includes a biomedical research center at the University of Kansas and an expansion of aviation safety facilities at Wichita State University. The purpose of each is to do research on the biggest issues facing the economy of Kansas.

Jerry Jaax, associate vice provost, said K-State has a strong agricultural department and believes the food and safety facility is in K-State's best economic interest.

"Agriculture is important to the state. As such, we have a need to be able to work on agricultural diseases that have economic interests to the state," Jaax said. "It will increase our capability to look at various plant and animal diseases that previously haven't been able to be addressed because of the lack of facilities."

Ron Trewyn, vice provost of research, said the food and safety facility will allow K-State broader capacity to gather information on food safety relevant to Kansas. Trewyn said Kansas will have the ability to respond to any diseases entering the state.

The Board of Regents' proposal includes a \$110 million bond issue. The state pays the first \$50 million in payment of no more than \$10 million a year, and the involved universities pay the additional \$60 million. Trewyn said K-State is now raising private and federal funds to cover the costs.

## Learning the elements

Tina Houston, 10, lights a balloon filled with hydrogen in front of a crowd in the Marlatt Elementary school gym

Kelly Glasscock/

### Students see world through eyes of chemists, scientists

BY MICHAEL WATSON

Kansas State Collegio

Breaking out the fire extinguisher, a K-State chemist said he was ready to "blow

Dave Heroux and Brian Helfrich. graduate students in chemistry, captured the interests of Marlatt Elementary School students, teaching them about chemistry by using a magic show.

"A lot of these experiments are quick and dramatic to get them interested in chemistry. We try to relate the experiments so that kids understand," Heroux said.

Keeping the children back about six feet, Helfrich explained one of his favorite parts

of the summer - The fourth of July.

"What makes fireworks different colors with the purples, the yellows, the reds? They're different colors because there are different elements.

An experiment with a small fire showed that green fireworks are green because of the copper element, and pink fireworks are pink from the lithium element in the fireworks

"When we burn the elements, they get excited and burn a specific color," Helfrich

Changing props, Helfrich bounced a ping pong ball and a rubber racquet ball. He

issues. Look in Monday's

three-day series that

Student Body Vice President Brandon Kauffman, senior in political science, said the program probably would result in a privilege fee

> student per semester if passed. There are a three options

increase of \$1 to \$2.50 per

being discussed to implement the program:

shuttle service

volunteer organization service

■ taxi service where students call in and get a ride by

presenting their student ID Kauffman said the shuttle service and student volun-

teer programs would not be feasible. He said the taxi service is the most feasible especially in Manhattan.

### Taking a stand on SafeRide

Students who use the program should pay a little more money when they get a ride than those who don't use the service.

Michael Day SafeRide is the No. 1 priority. Getting drunken drivers off the road will save lives. Supports a tuition increase.

A designated driver program is needed and the ticket would be pursuing implementation.

Chris Greene
Believes the program would ensure student safety, and if students want the program, they would continue it to make K-State a safe place.

What this year's candidates say about the Chris Greene, presidential candidate

SafeRide offers safer streets at a minimal cost. Not all students party, but they drive and they may get hit. Maximum cost would probably be \$3 per student per year.

SafeRide would cost a little bit of money, but the program is definitely needed. Walting for Barker to introduce the bill to senate before

Matt Wolters if students want it, he is more than willing to look into costs and implementation of the

### Today On the

Interested in medieval culture? K-State will be host to a medieval conference Saturday. Read about it online. www.kstatecollegian.com

### STATE IN BRIEF

#### KCI prefers private secuity screening over government

KANSAS CITY - With the federal government now overseeing checkpoint security screening at the nation's airports, Kansas City International Airport wants to be one of five allowed to have their own private screening companies.

The airports will be selected from five categories based on security risks.

KCl is in the second-highest risk category, said Kansas City Aviation Director Russell Widmar. Other airports in that category include Midway in Chicago, Love Field in Dallas, and airports in Milwaukee and San Jose, Calif.

#### State board says law will prevent crematory horrors

TOPEKA - Kansans unnerved by the gruesome discoveries at a Georgia crematory can take comfort in a new state law designed to prevent any such horror stories from unfolding here, the Kansas State Board of Mortuary Arts said.

The law, passed last year, took effect Jan. 1. It requires crematory operators to renew their licenses yearly, pass annual inspections, create detailed records of all cremations and maintain them permanently. It also requires the operators to keep equipment in good working

The law also requires crematories to establish a secure holding facility for bodies awaiting cremation.

All of the regulations should be in place by June, said Mack Smith. executive secretary of the Board of Mortuary Arts.

### **WORLD IN BRIEF**

#### Israel steps up attacks on **Palestinian Authority targets**

GAZA CITY, Gaza Strip - Stepping up attacks Thursday, Israel fired missiles and tank shells at Palestinian Authority targets, including Yasser Arafat's West Bank headquarters, and Israeli troops entered Gaza City for the first time in 17 months of fighting.

Five Palestinian civilians, three gunmen and an Israeli Arab manwere killed in the strikes and a shootout between a militant and Israeli soldiers.

Despite Arafat's tough talk, his security forces announced Thursday that they had arrested three suspects in the October assassination of Israeli Tourism Minister Rehavam Zeevi.

Israel has kept Arafat confined to the West Bank town of Ramallah since December, saying it would not let him leave until the people behind Zeevi's assassination were arrested.

#### Chief of disease control and prevention resigns

ATLANTA - Dr. Jeffrey Koplan resigned Thursday as head of the Centers for Disease Control and Prevention, the federal agency that was on the front lines of last fall's deadly anthrax attacks.

Koplan made the announcement in a meeting with senior CDC officials and later informed the staff. The resignation is effective March 31.

Koplan said he had not made a decision on what to do next, although he said he would like to remain in Atlanta, where the public health agency is headquartered.

#### ATTACK DEVELOPMENTS

- The U.S. government announced a policy shift Wednesday to "make every effort" to gain the release of all Americans kidnapped overseas, even private citizens:
- Gummen opened fire on a British patrol Wednesday night in the Alghan capital and the British returned fire, a peacekeepers' spokesman said Thursday, No deaths or injuries were reported.
- Afghanistan's foreign minister on Wednesday publicly disputed Prime Minister Hamid Karzai's claim that high-ranking conspirators within his own government assassinated the aviation minister.
- After breaking with the Taliban and banning some militant Islamic groups, Pakistan's President Pervez Musharral is moving to sever links between Pakistan's powerful spy agency and Muslim radicals.

### SHE said / HE said

Q: I recently met a guy online. We seem to click on many levels. How or should I go on with this relationship? - Lost in Cyberlove

Dear Lost in Cyberlove: Relationships are a funny thing. They seem to develop in the most

random places at the most inoppor-

tune times. I think it's great you met someone you click with. I can relate to your excitement because these days, good men are hard to find - at least here.

However, I am not experienced at chatting online and have no interest in spending my time this way. If I were you, I would be wary of this so-called great guy, because he could turn out to be a dirty old man, or woman for that matter.

Decide before you go further whether you want to take on the critics of your virtual romance. If you really like him and want to pursue the relationship, then go for it. However, be prepared for people like me who don't participate in this activity to be skeptical of your decision.

Have fun, have a relationship it's up to you, but most impor-

tantly be careful. Happy typing! Samh is a junior in electronic

journalism.

Dear Lost in Cyberlove:

I would use the term "relationship" lightly with someone you have never met. It's just typing. Leave it at that.

My advice for you is to drag it out as long as you can and have fun with this. It is harmless amusement at the expense of another.

If all you are doing is chatting with this person on the Internet, then it is perfectly OK. You will never get an STD or become pregnant, so this type of relationship is almost risk-free.

An Internet relationship would provide plenty of room to make yourself become the dream person that you always wanted to be. Tell them things that are facetious and brag about things in your life that do not exist. Screwing with other people's minds is one of the most entertaining

things we can do to one another.

Another option is to meet the person and take the chance

of ending up in a dumpster. Do as you please. but I still think it's just typing. Nothing. more.

> Derek is a senior in milling science.

Three K-State students were recently selected as finalists for \$30,000 Harry S. Truman scholar-

Ben Champion, Aubrie Ohlde and Leslie Small were chosen to participate in the final stage of the competition March 8 in Kansas City, Mo.

The students will go through an interview process along with other finalists from Kansas, Arkansas and Missouri.

Winners of the scholarships will be announced March 22.

The Harry S. Truman Scholarship Foundation awards merit-based scholarships to college students who plan to pursue careers in government or elsewhere in public service and wish to attend graduate or professional school, according to the foundation's Web site. Approximately 75 to 80 Truman scholarships will be awarded

The foundation seeks candidates who have extensive records of public and community service, according to its Web site. Foundation officials also look for candidates who are committed to

careers in government or public service and have outstanding leadership potential and communication skills. Financial need is not a consideration for Truman scholarships.

Jim Hohenbary, K-State scholar adviser, said the Harry S. Truman Scholarship Foundation allows K-State to nominate its candidates for the final round each year.

"We are very fortunate to have three make it into the next round," Hohenbary said. "Few universities have that many individuals go forward."

Hohenbary said the interviewing panel is comprised of distinguished individuals that have done great work in public service.

According to the foundation's Web site, the panel will include: David Adkins, Kansas Senator; Kent Bradley, instructor of obstetrics at the University of Kansas-Wichita; Diana Carlin, dean of the graduate school at University of Kansas; John Gibson, a U.S. Court of Appeals judge; Manuel Pacheco, president of the University of Missouri; David Sallee, president of William Jewell College, and Louis Blair, the executive secretary of the Harry S. Truman Scholarship Foundation.

3 K-State students selected as Truman scholarship finalists

SMALL

CHAMPION

Champion, senior in chemistry, natural resources and environmental sciences with minors in Spanish and political science, said he was relieved when he discovered he was a finalist.

OHLDE

"I have really aimed to get to the finals, so I've reached a goal that I set," Champion said.

"There is some sense of relief, but I'm also trying to prepare as much as I can. The competition is extremely stiff, so I feel a fair bit of pressure.

Champion, the son of Mike and Paula Champion of Olathe, Kan,, is an Eagle Scout, a Kansas Honors Scholar, a K-State Putnam Scholar and a Howard Hughes Undergraduate Research Scholar,

He has served as the president of Students for Environmental Action and is a member of Alpha Chi Sigma Chemical fraternity and Golden Key National Honor

Society.

Champion said he wants to work on a dual program and get his master's degree in chemistry, and public affairs and policy. He said he is looking at a variety of graduate schools including Princeton, Cornell and some schools in Michigan.

Ohlde said she applied for the Truman scholarships because she knew she wanted to go to graduate school and would need some sort of financial assistance.

"I knew that what I was wanting to go into matched up pretty well with what the Truman foundation was all about," Ohlde

"They promote public service and want to help students who are devoted to public service."

Ohlde, a Palmer, Kan. native, is the daughter of Royce and Clarice

She is a senior in political science with a minor in leadership studies. She has a secondary major in international studies and a minor in business administration.

Ohlde serves as the director of public relations for Blue Key National Honor Fraternity. She is a member of Alpha Delta Pi sorority and the K-State Student Alumni Board.

She has served as an arts and sciences student senator for three years and has been involved in the Student Governing Association for four years.

Ohlde has interned in Washington, D.C., for Rep. Jerry Moran. She also is a K-State Putnam Scholar.

Ohlde says she plans to get a graduate degree in foreign policy and security policy, and hopefully pursue a law degree at the same

She said she is looking at George Washington University, Georgetown University and American University, all located in Washington, D.C.

Small, junior in agricultural economics with a minor in leadership studies, has served as the central region vice president of FFA in 1999-2000. This was a national office that allowed her to

travel around the United States meeting, educating and assisting FFA members.

Small is from Lebanon, Ind., and is the daughter of Tony and Barbie Small.

She is a member of Kappa Kappa Gamma sorority and interned for John Deere in Germany last summer.

Small said she plans to get a graduate degree in developmental studies. She said she is looking at the University of Denver, which has a graduate school of international studies. She also is looking at the London School of Economics because it has intense programs in her desired field of

"I was excited when I heard I was a finalist," Small said. "I was really proud of the proposal and application that I had submitted, and I was happy that they valued my opinions.

K-State ranks first in the nation among public universities in producing Truman Scholars. The Truman foundation reports that only Yale University, Stanford University, Duke University Harvard University, Radcliffe College and Princeton University, which are all private schools, have

### Annual rodeo begins tonight, participants predict tough competition

BY ANGIE JOHNSON

nationwide

Konsas State Collegian

"Two wraps and a hooey." That's all it takes.

This might sound simple, but to participants competing in K-State's Rodeo this weekend, it is a challenging technique to complete one of the fastest calf-ties ever.

The calf-tie is not the only competition audience members can watch. The 55th annual K-State Rodeo, also called the 46th National Intercollegiate Rodeo, begins tonight at Weber Hall and will feature several different calf, horse, bull and bucking horse races.

The rodeo consists of four separate performances, Kid's Day, a queen coronation and a church service.

"I encourage anyone who wants to have fun and see some exciting competition to come out and watch the rodeo,"said David McClure, rodeo coach and manager of the animal science horse unit.

K-State's 20-member traveling rodeo team, along with 22 different colleges from the Central Plains region, will be represented and given the opportunity to compete. Up to 750 students can participate, and each year the number of contestants has increased, McClure said.

"It is our first time back this semester, and this will give us a chance to get in touch with our friends from other states and schools," said Stacia Wood, president of the Rodeo Club and junior in elementary education.

McClure said another change is that team members have practiced using different techniques in order to finish timed events faster. Team members have improved in the timed dismount for calf-roping, where the contestant ropes a moving calf while riding a horse. McClure said.

"We have been getting down to the calf in three to four strides, which makes for a fast tie and really helps us on time," McClure said.

Members of the rodeo team practice all school year and travel to 10 different competitions during the season. Last semester, the team visited Pratt and Colby, Kan., and Alva, Okla. This spring K-State will compete in seven rodeos, spending only two weekends at home in Manhattan.

"It makes it difficult for them to keep up with school work," McClure said. "They really have to stay on top of things."

Besides requiring time, rodeo competitions cost money to put together.

This year, the budget for the rodeo was around \$20,000. Contractors brought in a stock of 68 calves, 85 steers, 20 bulls and 50 bucking horses to use for competing. With all of the hard work being put into the event, members of the team hope to see a lot of faces in the crowd this weekend.

"K-State always has big contestant and fan turnout," Wood said. "It's something college students

look forward to each year."

Jessica Henson, junior in human ecology and mass communications, said she is looking forward to attending the rodeo because her family has competed in previous

"I am anxious to see what the K-State rodeo team has to present this weekend," she said. "It takes a lot of talent, and I really enjoy watching it.'

The rodeo will end Sunday with a championship round. McClure encourages everyone to attend and see what the team has been practicing all year.

"I expect to see some of the toughest rodeo competition in the nation here," McClure said.

### Schedule of events

The K-State Rodeo will take place this weekend in Weber Hall. Tickets cost \$6 for adults and \$3 for children in advance, and they are \$7 and \$3.50 at the door. Tickets are avail Bar J Western Clothiers and the K-State Student Union Bookstore

### Officials should educate, not punish drivers

Government officials are attempting to cut down teen-age driving privileges.

On Wednesday, a bill was sent to Senate that would restrict the types of passengers in cars driven by 16-to-18 year-olds. Teenagers only would be allowed to transport one non-sibling minor to non-school-**▶ OUR VOICE**

related activities. This bill is intented to keep teen-agers safe. But punishing drivers for their age is not the solution. Instead, more education should be required.

Reports give high percentages of accidents for young drivers. But this group has more accidents because they are new drivers, not because they are young.

Officials should consider the alternative of education.

Driver's education programs help teen-agers learn how to drive safely. Right now, they are not required. One solution is to make this training mandatory for a driver's license.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

### FRIDAY

Nick Bratkovic thinks if Mike Tyson is going to fight anywhere, he might as well box in Kansas.
Paul White is confused about issues of censor ship during times of war.

Topic should be priority for candidates

n the upcoming Student Governing Association elections, the environment will be a hot topic. Environmental issues are a significant part of multiple presidential platforms, which is a pretty good indicator that students care about the issue.

The big question is this: what can we do to make the environment better while keeping the university's best interests in mind?

Should we implement a Micah Hawkinson huge university recycling program?

Should we concentrate on conservation? Should we just stop throwing beer bottles on the

lawn after wild parties? I don't know about you, but the debate has me more discombobulated than a sack of monkeys in a vat of marshmallow goo.

One thing's for sure: we need be careful about making major policy changes.

Protecting the environment is obviously important both to us and to our descendants. Unfortunately, preserving the world for humanity is not the main mission of K-State, Well, not directly anyway

The university's goal is to provide students with a high-quality education for the least possible amount of money. This sometimes means sacrificing really neat and productive extras on the altar of higher education.

In order to provide the best possible education, K-State needs to devote most of its resources to academic improvements like smaller classes, classroom renovations and increased faculty salaries. This means there's not much dinero for top-heavy programs that don't directly benefit academics.

This is especially true because of recent cuts in K-State's budget and the imminent increase in tuition. Now, more than ever, SGA's duty is to watch expenditures very carefully and make every penny

> In short, we should send all unnecessary and wasteful programs sliding away faster

than a downed Russian figure skater.

If we undertake new environmental programs, we need to make sure they serve the best interests of the university. Cool and innovative programs might be neat ideas, but if they aren't fiscally sound and eminently practical, they don't belong at K-State.

For example, starting a recycling pickup program in the residence halls could be a good idea. If the recycling program could be cheaply integrated into the trash pickup system, it might be worthwhile to investigate.

If, however, it required more money than it was worth, it would be a bad idea.

We need to use common sense when considering these issues. It's like planning a personal budget - if resources are tight, we wouldn't plan to spend hundreds of dollars on alcoholic beverages every

Of course, this probably isn't an issue for most K-State students, seeing as they only drink zero to five drinks when they party, but I digress.

Instead of planning new ways to spend money, we need to look at methods of cutting costs. SGA should explore the feasibility of making buildings more energy efficient. It also should find ways to cut electricity costs on campus.

Please don't misunderstand - I'm not saying we should let the environment rot away without doing anything about it. On the contrary, I would love to see new methods for making the environment cleaner and safer for everyone.

That said, K-State's job is not the preservation of the environment. To paraphrase one politician, it's about education, stupid!

If we can make the world better without detracting from our main vision, I'm all for it.

But let's not sacrifice academic excellence for environmental policies. We need to focus on, like, learning stuff.

Micah is a junior in English and history. You can email him at mph7686@ksu.edu.

### Small towns have own identity, sense of community

line art by Jennifer Kimball/Collegian

ome of you are from a small town. A couple of you might have even been to one once. But to me, there is no place on

Earth quite

hometown.

Lyndon,

Kan., popula-

tion 1,038, is

the place I

still call

home.

like my

view

Kyle Brownback

Sometimes referred to as the "jewel of east-central Kansas," Lyndon is the place of residency to some of the greatest people in this world.

What can I say, I love the town I call home, and it will always be a part of

That is what makes small towns great. We have pride in our little city.

We take pride in knowing that our town is much better than Burlingame, Lebo, Melvern or any other surrounding towns.

I don't think I've ever heard someone tell me why Lenexa is better than Shawnee. I don't even know if that is a plausible argument.

Small towns have their own identi-

Whether it is through businesses like the Olde Bank on Main Street to the Casey's General Store located on the outskirts of town, these places make us

who we are.

When you drive into Lyndon, the first sign you see welcomes you to our small town.

Immediately below this sign is another, just as important, that reads, "Home of Stephen Singular, Published Author.'

While I have not read any of his books, I take pride in knowing that a man with the same roots as mine has enjoyed so much success.

And this pride is shared within the entire community.

Interactions with families in the community also help to make small towns different.

I know that every time I have been home for a break, I cannot go to the grocery store or post office without being stopped and asked how school is going for me, and if I had learned what I wanted to do with my life yet.

The general desire to see people from their town do well in life is something that makes all small towns great.

We might not have the best things in Lyndon. It costs more to buy groceries in our town than it would at Wal-Mart. But the residents don't mind the extra money because they're just glad to see the money stay in the community.

We might have to drive a half-hour to see a movie, but a movie theater isn't a necessity.

This sense of community and general concern for the welfare of the town's inhabitants are what makes towns like Lyndon thrive.

In Lyndon, there is no need to buy a Mercedes Benz or dress in clothes from Abercrombie and Fitch.

The people in my town know you for who you are and the things that you own can't change that.

Now that I have been living in the "big city" of Manhattan for four years, I've become accustomed to having a more convenient life.

However, this has come at the

expense of losing my identity. I feel lonely in this town, and I miss not knowing everyone I see when I go to the gas station or a restaurant.

I am sad to realize that my chosen profession most likely will force me to work in a large city throughout my life. But that isn't that big of a problem. I can commute.

After all, my parents blessed me by raising me in a small town. The least I can do is to return this favor to my children.

Kyle is a senior in biochemistry and pre-medicine. You can e-mail him at krb4706@ksu.edu.

### State Department says kidnapped Wall Street Journal reporter Daniel Pearl killed

BY RICHARD PYLE The Associated Press

NEW YORK — Wall Street Journal reporter Daniel Pearl is dead, the State Department said Thursday, a month after the journalist was abducted by

Islamic extremists in Pakistan. Pakistani authorities said a videotape indicated Pearl, kidnapped in the port city of Karachi on Jan. 23, had been killed.

"The recorded video contained scenes showing Mr. Pearl in captivity and scenes of his murder by the kidnappers. The tape appears to be correct," said Mukhtar Ahmad Sheikh, interior minister of the Sindh province, which includes Karachi.

Pearl was abducted after arranging to interview the leader of a radical Muslim faction with purported ties to the al-Qaeda terrorist network and terror suspect Richard C. Reid,

arrested in December on a Paris-Miami flight he allegedly boarded with explosives in his shoes.

Pakistani police have seized several suspects, including an extremist who said in court that he engineered Pearl's abduction.

In Washington, D.C., the State Department said the U.S. Embassy in Pakistan received evidence Thursday that Pearl is dead, but spokesman Richard Boucher provided no details

Two U.S. officials, who spoke on condition of anonymity, said a videotape purportedly showed Pearl either dead or being killed, and the FBI was evaluating the tape's authenticity.

The Pakistani minister refused to say whether he or other Pakistani officials had seen the videotape or what "the scene of his death" meant. The Journal said it believed Pearl was dead.

"His murder is an act of barbarism

that makes a mockery of everything Danny's kidnappers claimed to believe in," the newspaper said in a statement. "They claimed to be Pakistani nationalists, but their actions must surely bring shame to all true Pakistani patriots."

Journal spokesman Steve Goldstein said he did not know if a body had been recovered.

In Beijing, a grim-faced President Bush decried Pearl's slaying and said

such crimes "only deepen the resolve of the United States" to fight terrorism.

Pakistani officials said there were indications that Pearl had been lured into a trap by false information.

Islamic militant Ahmad Omar Saeed Sheikh said during a court hearing that he had engineered Pearl's abduction to protest Pakistan's alliance with the United States.

"Our country shouldn't be catering to America's needs," the militant said.

## BATTLE IN BOULDER

### 2nd place up for grabs against CU

BY MICHAEL NOLL

Kansas State Collegian

K-State will play for more than just a victory when it tips off against Colorado at 8 p.m. Saturday.

The Cats and Buffaloes will play for second in the conference and for a firstround bye in the Big 12 Tournament. Those goals might be more urgent to Colorado, though, especially on senior

"They're a very senior-dominated basketball team," Coach Deb Patterson said. "Then, when you understand what's on the line for that senior-dominated club, they're going to be very, very primed and ready to play."

No. 12 K-State (22-5, 10-4) has at least one advantage over No. 11 Colorado (19-8, 9-5) — the Cats beat the Buffs 75-72 in Manhattan on Jan. 9. In that game, though, K-State had double-digit leads but allowed Colorado to fight back. Center Tera Bjorklund had 17 points, and guard Mandy Nightingale had 20 points, including six three-point shots.

"They have good outside shooters," freshman guard Megan Mahoney said. "We need to contain their three's. I think they had 10 against us last game. We just had some breakdowns, letting them have open three's. We need to make them make

Colorado's ability to score isn't limited to the perimeter. The Buffs have three post players that are 6-foot-2 or taller.

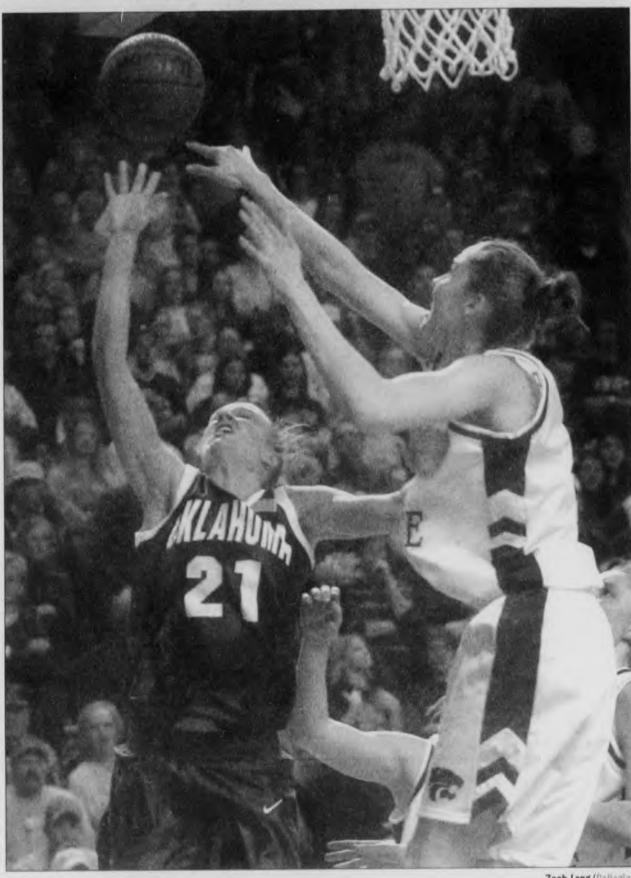

"We obviously have to do a very good job on the boards against them." Patterson said.

"Their size is always a concern, but also their ability to really stroke the threeball. They're one of the best teams in the country in knocking down three's. So it presents some real challenges for us defensively."

Colorado's post players also present a personal challenge to sophomore forward Nicole Ohlde, especially after their success in Manhattan.

"They definitely got a few on me when they were here," she said. "Lately, I haven't been stepping up my defense and getting rebounds and doing the things I need to do, so I think it's a personal challenge for me to start playing better than I have been and help the team get a

The focus will be on the entire K-State team to play well defensively, however,

K-State's Nicole Ohide, right, blocks Oklahoma's Stacey Dales' (21) shot during the Wildcats' loss to the Sooners on Feb.13 at Bramlage Collseum. K-State will play at Colorado on Saturday and are second in the Big 12 conference rankings, two games behind Oklahoma.

because the Cats' entire game is based on their performance on that end of the floor, Patterson said.

"I have a great deal of confidence in our ability on the offensive end of the floor, but I think our game is typically keyed off our defensive intensity," she

said. "We're going to have to bring it on the road to be in that basketball game."

While the defense is key, K-State might also bring an improved offense to Colorado. Against KU last Sunday, the Cats showed more movement on the offensive end of the floor than earlier in

"We were pushing the ball, which opened things up for us," Mahoney said. We just need to be aggressive and take them to the hole against Colorado and hopefully get some kick-outs and find our posts in there."

### Confident Cats head to Homestead Challenge

Kansas State Collegion

Teams representing both ends of the competitive spectrum will meet at the Homestead Challenge this weekend in Homestead, Fla.

As K-State takes its 3-0 record south, defending NCAA national champion Miami will highlight the competition. The Hurricanes are 6-4, returning a number of players from last year's championship squad.

But Miami doesn't figure to be the Wildcats' biggest challenge this weekend.

Florida International enters the tournament 8-1 and downed the Hurricanes 7-1 on Feb. 6 in Miami.

Before K-State gets a crack at those teams, though, the Cats will have to get by St. Francis and Lipscomb both teams in the throes of an abysmal start. Lipscomb is 0-5 and St. Francis is 1-6.

Coach Mike Clark said the tournament field will give his team a good opportunity to improve.

"This will test our guys as far as showing up for every game," Clark said. "We are playing a pair of teams who aren't well-known nationally, and then we will play two of the best teams in the country.

"It is important that we learn to show up no matter what is on the front of the other team's uniform. We need to play with consistency."

Consistency hasn't been a problem for Clark's club to this point in the season.

With a collective ERA of 3.00, K-State has been able to hold back opposing offenses, while the Cat bats have driven in incredible numbers, averaging more than 14

runs per game. K-State will start senior Brock Smith against Lipscomb, Eric Rawlings against St. Francis, senior transfer Ross Hawley against Florida International, and Junior Kevin Melcher against the Hurricanes.

Coach Clark said pitching will be a point of emphasis

in Florida.

"This is a great opportunity for us to play four games in three days," Clark said. "It is a chance to get some positive things out of our pitching, and this is going to

Zach Long/Collegian

K-State second baseman Braden Bottenberg (12) waits on a throw as Doane College's Marcus Schmidt (10) slides into second base during the Wildcats' win Feb. 8 at Frank Meyers Field. The Wildcats are embarking on a seven-game road trip.

be a big weekend for us concerning our staff."

On the other side of things, K-State will depend on a collective .374 batting average to aid its statistically solid pitching staff.

Coach Clark said that while his defense has struggled at times, the Wildcat offense has been something the team could trust in.

"I am concerned about our defensive inconsistency," Clark said. "We have been erratic in the field so far, and four games in three days will allow us to get a little

better feeling for what we need to be doing. "Offensively, we have swung the bats well. Offense has probably been the best part of our game to this

Gabe Luttrell, a junior transfer managing a .500 average at the plate, said the Cats will be ready to play in

"Our mindset is knowing we have been playing very well," Luttrell said. "We know we have some areas we need to improve in, and we feel very confident we can

This is a talented ballclub, and we are anxious to go down to Florida and see what these teams have got - we are going down there to put up wins."

### Basketball, academics mix well together

I did something a bit out of the ordinary Wednesday night.

Wait, can you hold on for a second? Let me check something really quick. Really quick, I promise. I've just gotta hop on the Internet and look in the Collegian archives.

**Derek Boss** 

C'mon ... Hurry up ... hurry up. Now what? PC Load Letter? What the heck does that mean? (NOTE: this is the first and

C'mon .

only time I will ever use ellipses in one of my stories).

Anyway, I don't usually make these kinds of interruptions in the middle of my masterpiece (feel free to bash away), but it's kind of important.

OK. OK. Here we go.

Yeah - I thought so. I began my column last week exactly the same way: I did something a bit out of the ordinary Wednesday night. I knew I smelled something fishy.

Huh? Never thought I'd do that. But then again, I never thought I'd jump online on a Friday and see the headline of my column at kstatecollegian.com read "I suck," which has happened, I might add. Though I bet some people got a kick out of it. Good for you.

Still, if the aforementioned matching leads in my last two columns weren't enough to drive home my point, I'll spell it out to you. Something's up with my Wednesday nights, man.

Last week, I found myself watching women's basketball until 2:30 a.m. (I do hate mentioning that fact two straight weeks, by the way), and now this Wednesday I skipped the K-State men's basketball game to study.

Yep. I said it. I stayed home to study. Two Thursday exams or not, it's pretty much a foregone conclusion to say I'll be at a men's b-ball home game. Throw out games during winter breaks, and I don't think I've missed one at Bramlage Coliseum since I've been at K-State.

Granted, most of those had me sitting comfortably on press row covering the game for the Collegian, but even if I wasn't, I guarantee I would've been there. I just love watching basketball.

I was telling one of my colleagues the other day how much more fun I have at live basketball games than any other sport.

But Wednesday, the books came calling (or the lack of books, I guess, since I didn't buy one for either of the two classes). So to correct myself, it was two back-to-back tests that were screamin' my name.

It was 7 p.m., and I sat determined on my couch with my notes in front of me. I had hidden the TV remote, as to avoid hearing its continual taunting every few minutes, knowing full well the K State/Colorado game already had tipped

And I made it darn near 45 minutes. After that, I just couldn't take it anymore. After all, it was a battle of two teams slashing, scratching and clawing for seventh place in the Big 12. Now that's intense.

So I flipped the game on and watched the end of the first half transpire, as Coach Jim Wooldridge's club headed to the locker room trailing by seven.

I could see my viewing paid off in the second half, though, as K-State opened the frame on a 7-0 run to tie things up. Somehow, my purple passion must have filtered through the TV and traveled - via power lines, I presume - to Bramlage to give the purple that needed boost.

No thanks or pats on the back necessary,

As you should know, K-State went on to win that game - and I managed to get a bit of studying done in the process. In fact, I actually thought I did pretty well on my Thursday exams.

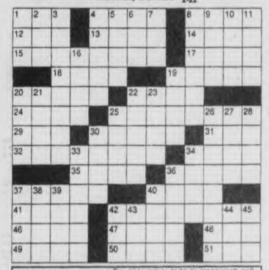

Guess there is such a thing as the best of both worlds.

Derek is a junior in print and electronic journalism. You can e-mail him at dnb8765@ksu.edu.

K-State looks to build on its recent momentum in men's basketball and the Wildcat equestrian team is back in action this weekend. Get the entire story online at www.kstatecollegian.com

42 Weir

"As Bees in Honey Drown" will be performed at 8 p.m. Friday and Saturday and 2 p.m. Sunday at the Manhattan Arts Center. Tickets are \$7 for students and children an \$10 for the general public with a \$5 student walk-in

The play, opening tonight at the

has a cast of six, but there are 25 characters, play director David Smit said.

"Twenty of the 25 characters are played by only four people," he said. "It is really fun to watch the same actor or actress play different people in different scenes.

The play is about a conwoman, Alexa, who uses famous men for their money

Alexa finds hot young male stars on the covers of People and Time magazines and pretends to love them for their

money, and then ditches the guy for someone The victim in this play realizes that Alexa used him, so the second act of the play focuses on his

seeking revenge on her. Smit said the play satirizes celebrity culture, partially by showing how a conwoman gets her

proverbial 15 minutes of fame. "As Bees in Honey Drown" deals with comic and serious issues, by showing the damage someone can do in exploiting a person for their

Casey Jackson, senior in speech education, has three different characters in the play and said it

probably would have been easier to only have one. "I haven't done multiple characters since high

school," Jackson said.

"It has been a little difficult with the three since they have different personalities that I have to act Chrissy Newland, senior in theater and

secondary education, said playing seven different characters can make it challenging to distinguish between them onstage.

"One of my characters has an accent, so that

Alexa Vere de Vere, played by Suzy Dotson, recalls the painful incident of her husband's suicide to Evan Wyler, played by Ryan Mott. Vere de Vere has hired Wyler to write the script of her life for a movie in "As Bees in Honey Drown."

one is easier to distinguish, but others are distinguished by slouching, different ways of walking, and costumes," Newland said.

"One of my characters doesn't even have any lines. I play a waitress in a scene, and she doesn't. speak.

Changing into seven different costumes is another challenge for cast members Newland said.

"I am nervous about changing into my costumes because I don't have much time between characters or acts," Newland said. "After we start practicing in our costumes, I will hopefully know how much time I have between acts to change costumes.'

Smit said "As Bees in Honey Drown" is a comedy/drama play that will draw in audience

"This play is going to be really fun to watch, not only because of the different characters, but also for its humor and realistic issues," he said.

Vere, played by Susie Dotson. and Evan Wyler, played by Ryan Mott, kiss after Vere de Vere threw Wyler's old clothes Into the ocean from the boat they are traveling on. Wyler is traveling with Vere de Vere to observe her so he can write the screenplay of her life in the play "As Bees in Honey Drawn." Jenny Braniff/

### Student poetry readings begin in local art gallery

ADAM LEE

Placing literary art in a visual art setting, a transcendence of medium is the hoped result for a new poetry

The Strecker-Nelson Gallery will have a reading featuring K-State poetry students at 7 tonight. The

Reading A free student poetry reading will take place at 7 tonight at the Strecker-Nelson Gallery

event came into being through a collaboration between gallery co-owner lay Nelson and English professor Elizabeth Dodd.

Nelson said he 406 1/2 Poyntz has been interested in the

relationship between the visual and literal arts for many years. His master's thesis focused on the work of William

Blake, whose engravings often appeared alongside his poetry. Nelson said there is an increase in curiosity for studying the associations between poets and painters, with several books on the subject recently being published. "All the arts feed off one another,"

he said. "They're all forms of communication. With painting and poetry, the main thing being communicated is emotion. Sometimes it's more appropriate in words. Sometimes it's more appropriate in an image."

Nelson said the reading is an opportunity to use his business to feature a different medium of art than it usually displays, one in which he holds a particular interest having earned his master's degree in English literature. A chance for her students to get their work outside of the classroom was one of the motivating factors for Dodd to get involved.

"An awful lot of writers want to share their work, and they really want to connect with an audience,' Dodd said. "This is a nice opportunity to do that."

Josh Shuart, graduate student and English instructor, will be reading on Friday. He said oral presentations give the poet more control of some aspects of their work. He also said readings allow writers to emphasize the piece's intended sound effects such as rhyme and meter.

Shuart said that while some people might be apprehensive to read their poetry in front of a group of people, there are substantial rewards for overcoming those fears.

"There's always a certain level of anxiety when you're baring your soul in public," he said. "But most audiences are polite, so even if they're completely bored or bewildered, they'll still smile and clap. Reading in public allows you to be a minor celebrity."

Shuart said the new venues for literary performances, like the Strecker-Nelson, have a noticeable effect on local writers.

"There's always a certain level of anxiety when you're baring your soul in public, but most audiences are polite, so even if they're bored or bewildered, they'll still smile and clap."

Josh Shuart, Graduate student and English instructor

"It's definitely a positive. People are more motivated to write if they know they have a place to perform their work," Shuart said.

Dodd said Nelson is trying to establish the gallery not only as a business, but as a tool for the community.

"I think he wants it to be a really open, sort of celebratory space," Dodd said. In attempting to make the gallery

more approachable for the general public, the Nelsons have had events such as wine tastings, wedding and funeral receptions, and meetings of various organizations. Nelson said he hopes that having events, such as Friday's poetry readings, will acquaint students with the gallery and make them feel more comfortable with art.

"I would like for students to remember our gallery as one of the cool places that they hung out at in college, and hopefully it will get them to go into art galleries in the future," Nelson said.

Dodd said the ambience of the gallery should lend itself nicely to her students' readings. By presenting

poetry in visually stimulating locations, she said she feels the audience has a richer and more full experience. Nelson said the gallery is well-suited for readings because of its tranquil, thought-provoking qualities. Nelson said he hopes to incorpo-

rate literary events at the gallery on a monthly or bimonthly basis. He said local writers will benefit not only from having a place to share their work, but also by attracting an audience that is interested in multiple channels of art. "The reason why I stay in

Manhattan is because it has such a broad cultural base," he sid. "It makes it a great place to live when you have things going on like this."

The interaction between different artists that will be encouraged by readings at the gallery also appealed to Shuart.

"Conversation between the mediums brings about a lot of fresh ideas," he said. "There's already a strong literary community here, and the opportunity for people to continue to share their work will only make it stronger."

BY JOE ELKINTON — GANGSTAHONKY@HOTMAIL.COM

### Dave Holland Quintet to perform at McCain Auditorium Saturday

BY KAREN MIKOLS

Kansas State Collegian

Dave Holland and his bass will take center stage for a jazz concert Saturday night.

The Dave Holland Quintet will perform at 8 p.m. Saturday in McCain Auditorium. The musical lineup will include traditional selections, as well as new material, Holland said.

"We're trying music that has lots of layers, with simple, as well as complex music," he said. "We want it to reach different people at different

The band formed in 1997 and features Holland on bass, Steve Nelson on the vibraphone and marimba, Robin Eubanks on trombone, Chris Potter on the alto/soprano saxophone and Billy

"All of the players are top-notch," said Thom Jackson, development officer at McCain.

The band's rich history enables them to create jazz on a higher level, said music professor Al Cochran.

"His group has played with a level of sophistication and sensitivity that is extraordinary," Cochran said.

Cochran said the combination of

players is probably a key to their musical success.

"Each person speaks with their own distinctive voice musically," he said. "The degree to which they play together is nothing short of amazing.

The group uses improvisational playing, Cochran said. This entails beginning and ending with a rehearsed melody, but letting each

driving, but if it's the law, then I guess we're going to have to abide by it," she said.

Also as part of the bill, 15-year old drivers possessing restricted licenses and people with farm permits would not be able to transport any friends.

Drivers caught violating the law would be fined \$60 and be cited for a moving violation, according to an Associated Press

Lindsay Sutter, freshman in environmental design, said the bill could cause more drunken driving accidents.

"When students go to parties and get drunk, they usually have designated drivers," Sutter, 18, said

"If the drivers are only allowed to have one other passenger in their car, then more drunk people will have to drive, and that could cause more problems than we already have."

Sutter said the law will be hard to follow being in college because there's going to be times when students will have to have several people in their cars.

Supporters of the bill said when young drivers have friends with them, they are often distracted, but critics said the bill would be difficult to enforce.

### SAFERIDE

Continued from page 1

looking into the SafeRide program if he was elected.

"I believe it ensures safety," he said. "If the students want the program, then we want to make sure that they are safe."

The Wildcat Walk Escort Program already is in place to keep students safe by walking students up to two blocks off campus. Greene said this would provide another outlet for students to use to feel safe at K-State.

Al Gard, presidential candidate and senior in English, said he probably would continue SafeRide. but he said he would make sure it receives more promotion.

"Students generally feel safe on campus," Gard said. "Wildcat Walk is a good program, but it is way underused. I was a volunteer for them two years ago, and in the three months I was a volunteer, we had only one call. We definitely need a DD service, and I think students would use it.

On March 5, the student body will get the chance to vote for the program on the same ballot as the general president, vice presidential election.

Matt Wolters, presidential candidate and senior in agricultural education, said he is happy to see a large number of students getting the chance to vote for the program. He

said the university does not get the opportunity to poll a large number of students often.

"SafeRide is definitely something that's worth looking into," Wolters said. "If students want it, we're more than willing to look into it. To be honest, it's really not possible to get it in the fall. The priv. fee for student government has to be decided by the first of March for next year. We would start it for fall 2003."

Luke Miller, presidential candidate and senior in architectural engineering, said SafeRide not only would be for students who drink.

"It's not just the safety of those going to the bars that we are interested in, but the program will benefit everyone that is on the road," Miller said. "We won't know the cost or how to implement the program until Barker introduces the bill, but we would like to continue the program.

Ali Karimi, presidential candidate and senior in social science, said he thinks costs of the program would be less than \$3 per person for the year. He said it's a minimal cost for the type of service SafeRide provides.

"Student are spread out all over the place, SafeRide will be a program that benefits a wide range of students," he said. "And you may not party, but you drive, and you might get hit. You may not drink, but you know someone who does. Everyone will benefit from this program."

Michael Day, presidential candi-

date and junior in horticulture, said the University of Kansas has a program like SafeRide, and its funding comes from private enterprise. Day said it would be great to get the Aggieville Business Association involved with the

"Right now, SafeRide is my No. 1 priority," Day said. "Getting drunk drivers off the street will save lives, and the police department will be looking to serve the city in some other way because they wouldn't have to spend as much time manning roadblocks.

"One avenue for funding I would like to look into is paying for the program from the \$4 privilege fee that students won't have to pay for next semester when students no longer have to pay to enroll on

Zac Cook, presidential candidate and senior in biological and agricultural engineering, said he would like to see how much money the program would cost students. He said be is in favor of the program's idea, and there will definitely be some kind of program for safety, but he doesn't like the idea of students who don't use the program to pay the same amount.

"I would like students who use SafeRide to pay some money when riding home from Aggieville Students who want to drink should pay a little money. That way students who don't use it will get safety at some cost, but those who use it most will pay a little more."

### SCIENCE FAIR

Continued from page 1

asked the children what would happen if the balls were dipped in liquid nitrogen.

Everyone that thought the ball would break were asked to raise their hands.

While most hands flew to the air, he dropped the frozen ball that was dipped in temperatures of -470 degrees Fahrenheit. The ball bounced.

"What's going to happen with the rubber racquet ball?" Helfrich said.

Nobody answered. But when the ball dropped, it shattered.

"The ping pong ball is plastic, and it doesn't need to compress to bounce," he said. "The rubber racquet ball needs to compress or squeeze to bounce, but freezing it makes it too brittle and it breaks."

Julie Waterhouse, coordinator of the science fair and parent of three

Marlatt Elementary students, said a lot of the projects are the same as when she was little, but computers have been used a lot more.

"The goal of the science fair is to turn on that switch. The switch to look at the world in a different way," she said. "It's neat to see children start with questions, find results and learn something new."

Sixth graders Michael Larson and Greg Bilderback, both 11, said they had fun working on their project "Where the wind takes you."

"We found out which airplane design flew the farthest," Larson

Out of three designs - cockpit, arrow and a glider - the two students said they were right with their hypotheses that the glider would fly the farthest.

"We got the idea from looking through a paper our teacher gave us, and we came up with the idea in about three days," Bilderback said.

"Paper airplanes helped explained science in a very fun way,"

### SENATE

■ Continued from page 1

"I feel confident our money is safe where we intend it to be," he said.

Each bill included a clause the money must be spent on the fund it was designated for.

Bernard Pitts, Union executive director, also promised student money would be taken care of.

"We, as a staff, are working very hard to protect your investments, Pitts said.

Student Senate also passed a bill authorizing a plebiscite vote regarding a SafeRide program to be printed on the general election ballot March 5 and 6.

The plebiscite vote will serve as an opinion poll for students to find out their opinions on the institution of a SafeRide program and their willingness to increase privilege fees to fund the service.

"These questions are going to give us good results," Kyle Barker, student body president, said. "You want to find out how your constituents feel about a SafeRide program.

#### Candidates explore parking solutions 2 pairs spend more than \$2,500 on SGA campaign Taking a stand on parking **SGA ELECTIONS** Kansas State Collegian

With each student body president election, having a stance on the issue of parking is a must. But the majority of the candidates agree that finding a solution is not something that can be accomplished in a year.

Exploring alternative ways of getting to and from campus, five of the seven candidates said they would support increasing use of the shuttle bus system, one of the few solutions to the parking problem.

An existing alternative to parking on campus is to use the shuttle system, which runs from the KSU Foundation Center to the K-State Student Union and to Edwards Hall throughout the day. The only other solution to the problem is to follow the

This is the last in a three-day series that allows each presidential ticket to tackle campus issues. Look online to check out previous coverage at kstatecollegian.com.

Primary elections will be Feb. 26 and 27 ■ General elections will be March 5 and 6.

long-term plan of constructing several parking garages across campus in accordance with the K-State Master Plan.

Candidate Matt Wolters said if he is elected, he would push to see the first parking garage constructed as soon as possible.

"The best solution is a parking garage at

See PARKING OF PAGE 10

Zac Cook: Would work to follow the Master Plan and encourage the use of the current shuttle

sel Day: Would implement a more extensive shuttle system, such as one that would run from um parking lot Al Gard: Supports all efficient ways of transit such as car pooling or a shuttle system.

Chris Greene: Supports expanding the shuttle system at minimal costs.

All Karimi: Maintains an informational stance.

Believes an educated decision should be

examined and made Luke Miller: Is in favor of car pooling and exploring other avenues such as a larger shuttle Matt Wolters: Supports the Master Plan and

would work to see that one garage is constructed as soon as possible.

BY NANCY HULL

Kansas State Collegion

Two student body presidential pairs spent more than \$2,500 on their campaigns, and no other pair spent more than \$1,000.

Presidential expense reports were due Friday at 4 p.m. and haven't been checked for spending violations yet. Matt Wolters and Mandy Achilles spent about \$5 more than Zac Cook and Todd Kohman. The Wolters/Achilles ticket spent \$2,599.88, and the Cook/Kohman ticket spent \$2,593.67. Al Gard and Jon Krasnoff didn't turn in an expense report and face a fine.

Presidential candidates had to adapt to

new spending rules this year. The personal contribution limit - the amount a presidential pair can give toward its campaign - was lowered from \$800 to \$500. Aside from the personal contribution, pairs must rely on individual contributions from students. The student contribution limit for this year's campaign decreased from \$20 to \$15.

Student Senate approved the decreases last semester with the purpose of getting as many students involved in a campaign as possible, said Ryan Walker, senate vice chair.

"It's not about who can spend the most money and put up the most banners," Walker

## Behind the bull

Photos by Kelly Glasscock/Collegian

Grooming his horse, Zac Parrington of Topeka prepares for the K-State Rodeo in Weber Arena. Parrington helps protect the competitors and round up livestock during the events.

### Rodeo volunteers keep events running smoothly

BY SHANNON HARTENSTEIN 1902 State Collegian

ith their dusty boots planted in the loose soil of Weber Arena , K-State rodeo team and club members stand poised in their starched jeans, purple vests and cowboy hats, ready to lend a hand at the weekend's 46th annual K-State Rodeo.

An announcer booms out the name of the next contestant and a gate clangs open, ejecting a frisky brown calf pursued by a horse and its determined young

Beyond the excitement of the arena, rodeo team and club members worked with volunteers from the Kaw Valley Rodeo to prepare for more than 1,000 spectators and dozens of contestants.

More than 40 volunteers helped keep events running smoothly by operating gates, lining up contestants, timing events and managing livestock in the arena and in the alleys beneath the stands, said coach David

Travis Kinsinger, rodeo team member and freshman in feed science, helped round up steers during the slack competition Friday afternoon. Kinsinger competes in bull riding and steer wrestling.

"We run as many contestants as we can during slack, time permitting," Kinsinger said. "The top 10 qualifying in each event will compete in the performances this

From getting contestants signed in to setting up fence panels, many members spent last week preparing the arena and managing other preliminary tasks. Rodeo activities began early Friday morning when volunteers began moving livestock at 5:30 a.m.

Preparing for and running the rodeo often lasted until early morning, said Molly Shaw, 2001 K-State graduate and former rodeo club member. Shaw helped time events Friday afternoon.

"We've spent a lot of hours getting ready for this," Shaw said. "If you're a team member, you can pretty much plan on being here from very early Friday morning to midnight on Sunday night when it's all over. And if you're lucky, you might get home by 2 a.m. each night."

Organizing the rodeo is an all-year project, McClure said. About 40 members of the rodeo club meet two

Tuesdays each month to plan rodeo activities. In his first year coaching the team, McClure said he's learned a lot about the team and the work that goes into putting the rodeo together.

"It's been really good working with the rodeo team," McClure said. "We've got a great bunch of kids."

The rodeo relies on community support, he said. Sponsors helped provide funding, supplies and other services. The Ramada Inn provided motel rooms for contestants and Farm Credit Services of Northeast Kansas gave away cowboy hats to the first 300 kids at the Saturday afternoon performance. Vanderbilt's of Wamego also sponsored the Kids' Rodeo at Manhattan Town Center last weekend.

Suzann Pacha, junior in agricultural communications and journalism, said children are a big part of the rodeo. It is important for youths to be involved in something they enjoy, she said.

Rodeo gives children and college students the opportunity to learn and have fun, Pacha said.

"There are so many kids that sit around and say, 'I'm bored.' I've never been that way," she said. "You win, you lose, but I think there's a lifetime lesson that kids can take with them that will make them better people.

A steer waits under the bleachers before the rodeo competition in Weber Arena Saturday night.

"It's a good way just to enjoy life, to come out and

Pacha competed for the first time in the breakaway calf-roping event Friday afternoon. Competing in the event has been her goal for two years, she said.

See RODEO on PAGE 10

### Enrollment continues to increase

BY JESSICA PITTS Kansus State Collegian

Enrollment at K-State is continuing the upward trend the university's population has followed for several years with the spring semester's headcount at 20,409.

The Manhattan campus reported 19,479 students and the Salina campus enrolled 930 students this semester.

"The philosophy behind qualified admissions held its own at K-State as you can see with the enrollment figures," Pat Bosco, dean of student life, said. "The freshman class was the strongest academically prepared."

Enrollment in the fall 2001 semester at K-State also hit an all-time high with 22,396 students, even with the freshman class being the first admitted under the state's qualified admissions system. Critics of the program were concerned it would decrease access by Kansas high school graduates to a college education, but at K-State, Bosco said, the exact opposite

Sm ENROLLMENT on PAGE 10

### Judge allows evidence to be viewed by jury

BY MICHAEL WATSON Kansas State Collegian

The motions hearing for a Manhattan man charged with first-degree murder in the June 2001 death of a Fort Riley soldier allowed the victim's pistol, the testimony of the victim's companions, the amount the victim had to drink and a taped conversation between the defendant and his grandfather to

be presented to the jury. Skylor Alexander, 18, was arrested in the early morning hours of June 30, and charged in connection with the stabbing of Pfc. Randall Lindsey, 21. The incident occurred in the 1200 block of Laramie. Lindsey suffered a single stab wound to the abdomen area.

Valerie Peterson, assistant Riley County attorney for the state, refuted Pedro Irigonegaray, the defendant's council, when he said the gun should be allowed for motive under a state of mind provision.

"If the court allows council to say the victim had a gun, it unfairly prejudices the

jury," she said. "There are plenty of facts that show the victim's intentions, but it doesn't affect the

defendant's decision to stab the victim." Peterson said the gun should not be introduced to the jury because the record shows that the victim did not reach for the gun until after he was stabbed.

"The gun will confuse the jury into thinking the defendant had a reason to stab him for self defense," she said. "But the defendant did not know the victim had a gun."

Irigonegaray said it did not matter whether the defendant knew the victim had a

"Whether or not Skylor knew doesn't matter," he said.

"The bully knew he had it. Lindsey was

### **LOCAL IN BRIEF**

#### Administrator facing drug charges resigns before trial

A K-State administrator resigned a week after her trial for drug charges was set.

Rence Freeman, former director of GEAR UP II (Gaining Early Awareness and Readiness for Undergraduate Programs), resigned Jan. 31, according to Holton Hall business office records.

Freeman and Reginland McGowan, assistant vice president of educational and personal development programs. were arrested and charged Aug. 24 in Junction City with possession of marijuana and drug paraphernalia. McGowan's position with the university has not changed.

Michael Lynch, associate vice president of educational and personal development programs, said he does not know the reason Freeman resigned.

"She simply indicated the desire to resign," he said.

During a Jan. 24 suppression hearing, Freeman and McGowan's trials were set for March 15 in Geary County District Court.

In a late January interview, Lynch said Freeman and McGowan's job

duties hadn't changed since the arrests. He also said he wouldn't speculate on action the department could take until knowing the legal outcome.

### NATION IN BRIEF

#### Rumsfeld might scale back jet patrols over U.S. cities

WASHINGTON, D.C. - Defense Secretary Donald Rumsfeld indicated Sunday he probably will scale back the continuous fighter jet patrols over U.S. cities, but said he had not yet made a decision.

He raised the possibility of tying the intensity of the patrols to different levels of threats against the United States, as assessed by the government.

The Air Force's civilian leader told The Associated Press last week that he wants to end the post-Sept. 11 the current 24-hour, 7-day-a-week patrols and instead leave fighters on "strip alert" at airfields, ready to launch in case of emergency.

The patrols are tying up about 265 airplanes - mostly fighters, refuelers and radar planes - and about 12,000 airmen, Air Force Secretary James Roche said in the AP interview.

That compares with 14,000 Air Force personnel committed to the war in Afghanistan, he said, making the Air Force the only service with a large-scale commitment to both fronts in the war on terrorism.

The Defense Department is working with other federal agencies to develop a plan for the future of the patrols, he said.

"It's a matter of my making a judgment as to what's appropriate for our country. And what it requires is

an analysis of what the threat is and an analysis of what the cost and the stress on the force is," Roche said.

Roche said he would prefer an adjustment that would place Air Force fighter jets on "strip alert" at certain bases around the country - ready to respond to indications of threatening aircraft. That would replace the current practice of flying continuous patrols over Washington, D.C., and New York and patrolling daily over a rotating group of cities elsewhere.

### **World in Brief**

#### Israel to ease Arafat siege, continues some restrictions

JERUSALEM - Israel decided Sunday to draw tanks back from Yasser Arafat's compound but continue restricting him to the West Bank city of Ramallah - a halfway measure that led angry Palestinians to cancel planned cease-fire talks with Israeli security officials.

While the Palestinians had hoped that last week's arrests of three top suspects in the October killing of Israeli Cabinet minister Rehavam Zeevi might end Arafat's almost three-monthlong confinement, Israel on Sunday demanded again that they be handed over and that other suspects be arrested as well.

But an Israeli official, speaking on condition of anonymity, suggested Sunday's was only a preliminary decision, and also that Israel expected the security meeting to be delayed by only one day and held Monday. The Defense Ministry, meanwhile, said the army would exercise restraint in hopes of enabling a truce.

The American flag is raised at the medals ceremony for Chris Klug who won bronze in the men's snow boarding giant slalom. Klug was one of three United States Olympians honored at that night's ceremony.

### K-STATE NEWSMAKERS Middle school instructor places in teacher of year contest

HERALD

Chris Herald teacher at Dwight D. Eisenhower Middle School

Baking in Easy Bake ovens, playing with Hot Wheel cars and building with Legos is science in Chris Herald's eighth-grade classroom.

Herald, an eighth-grade teacher at Dwight D. Eisenhower Middle
School, received third place in the 2002 Kansas Master Teacher of the Year

Eisenhower teachers nominated Herald for the title. Then she was chosen from the district nominations.

Requirements for the nomination include community involvement, a professional biography, membership in professional organizations, professional growth, as well as an articulated philosophy of education. "I was honored," Herald said. "It's my colleagues who are voting for me. It's a nice pat on the back, which we don't often get in this field."

### K-State Rodeo queen achieves dream

BY EDIE HALL

Kansas State Collegian

Since she was a little girl, Autumn Kleiner wanted the Miss Rodeo K-State title.

On Saturday, she achieved her goal when she was crowned Miss Rodeo K-State during the 46th annual K-State Rodeo.

"I'm ecstatic," Kleiner said. "I'm looking forward to the next year."

Kleiner, sophomore in accounting, and Tatum Sprague, junior in animal science and industry, were the only competitors for the title.

Kleiner, the daughter of Linda Kleiner, is a Manhattan resident. Sprague is a Hays resident and the daughter of Michael and Sandy

Kleiner said there originally were four candidates, but two dropped out earlier in the compe-

The two women were judged in four categories: horsemanship, modeling, a speech contest and an interview.

Kleiner won the modeling and interview categories and Sprague won the horsemanship and speech categories.

Kleiner said the competition took place Feb. 15 and 16.

She said it is open to the public, but usually only family and friends come to watch.

After she was announced Miss Rodeo Kansas, Kleiner received a tiara and sash from the current Miss Rodeo K-State, Suzann Pacha.

"She'll be very good," Pacha said. "She's been around rodeo for a long time, and knows a lot of people.'

Kleiner took her first queen's run, guiding her horse in a lope around the arena.

As Miss Rodeo K-State, Kleiner will be expected to represent K-State and the sport of rodeo around the state of Kansas at rodeos and functions.

Kleiner said besides this duty, she also wants to go to urban schools and talk to students about the sport of rodeo.

"I want to tell them what rodeo is all about," Kleiner said. "I want to get them involved or at least interested in it."

Jeanel Drake/Collegian

Autumn Kleiner rides around Weber Arena before she is crowned Miss Rodeo K-State during Saturday night's rodeo. This was K-State's 46th annual rodeo.

Kleiner also hopes to make a Web page for the K-State Rodeo Team so they are a more visible part of K-State.

Kleiner said she's been going to the K-State rodeo since she was very young.

"I always thought it looked like

fun to be Miss Rodeo K-State having people look up to you and being able to support K-State," Kleiner said.

### Presidential platforms not always realistic in 1 year

SGA

February 26 and 27.

March 5 and 6.

Kanana State Collegian

A solution to the parking

problem. Lower tuition. SafeRide. Two-ply toilet paper.

Student body presidential candidates have promised it all. But how much of it have they carried through?

Presidents can get a lot of work done on an issue, Student Body President Kyle Barker said. But sometimes,

that's about it. Presidents face several obstacles when trying to make changes, faculty representative

Phil Anderson said. "The obstacles are endless," he said. "Change is difficult. People are frightened by change. The easiest thing to do is nothing."

The first obstacle is time. One year can be too short a time to get much implemented, Barker said. However, if a previous administration has worked on an issue, it can make it much easier to accomplish

"You're not going to solve parking in a year," said Barker, whose term ends this spring.

The second is convincing senators to vote in favor of the change

"The president proposes. Senate disposes," faculty representative Bill Muir said. "If he gets the backing, he can make the program

The third is dealing with other offices on campus or in the city.

"If it's something that can be controlled by you, there are limitless things you can do," Barker said. "It's when you have to get funding from other areas that it gets hard.'

Often, that is the case. Most major issues, like parking, SafeRide, tuition and safe housing, involve numerous entities. These

also are the issues that pop up on platforms year after year.

Sometimes, too much importance is placed on platform issues, Barker said.

"I think that candidates get wrapped up in campus issues and voters tend not to," Barker said. "The majority of the job is representing students. Platform issues are there to help."

Muir said the importance of these issues varies from voter to

"It's probably more important to some than to other folks," he said. "If you've been adversely affected by

something, it will become more important to you.'

Campaign slogans don't mean much anymore, Anderson said.

"They're so vague and vacuous," he said.

While the president's job is to represent the student body, a good leader still will be able to cause

change, Anderson said. "A strong leader has to have vision and tenacity, a toughness to see it through," he said. "Politically, you have to under-

stand who in the bureaucracy has the influence." There is one issue missing on this year's platforms. It's safe housing, Anderson said.

"I keep looking for somebody to stand up for safe housing in Manhattan because I know we have a problem in that area," he said. "I'm dismayed that no presidential ticket has picked up on

Presidents have the power to accomplish their goals, Anderson said. It just depends on their commitment.

"The key is to stay focused on what you want to accomplish," he said. "That's the genius of politics, not to bite off more than you can actually chew."

GIVE US YOUR OPINION. Campus Fourum: 395-4444

**Bramlage boxing** 

Tyson should take bite out of Little Apple

anhattan has played host to some big events throughout the years. We had Vanilla Ice in concert after his career had flamed out. The Kansas Legislature convened on campus for a day. Bramlage Coliseum has played host to numerous concerts and Country Stampede is an annual tradition.

**Nick Bratkovic** The community has seen great speeches given as part of the Landon Lecture Series, presidents have addressed congregations of students and Martin Luther King Jr. spoke eloquently to the

Those speeches have helped produce thoughts that affected a generation, but here is an idea that would top all of those and put Manhattan on the map.

Mike Tyson.

This man is no eloquent speaker, mind you, unless you count derogatory racial slurs and f-bombs spoken in virtually every tense and part of the English language as a great profound prose.

No, this guy is a straight shooter, John Rocker-without-themisquotes type of guy who has a take-me-as-I-am attitude.

Let Tyson box at Bramlage. Let's make some money off the guy less known for his boxing and more known for biting and his antics outside the ring.

I don't mean to make light of it. He is the highest profile man in the world. People want to see what Tyson is going to do next.

Let's let him do it here in Manhattan underneath the Bramlage roof. The city of Manhattan could make a ton of money. We could rent trailers out at Tuttle Creek Reservoir and every hotel would be booked. Hey, we could hold the fight in the summer and rent residence halls out for the world's biggest stars to eat, drink and be merry.

Haymaker Hall would see the wildest parties it ever has seen. The entertainment world would come to Manhattan.

Imagine a bar where celebrities are partying and owners can charge Las Vegas rates for drinks. The whole city would benefit. I'll sublease my apartment for free if Tyson doesn't like the hotel scene.

Sure, Tyson is thuggish at times, but doesn't he deserve a second chance? Experts say he needs psychological help as well, but then who among us doesn't have a few problems?

"But Nick," you are thinking, "this is a train wreck waiting to happen.' Good point. view

However, we bring caged circus animals in all of the time to perform in the circus. How is Tyson any different than an animal who could go berserk at any time and cause a riot?

Seriously, Tyson is a gold mine for any city with the guts to let him fight. Manhattan could be that city.

He has been licensed in Washington, D.C., to fight. If it's good enough for the nation's capital, then isn't it good enough for us?

A Tyson fight would get the world talking about Manhattan. Perhaps for all the wrong reasons, but the city and its economically minded leaders could collectively laugh all the way to the bank.

Sure, it's a stretch, Hollywood's elite never will party inside Haymaker Hall. It is not a stretch to say that Manhattan needs visionaries to take some chances and watch this city grow.

Now it is a nice conservative place that never really takes a risk. A place that's nice to live during college, but not great to visit except on K-State football game days. A place that doesn't have enough industry to support people who would love to live here forever.

This town desperately needs some excitement. If not Tyson in the ring, then what do you suggest? How would you help Manhattan grow so we don't have to close schools and the industry can support young families? The best I could come up with is Tyson.

Nick is a senior in print journalism and public relations. You can e-mail him at neb8030@ksu.edu.

### **Goodnow Hall's** sex education beneficial to all

As the theme states, "Goodnow Hall is the only place to really have S.E.X."

All humor set aside, Goodnow Hall really is the place for students to learn more about dating and sexual relationships during S.E.X. (Sexual Education Xperience) Week.

It's important that college students take the time to learn about safe sex and

dating relations. Programs such as S.E.X. Week help bring difficult topics

to the forefront. Open discussions are the best way to find answers to

sexual questions. Goodnow Hall should be commended for opening up discussions about an embarrassing, but

important, topic.

the first place?

comparing my criticisms of the executive office and our foreign policy to an act of treason.

I can't recall five minutes that the previous administration wasn't under heavy scrutiny. I'm not going to apologize for not giving this president a free

Almost any democrat or republican president would use tragedy as a guise to

agendas (i.e. access to foreign oil, a geostrategic military foothold in central Asia, etc.)

It's not my job to report a sanitized, shiny, happy-people version of U.S. history and foreign policy to cheer you up. I am, however, guilty of the

following crimes: 1) Making an attempt to help students better understand why other nations are so frustrated with our foreign policy that they'd commit nightmarish acts, claiming the lives of hundreds of innocent men, women and children.

2) Making sure we don't end up blindly arming nations with our tax dollars - nations that we end up paying to go to war with years down the road like, Iran and Iraq in 1980 to 1988, Afghanistan from 1979 to 1989, and so

3) Not having the time or space to offer a solution to all the world's

problems in less than 700 words.

4) Criticizing the media and White House for offering us no alternatives to the beltway bandits bomb the world into pieces, I mean peace campaign for the new millen-

nium. We have turned into a disinterested, disillusioned and compliant public, who have been intimi-

dated into not asking questions about a war we're paying a billion dollars a day for. A war that President Bush said is only beginning.

Should we just forget about the environment, the economy and our children's public education, which all have been put on hold due to this administration's expensive and internationally embarrassing unilateral approach to ridding this planet of evil?

I guess we should leave those up to

You want solutions? Although I am no pert in world politics or the g life, I would suggest a fair and balanced education, an open mind and common sense. Only after experiencing the sweet and the sour can we even begin to think up a remedy that's in the best interests of only one race, the human race.

But even if we do, who's paying any attention?

The masses now are rallied to unknowingly bankrupt the country (déjà vu?) seeking misdirected revenge against countries that had no involvement in the horrific atrocities of Sept. 11. The public has fallen for the administration's illusions. Believing there is only one option, one solution, one direction, us or them, no negotiations, no neutrality.

To quote the words of Spanish philosopher Miguel Unamuno, Sometimes to be silent is to lie."

May the universal creator bless the soul of Daniel Pearl, a journalist who lost his life in pursuit of the truth.

### **READERS WRITE**

#### **Campus Fourum is safe haven** for ignorance, hate at K-State

In the Campus Fourum on Feb. 21, the Collegian printed a comment that caught my eye and turned my stomach: "Save a horse, ride a girl."

If this comment had been called into the Collegian saying: "Save a horse, ride an African-American," would the Collegian have printed it then as well? Where does the difference between the comments lay, Mr.

In reality, there is no difference between the comments. They are both ignorant statements meant to oppress a particular sector of our society.

If ignorance and hate have a safe haven on K-State's campus, it is definitely in the Campus Fourum.

- Jarrod D. Fritsch senior, psychology and history

### Task force presents report, waits for results of survey

Kansas Statu Collogian

One out of seven recent alumni had to retake a semester or more because of academic advising, according to a February Academic Advising Enhancement Task Force report presented to Faculty Senate.

Task force committee members collected and studied feedback from approximately 500 alumni in the past two years. Alumni were asked to evaluate K-State advising.

The results showed that 14 percent of recent graduates said they had to spend extra time at K-State because of poor academic advice.

This statistic can be misleading, said Robert Burton, chair of the task

"It is hard to know what might cause a student to spend extra time, and advising really goes both ways,' Burton said. "In order for advising to be successful, both advisers and advisees have to be responsible, which means that both students and faculty have to make it a major priority.

In response to student concerns, Provost Jim Coffman, Faculty Senate and Student Senate initiated the task force in 1998 to examine advising at K-State.

K-State's system is decentralized. Burton said, which means the university employs professors instead of

#### Survey results

Fall student-advising survey results will be released at the next Faculty Senate meeting. Faculty Senate will meet at 3:30 p.m. March 12 in the Union Big 12 Room. Anyone can attend

professional academic advisers to assist students with enrollment and other academic decisions.

This decentralized system is more beneficial for students, he said, because the faculty members truly know the curriculum.

Jackie Spears, academic affairs committee chair, said although there are times students receive poor advising, it does not characterize decentralized advising as a whole.

Spears worries the task force's recommendations will be too restrictive, she said, based on what 14 percent of only 500 alumni said.

"The concern is that if the problem is small, we will be setting up something cumbersome," she said. "How substantial is the problem?"

She said she thinks a more accurate depiction of student views will come from results of the student surveys taken in the fall. Students had to complete an advising survey before they enrolled for spring classes. More than 14,000 students

Michael Lynch, chair of the Academic Advisory Council, said he plans to release these results in

The Academic Advisory Council, which now is being formed, is made up of students and advisers from each college. Council members will enforce advising regulations and continue to promote successful advising at K-State, Burton said.

Task force members will evaluate the results and make a recommendation to Faculty Senate.

"We are definitely going to look at these results before we take any definite action depending on what the student survey states," Burton said.

He said that no matter how the results turn out, he hopes Faculty Senate, Student Senate and Provost Coffman will take a look at the recommendations of the establishment of culture in advising.

He said advising culture promotes advisers and students to work together through conflicts instead of students acting on their own.

Burton said he would suggest students read Page 12 in the undergraduate catalog because it would help them understand that academic advising is a two-way street. Although he understands that students deserve good academic advising, they also have to come in prepared and ready to receive it.

### 10 Americans presumed dead in crash

Associated Peass

ZAMBOANGA, Philippines -There is no chance any of the 10 American servicemen aboard a military helicopter that crashed in the Philippines two days ago survived, a U.S. general said Sunday.

The search of the Bohol Sea off Negros island in the southern Philippines, where the MH-47E Chinook went down during antiterrorism exercises Friday, has become a recovery mission, Brig. Gen. Donald Wurster said.

"Based on our best assessment in the extensive efforts by the Philippine and U.S. search and rescue teams, we have determined that there is no chance that we will find survivors," Wurster said.

"We will do everything possible to retrieve additional items and any human remains from the search area," he said.

The helicopter crashed before dawn after ferrying U.S. special forces and supplies from Zamboanga city to nearby Basilan island, where Muslim guerrillas have been holding an American missionary couple and a Filipino nurse for nearly nine months.

Witnesses reported it was on fire as it fell and exploded when it hit the water.

At least three bodies were recovered during a search that includes three Navy ships, a Coast Guard vessel, six helicopters and nine motorized outriggers.

Wurster said a memorial will be held Tuesday in Cebu.

Officials had held out hope Saturday because the eight-man crew from the 160th Special Operations Aviation Regiment at Fort Campbell, Ky., and two Air Force para-rescuers all were trained in water survival.

A 600-strong U.S. military force arrived in the southern Philippines last month for a counterterrorism training exercise aimed at helping the Philippine military wipe out the Abu Sayyaf rebel group, which has been linked in the past to the al-Qaeda terror network.

"Although we have lost 10 good men - eight Army and two Air Force - we will continue with our mission." Wurster said in Zamboanga, where most of the U.S. personnel are staying

"We are here to conduct a mission that the president of the Philippines and the president of

the United States committed to working together to help counter terrorism in the Philippines," he

A special team of U.S. military investigators has been dispatched from Fort Rucker, Ala., to investigate the cause of the crash. Philippine officials have ruled out hostile fire.

U.S. Lt. William Jewett said the crash occurred over water more than 1,200 feet deep.

More than 200 rescue workers shifted the search to 120 miles from the crash site as debris reached the open sea and dispersed in strong currents and brisk southeasterly winds, officials said Sunday.

Philippine air force Brig. Gen. Marciano Ilagan said rescue forces - including 10 U.S. Navy Seals, 7 U.S. Army personnel, a P-3 Orion surveillance plane and a U.S. C-130 transport plane - have covered 1,125 square miles of ocean and coast.

No decision has been made on whether to salvage the wreckage because of the deep water.

By late Saturday, the search had yielded a rotor, a fuse box, the fuselage, a pilot's helmet, a seat and the landing gear.

## INDIVIDUAL SUCCESS

K-State's Morgan High clears the bar while competing in the high jump during the Big 12 track and field championships at the **Bob Devany Sports Center** on Saturday in Lincoln, Neb. High won the event with a jump of 6-0.75.

Zach Long/Collegian

## Track team finishes 3rd at conference meet, 5 win individual titles

BY DAN SMITH

Lincoln, Neb. - K-State had to settle for third in the Big 12 Indoor Track and Field Championships on Friday and Saturday. but several Wildcat individuals did better than that in their respective events.

A school-record five K-State athle left the Bob Devaney Sports Center in Lincoln, Neb., with individual titles. Junior Austra Skujte led the Cats with a win in the women's pentathlon Friday and finished the meet with the most individual points of any competitor.

"What she did in this meet was remarkable," Coach Cliff Rovelto said. "There are some great, great athletes in this conference and she is competing at this level in so many events."

Saturday was even more productive for K-State, with four Cat tracksters finishing in the top spot.

Sophomore Morgan High took the women's high jump, junior Terence Newman captured the 60-meter dash, senior Shadrack Kimeli won the men's mile and freshman Erik Sproll finished first in the 800.

The Wildcat men were the biggest story of the weekend. K-State's three wins in Lincoln marked the first time the Cats had won more than one event at a conference

"The men had a phenomenal meet," Rovelto said. "Terence Newman was nothing short of spectacular.

"For him to run the times he did at this meet, just having come over from football. proves he's as good as anybody in the

the 60-meter race, but came back to beat Tre Gardner of Texas at the end.

"I knew the competition would be stiff coming in," Newman said.

"I tried to get out first, but I didn't. I just decided to relax and see what

happened. Newman's laid back approach worked again in the 200, as the junior finished just .14 seconds back of Kansas' Leo Bookman

K-State's women, who entered the weekend in second, finished short of its goal to add an indoor championship to last season's outdoor title.

"For the women, there were some good things and some things we were a little disappointed with," Rovelto said. "All in all, the final count of points we thought we would score after looking at last night's results wasn't too far off from what happened."

The Cats sat in second entering Saturday's final round, but couldn't make

1. Baylor (3:08.15) 6. K-State (3:12.68)

up the four-point deficit. Texas, which sat 11th after Friday's competition, came back with all but nine of its 107 points Saturday to edge out Nebraska in team

competition.

K-State next hits the track for the national championships March 8-9 in Fayetteville, Ark.

K-State's Josef Karas competes on the pole vault portion of the heptathlon Saturday in Lincoln, Neb. Karas finished third in the heptathlon with 5,297 points.

## KSU men fall to Iowa State in heartbreaker

AMES, Iowa - Omar Bynum caught a touch pass from Shane Power and made a layup with .5 seconds left to give Iowa State a 73-71 victory over K-State on Saturday.

Iowa State (12-16, 4-10), which faltered at the end in several narrow losses this season, finally made the kind of play it needed.

K-State (11-14, 5-9), which led by 13 points in the first half, had tied the score at 71 when Larry Reid came off a screen and hit a 3pointer with 6.2 seconds remaining.

Spurning a timeout, Iowa State's Ricky Morgan rushed the ball up the floor and passed to Power along the left baseline. Power caught the ball as he jumped and passed it in one motion to Bynum on the other side of the basket for the game-winning shot.

The Wildcats could manage only a desperation heave at the buzzer, the ball falling well short of the basket.

Tyray Pearson led the Cyclones with 20 points and 11 rebounds. Power scored 18, Jake Sullivan 13 and Bynum 12.

Reid's 21 points led K-State and Pervis Pasco scored 13.

The frantic finish ended a game marked by a flurry of fouls and traveling calls and a technical on Iowa State coach Larry Eustachy. K-State was awarded two baskets on goaltending calls, once when Iowa State's Jared Homan slapped the backboard and the Wildcats had to burn a timeout to avoid a fivesecond call because no one lined up to take the ball out of bounds.

Eustachy spent part of several timeouts staring down and complaining to the officials but avoided the second technical that would have gotten him ejected.

The officials called 43 fouls, including 26 on K-State. Three Wildcat players fouled out in the final 3:08, as did Pearson.

Trailing 60-53, Iowa State scored eight straight points, four each by Pearson and Bynum, to take a 61-60 lead - the first time the Cyclones led since the opening two

K-State's Nick Williams tied it with a free throw, and the Wildcats pulled ahead 68-67 on Phineas Atchison's driving shot with 58.4 seconds left. Homan then hit two free throws for a 69-68 lead, and Sullivan hit two more to make it 71-68 with 15.4 seconds to play.

## No. 11 Colorado defeats women Wildcats 79-58

BOULDER, Colo. - It only took a few missteps early in the first half and suddenly Colorado was the hunter and K-State the

No. 11 Colorado stormed to a 10-0 lead in the opening minutes and Jenny Roulier had 25 points as the Buffaloes beat No. 12 K-State 79-58 Saturday night for their 10th win in 12 games.

"I don't know exactly what was in our minds," said Nicole Ohlde, who finished with 10 points for the Wildcats. "They smelled blood and went after it. There's no way you can come out and play like that. The first half was horrible.

The Buffaloes (20-8, 10-5), who got 14 points from Eisha Bohman, extended their lead to 22-5 as the Wildcats repeatedly missed shots in the first 20 minutes.

K-State (22-6, 10-5) was 4-of-26 in the half with 11 turnovers, and finished with 22. The Wildcats trailed 40-12 at halftime after a late 13-2 run by the Buffs.

"Our defense in the first half clearly took them out of anything they wanted to do," Colorado coach Ceal Barry said. "We clearly won this game in the first half."

Laurie Koehn had 23 points, including five 3-pointers and Kendra Wecker added 14 points for the Wildcats.

K-State showed more life in the second half, scoring more points in the first five minutes (16) than in the entire first half. The Wildcats' shooting percentage was 35.8 in the second half after a dismal 15.4 percent in the opening 20 minutes.

But the Wildcats could not gain momentum against the Buffs' defense, and trailed by as many as 31 points. Colorado players said a big factor was the crowd of 8,282, more than double the previous record, that came out to watch the seniors play their last regular-season home game.

The other problem was Roulier, who had 13 points in the first half and took control after it became clear Nightingale wasn't making her shots.

"She took the floor like she would not be denied and she gained confidence with each possession," Patterson said. "She had a great feel for the game, a great understanding that Kansas State was defeated."

The win moved Colorado into a thirdplace tie with K-State in the Big 12.

#### BASEBALL IN BRIEF

#### K-State loses to Golden Panthers, end 1-3 in Homestead challenge

No. 25 Florida International scored three runs in the fourth and four runs in the eighth inning, as the Golden Panthers defeated K-State, 9-3, Sunday afternoon in the Wildcats' fourth and final game at the Homestead Challenge at the Homestead Sports Complex.

FIU improved to 9-3 on the season with the win, while K-State dropped its third game in as many days and fell to 4-3 on the season. The Golden Panthers outhit the Wildcats, 11-10, and took advantage of five Wildcat errors.

Freshman right-handed pitcher Derek DeCarlo (2-0) picked up the win for FIU, as he held the Wildcats to one run on six hits and three walks with six strikeouts in six innings of work. Senior right-handed pitcher Ross Hawley dropped to 0-1 on the season, as he allowed five runs (three earned) on eight hits with six strikeouts and two walks for the Wildcats in six innings of work.

K-State split two games at the Challenge on Saturday, as the Wildcats defeated Saint Francis, 12-7, before losing an 11-4 decision to sixth-ranked and defending NCAA champion Miami.

K-State returns to action on Friday when they travel to the Wiregrass Baseball Classic in Dothan, Ala

## Panthers bring politics to punk in new release

"ARE YOU DOWN"

\*\*\*

MUSIC REVIEW BY JJ DUNCAN

"GADJITS"

\*\*\*\*

MUSIC REVIEW BY ADAM LEE

In the red corner, hailing from Brooklyn, NY and accused of making rebellious East Coast hardcore, the Panthers

Panthers take on all aspects of the system which possibly could be referred to as being "the man" and attack them with

tongue-in-cheek and fist in air.

This highly politically-motivated band has progressed the sound that defined At the Drive-In and penned their own brand of clear, concise anti-system lyrics.

With song titles like "Panthers! Pow! Pow!" and "Panthers vs. the Automaton," the band begs for conflict and confronta-

In "Vandalist Committee of Public Safety", the band attacks basically every figure of authority. "Professors you make us old and you'll be the first to go: teachers, poets, militants, family. You're all cops. Don't say society, say racket, cause that's what it is.'

\* The funny thing is the album works really well.

It takes the influence of bands like the

Stooges for music and adds poetic tongue in cheek lyrics about bringing down the system. It's comical without

trying, and still flamboyantly rebellious. Proclaiming that "The revolution will be plagiarized!" the liner notes are just as inyour-face as the music.

Besides the lyrics, the band includes two brief diatribes explaining their use of the word "pig" as well as the phrase "destroy art."

This album is interesting from top to

In reality, the band is a little too selfrighteous for their own good, but the album is a must-have for anyone whose ever had sympathy for Che Guevara. So when it comes to it, the question is, "Are You Down?"

## Omaha songwriter's CD debut impressive

"READ MUSIC"

\*\*\*\*

MUSIC REVIEW BY JJ DUNCAN

The theme is that corporate America has invaded our lives and we need to take a look at the country as well as ourselves.

It isn't new,

but Desaparecidos (The Disappeared, in English)

make it sound fresh.

Indie-folk phenomenon Conor Oberst of the critically acclaimed Omaha, Neb., band Bright Eyes has spear-headed a rock album that wastes none of his astounding lyrical talent and backs it up with irresistible music. "Read Music, Speak Spanish," is a beautiful blend of catchy hooks, quick music and witty lyrics.

Fans of Bright Eyes shouldn't let this album pass them by just because it's rock. Oberst's talent is just as bright in the upbeat sounds of this talented band.

Instead of the introspection

Oberst drew on with Bright Eyes, this album attacks consumer culture without being punk. The writer critiques himself as well as the world

that has come to be.

The album opens with sound clips of

girls talking about wanting money in relationships and quickly

jumps into the hook-laden, "Man and Wife, the Former." Oberst sings, "And we'll enroll in that middle class / Get a compact car full of discount tags / If you're feeling trapped or too attached remember we wanted that." The music is on par with anything

available, but what makes "Read Music, Speak Spanish" exceptional is the lyrical quality. Oberst has solidified his presence as one of the most talented songwriters anywhere. His music will appeal to a surprisingly wide audience, reaching many who may not usually listen to indie-rock.

## misdirection

LIPHIM THE BIRD

## sex education events

BY ERIKA NELSON Kanssa State Collegian

Goodnow Hall is the only place to really have S.E.X. this week.

The hall is hosting S.E.X. Week, Sexual Education Xperience Week, which includes a week of programs to ·help promote sexual education and boost attendance and the effectiveness of hall programs.

"The purpose is to promote sexual education and awareness," said Amy Seery, events coordinator of Goodnow Hall. "By doing this as a weeklong event, we can encourage participation, and it allows HGB members and resident assistants to work as one big team."

The programs begin at 9:30 tonight with the Battle of the Sexes on the second floor of Goodnow Hall. The activity offers a chance to learn what girls and guys really have on their minds.

Jeff Payne and Jessi Messer, Goodnow resident assistants, will be leading the discussion group.

"It's a good opportunity to learn from the opposite sex," Payne said. "Where else can you get personal responses without getting laughed

The group will be split with the men on one side and the girls on the other, and they will exchange questions. For comfort, everyone will be given the chance to write down questions they are too shy to ask out

"I'm looking forward to learning anything that deals with making the female happy," Payne said.

Tuesday's event attracts couples to test their knowledge about their partner, Jason Baldridge and Erica Tabares, Goodnow resident assistants, will be hosting the couples' game

"It will be funny to see how well they know each other," Baldridge

The couples will answer questions similar to the style on the Newlywed Game, he said.

"Some of the questions will be the kind that couples should easily answer about their relationship, Baldridge said. "For example, the "question. 'What does your partner do that annovs you the most?' is something that most couples don't usually discuss openly with one another, yet they should know the

Before the couples' game begins Baldridge and Tabares will do a fiveminute presentation on helpful hints on how to fight in a healthy way

"The main focus is to have fun, but it's good to throw education in there," Baldridge said.

Education is the key for Wednesday's activity with an educational program to promote healthy choices. S.H.A.P.E., Sexual Health Awareness by Peer Educators, a group from Lafene Health Center, will talk with students and provide good tips,

Seery said. "There's always something new to learn," Seery said.

Another program is on cheap dates and will be Wednesday. The purpose is to give people ideas on where to take out that special someone when money is tight. Seery

The highlight of the week is the date auction Thursday. It is a community service event in which all proceeds go to the Women's Crisis Center of Manhattan. Residents bid to purchase dates, such as dinner and a movie or other planned events, with an accompanied representative from Goodnow Hall. The representatives include six resident assistants, two community assistants, two Goodnow Hall Governing Board members and two celebrities of the hall.

"It's not a meat market where you auction off dates." Baldridge said. "They're bidding on the activity with the person, not on the person.

The hall representatives dress up for the event in a theme they create themselves. For example, one pair plans to dress up in a Hawaiian theme. The representatives are auctioned in pairs, so there are four people on the date rather than one representative with the bidder alone It makes the dates more comfortable, Seery said.

The date activities are donated from local businesses. Restaurants and certificates for activities like bowling and ice-skating are some of the events that will be available,

The auction is open to the community, so anyone can bid in the auction, Seery said.

This will be the third year Goodnow Hall has had the date auction. In the past, money raised for the Women's Crisis Center totaled \$2,000 and \$1,300. This year, they hope to make more.

"It's been very successful in the past and has become a tradition." Baldridge said.

All events are open to the public, even for people who do not live in Goodnew Hall. For more information concerning the events, call Seery at (785) 395-5238

## Hall offers weeklong Olympians test positive for drug use

BY LARRY SIDDONS

SALT LAKE CITY — Cross-country skiers Johann Muehlegg of Spain and Larissa Lazutina of Russia were stripped Sunday of their most recent gold medals at the Salt Lake City Olympics after testing positive for a performance-enhancing drug.

A third cross-country skier, Olga Danilova of Russia, also tested positive for the drug, darbepoetin, which is used to treat anemia by boosting the production of red blood

cells that carry oxygen to muscles. All three athletes were tossed out

The International Olympic Committee said Muchlegg, who won three gold medals at the Games, was ordered to return his gold in the 50kilometer classical race. But he will be allowed to keep his gold medals in the 30K freestyle and the 10K pursuit

Lazutina, who tied an Olympic record Sunday with her 10th medal

when she won the women's 30K classic, will be forced to forfeit that medal. But she will be allowed to keep two medals she won earlier in these

Danilova was disqualified from the 30K classic in which she finished

A random urine test Thursday found traces of darbepoetin in the German-born Muchlegg, who was called before the IOC's disciplinary panel early Sunday, along with Spanish Olympic officials and the team doctor.

Before Saturday's 50K race, he was randomly selected to be tested for high levels of hemoglobin, an oxygencarrying molecule in red blood cells that can increase endurance.

His levels were above the limit for the first test, but beneath the threshold in a second test administered five minutes later. He was allowed to race, and made a strong comeback over the final 10 kilometers to beat Russia's Mikhail Ivanov by 14.9

Asked why the tests showed different levels, Muehlegg responded, "I don't know if the machine is not working well." He also said a change in his diet three days before Saturday's race might have altered his blood

Muehlegg had become the toast of Spain, even fielding congratulations from King Juan Carlos following his success in Salt Lake City.

Muehlegg competed in three Olympics for Germany, but began having troubles with the country's ski federation in 1993. Relations with his coaches, teammates and trainers deteriorated, and he left in 1998.

Since darbepoetin is relatively new, it is not on the IOC's list of banned substances. But it has similar properties to the banned hormone erythropoietin, or EPO.

Lazutina, 36, was disqualified from the women's relay Thursday for having high levels of performanceboosting hemoglobin, a blood molecule that helps carry oxygen to muscles. She took another blood test

Sunday morning.

"It was a shocking experience," she said. "That tragedy on Thursday made me more determined to work

The heavily favored Russians had to withdraw from the relay. Russian officials claimed drug-testers were targeting their athletes, and the dispute led to widespread complaints of biased judging in other sports.

Russia threatened to pull out of the Winter Olympics and not compete in the 2004 Summer Carnes if its concerns were not addressed.

"The rules need to be changed," Lazutina said before the results of the second blood test were announced Sunday. "Unfortunately we cannot change any rules. In that sense, I feel lawless. ... It's hard to get to the people who make decisions. I feel like we're treated like criminals because of those

Lazutina will get to keep her silver medals in the 15K freestyle race and the 10K combined event, but her medal total now stands at nine.

## Reporter's killers linked to al-Qaeda

BY STEVEN GUTKIN

ISLAMABAD, Pakistan - The hunt for the killers of Wall Street Journal reporter Daniel Pearl is targeting three Arab nationals - an indication, investigators said, that the perpetrators might be linked to Osama bin Laden's al-Queda terrorist network.

Authorities offered little information Sunday about the Arabs' identities or what role they might have played. But their alleged involvement combined with investigators' revelation that a key suspect now in custody said he mer personally with bin Laden in Afghanistan suggested an al-Qaeda link.

Police believe a dozen or more people were involved in Pearl's abduction and murder, and that most of them have spent time in Afghanistan as supporters of that country's ousted Taliban regime. Their links to al-Qaeda — the group believed responsible for the Sept. 11 terrorist attacks in the United States - are being studied, investigators said.

Four key suspects already were in

dependable quality service Claftin Books and Copies

1814 claffin rd 776-3771

www.claflinbooks.com

police custody when U.S. and Pakistani authorities revealed the contents of a videotape Friday that showed images of the 38-year-old journalist getting his throat slit.

Ahmed Omar Saeed Sheikh, the British-born Islamic militant who police believe masterminded Pearl's abduction, has been in police custody since early February. At one point he told interrogators that he met with bin Laden in Afghanistan after the attacks, a senior police investigator said on the condition of anonymity.

Saced also told investigators that his group wanted to teach the United States a lesson and Pearl's murder was just a first step, officials said.

On Monday, prosecutors will formally charge Saeed and three codefendants with kidnapping and murder, a senior government official said. The three others are accused of having sent e-mails announcing

Pearl's abduction, including one showing the journalist with a gun pointed to his head.

Fearing the killing might signal a wider plan to thwart the government's drive against terrorism, Pakistani authorities have warned U.S. and other foreign diplomatic missions and businesses to boost their security.

Before his abduction on Jan. 23. Pearl had been investigating alleged links between Pakistani militants and Richard C. Reid, who was arrested in December for allegedly trying to ignite explosives in his sneakers during a Paris-Miami flight.

With Saeed in jail, the prime target of a massive police dragnet is Amjad Faruqi, whom Pearl apparently knew as Imtiaz Siddiqi and who is believed to have carried out the kidnapping. An investigator said one detainee met Faruqi several times and each timehe was accompanied by three Arabs.

### **ENROLLMENT**

Continued from page 1

\*The numbers show that from the spring to the fall, our retention rate is high," Bosco said, "and a lot of that has to do with the qualified admissions. Students are better prepared for college."

Legislators approved qualified admissions in 1996, requiring Kansas students who wanted to enter a state university either to have a 2.0 grade point average, score at least a 21 on the ACT entrance exam or rank in the top one-third of their graduating class.

The drop off in students from the fall to spring semester has little to do with the program, Bosco said.

"That is a normal trend with students graduating or transferring at semester," he said. "However, the amount of students that re-enrolled

Gunile Devault, associate registrar, said fall enrollments are always higher and explain why rates are reported by semester and compared spring to spring and fall to fall.

"This is expected," Devault said. "Past history of enrollment shows a lot of people start in the fall new and decide that is not what they want to do by spring. Plus, graduation has some effect on the rates."

Larry Moeder, director of student financial assistance, said the increase in enrollment for the spring semester would not have a negative effect on students in need of money.

"Financial aid figures tend to increase as the amount of students increase," he said.

The formula for determining the total amount of funds the university receives is decided by the population and the total financial aid needed by the students, Moeder said.

"K-State tends to bring in more and more aid each year," he said. "We are very fortunate to be able to match the increasing enrollment."

#### RODEO

Continued from page 1

When Pacha and other team members aren't on the road, they can be found practicing in Weber Arena or, in warmer weather, at Cico Park.

Though the team trains about 15 hours each week, many members spend additional time practicing individually to perfect their skills.

Pacha said she practiced almost every day when she wasn't too busy with classes and her duties as former Miss Rodeo K-State.

Also, at each rodeo members must pay entry fees for each event in which they compete. With about 10 rodeos each year, the fees could turn rodeo competition into an expensive activity, Pacha said.

Rodeo team members also must provide their own horses and find places to board them during the school year. The rodeo club purchases stock with which to

Resting on a rail, Gary Hershey, Franklin, Kan., waits for livestock to enter Weber Arena on Saturday during the KSU rodeo. Hershey works for Rafter H. Livestock, a rodeo stock contractor, whose job it is to sort the livestock at rodeos around the country.

#### MURDER

Continued from page 1

being aggressive and a bully not only because he was bigger, but he was packing a pistol."

According to the court records, the testimony of the victim's two companions, who were with Lindsey that night, would be allowed. The testimony would show that Lindsey liked to be a bully, and was in Manhattan that night to fight.

Irigonegaray said the victim had 14 or 15 beers the night he was stabbed. Because alcohol is a moodaltering drug, he said the jury should be aware of the amount Lindsey had to drink.

"He was a big man who was trained to kill, he was packing heat

and he liked to fight and be a bully," he said.

These three rulings worked in favor of Alexander, but a motion from Irigonegaray to prohibit a taped conversation between Alexander and his grandfather was denied by the judge, allowing the jury to hear the conversation where Alexander told his grandfather he had stabbed a man.

Irigonegaray said the tape should not be allowed because the defendant and his grandfather expected privacy during their conversation.

"There is no expectation of privacy," said Brenda Jordan, assistant Riley County attorney for the

"The law enforcement center was designed for interview and interrogation."

#### **CAMPAIGN**

■ Continued from page 1

said. "It's about who can talk to students and find out what students want. This causes them to go out and get contributions." The bulk of presidential candi-

date spending usually comes from T-shirts and banners. There aren't regulations on what pairs can spend money on. In past years, candidates have spent money on things ranging from food for the women's crew team to roses for sorority house mothers. Money that's raised but doesn't go into campaign spending must be donated to a charity.

Spending has correlated with outcome in past elections. Student

Body President Kyle Barker and Vice President Brandon Kauffman spent \$1,932.69, which was the second highest campaign amount. Travis Lenkner and Mary Bosco, who were the second highest vote getters, spent \$2,647.93. In the 2000 president election, the two pairs in the runoff spent the most money. The Jake Worcester/Dana Pracht ticket won and spent \$2,792.16. The Jesse McCurry/Kylo Heller ticket spent \$2,987.84.

Elections Chair Ted Conrad said there's a definite correlation between time spent campaigning and money spent on propaganda. "Those who are serious about

being elected also do a lot of spending on the side," Conrad said. There are benefits to spending

money on T-shirts, flyers, buttons and other items with candidates'

#### Campaign spending

Matt Wolters/Mandy Achilles Zac Cook/Todd Kohman \$2,593.67 Luke Miller/Jeremy LaFaver \$979.00 Chris Greene/Greg Woodyard \$549.82 Ali Karimi/Eric Hoopingamer \$519.02 Mike Day/Tyson Steffen \$398.79 Al Gard/Jon Krasnoff did not turn in an expense report.

names, he said.

"The simple reality is that votes come from name recognition," Conrad said. "Someone knows someone they

want to vote for, and when they vote, they go to the ones they recognize."

### Olympic medal count

Want a brief look at who's ahead in the Olympics? Here's a rundown of what countries are sweeping the medals.

Nation	Gold	Total
Germany	12	35
U.S.	10	34
Norway	11	24
Canada	6	17
Austria	2	16
Russian Federation	6	16
Italy	4	12
France	4	11
Switzerland	3	11
China	3	8
Netherlands	3	8

#### PARKING

Continued from page 1

some point," Wolters said. "I would support the Master Plan and push to see something done.'

Wolters said the overall idea behind the shuttle system is a good one, but the majority of students do not want to buy a parking permit to park and then ride a bus. "Because of many K-State

students' backgrounds, they are not used to riding a bus," he said. "We would be lucky if one in ten students would be interested in buying a permit to ride a bus."

Michael Day, presidential candidate, said he thinks a shuttle system would be a good option for K-State

"A lot of people are talking about

a parking garage," Day said. "We would have to take a step back while this structure is created and most students don't want to sacrifice parking for a year while they wait for this construction." Opening up the K-State stadium

parking lot and running a shuttle from that location would be the best short term solution, Day said.

"The use of the stadium parking lot would be a great way," he said. "There is parking galore out there. We could easily get people to and from that spot and this idea is something that could be imple mented within a few months."

Candidate Al Gard said he would support any type of mass transit or car pooling because that would be in accordance with his platform theme of energy conservation.

"I would encourage car pooling or any kind of mass transit," Gard

said. "I would also be in favor of making an existing lot a kind of car

Gard said he would be in favor for using the stadium lot for extra parking and running a shuttle from "I think it would be an encour-

agement for students to use the lot if the permits were made less expensive for that area," he said. "I think the current shuttle we have works fine but I would be in favor of any efficient way of transit."

Luke Miller, presidential candidate, said he would like to follow the 50-year Master Plan to go with the natural progression of K-State, but would encourage use of the current shuttle if he was elected. "I don't think a parking garage is

in the future for a while," Miller said. "I would be lying if I said I could accomplish it.'

Miller said a parking garage can not be done overnight, so he would encourage the use to existing transportation.

"I would tell students to consider using the shuttle we already have," he said. "Explore other avenues. Car pool when you go to class. Use the options there."

Candidate Chris Greene said beginning a more extensive shuttle system would be the best solution because it would have the most minimal cost to students. "Our whole platform is about

quality changes at minimal costs," Greene said. "We are not in support of a parking garage because there are not a lot of places to put one on campus."

Working on making a better shuttle system is the way to solve the parking problem, Greene said.

'We would have to look at things

like opening up Bramlage parking lot or having other transit spots," he said. "This is realistic and could be implemented by late fall or spring."

Zac Cook, presidential candidate, said he supports following the Master Plan, but making a change right away would require a change in mindset from the students. "Most people are stuck in the

mindset that they have to drive to the middle of campus to park," Cook said. "A parking shuttle would require a change in mindset by the students. We can't propose more stops on a shuttle system without more buses.'

If elected, Cook said he would follow the administration's Master Plan, but thinks car pooling or riding the shuttle is a good quick

"I would hope that anyone who is elected would follow the Master

Plan," he said. "But it is just not feasible to say it can be accomplished in a year." Candidate Ali Karimi said

anything to help students get to class quicker and safer is a good solution, but would prefer to take an informational approach to the problem. "I prefer to take an informa-

tional stance and not make any promises without an educated decision," he said. "I am never going to see a parking garage while 1 am here.

Karimi said he believes that parking is a problem between the city and the university though.

"The burden of this parking problem needs to be equally distributed between the city and the university," Karimi said. "We can't push this all on students because we are citizens, too.'

## Primary election polls open today

SGA

**ELECTIONS** 

Primaries are today and

Wednesday, General elections will be March 5

Kansas State Collegian

The primary election polls will open today at 8 a.m. and will continue until Wednesday evening at 6 to narrow down the presidential tickets from seven to two.

Ted Conrad, elections committee chair, said students can vote online using KATS.

"Every student will have to log on through KATS and there will be a link for SGA elections," Conrad said.

From there, KATS will give you a user ID and password and a link to the election vendor's Web site, Conrad said. Students should click on the link and enter their ID and password.

"This should bring up the correct ballot

for their college," he said.

Primary results will be available 15 minutes after closing time

Wednesday. "They send the

results to us electronically shortly after the polls close." Conrad said. "The committee will be there to receive them and verify everything. We want to give ourselves time to make sure everything is in order."

and 6.

Election committee member Brandon Grossardt said he doesn't anticipate any problems with the online vendor.

"As far as I know, there shouldn't be any

Once the committee verifies the results, they will be available for public announcement Wednesday evening around 7:15.

"We are trying to coordinate that with KSDB 91.9 and announce them on air during the women's basketball game," Conrad said.

The results also will be available online at www.ksu.edu/elections after the on-air announcement.

Conrad said he is expecting a 15 to 20 percent voter turnout.

"General elections in years past have been close to 20 percent," he said. "Since we did the primary, there might be more interest."

He said Student Senate's decision for a primary election instead of the runoff of the past, was to maintain student interest.

"They wanted to streamline the process because this way, all but two of the candidates are eliminated," he said. "All the outcomes are decided on the night of the general election."

Conrad said he also is hoping that voter turnout for both the primary and general elections will be high

"In the past, after the general election was over, a lot of interest was gone and very few voted in the runoff," he said. "Now, people will probably vote in the primary and then. everyone will vote again in the general election.

Grossardt said it is important for students to vote in both elections.

"If you don't vote, you don't have anything to complain about," he said.

## 2 athletes arrested at Union Saturday

BY PETE ELSASSER Kansus State Collegian

Two K-State football players were arrested Saturday night at the K-State Student Union.

Alan Walker, defensive back, was arrested at 12:30 a.m. for resisting arrest, criminal threat, criminal trespass and disorderly conduct.

Allen "Tank" Reese, defensive tackle, was arrested at 1:10 a.m. for resisting arrest and disorderly conduct.

In a press release, Coach Bill Snyder said there are substantial consequences for inappropriate behavior in this program.

"Those consequences will remain inhouse and as confidential as the system allows," he said.

Libby York Stauder, Union marketing and promotions manager, said the two students were creating a problem at a residence hall dance at the Union Saturday night.

She said the Union received a call Saturday at 1:20 a.m. complaining of disturbance, and the dance was shut down at 1:45 a.m.

Stauder said one of the students arrested had previously been banned from Union functions.

"I believe we handled the situation in a timely manner," she said. "I don't believe there was any overreacting, and we'll keep an eye on situations like that in the future.

However, Sarah Decke, Association of Residence Halls adviser, said there were no problems at a KSUARH-sponsored allhall dance Saturday night.

She said more than 500 people attended the dance at the Union Ballroom, and that the dance ended at midnight as scheduled.

There was nothing wrong at the dance that I knew of," Decke said.

"Everyone had to go through wand

sticks from security before entering." Ronnie Grice, K-State police department director, said the two students were taken to Riley County Police Department

K-State Police would not comment further on the arrests.

Ready to rumble

Jarrod Dilka of Southwest Oklahoma State University prepares his grip and rope for the bull riding competition Saturday at Weber Arena during the K-State Rodeo. Dilka spent a half hour working on the grip. See page 10 for a photo essay of the K-State Rodeo.

## Board tables Wal-Mart re-zoning plan to address public, officials' concerns

BY MICHAEL WATSON

Kansas State Collegian

Wal-Mart went before the Manhattan Urban Area Planning Board to take a step forward with its proposal, but the board said more information was needed before moving forward.

The seven-member planning board tabled Wal-Mart's proposal 7-0 to rezone approximately 22 acres of land located south of McCall Road, between Tuttle Creek Boulevard and Hayes Drive.

"Before we approve it, we should do our best to find a win-win situation, and not just a win situation." Mike Hill, planning board member, said.

The motion would give Wal-Mart an opportunity to come back to address unanswered questions and concerns about the proposal.

The planning board and the applicant set March 18 for their next

Jerry Reynard, board member, first motioned to reject the Wal-Mart proposal completely, before voting to table the proposal.

"I move to reject the proposal simply because it doesn't answer my questions in terms of traffic. I think it does vital harm," he said. "I don't think all the questions have been answered to my satisfaction."

Significant issues concerning the proposal involve access and traffic

City Engineer Scott Crain said there

"I believe if you listen close at night, you can hear a sucking sound. That's the money leaving town."

Ron DeWeese, owner of Ace Hardware/ Midwest Appliance

is a domino effect when addressing traffic concerns. He said the master plan he would be taking back to the City Commission would be to widen Bluemont Avenue, heading east toward Tuttle Creek to seven lanes and construct a raised median down the

The construction also would remove the traffic signal from the intersection of Third Street and Bluemont, moving the signal to the Fourth Street and Bluemont intersection.

Total cost for design, construction and inspection of the first wave, which includes extending the widened Bluemont through Tuttle Creek to the Wal-Mart parking lot, and adding a right turn lane on McCall, would be about \$2.7 million.

Another concern is what the proposal does to Ace Hardware/Midwest Appliance.

Ron DeWeese, owner of Ace Hardware, said he is in favor of the new store, but he said he wants to make sure other businesses are accommodated.

"We oppose the proposed plan because it removes three-fourths of our access and makes us an illegal building site," DeWeese said. "It's the responsibility and charge of our city staff to maintain access to Ace Hardware."

Manhattan is a great place to live and work. DeWeese said Ace Hardware is a store where money is spent in Manhattan and stays in Manhattan. He said other big stores like Wal-Mart don't always leave their daily receipts in Manhattan overnight.

"I believe if you listen close at night, you can hear a sucking sound. That's the money leaving town," he said.

Gwyn Riffel, planning board member, said he thought the Wal-Mart proposal was a very good plan. While he said he is sympathetic for Ron DeWeese, he said the supercenter would be good for the community.

One suggestion board members wanted was to change the orientation of the building to where the building's back was against Hayes Drive, with the storefront facing west.

CEI Engineer Chuck Mitchell, speaking on behalf of Wal-Mart, said changing the direction the building faces would not be possible because of the constraints of the land. The only design that is feasible is the one proposed.

"I think there's enough brain power here that it can all be worked out,' Reynard said. "We can work this out."

## Powell encourages Saudi prince to develop Israel peace initiative

BY BARRY SCHWEID The Associated Press

WASHINGTON, D.C. - Secretary of

State Colin Powell is encouraging Crown Prince Abdullah of Saudi Arabia to keep working on a proposal where the Arab kingdom would recognize Israel, and the Jewish state would give up all of the West Bank, Gaza and part of Jerusalem.

Powell telephoned Abdullah on Sunday. He told reporters Monday the proposal was an important step that he hoped would be fleshed out in the next few weeks.

But Powell also indicated a swap would not be a simple matter. For one thing, Abdullah has proposed Israel return to its pre-1967 borders, but Powell said there are various ways to interpret U.N. resolutions adopted at the end of the Mideast war that year that called for an Israeli pullback.

The United States and Israel supported the resolutions, which were reaffirmed after the 1973 Middle East war, only after the English-language text referred to withdrawal from "territories" not "the territories," which would have implied all the land the Arabs lost in the 1967 war.

The Arabs and many of their supporters insist now, as they did then, that the resolutions require a total pullout.

Powell said he thanked Abdullah for the initiative, which was floated through The New York Times.

The kingdom's effective ruler offered full diplomatic relations, trade and guarantees for Israel's security in exchange for a complete pullback.

Israeli Prime Minister Ariel Sharon has

offered statehood for the Palestinians and an Israeli pullback if violence is halted and negotiations reopen and succeed. But he is loath to give up all of the territories, and few Israelis are open to the idea of surrendering part of Jerusalem.

Still, Sharon's predecessor, Ehud Barak, tried to strike a deal with Palestinian leader Yasser Arafat in which Israel would have retained only a small portion of the West Bank. He also accepted as a basis for negotiations President Clinton's proposal to give the Palestinians sovereignty over part of Jerusalem.

Arafat did not accept the plan, and the Bush administration has been hampered in its peacemaking efforts by sustained violence between Israel and the Palestinians.

A scheduled meeting Sunday between Israeli and Palestinian security officials under U.S. auspices was canceled. But Powell said he expected it would be rescheduled soon.

The Mideast conflict was one of the main topics of discussion at Powell's meeting Monday with Spanish Foreign

Minister Josep Pique. In a statement afterward, Pique endorsed the Bush administration's call on the Palestinian Authority to curb attacks on

Spain is the current president of the European Union, whose senior diplomat, Javier Solana, is in the Middle East seeking

an end to the violence. Powell said he hoped the United States and the Europeans would be able to find a way out of this horrible situation.

#### STATE IN BRIEF

#### **House debates Senate** state redistricting plan

TOPEKA - The House gave firstround approval Monday to a bill redrawing the state's 40 Senate districts.

There was no debate on the bill. and it advanced on a voice vote. The House plans to take final action Tuesday, and leaders expect the measure to go to Gov. Bill Graves.

By tradition, one chamber does not make changes in another's redistricting map.

The House advanced the bill despite objections from Senate President Dave Kerr, R-Hutchinson, and members of the Senate Reapportionment Committee.

#### NATION IN BRIEF

#### **Defense says Yates weighed** methods of killing children

HOUSTON - Andrea Yates had visions and heard voices encouraging her to use a knife to kill her five children but she decided it was too bloody, a jail psychiatrist testified Monday.

As testimony resumed in the second week of Yates' capital murder trial, Dr. Melissa Ferguson said during crossexamination that Yates also ruled out drugs to kill her children but believed drugs were possible for suicide. Ferguson interviewed the Houston mother at the Harris County Jail the day after her children were drowned in their bathtub June 20.

Ferguson testified that Yates told her she thought about killing her children

for at least three months and thought about it the night before the children were drowned.

Other testimony this week is expected to include doctors who treated Yates before the killings.

#### Afghans made mistake in deadly raid on compounds

WASHINGTON, D.C. - The U.S. commander of the war in Afghanistan defended the actions of American soldiers in a January raid that killed 16 Afghans later determined to be friendly forces.

Gen. Tommy Franks, commander of U.S. Central Command, said Monday there had been no intelligence failure in the raid, even though those killed and captured turned out not to be the hostile forces that the U.S. soldiers had been told were there. He disputed suggestions that the U.S. troops had erred.

The one mistake that I know was made was when people shot at American forces doing their job on the ground in Afghanistan," he said in a videoconference from Tampa, Fla., with reporters at the Pentagon."

## Graduate offers advice for finding job in tough market

BY MICHAEL LAWRENCE Kansas State Collegian

Where they are now

inding a job after college was difficult for Rob Ewing, 1994 K-State graduate in chemical

engineering. "I had signed up for the on-campus interviews at Holtz Hall," Ewing said. "I had lots of interviews,

but no luck." He finally was hired by the Lee Company in Kansas City, Kan., two

months after graduation. He said he worked in product development where he was responsible for creating denim dyes. He said getting this job was an end to the suspense.

"I was relieved, too, to know what I would be doing, and anxious to get

started with my career."

Now, Ewing is employed at Koch Industries in Houston where he trains sales representatives.

He said it is inevitable that future K-State graduates will be put through a similar job-searching situation. Having been through the routine, he said, he has important advice for students.

Ewing said, in addition to the career fairs, the on-campus interviews also are a helpful resource.

"The people they have there to help are wonderful and have good industry contacts," he said.

Ewing said it also is helpful for students to keep in touch with contacts within their field, including other graduates. He said they might be helpful in lfinding jobs.

Still, if nothing is working, Ewing said it is important to remain persistent and confident.

"Don't be discouraged by rejection," he said.

#### ON RECORD

#### **CAMPUS** BULLETINS

## PRIMARY ELECTIONS VOTERS' GUIDE

#### Zac Cook and Todd Kohman

1) In 30 words or fewer, how would you react to any tuition

Tuition will increase to fund priority action items. Student leaders should have input to ensure that financial assistance and better services are available. Todd and I will voice students' input

2) In 30 words or fewer, what will be the future of the SafeRide program during your term? SafeRide was created to ensure student safety. Students should be

aware of such programs and encouraged to make safe decisions. If

only one life is saved, the program is successful.

3) In 30 words or fewer, what would you do to improve parking

A proactive solution for parking exists. If each car with less than two occupants were not allowed to enter campus lots, there would be no parking problem. It's that simple.

#### Michael Day and Tyson Steffen

1) In 30 words or fewer, how would you react to any tuition

With a subsequent raise in financial-aid allocation, hopefully a college education is an affordable option for anyone, regardless of if there is a tuition increase or not.

2) In 30 words or fewer, what will be the future of the SafeRide program during your term?

A SafeRide program is my No. 1 goal as student body president. With an effective program in place, hopefully DUIs will decrease and lives can be saved.

3) In 30 words or fewer, what would you do to improve parking

Implementing a shuttle-bus system from KSU Stadium to campus seems to be the best short-term solution before money is raised to build a new parking facility.

#### Al Gard and Jon Krasnoff

1) In 30 words or fewer, how would you react to any tuition

Tuition increases are inevitable. The university has an obligation to notify the students where their tuition money is going. 2) In 30 words or fewer, what will be the future of the SafeRide

program during your term?
We believe the SafeRide program and the parking problem can be solved with one solution. We propose SafeRide could serve as a satellite shuttle system.

3) In 30 words or fewer, what would you do to improve parking on campus?

Restructuring off-campus parking permit distribution is our main concern. Adding parking garages is neither a fiscally nor environmentally responsible solution to the parking problem.

#### **Chris Greene and Greg Woodyard**

1) In 30 words or fewer, how would you react to any tuition

We want to communicate to the students what their money is going to be used for, while at the same time fighting to keep tuition

increases as low as possible 2) In 30 words or fewer, what will be the future of the SafeRide

program during your term? I believe every student should feel safe on his or her campus, and

our current system is doing an excellent job of creating a sense of

3) In 30 words or fewer, what would you do to improve parking

We want to expand our current shuttle system. This will allow us to keep costs down and help alleviate the parking problem. Quality improvements at lower costs is critical.

#### Ali Karimi and Eric Hoopingarner

1) In 30 words or fewer, how would you react to any tuition

Don't let the empty promises con you into thinking that tuition will stay the same. It'll rise no matter what. We support a gradual 9-percent increase

2) In 30 words or fewer, what will be the future of the SafeRide

program during your term? We are big advocates of the SafeRide program. In fact, our names are on the bill. If elected, we would push hard to have this fully

3) In 30 words or fewer, what would you do to improve parking

There is no one answer to the parking fiasco. A quick fix won't improve anything. It may make things worse. We need real dialogue between the city and college.

#### Luke Miller and Jeremy LaFaver

1) In 30 words or fewer, how would you react to any tuition increases?

We will ensure that the money students pay will directly affect them in a positive manner. SGA and the administration must be held intable for the tuition increase

2) In 30 words or fewer, what will be the future of the SafeRide program during your term?

We will continue to develop the SafeRide program, as the groundwork has already been laid. This program will help to ensure the safety of all K-State students

on campus? Parking is a major issue. However, this problem requires excessive funding to solve, and we feel the need to address the academic

3) In 30 words or fewer, what would you do to improve parking

#### **Matt Wolters and Mandy Achilles**

1) In 30 words or fewer, how would you react to any tuition

The implementation of a student-centered tuition advisory committee will ensure that students have a voice in deciding where

their additional tuition money is spent. 2) In 30 words or fewer, what will be the future of the SafeRide program during your term?

If students support the SafeRide concept on the general election ballot, we will explore options to administer and manage a SafeRide

program in Manhattan. 3) In 30 words or fewer, what would you do to improve parking on campus?

The K-State Master Plan includes three parking garages. We support the Master Plan and will work to see that the first garage is constructed as quickly as possible

### New election process improvement for students, candidates

DUR VOICE and debated by the editorial board and written after a majority opinion is formed. OUR VOICE is

the Collegian's official

Jessica Pitts **April Middleton Nancy Foster** Dana Strongin Alyson Raletz Nancy Hull Matt Killingsworth Dan Smith **Paul Restivo** Katle Lane JJ Duncan Zach Long **Nicole Donnert** Micah Hawkinson

The presidential primary elections start today and will end Wednesday. This is the first year K-State is having primaries. The old system was comprised of general elections,

Students and candidates should welcome the new election process, because it will bring significant improvements. The old dates, and it hindered the selection process.

The runoffs turned elections into a long, drawn-out process. The highest-ranking

presidential candidates were not chosen

system, which is modeled after the national

Students will have a week to learn about the top candidates. They can focus on the two pairs and their platforms before the general elections March 5 and 6. It will be easier for students to take the time to understand the issues and stances before voting.

The Student Governing Association made a smart decision in changing K-State's elections. The new system should decrease campaign duration. The shorter and easier process should help increase voter turnout for the university.

The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication.

Every moment of every day, somewhere in the world, there's a girl crying, and a guy trying to figure out why.

The Canadian hockey team: Born in Canada, made all their money in the United States. Traitors.

Let's see. Texas A&M, Oklahoma, K-State and Nebraska all think Kirk Hinrich looks like Harry Potter.

Sidewalk chalkers are losers. Don't vote for them for Student Senate.

This is a big thank you to whoever called in the bomb threat to King Hall.

Don't advertise what you're not going to sell or give away.

This is to Kyle Brownback. Lyndon will always be second to Osage City.

I call for the resignation of George W. Bush on the grounds that he is an uncool

I'm like a chocaholic, only with booze.

To the girl at Rusty's on Thursday night in the jean skirt: wow.

Cooking is a much better hobby than drinking, but it can easily become about three times as expensive.

Chase Manhattan clubhouse Friday night: best party ever.

The lead singer of Nickleback is teaching estate and gift tax in the College of Business. It's kind of odd.

I wish the P'Zone revolution would come to K-State.

My roommate chose this semester to become annoying also,

My computer is possessed.

To the student body presidential candidates: If you want my vote, disband parking services.

I'm going to buy a Beta fish and name him Alpha.

After watching the Olympics, maybe America will now appreciate how great of a sport hockey is.

Death is just a graduation from life.

Ah, only four more days until Friday

I want my sweatshirt back.

Do you ever wake up and you can't move because you're still high from last night? It sucks.

If you want to solve the parking problem, why not raise the price of parking permits? Or, if you're not lazy, you can bike

To the guy with the cheesy, fixed-up Geo Metro: I could probably overtake you and a couple of other guys on a skateboard.

Holey matrimony Getting married too young causes complications

restrictive way of thinking. Instead, entertain a

etting married in college is cool, if you're my parents. I know, I know. What better time is there to find a spouse than when you move to the big state university?

I can't totally dismiss this logic, but I disagree

Jared Wiesner

with the somewhatpopular trend of getting married while still attending school. To clarify, I'm not talking about nontraditional or

I'm speaking to those lovebirds in their late teens to early 20s who can't wait to move into Jardine, put a down payment on their first mini-van and squeeze out their 2.4 kids.

Please, for the sake of argument. reconsider this selfdifferent approach to matrimonial happiness. We all know that life is complicated, huge and In order to make sense of what little we know, social norms and practices are established. It is from these traditions that we extract hope and

Among these practices is the concept of monogamy, or more specifically, the idea of marriage.

Yes, the wonderful piece of paper signed and sealed by the government proving there is an eternal love between any married couple.

Every 5-year-old girl dreams of her wedding day. when Prince Charming lays a soft kiss on her lips, and

everybody lives happily ever after. It is this image that fuels a \$70 billion wedding industry, according to a 2000 Bride Magazine

survey. This is how I see it. Taking medical science into account, I assume I will live to about the age of 80.

According to social norms, I should definitely be married by the age of 30. After all, if you cannot find a lifetime mate in this amount of time, you must be headed for the monastery.

Basically, society tells me I should decide to spend the last 50 years of my life with a person I

met in the first 30. No, thank you.

Don't get me wrong. If, by chance, I meet the woman of my dreams tomorrow, I will not hesitate to spend the rest of my life with her.

But that doesn't mean I'm going to race at the chance to marry her at the first convenient oppor-

If you feel passionately about another person, why must you seek immediate approval from a registered body?

Why is an expensive wedding dress, rented church and cheesy dance required for a successful, lasting relationship?

I believe too many people marry their lives into a corner by limiting their professional and social dreams at such a young age

In the next 10 years, I will have to decide where I want to go to law school and begin my career. Accepting the permanence of marriage, I would have to compromise with my wife's life plans at each important juncture.

I'm not prepared to make such a sacrifice. Life is short as it is, and if we are always preoccupied with finding a lifetime mate, we might find the most invigorating years of our life slip away.

For at least a few years, forget the music, lace, bow ties and photographs. There will be plenty of time for that in the future.

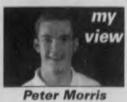

Instead, hand me a cup of beer, turn up the limmy Buffet and let's worry about tying the knot another day.

Jared Wiesner is a sophomore in political science. You can e-mail him at jsw7333@ksu.edu.

## U.S. should embrace Cuba for economic, social good

n the fervor of the 2000 presidential campaign, then Gov. Bush responded to a question, "I would be a free-trading president, a president that will work tirelessly to open up markets for agricultural products all over

Line art by Bingrong He/Collegian

the world. "I am a glorious man," Bush added. OK, maybe not. Much like me with my

history reading assignment, President Bush just hasn't gotten around to it.

Forty years ago, a man named Fidel Castro saw the corruption and exploitation American big business was doing to his small island country. In response, Castro and his group of communist guerrilla fighters seized the capitol and left the streets of Havana drenched in

crimson. With Americans appalled, the United States set a trade embargo against the poor sugar-cane nation. Even Fidel had to sell everything he had, except for his green commando suit, which has lasted him since he was 30.

Tensions mounted between the two countries when the Soviet Union, in

response to U.S. missiles in Turkey, placed nuclear missiles in Cuba in 1963. The Kennedy administration dictated that this was unjust, for it clearly broke the rule of America's favorite game, "I win."

Americans soon became entrenched against their despotic Caribbean neighbor.

However, in 1991, the Soviet Union fell and the Cold War fell with it. Freedom soared, families reunited, vodka prices tumbled and the masses were happy. However, instead of relations becoming better between Cuba and America, they grew much worse.

Since 1991, measures by the government have prevented ships engaging in trade with Cuba from entering U.S. ports. Furthermore, the United States has used its political clout to keep Cuba from gaining access to foreign credit. The result is another Iraq — a starving populace with a powerful dictator who has bad facial hair.

Why would the beacon of democracy do business with a bunch of bearded commies? Because there is money to be made.

Paula Stern (no relation to Howard), Ph.D., said if the United States was to open an unrestricted trade agreement with Cuba, the result would be \$1.6 billion in food and medical exports,

associated with 20,000 U.S. jobs.

With the United States in recession, and the price of Ramen reaching a stratospheric 20 cents a package, action must be taken to promote economic

Wouldn't it be better to play the piano in a whorehouse than do business with a bunch of nasty commies? Seeing that we are the largest importers of goods from communist China, we already are doing business with the reds. So what is the difference between blocking trade between Cuba and China if they are both communist nations that killed scores of innocent people in their quest for power?

Beanie babies.

Yes, those cute, now out-of-style cuddlies are symbolic of the mass trading that carries on between the United States and its most favored nation, Red China. Our underlying foreign policy principle is that if the United States can make money off of you, you are our friend. Since I have shown that we can make money off Cuba, we should make friends with papá Fidel,

But aren't we helping communist nations acquire hard currency to purchase military equipment to use against us?

Yes, but hold' er there, partner. By allowing free trade in China, we allow individuals to choose their destiny - the essence of true freedom.

Bush's own secretary of commerce, Donald Evans, said it best. "Free and open trade is an important foundation for democracy, social freedom and political stability in our hemisphere and around the world. In liberalizing trade agreements, we are recognizing that the genius of the free enterprise system relies on and encourages human freedom."

So, by opening the doors of trade to freedom, we are, in essence, opening individual freedom in China, and allowing Chinese citizens to use their own talents, skills and pursuits to raise their standard of living.

From there, it's only logical to say, by promoting individual freedom in China, we are helping to change its political situation. By opening the doors of free trade, we are, in fact, fighting commu-

Therefore, by enacting a free trade agreement with Cuba, not only are we helping Americans down on their luck by the economic cycle, but we also are fighting the despotic tyranny that only isolation can promote.

Peter is a sophomore in open option. You can e-mail him at pdm5999@ksu.edu.

## <sup>2</sup>2 K-State distance education programs receive recognition

BY EDIE HALL

Kanson State Collegian

Two K-State distance education programs recently received honors from the American Distance .Education Consortium, a national ,consortium of land-grant universi-

The Great Plains Interactive Distance Education Alliance is an association of human sciences colleges from 10 universities and is coordinated by K-State. The alliance received the Excellence in Distance Education award from the consor-

The alliance was recognized for its inter-institutional graduate program in family financial planning and for its faculty development opportunities. The alliance also was recognized for its creation of model policies and practices for distance education alliances.

The consortium also awarded K-State's master's in agribusiness program an honorable mention award for excellence in distance education. K-State's agribusiness program is the first graduate agribusiness program in the nation to be offered through distance education.

Universities involved in the alliance include: Colorado State, Iowa State, Michigan State, Montana State, the University of Nebraska, North Dakota State, Oklahoma State, South Dakota State, Texas Tech and

Virginia Moxley, associate dean of K-State's College of Human Ecology and chair of the alliance's leadership team, said she felt honored to receive the award, considering the competition.

"It's a real honor to win the award," Moxley said. "The programs that received honorable mentions were fabulous, for example, the agribusiness program K-State

Moxley said the alliance began in 1994 when the University of Nebraska was creating distance education master's degree programs.

tions to join in and provide courses they could use towards their master's programs," Moxley said. "From that point on, we started sharing courses with each other. Now we have inter-institutional

Through the alliance, students can be admitted to one member institution, and study at other member institutions through Internet-based courses.

Moxley said the alliance provides a master's program in family financial planning, and is working on developing a master's program in gerontology and youth develop-

K-State's master's in agribusiness program has 85 students and 15 alumni representing 25 states and seven countries.

Dea Mandery, program coordinator, said it's important to provide distance education classes because there is a shortage of programs for working adults who want to continue their career.

"This program gives people the opportunity to go back to school and continue their education without sacrificing their career or being away from their families." Mandery said.

Allen Featherstone, professor of agricultural economics at K-State, said the program was started when the Kansas Board of Regents wanted to provide a master's program for an audience in western Kansas.

"In terms of looking at providing a master's program for western Kansas, the Department of Agricultural Economics saw an opportunity to do something on a national or international level," Featherstone said.

Mandery said although the program has won several awards, winning awards isn't the program's primary focus.

"We really aren't that focused on the awards anymore," Mandery said. "We are more interested in student satisfaction than competing for awards at this point."

## K-State-Salina presidential candidates prepare for primary, general election

BY NICK BRATKOVIC

Kansus State Cullegian

In the Salina elections, candidates go door-to-door campaigning for the right to lead their classmates in the next academic year.

The elections are similar to the K-State Student Governing Association elections, but candidates said they are more intimate because of the smaller campus.

The campus has 1,000 students, and a large number of students live in the two residence

Candidates said they enjoy the chance to get out and meet all of their constituents.

Candidates also said more campaigning is done through word of mouth at the Salina

Spending is capped at \$300, and there is one debate for candidates to participate in, as opposed to the various ones taking place on K-State's campus.

The debate occurred Sunday night, and candidates said they enjoyed the process.

"The debate went really well." Kevin Gorman, presidential candidate, said.

About 80 to 100 people attended the debate.

"It went very well," said Mike Higley, Salina student body president and elections chair. "There were very good numbers, and the candidates had the chance to voice their tickets and tell what's going on.'

Making a difference is what SGA presidential candidates said drives them to lead the Salina

Party tickets are throwing out platforms like "Leave all politics at the door," "To infinity and beyond," and "What do you expect?"

Lynsey Burnett, presidential candidate, and her running mate Betty Pina, said they want to gain more recognition for the Salina

"Our main biggest issue is that we don't feel our campus at Salina receives the recognition we deserve," Burnett said. "We have been getting out there, talking to

people.' Additionally, she said they want to improve existing facilities, have Wildcat Welcome Week at the start of each semester, form a spectator sport and get an

on-call nurse, which goes into their slogan of " To infinity and beyond.' Meanwhile, Kevin Gorman

and Nick Sulzen are asking voters what they expect from SGA, and said they would like to see a program and activities committee established to shift some of the responsibility of planning events away from SGA. It would be similar to K-State's Union Programming Council, Gorman said.

The third pair, Seth Short and Jeff Taylor, said they would like to encourage people to leave all politics at the door and promote

ways for upcoming graduates to find jobs. Tuition is another issue, and they said they are looking into different ways for people to receive financial assistance.

While the candidates have different issues, they all said they wanted to promote the Salina campus.

Shana Warkentine Meyer, assistant director of college advancement for student life, said one of the key jobs of president is working as a representative to various outlets.

"It is a lot of liasoning between the campuses," Meyer

The ambassadoring of the Salina campus extends up to the K-State administration and on to the Kansas Board of Regents and legislature. Other duties include serving in the K-State SGA president's cabinet.

With voting starting today, Salina president Mike Higley said they are expecting strong voter

## **CALLING THE SHOTS**

## Intramural officials prepare for basketball postseason

BY DAN SMITH

Kansas State Collegian

When Adam Gerrond talks, people listen. It's a lesson hundreds of students participating in K-State's intramural basketball leagues have gotten used to this season.

Gerrond, a junior in agricultural economics, is one of 77 student officials who patrol the courts at the Chester E. Peters Recreation Complex each night with one duty in mind - to keep the game clean and fair.

And though the thought of being yelled at constantly for hours might not be most students' idea of the perfect college job, Gerrond embraces the

In fact, the second-year official has been called pretty much every name you can think of in his time as an official at the Rec Complex, and even though he takes his job seriously, Gerrond still retains his sense of humor.

"It makes me laugh," he said. "It's funny because people think they know more about the rules than you. They think we're just down here goofing off, but

Training, for every official, entails three mandatory rules clinics before ever stepping on the floor to call a game, and each official is evaluated following every contest by supervisors who tend to be a bit more brutal than any coach or player.

"If it's a really close game, we stay over there and make sure everything is going good," said Aaron Jantz, senior in finance and rec services official.

Jantz is a veteran official at the Rec Complex, and supervises other officials as well. His job is to make sure arguments are resolved, rules are followed and play is safe.

"We evaluate our officials and try to help them out throughout the year so they get better," he said. "They come in and most of them don't really know what's going on at the beginning of the year.

But before the playoffs begin in early March, every official has a pretty good grasp on the rules, Assistant Rec Services Director John Wundra said. In fact, as regular-season games conclude in the next few weeks, players aren't the only ones hoping to make the playoff

"We don't take all the officials to the playoffs." Wundra said. "Depending on how many teams make it to the playoffs, we'll take about 40 to 45 officials."

That means competition among the blackshirts has begun to heat up for the final few spots in the

Wundra said his expectations for solid officiating increase as the season moves on, and once teams

Photos by Zach Long/Collegian

Chris Nichols, junior in biological engineering, looks inside the lane while officiating a basketball game Monday at the Chester E. Peters Recreation Complex.

make it to the playoffs, there's little margin for error.

With coaches and players pulling out all the stops to make it to the next level, fantz said his officials' tolerance level has had to increase accordingly during the season's final few weeks.

"The toughest part is probably being out here and putting up with all the stuff," he said.

"It kinda sucks because you're always looked at as

But regardless of the negative connotations some athletes attach to officials, Jantz said, it's all worth it to

be doing something he enjoys. "I like coming out here and being around people."

"It's a nice job. You get to pick your own hours and it's better than working in an office somewhere and doing something you don't like."

Aaron Cook, Junior in marketing, calls a foul as Mark Friesen, senior in marketing, laughs at the outcome during a basketball game Monday at the Chester E. Peters Recreation Complex.

It's a nice job. You get to pick your own hours and it's better than working in an office somewhere and doing something you don't like.

## Dentist trip, lack of perfect girlfriend bring memories of classic underdogs

I got braces on Monday. Yes, metal mouth, train tracks, or whatever you want to call it, that's me.

When I was strapped into the seat at the drill sergeant, I got to thinking about what braces will be like.

Nothing but bad thoughts came to my But, being a sports writer, all I thought

about was sports. Years Sean Purcell of past games resurfaced as I began to cope with my inevitable doom of a human

radio wave conductor. What I came up with was the comparison of major upsets by big-time underdogs to my inability to find a girlfriend, a handicap that was to become more apparent now that I am

sporting the ever-attractive braces. Might as well call me Timmy. Ribida! See, I figure since my ability to find the girl I want was zero before braces, it must be negative after. I mean, seriously, unless I can find a girl like Cameron Diaz's character in "There's Something About Mary" - who, if you will remember, digs guys with metal mouths

 I am up a creek without a paddle. And if I did land a girl like that, I would have to watch myself when I zipped up my fly, because bad luck surely would strike in a situation like

Mary was the perfect girl. She even liked sports.

Anyway, back to the discussion of classic upsets.

1969 Super Bowl: Jets defeat Colts 16-7 — Broadway Joe's guarantee seemed to be just a joke at first, but when the Jets handed it to the Colts in Super Bowl III, his promise of upsetting the 17-point favorite became

> Namath passed for 206 yards earning a Most Valuable Player award in the game where his strut off the field

with one finger in the air is

played year after year to prove that upsets can and do happen. If that is not motivation that good thingscan happen, I don't know what is.

1980: USA defeats Russia in Winter Olympics 4-3 - "The Miracle on Ice," as it was later called, became a recurring theme in this year's Olympics as the United States once again knocked off the Russians to advance to the gold-medal game. I guess 'miracle' is the key word in the scenario. The announcer kept exclaiming, "Do you believe in miracles?" I guess I would have to, if God decided to bless me with a little good

1998 NCAA tournament: Valpo defeats Mississippi 70-69 - If you didn't start picking the underdog in the NCAA tournament before 13th seeded Valparaiso's upset over heavily favored Ole Miss, you started to think about it a little more afterward.

2001 World Series: Diamondbacks defeat Yankees in Game 7 - Now this one is kind of stretching it, but hang with me here. You can't really bet on anyone against the Yankees in any

See, I figure since my ability to find the girl I want was zero before braces, it must be negative after. I mean, seriously, unless I can find a girl like Cameron Diaz's character in "There's Something About Mary" who if you will remember, digs guys with metal mouths - I am up a creek without a paddle.

situation. Like the Lakers or Rams, a team that seems to have everything sometime winds up on the short end of the stick. This time it was never bigger.

With Mariano Rivera on the mound and two outs, confidence had to be riding high. The guy is that clutch. But sometimes things just aren't meant to be. Luis Gonzalez's Texas-leaguer brought hope to those who don't want to see a New York dynasty. Now with Jason Giambi wearing pinstripes, any Yankee loss would come as an upset.

So while I prayed for the drilling to stop, I came to the conclusion that things might not be that bad, maybe there was hope for me. After all, crazy things do happen. Never count out the underdogs, upsets will always happen.

I guess that is why sports and life are a little more tolerable.

Sean is a junior in electronic journalism. You can e-mail him at spu5598@ksu.edu.

## Tennis wins 2 duals over weekend, pushes winning streak to 8 games

BY ERIKA SAUERWEIN Kantus State Collegia

K-State had a repeat performance against

Southwest Missouri State on Friday For the second straight year, the Wildcats defeated the Lady Bears 6-1 to continue their eight-game winning streak over SMSU.

'We knew Southwest was going to be tougher than WSU," Alena Jecminkova said. "It was a bigger match today. Winning every match is going to be helpful for the rest of the season."

K-State used the momentum from the SW Missouri matchup to beat Colorado Sunday in Boulder 5-2. For the fourth year in a row, K-State has opened Big 12 conference play with a win.

In the SW Missouri match, K-State swept the doubles point and had strong singles performances by Kathy Chuda and Petra Sedlmajerova. K-State grabbed the winning fourth point early in the match to claim the victory over the Bears.

Chuda posted a 6-2, 6-2 victory in No. 2 singles over Cassandra Godfrey to grab her third win of the season. The senior never trailed in the match.

"I thought Cathy was solid today in the doubles and singles," Coach Steve Bietau said. "She was just sharp, hitting cleanly and just focused."

Sedlmajerova posted a 6-2, 6-2 win over Oyuki Cruz. Although losing the first games of both matches, she would rally to earn her fifth straight win of the season.

"I had trouble at the beginning of the two sets with returning her serve," Sedlmajerova said. "At first I wasn't sure where to go. But once I got my serve and realized that I could hold my serve, I was more relaxed when she was serving. I just adjusted to it."

The Wildcats No.1 singles player had a more difficult match-up. Jecminkova improved to 5-5 after a tough 7-5, 7-6 (2) win over la Zozrashvili. After a close first set, Jeckminkova trailed 1-4 in the second.

"I started the match good," Jecminkova said.

"But then I got a little scared of my mistakes. I was concentrating too much on the stupid mistakes. When I was down in the second set, I just tried to calm down, and I tried to not think so much about my errors.

Jecminkova won the next three games to tie the set. The players then traded games until the set landed on a 6-6 tie. In the tie-breaker, Jecminkova went up 4-1 on an ace and never looked back, winning 7-2

"I just did whatever I could do to finish the match. I tried to changes things up in the match. I used some flat balls and top spin," Jecminkova said. "I am pretty confident with tie-breakers. I have had some success in the past. I just knew what I needed to do in that situation."

Also victorious for the Wildcats was freshman Maria Rosenburg with a 6-2, 6-1 win to improve her record to 9-3. Although she lost the first set 6-1; sophomore Hayley McIver rallied for her fifth win of the year against Maria Amato. McIver won 1-6,

K-State started the match by sweeping the doubles matches. Two of the doubles teams had to come from behind to win their matches.

"Winning the doubles points definitely helps," Sedlmajerova said. "Even though it is just one point, it still gives us confidence. We gain momentum and confidence heading into the singles.

K-State's No. 3 doubles team came from behind for an 8-6 victory. After a quick 2-0 start, sophomore Paulina Castillejos and Rosenberg found themselves trailing 6-4. But the team won the next four games, for its third doubles win of

"We played pretty well in some spots, and then we got a little sloppy in other spots," Bietau said. "In the doubles I thought we didn't hold our serve, and we weren't finding the easiest places to place the ball, but we still swept the doubles."

RC McGraw's,

Bo Winkle's

RC McGraw's

nights

Kansas State Collegian

Student by day. Superstar by night. How can it be done? For anyone who lacks the motivation, means or talent to start the next great Manhattan band, the answer is the

> four-syllable Japanese word, karaoke.

"People like being on stage. They like singing," said Al Bellinder, karaoke host for Almost Live DJ and karaoke. "They all want to be stars. They just can't be professional about it."

The trend is catching on in town, with several venues in Manhattan

hosting weekly karaoke nights. Josh Wildin, karaoke host for Allstar DJ, said the entire aura behind being famous is what attracts people to karaoke.

"Karaoke is the cheapest, easiest way to get in front of a crowd and get people to clap," Wildin, senior in music education, said. "If you do a good job then they'll stand up and hoot and holler and everything.

"It's a lot easier than getting a guitarist, a bass player, a drummer and everything else you need for a back-up band, and sometimes people are approached by talent scouts. It's rare but it happens."

#### The Performance

Some of the words were wrong, the stage lighting wasn't anything special, the bar wasn't packed, but the applause was loud for two Destiny's Child wannabes last week at RC McGraw's

After singing "Say My Name," the two found out that in karaoke, it's all about the performance. Tamara Mack, sophomore in animal science and pre-veterinary medicine, and Dawn Frederick, sophomore in business management information systems, said there wasn't any pressure and they both knew the song well.

Mack said that when performing for a bar crowd, performers have to get into the music.

"Have fun. Get the booty shakin' into it," Mack said.

Bellinder, karaoke host, said that even if someone is the worst singer in the world, they can put on a good

"People want action," he said. "When you move and get into the song, people love it. Some people just stand there and sing, and they're good, but with the most popular acts, the more show the better.'

That's because no one wants to watch someone get scared on stage, Bellinder said.

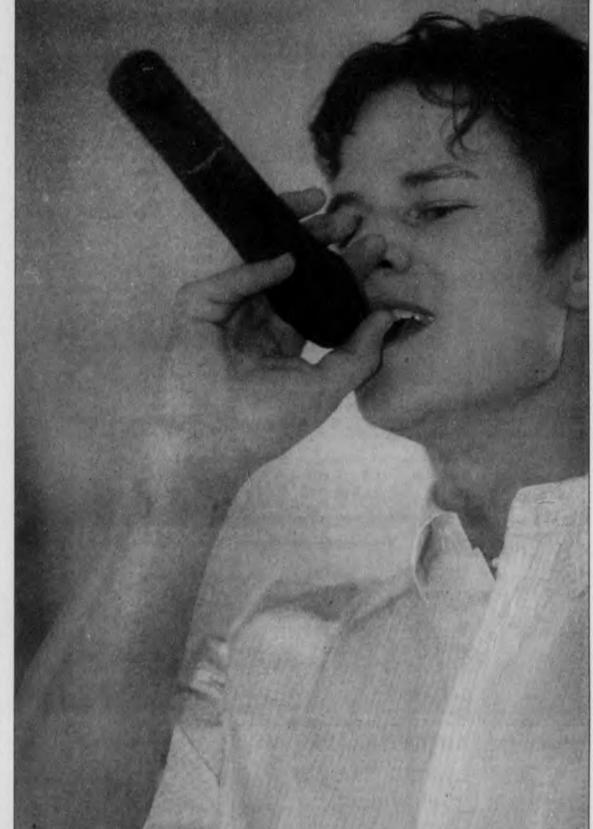

"Don't just stand there like a statue," he said.

Wildin, karaoke host, said as a music education major, he used karaoke in part of his methods classes as a way to introduce solo singing to elementary school students.

He said it gives people an easy way to get used to performing in front of a crowd, as well as develop their ears.

Some performers become wellknown for their karaoke performances, Wildin said. One example is Manhattan resident Sage Miller, who always pleases the audience, Wildin said.

"All you have to do is say 'the

Jenny Braniff/ Collegian

it. Just don't picture the audience in

their underwear." Many people might think that people are more likely to sing because having the words and music makes them less nervous, but Wildin said it's liquid courage that breaks down those barriers.

KARAOKE

Continued from page 7

"Karaoke doesn't allow people to lose their inhibitions, alcohol does," he said.

#### The Regulars

Once people get a taste for performing, they can't seem to help themselves from coming back.

Bellinder said he gets to know many people hosting at Gilligan's, and more than half of the crowd are regulars who come nearly every week. Many regulars get to know each other through an enthusiasm for singing the songs they love.

Lindsay Knouft, junior in criminology, said she tries to make it to several nights of karaoke each week by going to BoWinkle's on Sunday, Gilligan's on Tuesday, Bobby T's on Wednesday and RC McGraw's on Thursday. Knouft said she uses the nights as a way to work on her voice.

"You can work on just about anything you want to work on," she said. "I'd like to be a singer some day. You can work on your performance or poise or anything. I take it more seriously than others because I want to sing for the rest of my life, but it's fun."

Many regulars often are known for singing a few songs. Knouft said she often sings Martina McBride's

Lindsay Knouft, Junior in criminology, sings karaoke at Gilligan's on Feb. 5. Knouft attends several karaoke nights a week as a way to work on her voice.

#### Jenny Braniff/

"Independence Day," and she also is known for singing "The Star Spangled

Banner" in bars.

Eric Patterson, computer and information specialist in the Department of Mechanical and Nuclear Engineering, said the karaoke regulars become a kind of family where they all know each other. Since he began going to the nights about four months ago and has about 25 songs, he feels comfortable singing.

Patterson said the more people who go out to sing, the better, but some regulars are afraid to expand themselves

"Some prima donnas do about 10 songs only and won't do any others," he said. "But it's best not to be afraid to get up and just have a good time trying new things.

Wildin said some of the singers are actually very talented, which isn't what some people expect when they think of karaoke.

April Zieber, senior at Manhattan High School, said she sings at RC McGraw's at least a few times a month. Known for singing Reba McEntire's "Fancy," Zieber said she has lofty goals for her singing.

"I want to become a famous country singer. That's my goal," she said. "I'm in the choir at school. It's different here, and I like it because it's relaxed and there's no pressure."

## Architecture program earns national honor

BY AMBER KOEHN

Kansas State Collegion

K-State's College of Architecture, Planning and Design received national recognition for its interior architecture program in the February issue of Design Intelligence.

The magazine asked more than 300 leading U.S. interior architecture/interior design firms the question, "From which schools have you had the best experience hiring employees?"

K-State's program ranked No. 2 behind the University of Cincinnati

Respondents looked at programs from the past five years, and only Foundation for Interior Design Education and Research, or FIDER, accredited programs were eligible for consideration, according to the survey.

"K-State is very well-represented in the interior architecture field," said Judy Roland, office specialist for interior architecture. "We have a very high success rate, and our graduates are in good standings with employers."

Roland said interior architecture students do not have trouble getting jobs because the job market is better for students who have experience in their field.

"Our students have expertise in design and preservation, and that's important because employers don't have to spend time training them,"

K-State's interior architecture program is one of only three schools listed in the top 15 that offers a fiveyear professional degree program, and it is the only program with dual accreditation for interior architecture and product design, according to the study.

"We're very excited to be recognized," said Stephen Murphy, professor and interior architecture department head. "We've made enough of an impact over the years to carry our program far. Our program is well-known for initiative, drive and intelligence, and we were delighted to receive this news."

Murphy said the interior architecture program has received similar recognition in the past, and the combination of exceptional faculty and outstanding students helps keep K-State near the top.

Three years ago we were sixth on the list, and last year we were third, so it is becoming a nice trend," he said. "Cincinnati is hard to beat because its students have more opportunities to make themselves known, but our goal is to be No. 1, so we'll continue our efforts to get our name out there."

K-State's program is one of only two in the top 15 to offer a bachelor of interior architecture degree, according to the survey, and the program is in its 30th year of existence at K-State.

"Our alumni have paved the way for future graduates," Roland said.

## Election primaries on schedule despite write-in problems

Problems with online voting system will not affect elections; committee corrects ballot

BY TARA PATTY

Kansas State Collegian

Student Governing Association presidential primary elections will proceed as planned, despite a two-hour window Tuesday when write-in candidate names appeared on the the ballot, said Ted Conrad, elections committee

Conrad said an e-mail sent to him around 10:15 a.m. indicated a problem with the online vendor, iballot.com. The vendor site automatically added write-in votes to the student body presidential primary election ballot.

He said he didn't know about any problem until 12:30 p.m. when he got out of class.

said. "That's not supposed to happen."

Write-in candidates were removed from the ballot at 1:10 p.m., he said.

The elections committee is not taking any action to prolong or invalidate the elections at this

"The problem we had didn't disable anyone from voting," Conrad said.

"It's unfortunate that the write-in votes were displayed."

Kyle Barscewski, elections committee member, said he was surprised when he saw all of the write-ins on the ballot. After he talked with Conrad, he said, the two figured out what happened and immediately began working on the problem.

"We're following procedure which we feel

"Obviously, I was very concerned," Conrad is prudent to do," Barscewski said.

He said he does not see a problem with the ballot, because all candidates were equally affected and no one candidate was favored.

> "As a committee, we don't want to compromise weeks of work to hastily make a decision now, Ryan Evans, elections committee member, said.

"We need to sit back and examine the entire issue to really make a decision.'

Because the vendor allows voters to change their votes, Conrad said he advises students keep their user IDs and passwords private to prevent other students from using that information to change votes.

Winners of the primary election will be announced at 7:15 Wednesday at the women's basketball game.

### Candidates voice concern

Six of the seven candidate pairs running for student body president and vice president were present at a meeting Monday night discussing what should be done about the discrepancy with the online ballot.

Write-in votes were appearing on the official ballot. Although the problem was fixed at around 1 p.m., students were able to vote for illegitimate write-in candidates Wednesday morning.

Ted Conrad, elections committee chair,

that postponing the primary election was not an option. He said the vendor K-State had used to conduct online voting, iballot.com, was not prepared to make any

"The election committee is not prepared to take any action as far as requesting from the vendor that we have another day," Conrad said. "Our process at this point is to continue as planned."

Candidates had various complaints about the problems with the online ballot.

## Bill to help district hire teachers

BY MICHAEL WATSON Kansus State Collegian

Qualified teachers are getting more difficult to recruit, the associate superintendent of Manhattan-Ogden USD 383 said.

Bob Seymour, associate superintendent, said there are many school boards in Kansas that need tools to hire and keep qualified teachers to teach subjects like math, science, music and special education.

To address the need for quality teachers in Manhattan and other communities, the Kansas Senate Education Committee endorsed a bill Monday allowing school boards to pay for hiring and retention bonuses

"The bill would provide us an opportunity to compete on a level playing field," Seymour said.

He said school boards in other states already offer hiring and retention bonuses. Some school boards in Texas offer a \$1,000

The bill going before Senate would make bonuses permissible, but not mandatory if districts do not have enough money.

Seymour said not all school boards in Kansas need this tool to hire and keep qualified teachers in their schools, but the bill would definitely benefit some areas of the

## House allows bill to limit telemarketing

BY AMY LINK Kansas State Callegian

The Kansas House of Representatives approved a bill 65-53 that would allow Kansans to put their names on a no-call list for telemarketing companies Monday.

"They actually left a message on my machine," Kim Lewis, senior in elementary education, said.

This was Lewis' response to some of the telemarketing calls she receives. However, these days might be over.

The bill will now go to the Senate. If the bill is approved, Kansas residents can put their names, free of charge, on a nocall list. Telemarketers would then be required to buy a state list for each of Kansas' four area codes. These lists would be released quarterly and cost \$25.

With its 65-53 margin, the bill had just two more votes than the majority number it needed to pass.

According to the new bill, telemarketing companies could have to pay up to \$400 a year for the lists. A Topeka-based telemarketing company, Southern Education Council, is one of the companies that would be affected by the bill. Angie McKinney, an employee for

See CALL on PAGE 12

University employees provide 30 plus years of service meeting new people through my job," she

said

Barbara Brooks, director of Van Zile, praised Holle for her dedication.

"Darleen is a very dedicated person," Brooks said. "She was here at five in the morning both of the mornings school was called off. That's just one example of her dedication.

Schmanke, like Moore, is a food services supervisor at Derby.

Schmanke began at Housing and Dining Services when she was 34 years old. She said she began as a food services worker and soon was promoted to a cook. She kept that job until she was promoted to her current position.

"I came to work here because many of the women from my hometown were working here, and it was the only place I could get nine months of work," Schmanke said. "I still had children at home and we farmed, so I needed to be home during the summers."

Schmanke said she really has seen a change in the menus during the time she's worked at Housing and Dining Services.

"When I started we had one menu. It was all the classic type of food," Schmanke said. "Now we have quite a variety of menus and lines. It has changed consider-

Schmanke said it isn't only the job benefits and job security that keep her at

Darleen Holle must prepare daily meals weeks ahead of schedule. She keeps track of the dishes that need to be prepared and what has been prepared by circling and checking items off as she gets them done.

Housing and Dining Services.

"Mostly, I enjoy the people I work with," Schmanke said. "It's great being around the students."

Schmanke said that since she is still in good health, she might stay at Housing and Dining Services several years longer. Moore said that she loves the way her

job challenges her.

"I've always loved a challenge," Moore said. "On most days, food service really

offers a challenge - whether it be shortage of help, a problem with the menus or equipment failure."

Moore said her job allows her to grow in her ideas.

"When I come up with an idea, they help to feed that idea, and I just love that stuff," Moore said.

Moore said many things have changed

#### RCPD makes drug-related arrest at Pillsbury Crossing

A routine stop at Pillsbury Crossing for the Riley County Police Department officers resulted in a drug-related arrest

Police arrested Anthony Cervantes, 841 Stadel, for possession of marijuana, intent to distribute felony drug paraphernalia, no drug tax stamp and a misdemeanor charge of possession of drug paraphernalia, Sgt. Lynette Woods said.

Additionally, Cervantes was arrested on two other charges and is being held on a \$26,000 bond.

Cervantes had been wanted on an outstanding warrant for possession charges that carried with it a \$20,000 bond. Police officers used a search warrant to search Cervantes' house where they filed additional charges, including intent to distribute, felony possession of drug paraphernalia, misdemeanor possession of drug paraphernalia and no Kansas drug

Republicans drafted the redistricting plan and pushed it through their chamber over the objections of Senate President Dave Kerr, R-Hutchinson.

The governor said last week that he had reservations about the proposal but had not decided whether he would veto it.

#### NATION IN BRIEF

#### **Ex-Enron head Skilling says** he didn't lie to Congress

WASHINGTON, D.C. - Former Enron chief executive Jeffrey Skilling told senators Tuesday he didn't lie to Congress or anyone else in denying he was aware of the company's precarious finances or its use of complex partnerships to hide debt.

Addressing skeptical lawmakers, Skilling also said, "I never duped Ken Lay," disputing previous statements by Sherron Watkins, a company vice president who said Skilling had manipulated Enron's former chairman.

#### Crematory operator facing 100 additional charges

LaFAYETTE, Ga. - Authorities filed 100 more criminal charges Tuesday against the operator of a Georgia crema-

Ray Brent Marsh already faced 16 counts of theft by deception for allegedly taking money for cremations he never performed at Tri-State Crematory.

The new counts were connected to 50 of the corpses found at Tri-State. For each body, one count was filed for taking money from the families and another for failing to give the ashes to the families.

So far, 339 corpses have been found on the crematory grounds. Only 70 of the bodies have been identified.

Also Tuesday, the House unanimously voted to make it a felony to abandon a body intended for cremation or burial. The bill now goes to the Senate.

#### WHAT DO YOU WANT TO BE WHEN YOU GROW UP? K-State professional describes basics of degree program

1. How many hours are required to graduate? 36-39, depending on the track that is chosen.

2. What careers could I pursue with this degree?

Anything having to do with communication.

3. What are the advantages/disadvantages of this major?

Advantages are it is a major that grounds students in the humanistic tradition in the value of ideas and communication and hones students' own ability to think and write well. The disadvantage is that it requires a graduate to use some ingenuity and innovative techniques and to be self perceptive in the ways the student wants to use the communication techniques 4. Is graduate school typically required?

No. Many English majors go on to good graduate programs but the majority

5. What is the average starting salary of a graduate in this major?

### Student selected to be Special Tactics Officer Curbside-recycling program moves ahead to bid process

Kansas State Collegian

While Sept. 11 led to increased interest in the military, it was not the motivation for Jake Schwartz to join the Air Force Special Forces.

"It just made me realize why I was doing it," Schwartz said.

Schwartz, member of the Air Force ROTC program and graduate student in criminology, was one of eight people in the nation selected to be a Special Tactics Officer.

The special forces work ahead of the other branches of the armed forces and prepare areas for air strikes.

Other tasks include direct assault and counter-terrorism

They also work with the U.S. Army Rangers, Navy Seals and Marine Force Recon, Schwartz

Despite being the only Air Force cadet in the nation to be elected, Schwartz was not surprised at his selection.

"I was pretty confident because I knew what was expected to be selected,"

Schwartz said. Brad Caywood, who has worked with Schwartz through the Air Force ROTC program, also was not surprised by Schwartz's selection.

"If you ever saw him train you would know," Caywood said.

Caywood said he believed Schwartz's selection might

More than 34 percent of roughly

Jacob Schwartz, graduate student in sociology and criminology, was selected as an Air Force Special Tactics Officer. Schwartz was one of eight candidates selected from the United States. He is the first student from K-State to be selected for this honor.

encourage other Air Force ROTC cadets to try out.

Since K-State never has had anyone selected, Schwartz

proved it is an achievable goal. "It was a heck of an accomplishment for the Air Force and K-State alike," Caywood said.

Schwartz had to meet certain requirements in order to be selected. He had to take a physical abilities test and write an essay.

Selections are determined by

the applicant's physical abilities and his ability to lead others,

Schwartz said. Schwartz's ultimate goal is to become a Special Tactics Officer. Schwartz's selection is a big stride toward achieving his goal, but he said he has more to do.

He must complete two years of training before he will be admission-ready, but he said he is up for the challenge.

Tactics Officer.

He did the training, and said he worked to meet all the requirements.

Despite his confidence, he still was excited about the outcome of his work.

"I was happy because being one of eight in the nation, just to be selected is an honor," Schwartz said.

Nelson said he can't afford another tax to pay for the citywide program.

"You've nickeled me to death. I can't afford you no more," he said. "It costs too much as it is, especially for retired people. They're leaving town."

The voices of three people who spoke against the recycling program were not enough. A community interest survey in 1999 and a pilot program from 1990-91 both show that a curbside-recycling program is something that has a significantly higher level of community support.

That is why the City Commission decided to move the project forward.

Three financing and implementation options were proposed to the Commission. These options will now be discussed by city administrators: ■ Place a city fee on utility bills making the city responsible for

collecting fees ■ Create a fee on residential property tax bills, allowing the city to receive funds from tax payments

Add a mandatory fee to trashhauling bills

Materials that would be recycled in the initial phase of the program would be No. 1 and No. 2 clear plastic beverage containers, aluminum beverage cans, steel cans and brown,

green and clear glass bottles. "These are the items most commonly found in homes and would be a good place to start the program," Judy Willingham, recycling task force chair, said.

## SAFE SKIES

## Tighter security makes dealing with strangers easier

BY AMBER KOEHN Kansaa State Collogias

It is filled with beautiful coastlines, gorgeous forests and magnificent cities full of mom-and-pop shops and restau-It has everything a person could want.

My husband and I flew there with his family over during winter break. This was the first time I had ever been to the

Hoved the experience of flying to Oregon, especially since

the airports made security a top priority. Granted, I had to expose my odoriferous feet to the world and spread my legs for a female security guard who, in my

opinion, seemed to enjoy the experience way too much. Overall, the trip went smoothly, and all because we didn't have any major problems at the airports.

But I'm not saying we didn't have our share of mishaps. On our way from Kansas City to St. Louis, the airline made seating arrangements for the wrong plane, and I was assigned a nonexistent seat. Then, on the way from St. Louis to Portland, the airline overbooked the plane and the only person who had a seat was my husband's grandfather.

Thank God these were the only things we had to worry about.

**Derek Boss** 

Before the recent change in airport security, I was nervous about flying. Actually, I was terrified that terrorists would stab me with box cutters. But my fears were put to rest after successfully flying across the country and back.

Now that my security rests in the hands of the federal government, I am confident airports and airplanes are safe. The stricter require-

ments for airport security workers make me feel like something actually has been accomplished in this war on

Now the only thing I have to worry about is who I have to sit next to on the plane.

On the way to Oregon, it was Raymond, a 10-year -old from Illinois who was going to see his dad and step-mom in

Raymond was a talkative little fellow. By the time our plane touched down on Oregon soil, he had given us his entire life story, right down to the Christmas gift his mom gave him — an expensive drawing pen — which he later lost and, in a state of panic, asked my mother-in-law to assist him

Raymond had a comment for everything, and didn't seem to care that my mother-in-law wanted to catch a few z's before the exhausting "family reunion." He went on and on about his two-year-old step-sister, whom he wanted to draw

but she wouldn't sit still.

Yes, Raymond was quite the artist, and said his dad wanted him to continue the family occupation of engineering, but he was just too gifted in his career choice.

Then there was the woman who appeared to have some mental issues. My husband was fortunate to sit next to her.

She was tall and lanky, and looked as if she never picked up a brush to save her life. She was constantly looking over her shoulder like she thought she was being followed.

All the dogs were definitely not barking in her neighborhood, that's for sure.

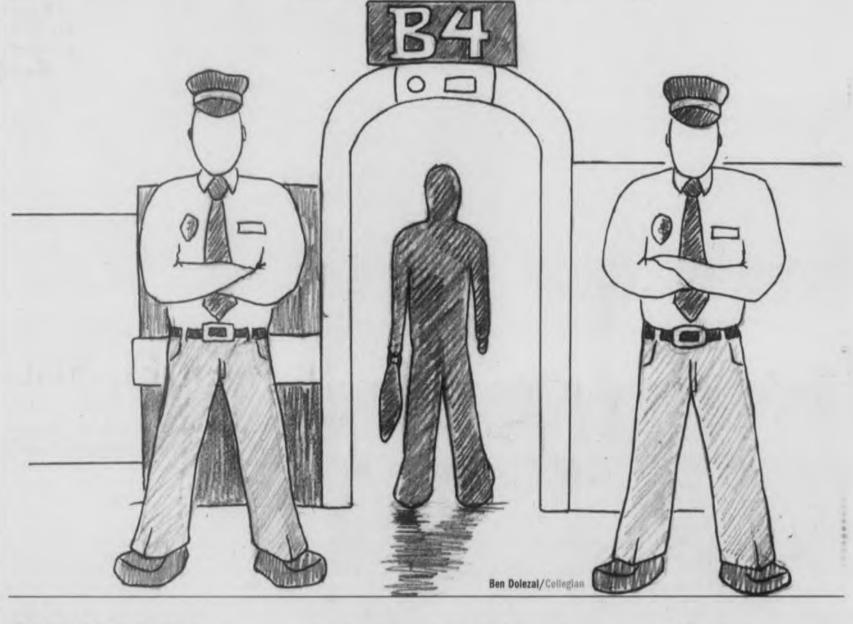

While the rest of us were calm with the idea of soaring through the air at 35,000 feet, she continually expressed her discomfort by moaning every time the plane made the slightest adjustment.

It's interesting people like Raymond and the "moan queen" who make flying worthwhile.

And it's the security officers on the ground who make sure it's safe for me and my family to sit next to them.

I would just like to say how much I appreciate what the security people are doing, and hope they continue to make the flying process as smooth as it can be.

#### READERS WRITE

#### Some Fourum comments breed sexism, ignorance at K-State

As I was reading the Campus Fourum Feb. 21, the proliferance of ignorant, sexist and completely irrelevant comments finally

At the top of the column itself, it states that "The Collegian's Campus Fourum is an anonymous call-in system that allows readers to voice their opinions on topics relevant to the publication."

Topics relevant to the publication? Is it just me or is anyone else sick of the Fourum being used as an arena in which

people wretch about their wretchedly dormant sex lives? Example in point is the following comment: "If 92 percent of women on campus are sexually active, then some guy is getting more than his fair share, because I'm

I'm sorry, but if you're really that tortured by this void in your life, take out an ad in the personals, don't waste space where an otherwise useful, relevant, worthwhile, or even amusing comment could have been printed.

As for the two most inflammatory comments, the ones that made me grit my teeth to restrain the angry stream of profanity about to burst forth from my mouth, they were prime examples of classic male stereotypes: "Eat a beaver, save a tree" and "Women's figure skating would be much more exciting if they didn't wear underwear."

Come on, boys, what kind of message are you sending here? This just reinforces the very standardized, unfair, pathetic male stereotype which paints the picture of the average guy as being stupid and appreciative only of the aesthetic quality of things.

It also encourages the myth that men

have no control over themselves or their reactions to stimuli, therefore they can be expected to carry zero respect for women everywhere.

It doesn't stop with male callers, either. I refer to the following: "I just took my boyfriend to the bus stop to go to the Army for four months. Let's get this party started."

To this caller, I am compelled to ask "where is your self-respect, woman?" This kind of comment also reinforces stereotypes. As a woman, I am pissed off at all women who do themselves, me, and all women a great disservice by perpetuating the stereotype of women as being sex-obsessed, stupid, and unfaithful or totally frigid prudes.

This Madonna/Whore duality way of thinking has had fingers pointed at it from all over the academic world as being the root of the rape crisis in the United States today. If the predominant idea is that women are nymphomaniac sluts, potential rapists are handed a huge window of self-justification to follow through with their impulses.

The only way to change these misconceptions is to have enough self-respect to not perpetuate such dangerous stereotypes of both women and men.

Whether you play the patriarchy's subordination of women game knowingly to gain acceptance or because you are genuinely ignorant to the idea that what you're doing is helping to oppress you and all other women, it's still working to prevent the rest of us from being able to shed unfair labels and stigmas and move on with our lives.

Also at fault partly here is the Collegian itself for exhibiting nothing short of juvenile judgment capacities about what is and what isn't appropriate for publication.

The comment regarding the caller and his roommate's "...strong suspicion that they've been letting drag queens skate as women figure skaters" not only was irrelevant and ignorant, but also highly offensive to anyone familiar with the living hell of prejudice that

homosexuals suffer in our society.

If one is to use the Fourum as a gauge, then sexism, prejudice, and ignorance appear to be abundant at K-State. I have nothing against comments not directly related to actual articles printed by the Collegian as long as they have some kind of relation to the campus, Manhattan, the school itself, or student life.

However, there is little need in this world for any more ignorant and offensive behavior that already is present in our society.

The catalyst behind this letter is that I had to say what a monumental disappointment it has been to me that surviving high school for me was fed by the hope generated by promises that when I got to college, there wouldn't be as much adolescent behavior to deal with from my peers. Oops.

Sarah R. Coats junior in Criminology and Women's

#### Time distribution of classes solution to parking problems

Of the seven student body presidential candidates, six have proposed expensive methods of addressing campus parking congestion, according to the Collegian's Feb. 25 Page one story. One candidate suggests building a parking garage which would cost 12-15 million dollars and be built at mostly student expense.

Parking congestion mostly is due to the fact that K-State bunches too many classes between the hours of 10 a.m. and 2 p.m. rather than more equitably spreading classes from 7:30 a.m. through night classes.

Making that simple change would spread out the demand for parking, make more efficient use of our facilities, make K-State more accessible for non-traditional students, and fend off legislative criticism when they discover how inefficiently we've been

operating for many years.

Why throw a pile of student money at a problem that could be solved for no money

- Phil Anderson Instructor, Department of Speech Communication, Theater and Dance

#### Columnist's political views, attacks personally biased

I'm writing to comment on the recent columns by Paul White. As a former writer for the Collegian, I feel a sense of professional kinship with Mr. White. However, as someone who tried to write political columns in a way to create some sense of political unity, I'm extremely distraught.

A recurring theme in Paul's articles suggests President Bush deserves the same harsh treatment President Clinton received during his presidency. I wonder why this is. Does Paul think that now is the time for

While I am no fan of the Bush administration, I don't see the point in simply attacking a President because he belongs to the other

How do these divisive attacks benefit this campus? In his most recent article, Paul says he's writing to enlighten students. I ask Paul this: how can you expect students to feel enlightened when you come at issues with such obviously biased feelings?

The only thing his rhetoric is accomplishing is to polarize the student body. Paul, give up your bitterness. You're giving

moderate democrats a bad name and dividing the campus. You're also making this democrat do

something uncharacteristic — defend President Bush.

- John Graham senior in political science and accounting

## Israel ready to explore Mideast peace proposal

BY STEVE WEIZMAN The Associated Press

JERUSALEM - Prime Minister Ariel Sharon told an EU envoy Tuesday he was willing to meet Saudi officials, publicly or behind the scenes, to explore their proposals for an overall Mideast peace, the European diplomat said.

The proposals floated by Saudi Crown Prince Abdullah have gotten a warm response from the Palestinians, some Arab nations and some Israeli officials - including the foreign and defense ministers. Sharon's aides, however, say they want more details.

Javier Solana, the European Union's foreign affairs chief, announced that he was making a previously unscheduled trip to Riyadh on Wednesday to hear details of the Saudi peace plan from Abdullah.

Israeli officials said at this point, the initiative is only a newspaper article. It states the principle that in exchange for a complete Israeli withdrawal from the West Bank, Gaza Strip and east Jerusalem, the entire Arab world would make peace with the Jewish state.

Palestinians have endorsed the Saudi initiative, saying that it fits their policy of offering Israel full peace for full withdrawal.

Solana said Sharon told him he "would be willing to meet anybody from Saudi Arabia, formally, informally, publicly, discreetly, whatever, to get better information about the significance of this idea."

Saudi Arabia has not commented on the reaction to the proposals. The state-run newspaper Al-Watan, which usually reflects government thinking, said no Israeli-Saudi visits could take place until a Mideast peace agreement had been reached.

President Bush telephoned the Saudi crown prince Tuesday to express U.S. hopes of working with him in the pursuit of Middle East peace, said White House spokesman Ari Fleischer.

However, Fleischer appeared to question the plan's bottom line. "It's important to have a vision of what peace should look like at the end of the day," he said, "but it's a long time until the end of the day in the Middle

In an attempt to address a more immediate concern — bringing calm after 17 months of violence - Israeli and Palestinian security chiefs resumed talks Tuesday on measures to stop violence and ease Israeli restrictions over Palestinian territory.

Palestinian officials, insisting on anonymity, confirmed the meeting

began in Tel Aviv after nightfall. Israeli officials refused to comment.

The security chiefs met Thursday after an especially violent week of Palestinian attacks and Israeli reprisals. However, the Palestinians called off a meeting set for Sunday, expressing anger over Israel's refusal to lift restrictions on Palestinian leader Yasser Arafat, who has been confined to the West Bank town of Ramallah for nearly three months.

Arafat said he ordered the talks restarted after a plea from Solana. "This is a request from our friend, Javier Solana, and to that I cannot say no," Arafat told reporters.

Solana said he had more details about the Saudi plan than appeared in Saudi and U.S. media, but he would not disclose them.

Russian Foreign Minister Igor Ivanov voiced his country's support for the plan. Egypt and Jordan, the only Arab states with peace treaties with Israel, were among several Arab states to welcome Abdullah's comments.

Egyptian President Hosni Mubarak and Jordanian King Abdullah discussed the Saudi proposal during a meeting in Cairo Tuesday.

Israeli Defense Minister Ben-Eliezer said Tuesday that the Saudi plan contains positive elements and should be encouraged.

Ben-Eliezer heads the moderate Labor party, partner with Sharon's hawkish Likud in a broad-based coalition government.

It is unlikely that the coalition would survive dealing directly with the issue of borders between Israel and a Palestinian state. Labor favors giving up most of the territory for peace, including the dismantling of many Jewish settlements. In contrast, Sharon has talked of offering the Palestinians a state in about 40 percent of the West Bank and much of Gaza, without removing settlements.

However, up to now even Labor has rejected withdrawal from all the territories Israel captured in the 1967 war, as the Palestinians have demanded. Foreign Minister Shimon Peres of Labor told Israel TV Tuesday that unlike the Arab interpretation, Israel does not believe that U.N. Security Council resolutions require a pullback to the pre-1967 war line.

"There is a disagreement between us and the Palestinians on this issue, and there is no reason to deny it," Peres said during a visit to Paris.

Expressing qualified interest in the Saudi proposal, Sharon aides have been careful to praise the initiative while disagreeing with its contents.

## K-State looks to end Jayhawks' perfect conference record

BY DEREK BOSS

Kaneas State Collegian

Coach Jim Wooldridge firmly believes there's no point in playing a game if a team doesn't believe it has a chance to win.

Too bad the odds seem stacked against K-State tonight at Kansas.

The Jayhawks (25-2, 14-0) are two wins away from their first undefeated conference season in more than 30 years, they boast a No. 1 national ranking, and they've beaten the Wildcats 23 straight times during an eight-year span.

Not to mention it will be Senior Night, as six seniors - and possibly junior center Drew Gooden - will play for the last time at Allen Fieldhouse.

Moreover, KU is on a 12-game winning streak, and leads the conference in scoring (92.6 ppg), scoring margin (16.9), field-goal percentage (51.9), three-point shooting (42.1 percent) and rebounding (+8.7).

The Hawks also have the league's top scorer (20.9 ppg) and rebounder (11.3 rpg) in Gooden, and they downed K-State 98-71 in Manhattan earlier this season.

Not much in the purple's favor.

Midweek matchup

K-State (11-14, 5-9) at No. 1 Kansas (25-2, 14-0) When: 7:07 tonight dio: Wildcat Radio Network (WIBW-AM 580)

But Wooldridge said the Cats shouldn't worry about it. The team must concentrate on themselves in order to compete with Coach Roy Williams' club.

"We just have to control what we can control and play as well as we can play," Wooldridge said

"There might be some added incentives by the opponent, but we can't do anything about that. We've just got to make sure that we take care of things that we can do

"That's really the point of emphasis with our team. We haven't given up on our team.

"We're still working with our team, and I think our team is a group of guys that still have some fight in them. So that's what we have to hang our hat on."

loss at Iowa State Saturday - a team the Cats already had beaten Jan. 19 in Manhattan. The defeat drops Wooldridge to 0-7 on the road in conference play this season, and 0-9 away from Bramlage overall.

The purple shot more than 50 percent against the Cyclones, committed just nine turnovers and even led at halftime for the first time on the road this year, but K-State was plagued by 29 personal fouls.

After senior Larry Reid's three-pointer tied the game with less than 10 seconds to play, Iowa State drove the length of the floor and found an open Omar Bynum underneath the basket. Bynum laid it in with half a second left on the clock to nab the win.

KU experienced a similar type of game in its last outing, only the Hawks were the

Despite 18 Nebraska three-pointers Sunday, a late Keith Langford trey gave Kansas an 88-87 road win over the Cornhuskers.

So the stage is set for tonight, as K-State looks to snap "The Streak" held by its instate rival.

'We've got some guys that are playing K-State is coming off a last-second 73-71 well right now," Wooldridge said Monday,

"and I think one of the biggest things we've

got to do with our team is stay positive. This

is a time of the year where guys have got to

step up and perform, and that's really how

we're going to approach the next two days.

K-State's Larry Reid, top, battles for a loose ball with Nebraska's Jake Muhlelsen. bottom, during the Wildcats' game in Lincoln, Neb., on Feb. 9.

Zach Long/Collegian

"Let's try to get better, look forward to competition and know that we're playing the No. I team in the country, which is obviously a big challenge for us, but let's go put together same good minutes."

## CATFIGHT

## Wildcats to battle for 1st-round tourney bye against Tigers tonight

BY DAN SMITH

Kanyas State Collanian

f K-State's women don't feel a sense of urgency coming into their contest with Missouri at 7 tonight, the team's pulse might need to be checked.

On the heels of an embarrassing 79-58 loss to No. 11/13 Colorado last Saturday, and with postseason implications on the line against the Tigers (14-12, 5-10), March Madness begins at Bramlage Coliseum tonight for Coach Deb Patterson's No. 14 Wildcats (22-6, 10-5).

But Patterson's focus in practice this week hasn't been tailored toward a tournament run. Rather, the team's top priority has been to fix what was broken last weekend.

"Probably after my message the last two days in practice, it's hard for them to remember what we've done well," Patterson said after Monday's practice.

'I want us to remember what we didn't do well in those first 20 minutes at Colorado."

Finding what the Cats didn't do well against CU isn't hard. K-State made just four of 26 first-half shot attempts and committed 11 turnovers to trail by as many as 28 in Boulder.

'It was a huge disappointment," freshman guard Laurie Koehn said. "They came out aggressive and jammed it down our throats and we weren't ready for them. That was our fault for not being focused."

The Wildcats will need to be more focused tonight in order to end the regular season with a win and secure the league's final first-round bye in next week's Big 12 tournament.

#### Midweek matchup

Missouri (14-12, 5-10) at No. 14 K-State (22-6, 10-5) Where: Bramlage Coliseum (13,340) Radio: Wildcat Sports Network: WIBW-AM 580, KSDB-FM 91.9

For Missouri, the spark plug is senior guard Kerensa Barr, who averages 15.6 points and 4.3 assists per contest. Barr's backcourt mate, Natalie Bright, adds 11.7 points and 3.7 assists per game to Coach Cindy Stein's club.

The duo's 21 points on Feb. 5 accounted for more than one-third of MU's scoring, but the Tigers couldn't find an answer for K-State's Kendra Wecker. The freshman poured in 20 points and collected 11 rebounds in the Wildcats' 79-61 win.

Against Colorado on Saturday, Wecker had 14, but collectively, the Cats were held to 36-percent shooting. As a result, shooting, defense and the team's attitude were all topics of discussion during the week.

"We've been working on our pride as a team - not wanting anything easy," Wecker said. "That's something that in the Colorado game we let slip away from us. We let 20 minutes of basketball just slip away and you can't let that happen.'

With that in mind, Wecker said a team determined to turn its season around will be ready for Missouri on Wednesday.

"With the coaches getting on usthese last few days like that, we're gonna be the team we were before Colorado," she said.

Zach Long/Collegian

K-State's Kendra Wecker (53) loses control of the ball against Nebraska's Katle Robinette (21) during the Wildcats' game in Lincoln, Neb., on Feb. 9. The Wildcats will close out the regular season against Missouri tonight at Bramlage Coliseum.

## Rethman, Booker to play final regular-season game at Bramlage

File photo by Zach Long/Collegian K-State's Kristin Rethman drives the lane against Oklahoma State's Shelby Hutchens during the second half in Stillwater, Okla., on Jan. 19.

BY DAN SMITH Kamsus State Collunian

While fans have gotten a good look at the future of K-State basketball this season, seniors Kristin Rethman and Shalondra Booker have given the Wildcat faithful plenty to cheer about

The guards will play their final regularseason game at Bramlage Coliseum tonight, and Coach Deb Patterson is banking on plenty of emotion to follow them onto the court.

"I love it when it's our senior night. Generally speaking, you have a little more emotion in the gym, inside your program, within your team and certainly with your seniors," Patterson said.

"If they're quality seniors, they're going to elevate their game because of that emotion, and I think that's what we're anticipating."

Though their roles have changed significantly this season, Patterson said Rethman and Booker have proven invaluable to K-State's success.

Rethman, who averages 7.4 points-percontest, will finish her four-year career with the Cats in the Big 12's top five all-time list for threepoint field goals and either first or second in school history in treys.

The Corning, Kan., native is also the fourth player in Wildcat history to have 200 career three-pointers, reaching that mark earlier this

"Kristin Rethman has been here for the long run and has gotten through those tough years and now is working very hard to see her program advance to an NCAA tournament and have the opportunity to realize a dream." Patterson said.

"I'm really hopeful she'll be able to. She's

been a great person and a great player in our program and we'll be very sorry to see her leave.

Booker will leave the program after a twoyear career in the purple and white. Last year's starting point guard, Booker has taken a backseat to Laurie Koehn this season, but the senior's energy still has been a consistent plus-

"Shalondra Booker has changed as much as anybody we've ever had in the program in a short period of time, in learning what it takes on and off the floor - what it takes to really pursue excellence," Patterson said.

"I'm really proud to say that right now she's a young person that really does exemplify excellence in her effort, excellence in her performance, excellence in her attitude and in her approach to life and what's possible."

## Interior design

Union exhibit showcases 'instruments of service'

Kansas State Collegian

Anything, from the layout of a studio to a wooden model, can be seen as the K-State Student Union hosts

an Interior Design Exhibit this week. Several pieces of interior design students' work will be on display at the Kemper Art Gallery in the Union until Friday. Instead of referring to the work as art, the projects are known within interior design as instru-

Megan Hughes, arts and entertainment chair for Union Program Council, said UPC decided to sponsor

"The Gallery is an outlet for the interior design students," she said. "I believe this is the first time they have got to do anything."

Hughes said students will enjoy viewing this exhibit. "It's something done by other students," she said. "It's a good way to appreciate what other colleges are

One artist behind the work, Jennie Kinsler, created a piece inspired by art deco style.

Kinsler, senior in interior design, said the exhibit is a collection of work from a mix of sophomore to senior design studios. It's a final product of our solution to the design problem, she said.

Kinsler said her project was to renovate an old community of houses to an art community and home to a model retired couple, "Rebecca and Thomas." Kinsler said she created a studio/gallery space as well as a home space for the retired couple,

Kinsler said they were in charge of creating two places for them. Although they have space to work, they both have a place to live and their own pleasures, she said. Kinsler said she chose art deco to work with because she felt it correlated with her project.

"I chose it because of the time frame, proportions of the building and design of the place," she said. "I reinforced that theme."

Designing is so detailed that Kinsler said she was careful about everything she picked out, right down to

"I had to consider the type of material that will best support my environment," she said. "I researched art deco. I picked materials and finishes that supported and were safe for the users."

Kinsler said she first became interested in interior design a few years ago and immediately loved it.

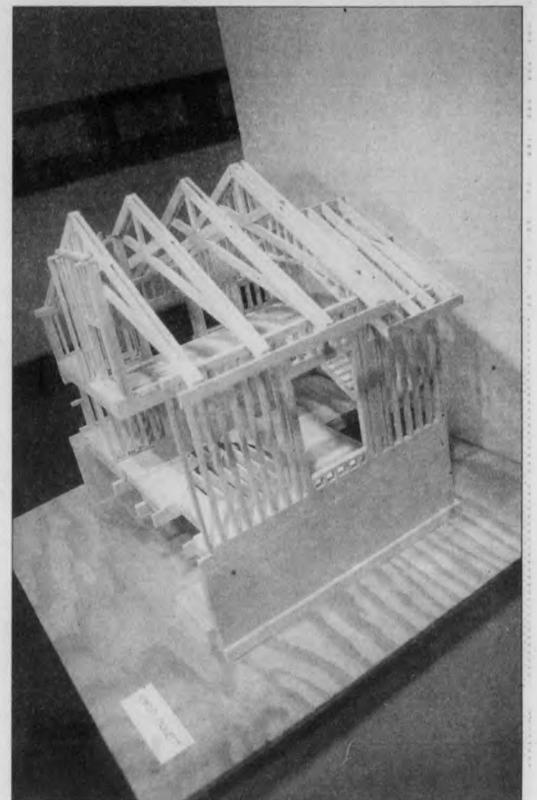

"I really like that fact that I am going to affect people and create something," she said. "With how you design, you can help or hinder people. The control is yours, and how they perceive their environment is fully up to

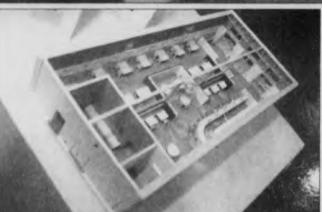

Although it typically takes four to six weeks to finish a project, Kinsler said there are factors that must be considered every time. The use of the building, for a primary person or for the general public, must always be considered, she said.

The placement of walls, the human dimension and other factors all influence the design. Considering human dimension is very important, she said.

Although creativity plays a big role in designing, Kinsler said she feels it's equally a learning process.

"When I design, I never just think inside my head. I do a lot of research and always have an eye out," she said. "We all draw from each other and our environments. You need to be really aware of your surroundings and trends, then be creative when you put it all

ABOVE: This wood model of a house by Christi Padgett is featured in the center of the Kemper Art Gallery at the K-State Student Union. The piece is part of the interior design exhibit. LEFT: Hui-Yun Tseng's model of a restaurant is featured in the gallery.

## Professor to sign literary critique of Harry Potter

JJ DUNCAN

Kansas State Collogian

Philip Nel, assistant professor of English, will sign copies of his book, "J.K. Rowling's Harry Potter Novels," from noon to 1 p.m. today in the Union Bookstore. The book is a detailed

analysis of Rowling's phenomenally popular Harry Potter series and is on sale at the Union Bookstore for \$9.95. Nel said the book is a

literary critique but is aimed

at the general reader instead of just literature scholars. "The book is something that people will actually read," he said. "It's nice to

write something that is useful and accessible to the general reader."

The Union Bookstore has been stocking the book since just before winter break, and it has been a popular supple-

ment to the Harry Potter books, said Von O'Neil, general book buyer for the Union Bookstore. The book signing is a chance for students to become acquainted with faculty work, O'neil said.

"It's a good opportunity for students and staff to interact and give appreciation and attention to a faculty member," she said. "It lets

the students know that this is a faculty member who is working and writing material."

Nel teaches "Harry Potter's Library," a

class that began this semester and focuses on the Potter books and the works that have influenced them.

The book isn't used as text for the class, but some of the same material is covered in the course, Nel said.

The book is divided into sections that allow for a systematic analysis of Rowling's work, revealing special meanings and motivations that many might not realize. Nel said he hopes people notice how wellwritten the Potter books are.

"This is a guided tour through the books," he said. "I want people to notice how interesting and deep these books really are.

"People often think that children's books can't be as sophisticated and deep as adult fiction, but this is strong work."

#### **Harry Potter Facts**

Joanne Rowling was asked to go by J.K. Rowling by Bloomsbury Publishing because they were afraid boys wouldn't want the book if they knew it was written by a female

■ Hogwarts Headmaster Albus Dumbledore's name has a deeper meaning. Albus means wisdom or white, while Dumbledore is an archaic English word for bumblebee.

■ The turquoise Ford Anglia that saves Harry and Ron in "Harry Potter and the Chamber of Secrets" was based on the car that belonged to Sean Harris.

Southern Education Council, said it would definitely hurt their business. However, she said she felt that the costs of the lists would not be a factor.

"It wouldn't hurt us that bad since we're one of the biggest companies,' McKinney said.

McKinney said she understood why consumers would put their names on the list, but people should realize that telemarketing is their business and calls are part of it.

Catherine Wisian, sophomore in landscape architecture, also was in favor of the bill.

"I'm from Texas where they have already passed the bill so I would definitely be in favor of it," Wisian said.

The Senate now will face the difficult task of deciding whether Lewis will receive anymore telemarketing messages on her machine.

SALARIES Continued from page 1

the bill passes in the Senate, Seymour said Manhattan definitely would benefit from giving hiring and retention bonuses.

"We have had, from time to time, a position where there is a shortage of applicants. We want more applicants," he said. "When we have three math positions open and four applicants for those positions, that doesn't give us much choice."

He said a signing bonus would offset the costs teachers would endure when moving to the Manhattan area. He said more applicants would give the board the opportunity to hire better teachers.

"There are two math positions open in the high school. I am concerned with the quality of applicants. Also, if at some point our district begins to grow again, elementary schools would be discussed again," he said.

Board Member Roger Brannan said the bill is an interesting concept, but he wonders how it would be implemented.

"Teachers overall are underpaid, but I want a sense of fairness," he said

"I would be apprehensive about giving a new teacher a hiring bonus and not give bonuses to other teachers for doing a good job.

Brannan said he definitely sees a need for the bill to hire teachers for math, science and band, and he said it will be interesting to see how the bill progresses through the Senate.

#### CONCERN

■ Continued from page 1

Zac Cook, presidential candidate, was curious if the vendor could provide specific numbers of students who voted for write-in candidates.

"How many people clicked on a write-in because it was there," Cook asked. "Those are the votes that would've gone to one of the legitimate candidates. Voters never would've picked Tom Osborne to write in, they just saw him on there and voted for him."

Matt Wolters, presidential candidate, said he was extremely disappointed in iballot.com, but he wasn't overly concerned about the legitimacy of the election.

"No one's right or ability to vote was inhibited," Wolters said. "It may have taken more time to pick them out from all of the write-ins, but none of our supporters were unable to vote for us."

Kyle Barker, student body president and elections committee member, agreed with Wolters. He said he strongly believed that none of the candidate pairs lost voters because of the error.

Jon Krasnoff, vice-presidential candidate, was concerned about the legitimacy of the election.

'It's disheartening to see the other names on the ballot - to see most of the Collegian ed board on there," Krasnoff said. "I just don't see how that doesn't affect the legitimacy of the election.'

Chris Greene, presidential candidate, said he agreed with Krasnoff.

"When I first got on to vote and look at the ballot, it was like a joke," Greene said. "I think a lot of other

people thought the same thing."

Ali Karimi, presidential candidate, pushed to postpone the election so candidates had time to tell students to vote for whom they

Luke Miller, presidential candi-

date, said he agreed with Karimi. "People took the time to get on and vote, and when they saw that, it was a free-for-all. I think we should get that time that was wasted back," Miller said.

Conrad said each pair had the right to contest the results of the election with in two days of the

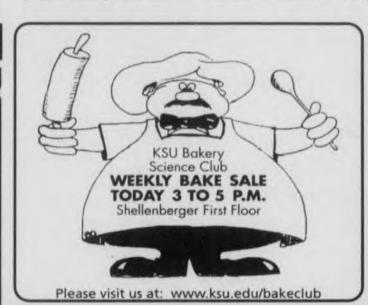

"If you feel strongly enough that your votes have been affected by this, go through the process of filing a complaint, and we will schedule a hearing. That's all we can do," Conrad said.

Candidate pair Michael Day and Tyson Steffen were not present.

## KANSAS STATE COLLEGIAN

Feb. 28, 2002 Kansas State University Manhattan, Km. Volume 106, Number 105 www.kstatecollegian.com

opens tonight

## WOLTERS, COOK MOVE ON

BY SARAH RICE

Kansas State Collegian

The presidential ticket choices have gone from seven to two.

After capturing the highest vote totals for the primary elections, Matt Wolters and Mandy Achilles will face Zac Cook and Todd Kohman in the general election March 5 and

Wolters, who received 37.5 percent of the votes cast, said he and Achilles were excited when the totals were announced.

"It's relief," he said. "We were expecting it was going to be close."

Zac Cook, who received 30 percent of the vote total, said he hoped people voted for him and Kohman because of their views on

"I am excited to be in the general

election," he said.

"I hope that means people believe in what we believe in."

Ted Conrad, elections committee chair, said he was happy with the turnout. Using spring enrollment figures, 13.9 percent of the main campus voted and K-State Salina voter turnout reached 20 percent.

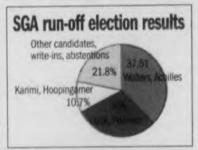

"The election, all things considered, went really well," Conrad said.

He said of the 2,698 votes from the main campus and 188 from K-State-Salina, write-in votes did not change the outcome of the

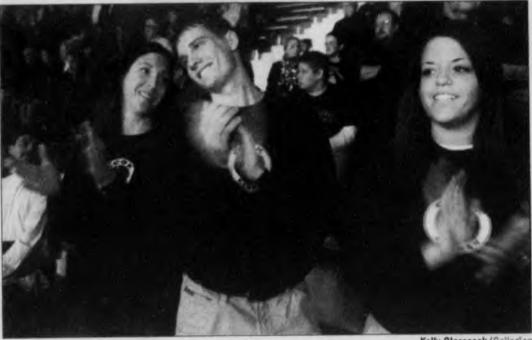

'It was reassuring to see the write-in votes didn't affect the end result of the election," Conrad said.

Cook, although receiving 810 votes, 202 less

## Candidates receive highest vote count, celebrate with supporters

BY SARAH BAHARI Hameau State Collegian

The name Matt Wolters hadn't even left the election chairman's mouth, and vice presidential candidate Mandy Achilles was on her feet clapping.

"I was just thinking, 'Yes,'" she laughed.

Wolters soon followed his running mate's lead. The two high-fived and hugged. More than 30 supporters joined them at Beta Sigma Psi fraternity house.

Wolters and Achilles were the highest vote-getters Wednesday with 1,012 votes, 37.5 percent. However, the candidates said there still was work to be done.

"It's by no means over," Wolters said. "If you look at these totals, it's going to be a close race."

"We'll work even harder now," she said.

The candidates and their supporters said they planned to hit the pavement campaigning as soon as possible. After the announcement, they left to chalk the sidewalks. They said they would

continue talking to student groups. Wolters said their realistic platform provided them with a spot in next week's

general election. He and Achilles also have made a point to talk with as many students as possible, he said.

'We believe in what we're doing, and we've got some

chair read the results of the primary election SGA for student body president and vice president **ELECTIONS** on KSDB-FM 91.9.

General elections will be March 5 and 6.

BY EDIE HALL

Kansas State Collegian

Cook, however could not hear that he and his running mate Todd Kohman received 810 votes and will be on next week's general election ballot.

Presidential candidate Zac Cook watched from across

Bramlage Coliseum as the elections committee

"The rest of the world is hearing who won - and I'm

not," Cook said. When Cook did hear that his ticket received 30.02 percent of the total vote, he smiled and nodded. As the news set in. Cook and his supporters stood and cheered.

Kohman received the news at Gilligan's. Cook said the two decided to hear the results in different places so they could be with more of their supporters.

Cook and Kohman came in 202 votes behind candidates Matt Wolters and Mandy Achilles.

Cook said their ticket made it to the general election because of the support they had.

"We have people who believe in us and believe in what we are about," Cook said.

Kohman said their supporters knew the issues on the pair's platform were real issues and not ear candy.

See COOK on PAGE 5

## Elections committee assures ballot legitimacy

BY EDIE HALL

Kansas State Collegism

Iballot.com representatives assured the elections committee that no students voted for write-in candidates that wrongfully appeared on Tuesday's primary election ballot, said Ted Conrad, committee chair.

"The voting during the time when the error was in place was not affected," Conrad said.

Although this eliminated the concern many candidates had about students voting for illegitimate write-in candidates, some said they felt there were other problems with the

"My only concern is that students won't see SGA in a good light," Chris Greene, presidential candidate, said. "I am concerned that the election didn't look legitimate."

Jon Krasnoff, vice presidential candidate,

said he felt the election should be thrown out due to a violation of the proceedings laid out in the elections regulations code.

He said he interpreted the code to say that write-in candidates could not be displayed on

"How can a SGA election be official and correct if it didn't follow the proceedings?" Krasnoff asked.

Michael Day, presidential candidate, said

he was not concerned about the write-in names appearing on the ballot. He said students were intelligent enough to vote for the candidate they wanted to support, despite the extra names.

Zac Cook, presidential candidate, said he was relieved that students took it upon themselves to vote responsibly, despite the appearance of the ballot.

Matt Wolters, presidential candidate, said

he felt the concerns that candidates had

should be alleviated by the news.

"That information proves there were no votes lost for any candidate," Wolters said. "I think the election should be fine. We are going to proceed as normal."

Candidates for student body president and vice president voiced other concerns about

See VOTES on PAGE 5

## Riley County unemployment rate increases, less than state average

Kanson State Collegian

A half-percentage point increase in Riley County's January unemployment rate bodes well when compared with the rest of the state.

The Kansas Department of Resources reported Wednesday the state's average jobless rate was 4.9 percent in January, which was up from 4.1 percent in

Bill Layes, chief of labor market information for the department, said Riley's unemployment rate was 3 percent in December 2001 and increased to 3.5 percent this January.

Layes said Riley County's lower unemployment rate is due in part to its student population, which acts as a stabilizing force in the job market. The county also is free of major layoffs in particular industries, he said.

Increased unemployment in the state was blamed on job losses in retail trade, aircraft and telecommunications industries, government and construction.

Layes said he expects the unemployment rate to decrease in the coming months, especially in retail and construction markets. He said these two areas were affected most by seasonal condi-

"I think we have reached the high rates of this year," he said.

About 70,000 Kansans were seeking jobs in January. The department also reported the number of people receiving unemployment benefits has increased to 40,000, up from 28,000 in December. Layes said the state issued \$240

million in unemployment benefits in 2001. The previous year, he said, the state allotted about \$205 million.

The counties hit hardest included Doniphan and Wyandotte, which recorded the highest unemployment rates in January - 14.8 percent and 12.6 percent respectively. Riley, Shawnee and Douglas counties' unemployment rates were all lower than the state's average.

On a national scale, Kansas' unemployment is more than half a percent point lower than the country's

## Salina student dies

Kanson State Collegian

The year 2001 has been called one of the deadliest years in K-State history, but K-State-Salina's assistant dean said this year isn't looking any better.

Nicole Johns, sophomore in geographic information systems, and Mason McHenry, a former K-State student in general agriculture, died Saturday on Kansas Highway 24 when a truck crossed over the centerline and hit Johns' vehicle head-on two and a half miles east of Glasco, Kan., about 50 miles north of Salina.

This is the second death at K-State-Salina this academic school year," Matt Melvin, assistant dean, said.

"It's always hard when something like this happens, especially when it's a younger person.'

Chris Batchman, a close friend and coworker, said he is going to miss Johns.

"She was always in a really good mood," he said. "She was positive about getting her work done, and she was always friendly toward all people.

Batchman said a lot of Johns' friends went to the service Wednesday to pay their "They played a video memorial with

pictures from throughout her life," he said. "It was very emotional. I'm really going to miss working with her, having fun and hanging out." Melvin said there probably would not

be a memorial on campus for Johns. Students who wanted to go to a service were bussed to the funeral, which was in Minneapolis, Kan., just 15 minutes away from Salina.

He said a lot of students went to the service. Seats in the church were full, with people overflowing out into the hallway.

The video memorial really pulled at the heart. It was very emotional," he said.

#### STATE IN BRIEF

#### Kansas Senate approves bill to increase educational aid

TOPEKA - Senators gave tentative approval Wednesday to an increase in education spending despite concerns that the state will not have the money to pay for it.

The proposal advanced on a voice vote: It must be approved on final action to go to the House.

The bill increases aid to public schools by \$20 per pupil to \$3,890 per year. The increase would cost the state \$12 million.

The proposal was introduced by Gov. Bill Graves in his State of the State address - and tied to his proposal to increase taxes \$228 million.

#### House, Senate advance bills on common law marriage

TOPEKA - Cammon law marriages among minors would be banned under a bill the House approved Wednesday, while the Senate passed a measure to abolish such arrangements altogether.

In the House, the vote was 120-1, with the only "no" vote coming from Rep. Raiph Tanner, R-Baldwin City, who said he supports the Senate bill. Senators approved their bill, 31-9.

The House bill went to the Senate. The senators' plan was sent to House members. Both chambers had debated their respective measures Tuesday and given them first-round approval on voice

Since 1913, Kansas courts have declared the common law age of consent for marriage is 14 for boys and 12 for girls, and that they do not need the permission of their parents or guardians.

#### Senate panel endorses bill to create 'Choose Life' plate

The abortion debate could go on the road in Kansas soon. A Senate panel has endorsed a bill creating a "Choose Life" license plate.

The Transportation Committee's voice vote Tuesday came after members amended the bill to include a proposal for a special plate providing funds for the Autism Society. The measure went to the Senate for debate.

Kansans who want specialized plates pay \$40 to the state. The bill would permit the Autism Society and Kansans for Life to charge additional fees.

The plate for Kansans for Life, the state's largest anti-abortion group, would contain the phrase "Choose Life." The group could charge between \$25 and \$100 to raise money for a trust fund to promote adoption.

#### Muslim attackers set fire to train killing at least 57

GODHRA, India - Muslim attackers armed with stones and kerosene descended on a train carrying hundreds of Hindu nationalists on Wednesday, setting fire to four cars and killing 57 people.

Fourteen of the dead were children and 43 other people were injured. many critically, when a mob attacked the train as it pulled out of Godhra shortly after 6:30 a.m.

Indian officials immediately stepped up security across this vast, religiously divided nation. The prime minister urged Hindus not to retaliate.

#### Analysts who recommended Enron stock defend actions

WASHINGTON, D.C. - Wall Street analysts who recommended Enron stock as the company slid toward bankruptcy

testified Wednesday they were not influenced by their own firms' investments and had seen no signs of serious trouble

It was the first time financial analysts, whose advice is heeded by investors nationwide and whose firms give millions in campaign donations to lawmakers, were called to account for their role in the Enron debacle.

#### Officials offer \$5 million for information on Pearl murder

WASHINGTON, D.C. - U.S. officials on Wednesday announced a \$5 million reward for information in the kidnapping and murder of Wall Street Journal reporter Daniel Pearl.

"We were outraged by the senseless murder of Daniel Pearl," said State Department spokesman Richard Boucher. "We've condemned it in the strongest terms.

Boucher said the reward would be advertised across Pakistan.

The offer of up to \$5 million is for information leading to the arrest or conviction of people responsible for Pearl's murder, Boucher said.

#### Psychiatrist says she warned Yates about having children

HOUSTON - A psychiatrist who treated Andrea Yates years before she was charged with drowning her children said she warned her patient against having any more babies because it might cause her to become psychotic

Dr. Eileen Starbranch, who began testifying Tuesday for the defense in Yates' capital murder trial, retook the stand Wednesday to say she never spoke with the doctor who treated Yates just before the drownings.

On Tuesday, Starbranch said she remembered Yates being "warm and loving" with her four sons when she was in Starbranch's care for about five months following two suicide attempts in 1999. But she warned Russell and Andrea Yates against having more children to avoid future psychosis.

Amy Harris, graduate student in kinesiology, teaches two sections of aerobic, dance and exercise. Harris said that after graduation she would like to be a personal trainer and continue to teach exercise classes. Matt Stamey/Collegian

### Texas graduate comes to K-State to pursue master's

BY ANGIE JOHNSON

he's an Aggie at heart, but nothing competes with her love for fitness and exercise. Amy Harris, graduate

teaching assistant in kinesiology, graduated from Texas A&M University last year and then moved to Manhattan to pursue a master's degreç in kinesiology with an emphasis in exercise physiology.

"I will always be an Aggie at heart because of the time I spent there, but K-State has opened my eyes to several benefits like actually getting to know your professors," Harris said.

During her undergraduate work at A&M, she received a teaching certificate and bachelor's degree in lifestyle and fishery science. Harris said she wanted to graduate in kinesiology but ran out of

"It's the only thing I would like to change, but at the time, it was too late if I wanted to get married," she said.

Harris teaches two sections of aerobic, dance and exercise classes. In each 40-minute class, she teaches a wide range of students, most of which are not kinesiology majors.

"I enjoy teaching them new things about making exercise a lifestyle and habit," she said. "Many of the students don't know anything about it." Some of the various exercises that

Harris focuses on include step, weights, aerobics and yoga. She often lectures on fitness and health. "Working out, especially with other

people, is something I have always loved," she said.

After earning her degree, Harris hopes to work in a clinical setting and practice exercise testing and prescription, she said. She also would like to be a personal trainer and continue teaching exercise.

"Anything about how the body works and changes through exercise is extremely fascinating to me," Harris said.

#### ON RECORD

#### **CAMPUS** BULLETINS

Campus Calendar is the Collegian's campus bulletin board service. Items in the calendar can Items might not appear because of space constraints but are guaranteed to appear on the day of the activity. To place an item in the Campus Calendar, stop by Kedzie 116 and fill out a form or v-mail the news editor at bulletins@spub.ksu.edu by 11 a.m. two days before it is to run.

"Core strength and training what it is, how to do it" will be presented at noon March 10 at Recreational

Applications for the 2002 Student Homecoming Committee are now

available in the Office of Student Activities and Services, ground floor of the Student Union or at the KSU Alumni Association, 2323 Anderson Ave., Fourth Floor, Applications are due by March, 8. All students are welcomed to apply.

## Candidates disappointed with primary election outcome

Day, Steffen upset with low voter turnout, blame complex election ballot

BYTARA PATTY

Kursans State Callegian

Presidential Candidate Michael Day and his running mate Tyson Steffen said they are disappointed about losing Wednesday's primary election, but they are even more disappointed with the low voter turnout.

Day and Steffen received 77 votes, garnering 2.85 percent of the 2,698 voters.

'Ted Conrad, the elections chair, said he was expecting around a 20 percent voter turnout, and there were only, it looks like, about 10 percent," Day said.

Day said he attributes the low numbers in the polls to the complexity of iballot.com, this year's online voting vendor. Being assigned a user name and password took voters more time, he said.

"Not a lot of people I talked to even knew where to vote," Steffen said.

While blaming a lack of voters on the online vendor, Day said he does not believe Tuesday's problem had any affect on the election outcome.

"They assured us no one voted for those write-ins," Day said.

The primary gained more voter attention than runoffs did in the past Day said, and it will be nice to have all of the winners announced after the general election, he said.

Day said he feels his campaign

STEFFEN

would have been strengthened if he had made name recognition more of a priority and used posters and flyers.

"A couple of things came up, and we couldn't make it to some of the debates," he said.

Day said people were just more impressed with other candidates.

"They had their names out more than we did," he said.

However, Day said he does not regret his participation in the election and said if he had it to do again, the experience would be well worth it.

"Not a lot of people get to do this," he said.

The next step for Day and Steffen is to support the candidates, Student Senate, and ultimately support the Student Governing Association, he said. Day and Steffen are supporting the Cook/Kohman ticket.

"Just know that you can approach the president and know that they're just students," Day said.

He said he still wants people to know they can talk to whomever wins about their opinions. Hopefully, he said, they can get things changed.

Steffen said he wishes the two candidates good luck and hopes for a better voter turnout in the general election next week.

Gard, Krasnoff blame election process, plan to dispute primary results

BY AMBER KOEHN Kansas State Collegias

Al Gard and Jon Krasnoff said they plan to file a complaint disputing Wednesday evening's primary election results. The ticket received 82 votes, 3.04 percent of the total vote.

"It's a travesty that such a thing happened to K-State students," Gard said. "This undermines the whole political process, and it makes students more hesitant to participate when things like this happen."

Gard and Krasnoff found out they lost the election Wednesday evening at Gilligan's in Aggieville.

"The hardest part about losing is driving home at the end of the night," Gard said.

Krasnoff said he didn't expect to win the primary election because the election committee handled the situation poorly.

The election was totally screwed up." Krasnoff said. "The reliability and credibility of the results is very questionable. The election committee could have taken initiative to better the situation, but it didn't.

Krasnoff said he holds the election committee fully responsible for the voting mishap and said he and Gard will contest the results.

"We want it looked into,"

Krasnoff said. "We want the students to know exactly what happened."

Gard said he isn't upset about losing because he knows students thought his platform wasn't important enough.

"It's all about timing," said Gard. "If candidates run under our platform in five to 10 years they will do better because I think our issues will be more pressing then."

Gard and Krasnoff said they will support presidential candidate Zac Cook and his running mate Todd Kohman in the upcoming general election March 5 and 6.

"I am supporting Cook and Kohman because the issues they're addressing are original," Gard said. "I want to see change, and I think they are better suited for the job."

Krasnoff said Cook and Kohman are the only other candidates besides themselves who are against a parking garage, and said he thought Cook and Kohman's support of multicultural programs was a good idea.

"I think the multicultural and study-abroad platforms are awesome ideas, and they're more important than the other candidates' issues," Krasnoff said.

Greene, Woodyard anticipated loss, use year as learning process

BY MICHAEL WATSON

Kansas State Callegian

Chris Greene and Greg Woodyard looked at each other in silence as the primary election results were announced. While the pair hoped to proceed to the general election, their names were not in the top two tickets.

Woodyard, sophomore in accounting, said he didn't expect to make it to the primary. This year was a learning experience.

"We didn't spend as much money as the two going to the general election." he said. "We also could have spoken to more fraternities and sororities. If we run again next year, we know what to expect."

Greene, junior in pre-law and business management, said he was not disappointed with getting only 93 votes, 3.45 percent of total votes. He said he was just happy with running.

"We didn't expect a whole lot," Greene said. "We didn't know what to expect going in, but we did the best we could with our campaign."

Greene and Woodyard said they started their campaign, "Caring About The Students," with the idea that they could make quality improvements at a low cost.

The duo said they planned to implement a grading scale that would benefit the students by

"There are groups we haven't

better reflecting grades earned in the classroom, expanding the shuttle system and working with administration to get more time for students to relax during dead

"I hope the other two pairs of candidates heard us and what we were trying to do. I won't be upset if they use our ideas," Woodyard

Now that they no longer are in the race, Greene said he doesn't plan on backing any of the other candidates. He said he was going to back Ali Karimi and Eric Hoopingarner if they made it.

Greene said the problems with the write-ins on the ballot Tuesday did not play a factor in the outcome.

There's nothing to complain about," he said. "Nothing would have changed."

Kyle Kuhlman, freshman in computer engineering, said he

believed in their issues and expected them to do better. "This might have been their

year to get their name out," he said. "It got them experience in SGA, and they learned what students want. I hope they run again next year."

#### WOLTERS

Continued from page 1

great ideas," he said.

The pair's platform includes a tuition advisory committee to ensure that students have a say in how additional tuition dollars are spent: Wildcat March, a new tradition where fans would walk from the Old Stadium to Aggieville on Fridays before home football games; and Wildcat Connection, a service connecting students to K-State alumni.

Wolters said it touched on several

parts of the college experience. including academies, student life and

"Mandy and I realized that every student at K-State benefits from a different piece of the university," he

Achilles said she and Wolters represent K-State well.

Wolters is an agricultural education major, a member of Beta Sigma Psi fraternity and will be a lifth-year senior. Achilles is a sophomore in public relations and advertising and a

different groups, organizations.

Wolters said the problem with the write-ins included on the ballot didn't affect the outcome of the election. No one's vote was inhibited at any time. he said.

Wolters and Achilles said they both voted by 8:30 a.m. Tuesday.

Before the results were announced, Wolters and Achilles tried to remain calm. Achilles tapped her foot. Wolters walked around, sitting occasionally.

"Anxious and excited," Achilles said of her mood.

After learning of the results, Wolters made a sigh of relief.

'I'm just excited and ready to move on," he said.

#### ELECTION

Continued from page 1

than Wolters, said he will continue the same gameplan of talking to as many students as possible.

"I hope there will be more people," he said. "We are going to be making sure that everyone is aware of the issues, and they vote for the candidate they agree with.'

Wolters, who received 1,012 votes, said his election strategy also is the same as it was for

10 tans 322

tanning for a limited time only

\$30 I month unlimited

the primary.

been able to visit yet," he said. "We are going to talk to as many people as we can. Our strategy was to come up with what we thought were good ideas and go out and tell students those ideas.

K-State Salina also had a primary election to narrow down their tickets from three to two. The presidential ticket of Kevin Gorman and Nick Sulzen received 51 percent of the 188votes cast, while Lynsey Burnett and Betty Pina received 34.6

### Reallocating KATS fee will lower cost for online enrollment

OUR VOICE

and debated by the editorial board and written after a majority opinion is formed. OUR VOICE is the Collegian's official

**April Middleton Nancy Foster** Dana Strongin Alyson Raletz Nancy Hull Matt Killingsworth Dan Smith Paul Restivo Katle Lane JJ Duncan Zach Long **Nicole Donnert** 

Micah Hawkinson

When you enroll for spring and summer classes in April, you will notice a change: the \$4 KATS fee will be dropped.

It was time for the fee to be dropped. Although \$4 might not seem like much money, it adds up each semester. The charge has been on students' tuition bills but no longer is the best way to pay for the costs of KATS.

The money was used to help pay for the original cost of the software and for maintenance of the program. The

balance is still not met, but the costs will now be met through tuition costs, said John Streeter, director of the Information Systems Office.

Charging all students for KATS is the best way to share the easy access of the system. It lowers the cost of online enrollment because an additional 10 percent of students will contribute.

Keeping fees and charges low is

is talking about tuition increases. During this time, it's good to hear that someone wants to share a little good news.

Reallocating the fee was a good move. The university could have kept charging it, and not too many students would have complained.

But the students who were unable to pay the fee did not have access to the online enroll system.

K-State's students will benefit from this new charging system.

## important right now. The economy is leaving wallets empty, yet the university

## DAILY DOSE Soaps good for emotional cleansing, personal growth

here's something mystical about the collegiate atmosphere. It seems the more you are exposed to it, the greater the feeling you might self-destruct at

However, you don't have to wait for "Dr. Phil Day" on Oprah to start re-examining your life. Just turn on the television a few hours early.

There's no need to surf cable for accessible insight. It abounds on network television. For the more observant viewer, soap operas give a

Susan Powell

daily dose of personal growth. There are funda-

mental life lessons explored on each soap opera: 1. Always think before you speak

When asked an uncomfortable or inappropriate question, think long and hard (and make an ominous facial expression or two) before answering. It is likely that someone or something will fatefully

interrupt the dialogue before you have to reply. 2. Be wary of asides. Whenever tempted to express your hidden desires in a soliloquy, chances are a snoop is around the corner, taking notes.

3. Be cautious when plotting. Your scheme ultimately will fail, you'll be exposed, and punished severely (unless, of course, you are

4. If Project Wellness hasn't convinced you yet, drink in moderation. Drunken stupors can cause you to marry your fiance's father and consummate the nuptials on a remote tropical isle. Your potential pregnancy is not up to the writers, just your own fertility.

5. Appreciate time spent with your family. In what seems just a season, little Billy can go from age 6 to 16. Welcome long-lost family members with open arms, but be wary of twins. They tend to be evil.

Besides these meditations on human behavior, soaps can be very therapeutic. Take a moment to assess the conflicts in your life. You probably aren't dating your child's ex-spouse. It's unlikely you have been or ever will be possessed by Satan. And if forced to, you probably could act your way out of a paper

Your own drama seems tame compared to the trials suffered by daytime's heroines. The sheer comparison of the stress of having an

essay (or article) due versus your son being trapped in a well helps keep things in perspective.

If your daily drama can contend with the rather creative storylines of daytime television, I suggest contemplating a change in your major. You could get stellar grades just by chronicling your life.

Besides, the English department could use a few

And just think, with a little perseverance, imagination and a move to New York City, you could contribute to the daily therapy that is the soap opera.

Susan is a junior in English. You can e-mail her at sjp8478@ksu.edu.

## Video games cause addictions, distort reality

am slowly becoming an addict. That's right, ladies and

gentlemen. My life is being consumed by an obsession - a

dependence on a drug that draws me from reality and hurls me into a contorted world of delusions and euphoria.

Tanner Ehmke The drug: "Unreal Tournament," a video game where I try to kill as many people as possible while trying to accomplish life-threatening missions in outer space. It's a virtual-reality galactic bloodbath that exists only on my computer and in my mind, and I love it.

I am spending more and more time in a world that doesn't exist rather than doing the things I used to do, like studying, reading Kurt Vonnegut or playing my

Ironically, I am doing what I criticized so many others for.

My roommate, known as Pinky, and I once went on an "Unreal Tournament" binge for more than a couple hours. The slaughter did not stop until the death toll

The carnage in an average game usually does not exceed 30 or 40 wasted souls.

All the while, I have my master's thesis to complete, which has a slightly greater effect on my future than blasting some guy's head off with a rocket launcher.

Still, I could not pull myself away. Thus, the video game took the form of a drug,

and I know I am not alone.

view

Last semester in the Collegian, I saw an announcement for a tournament to play the James Bond

video game, "GoldenEye 007." What do they compete for? A scholarship? A trophy? A

lifetime supply of Cheetos? This is video game depen-

dency gone mad. Not only do the players of this tournament deny their craving, but now they are trying to find purpose in

playing video games. And I thought I had it bad. Here's one more thing that cracks me

up - I've heard rumors among addicts in denial that some professional athletes use video games to work on their eyehand coordina-

This has got to be a joke. Video games actually improve motor

It's hard for me to imagine a guy like Barry Bonds saying in an interview, "I owe it all to Nintendo. Thanks, Mario and Luigi. You helped raise my batting average. Gee, you're

If this myth were true, my

roommates would be Bruce Lee and Jackie Chan by now.

We must come to terms with reality. Video games are the choice drug for our generation. The consequences of video games are like being addicted to a hallucinogenic drug or alcohol.

Productivity plummets. Have you ever skipped class or failed to do homework because the future of the human race lay in balance until you advanced to the next level of the game?

Saving the world from a cataclysmic fate is pretty important, but maybe you

4:10AM

could save your game and finish it later. Better yet, quit playing it all

together. Social and physical activity also is compromised. You become overweight and introverted.

Pat Kendall, a food science specialist at Colorado State University, said one out of eight young

people is obese twice the rate it was 20 years ago. One in four is overweight. Is this coincidence? I would bet my roommates' lives that the rise in obesity parallels the rise in

video game usage in young Americans. Even worse, nothing is gained or

learned. Video games distance you from friends and family, and time and money are wasted for momentary thrills that have no long-term rewards.

That's a great way to live: do nothing. Get fat and stupid. Yippee.

My parents had it figured out. They never allowed my brothers and me to have a Nintendo when we were younger. We still survived.

So, I have decided to employ a strategy to deter my own game usage - the infallible "sticker system" pioneered by my mother. Every time I was good, completed a task, or met a goal, my mom gave me a Snoopy sticker.

Similarly, every day I go without playing "Unreal Tournament," I get a reward. Considering I have aged some since the days of the sticker system, modifications are in order.

Rather than getting a sticker, my roommates should each buy me a beer. I like that idea.

Or, here's a better idea: I delete "Unreal Tournament" from my hard drive.

Man, that's a painful thought. But a grad student's got to do what a grad student's

I think I need a Snoopy sticker.

#### **Black history education** limited to popular figures

I don't think the conscience of young America understand the reason why black American history is so important today.

I was upset about Jared Wiesner's column Feb. 19 because he didn't mention what sites to visit to obtain information about black Americans contributions and achievements.

We as parents, students, educators and future leaders need to demand that history be rewritten to include the correct details about American history.

When you ask school children today about famous black Americans, you get the same answer. Martin Luther King Jr., Malcolm X, Harriet Tubman, or Jesse Jackson to name a few.

There are many black Americans who contributed to this nation, such as Garrett Morgan, the founder of the traffic light, the protective mask and other inventions.

Curt Flood was the father of free agency in sports, the first person to protest baseball's reserve clause about the free agency rule, and made it possible for sports athletes to get paid high salaries.

Dr. Charles Drew established the blood bank. Dr. Daniel Hale Williams performed the first open heart surgery.

Benjamin Banneker assisted in the design and city planning of Washington, D.C.

Prince Hall was an activist, abolitionist and founder of the Black Masonic Organization, which has more than 5,500 lodges and more than 500,000 members worldwide. Also, this Masonic Organization's rituals and traditions helped establish the Black Greek Organization.

The Black American soldier has served this country bravely and gallantly.

The ninth and 10th Colored Calvary Regiments along with the 24th and 25th Colored Infantry Regiments were assigned to protect the settlers and enforce the law in the western frontier.

The Indians called the colored soldiers 'buffalo soldiers' because of skin dark like a buffalo, hair curly and woolly like a buffalo. The soldiers accepted this name, and it spread throughout the west.

## Pairs disgruntled with election results

Miller, LaFaver endorse candidates, disappointed with election process

BY JAMIE BARRETT Kansas State Collegion

Wearing T-shirts endorsing Zac Cook and Todd Kohman for student body president and vice president, Luke Miller, presidential candidate, and Jeremy LaFaver, vice-presidential candidate, said they were disappointed with the election as a whole.

"We gave it our best shot," Miller said. "I can't say I am not disappointed, though."

Miller and LaFaver came in fourth in the primary election with 196 votes Wednesday night. The presidential tickets of Matt Wolters and Mandy Achilles, and Zac Cook and Todd Kohman will proceed to the general election March 5 and 6. Miller and LaFaver said they have no problems with endorsing the candidate they feel will do a good

"I think Zac and Todd have the best ideas," Miller said. "They did what it took to get the No. 2 spot. and we fully support their campaign next week."

LaFaver said he felt the only way to compete with some of the candidates was to spend more money than they felt comfortable

"If there was anything I would have changed if we wanted to get the No. 1 spot, we should have bought more buttons and T-shirts," he said. "Apparently, that is what gets more votes."

LaFaver said he also was disappointed with the way the election was handled. With the online

system used to vote, many of the write-in candidates were being put on the actual ballot. LaFaver said the mistake made the election seem like a joke.

"I don't think that it affected votes," he said, "but I think that it undermined the student government. The elections committee hid behind their 'oops' defense. They need to take responsibility for their actions. It was disappointing to me to see that so many candidates put in their time and effort and heart and feelings into K-State and then they could not do that for us."

Miller said he felt good about the way they handled their campaign, but felt as though the actual issues were brushed aside in many cases.

"Our strategy was to do the most effective thing for our dollar,'

"I guess that just tells me that maybe issues aren't really important, and it is the amount of money you spend and the amount of exposure you get.

LaFaver said he does not see himself running for a student government position again in the future, but Miller said he might consider running again.

For now, Miller and LaFaver said they are going to fully support the Cook/Kohman campaign.

"We are going to support them 110 percent," LaFaver said.

Karimi, Hoopingarner blame spending limits, call elections corrupt

BY MICHAEL LAWRENCE Kansas State Collegian

Ali Karimi, former student body presidential candidate. slammed his fist on a table in disgust at Gilligan's on Wednesday evening when he discovered his campaign, with vice presidential candidate Eric Hoopingarner, had been a loss.

The ticket came in third place with 288 votes. They won the support of 10.67 percent of voters.

"Third place is a really hard

pill to swallow," Karimi said. Karimi said the election results are a disappointment because students voted for the candidates who have utilized the most campaign money.

"Once again," he said, "the top two people who spent the most money get the election."

Karimi said campaign spending should not affect the outcome of an election. He said students should vote solely on the issues at hand.

"I believe ideas should sell themselves," he said.

Karimi said campaign spending is not the only reason

He said they won also because they are popular.

"We're doing a popularity contest," Karimi said, "and it's sick and disgusting.

Karimi said he is disappointed by the loss because his campaign platform might not come through.

HOOPINGARNER

"I want to see those things get

done," he said.

However, Karimi said if Cook and Kohman are elected, there might be hope for the survival of

"We believe they will let us do some of what we wanted," he Hoopingarner said the best

ticket for the presidential election is definitely Cook and Kohman.

"I'd like to urge all our voters to vote for Cook and Kohman," he said.

If elected, he said, this ticket

will get things done. He said he is disappointed that so many people voted for Wolters and Achilles.

"They're part of a machine." he said. "I'm disappointed that students didn't see through the

All in all, Karimi said, losing the presidential election wasn't something new.

"It's not the first time," he

Karimi said he is devastated by his loss, but he also is upset at the election committee.

He said they did not publicly release the ballot like they were required to.

"Elections people have been corrupt for over four years," he

ballot affected the results of the primary election. Cook praised the elections committee for proceeding as planned, despite arguments from many of the candidates.

felt they have a good chance of winning the general election. "I hope everyone realizes we are

Both Cook and Kohman said they

genuine," Cook said.

#### VOTES

■ Continued from page 1

this year's election at a meeting Wednesday night.

All of the candidates present said they were disappointed in the vendor used in the online voting process, iballot.com. Many candidates suggested that iballot.com refund money to K-State.

Candidates said they were not only upset with the write-in names appearing on the ballot, but also that the program allowed votes to be changed.

When voting online, students were given a user name and password. Each was comprised of eight randomly configured letters and numbers. Students were directed to write down these codes and proceed to either a voting booth, or a second browser window, where they would insert the codes identifying the voter as a K-State student.

Candidates said students left their user name and password codes written down on paper next to computers after they finished voting.

Luke Miller, presidential candidate, said he was relieved to hear the write-in names didn't affect the voting, but he did not believe all of the issues had been

"The whole thing with IDs being left around needs to be fixed," Miller said. "It allowed people the chance to change votes."

Conrad said the elections committee has not been able to talk to the vendor yet about recoding the software so votes cannot be changed.

"The best I can say is we'll check into that," he said. "That was something that they have in place for all of their elections. Obviously, we haven't been able to change votes in the past, so we'll talk to them about it."

Conrad said iballot.com was selected by the university and not by the elections committee. He said state guidelines mandate K-State to choose the most inexpensive vendor.

"It's unfortunate when you

take the decision-making ability out of the hands of the people who are most concerned with the outcome, but that's just the way it is," Conrad said.

The vendor, iballot.com, submitted the least expensive bid at \$9,000. Conrad said the next lowest bid cost an extra \$600.

Because the elections committee did not extend voting dates. Conrad told candidates who were worried about the legitimacy of the election that they had the right to contest the results within two days of the time they were announced.

This raised additional questions.

Cook asked how contesting the results would affect the general election set to take place next week.

Conrad said upon receiving a complaint, the elections committee would conduct a hearing to determine the validity of the complaint. At that point, they would report their decision to Student Senate who would make the final decision.
